Many of the calls to abandon the 1995 and 1996 elections were provoked by fear that the 'red-brown coalition' would gain power and reverse the reforms. Other appeals to cancel the elections came from wealthy businessmen who were afraid they would lose their often ill-gotten gains. In return for their financial support during the elections many were rewarded with official positions within the government or the

presidential bureaucracy. This interweaving of political and financial power is antithetical to democratic development. Similarly, corruption within the political elite and suspicion that there are connections between big business, political leaders and organized crime discredit government and increase the public's disillusion with the political process.

Rising crime and corruption interfere with democratic consolidation because they are used to justify undemocratic laws. But the absence of law and order also fuels an aspect of Russian political culture which is among the greatest threats to democracy. Many Russians admire strong leadership and believe that it is the only way to reimpose law and order. They combine this with the conviction that Russia has a unique route to democracy which goes via authoritarian rule. The danger, therefore, is not so much that democracy will fail of its own accord, but that Russians will deprive themselves of it in the mistaken belief that an authoritarian ruler will promote democracy when the time is right, rather than simply entrench his power.

There is, therefore, a long way to go before Russian democratic consolidation is secure and there are many challenges and pitfalls along the way. However, the imminent demise of Russian democracy has been regularly predicted since the attempted putsch of August 1991. Democracy may have become misshapen, but it has not yet fallen. There is room, therefore, for cautious optimism about Russia's democratic prospects, just as long as Russians continue to defend their democracy—using only democratic means.

KEY HISTORICAL EVENTS. At the end of the 17th century the Russian Empire embraced much of eastern Europe and northern and central Asia. The Empire was governed as an autocracy under the Romanovs who had ruled since 1613.

On 8 March 1917 a revolution broke out. The Duma parties, on 12 March, set up a Provisional Committee of the State

Duma, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies. Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry. On 15 March 1917 Tsar Nicholas II abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept., proclaimed a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist Revolutionaries—and the Bolsheviks who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin.

On 25 Jan. 1918 the third All-Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited People, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies; and on 10 July 1918 the fifth Congress adopted a constitution for the Russian Soviet Federal Socialist Republic (RSFSR). In the course of the following civil war other Soviet republics were set up in the Ukraine, Belorussia and Transcaucasia. These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union.

The Union of Soviet Socialist Republics (USSR) was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic; the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922. In Oct. 1924 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

From about 1929 Stalin's authority was supreme. Resistance to agricultural collectivization was ruthlessly suppressed. A series of Five-Year Plans (1928, 1933, 1937, 1946 and 1951) transformed the USSR into a powerful industrial state. Opposition in party and government was crushed by the purges of 1933 and 1936-38.

At the eighth Congress of the Soviets on 5 Dec. 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the RSFSR, were proclaimed constituent republics of the USSR.

In Sept. 1939 (under a secret clause of the 10-year non-aggression signed with Nazi Germany on 23 Aug. 1939) Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian

Soviet Socialist Republics. In Feb. 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged.

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic. On 16 July 1956 the Supreme Soviet of the USSR altered the status of the Karelo-Finnish Republic from that of a Union Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR.

On 2 Aug. 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq. km, ceded by Romania on 28 June 1940), except for the districts of Khotin, Akerman and Izmail, which together with Northern Bukovina (10,440 sq. km), were incorporated in the Ukrainian Soviet Socialist Republic. The Soviet-Romanian frontier thus constituted was confirmed by the peace treaty with Romania, signed on 10 Feb. 1947. On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq. km) was by treaty with Czechoslovakia incorporated into the Ukrainian Soviet Socialist Republic.

On 3, 5 and 6 Aug. 1940 Lithuania, Latvia and Estonia were incorporated in the Soviet Union as the 14th, 15th and 16th Union Republics respectively. The change in the status of the Karelo-Finnish Republic reduced the number of Union Republics to 15.

After the defeat of Nazi Germany it was agreed by the governments of the UK, the USA and the USSR that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovyetsk) and Insterburg (renamed Chernyakhovsk), was joined to the RSFSR by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb. 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct. 1920 and 12 March 1946, was returned to the Soviet Union. On 19 Sept. 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of its forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR. However, Japan has since asked for the return of the Etorofu and Kunashiri Islands as not belonging to the Kurile Islands proper. The Soviet government informed Japan on 27 Jan. 1960 that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of American troops from Japan.

Nikita Khrushchev, Secretary-General of the Party, criticized the regime of Stalin who died in 1953 at the Twentieth Party Congress in 1956. This encouraged a liberalizing of the Russian-backed communist regimes of Hungary and Poland, and later Czechoslovakia (1968) which the USSR crushed with its forces and those of the Warsaw Pact (established 1955). A policy of 'peaceful co-existence' with the West, especially after the war scare with the USA in 1962 over Cuban missiles, led to years of strained relations with China. After 1985, with Mikhail Gorbachev as Secretary-General of the Communist Party, a new period of *glasnost* (openness) and *perestroika* (reconstruction) was inaugurated. But desperate economic problems helped to accelerate liberalization and in 1991 the Soviet Union broke up into its constituent parts.

After the dissolution of the USSR in Dec. 1991, Russian became one of the founding members of the Commonwealth of Independent States. Boris Yeltsin was elected President in June 1991. A period of confrontation in 1992-93 between President Yeltsin and parliament culminated on 21 Sept. in a presidential decree on 'gradual constitutional reform' which suspended the operations of parliament, called new parliamentary elections for Dec. and assumed emergency executive powers. Parliament and the Constitutional Court rejected this action, and parliament proclaimed Vice-President Rutskoi acting president. The USA, the EC and other countries expressed support for President Yeltsin, as did Ukraine and Belarus. Many deputies refused to leave the parliament building and mounted an armed guard which was cordoned off by pro-Yeltsin forces. Public demonstrations and counter-demonstrations began

on 26 Sept. After a week in which deputies remained in the parliament building, some thousands of armed anti-Yeltsin demonstrators assembled on 3 Oct. and were urged to seize the Kremlin and television centre. Shots were fired and there were fatal casualties. On 4 Oct. troops took the parliament building by storm after a 10-hour assault in which 140 people died. Vice-President Rutskoi and Speaker Khasbulatov were stripped of their offices and arrested.

In Feb. 1994 parliament amnestied not only those arrested after the occupation of the parliament building in Sept.-Oct. 1993, but also the instigators of the failed *coup* against the Soviet government in Aug. 1991.

TERRITORY AND POPULATION. Russia is bounded in the north by various seas (Barents, Kara, Laptev, East Siberian) which join the Arctic Ocean, and in which is a fringe of islands, some of them large. In the east Russia is separated from the USA (Alaska) by the Bering Strait; the Kamchatka peninsula separates the coastal Bering and Okhotsk Seas. Sakhalin Island, north of Japan, is Russian territory. Russia is bounded in the south by North Korea, China, Mongolia, Kazakhstan, the Caspian Sea, Georgia, the Black Sea and Ukraine, and in the west by Belarus, Latvia, Estonia, the Baltic Sea and Finland. Kaliningrad (the former East Prussia) is an exclave on the Baltic Sea between Lithuania and Poland in the west. Russia's area is 17,075,400 sq. km. Its 1989 census population was 147,021,869 (53.3% female, 73.6% urban), of whom 81.5% were Russians, 3.8% Tatars, 3% Ukrainians, 1.2% Chuvash, 0.9% Bashkir, 0.8% Belorussians, and 0.7% Mordovians. Chechens, Germans, Udmurts, Mari, Kazakhs, Avars, Jews and Armenians all numbered 0.5m. or more. Population estimate, 1997, 147.501m. (female, 53%; urban, 73%). Age structure: 16-29 years, 34%; 30-44, 42%; 45+, 24%.

Vital statistics rates, 1996 (per 1,000 population): Birth, 8.9; death, 15.7; natural increase, -5.5; 1995: marriage, 7.3; divorce, 4.5; infant mortality, 18.1. There were 3.1m. induced abortions in 1994. There were 61.9 divorces per 100 marriages in 1995.

There were 915,000 immigrants in 1995, mainly from the former Soviet republics. In Jan. 1995 there were 702,451 refugees, mostly from Tajikistan, Georgia, Azerbaijan, Chechnya and Ingushetia.

CONSTITUTION AND GOVERNMENT. The Russian Soviet Federative Socialist Republic (RSFSR) adopted a constitution in April 1978. In June 1990, pending the promulgation of a new constitution, it adopted a declaration of republican sovereignty by 544 votes to 271. It became a founding member of the CIS in Dec. 1991, and adopted the name 'Russian Federation'. A law of Nov. 1991 extended citizenship to all who lived in Russia at the time of its adoption and to those in other Soviet republics who requested it.

There is a 19-member *Constitutional Court*, whose functions under the 1993 Constitution include making decisions on the constitutionality of federal laws, presidential and government decrees, and the constitutions and laws of the subjects of the Federation. It is governed by a Law on the Constitutional Court, adopted in July 1994. Judges are elected for non-renewable 12-year terms.

At a referendum on 25 April 1993 the electorate was 107.3m.; turn-out was 69.2m. 4 questions were put: Confidence in President Yeltsin (58.7% of votes cast); approval of economic reforms (53% of votes cast); early presidential elections (31.7% of the electorate); early parliamentary elections (43.1% of the electorate). This referendum had no constitutional effect, however.

Voting was held on 12 Dec. 1993 on the adoption of a new constitution and the election of a new parliament for a 2-year term. The electorate was 106,170,335; turn-out was 54.8%. The constitution was approved by 58.4% of votes cast, and came into effect on 24 Dec. 1993.

According to the 1993 Constitution the Russian Federation is a 'democratic federal legally-based state with a republican form of government'. The state is a secular one, and religious organizations are independent of state control. Individuals have freedom of movement within or across the boundaries of the Federation; there is freedom of assembly and association, and freedom to engage in any entrepreneurial activity not forbidden by law. All citizens have a right to housing, to free medical care, and to a free education. The state itself is based upon a separation of powers and upon federal principles, including a Constitutional Court. The most important matters of state are reserved for the federal government, including socio-economic policy, the budget, taxation, energy, foreign affairs and defence. Other matters, including the use of land and water, education and culture, health and social security, are for the joint management of the federal and local governments, which also have the right to legislate within their spheres of competence. A central role is accorded to the *President*, who defines the 'basic directions of domestic and foreign policy' and represents the state inter-nationally. The President is directly elected for a 4-year term, and for not more than 2 consecutive terms; he or she must be at least 35 years old, a Russian citizen, and a resident in Russia for at least the previous 10 years. 1m. signatures are needed to validate a presidential candidate, no more than 7% of which may come from any one region or republic. The President has the right to appoint the prime minister, and (on his nomination) to appoint and dismiss deputy prime ministers and ministers, and may dismiss the government as a whole. In the event of the death or incapacity of the President, the Prime Minister becomes head of state.

Boris Yeltsin became President for a 5-year term at the elections of 12 June 1991, gaining 57.3% of the votes cast against 5 opponents. Presidential elections took place in 2 rounds in 1996. In the first round on 16 June 11 candidates stood. The electorate was 104m.; turn-out was 69.8%. President Yeltsin won 35.28% of votes cast, Gennadi Zyuganov (Communist) 32.08% and Aleksandr Lebed, 14.52%. In the second run-off round on 3 July turn-out was 68.8%. Yeltsin was re-elected with 53.8% of votes cast.

Parliament is known as the *Federal Assembly*. The 'representative and legislative organ of the Russian Federation', it consists of 2 chambers: the *Council of the Federation* and the *State Duma*. The Council of the Federation, or upper house, consists of 178 deputies, 2 from each of the 89 subjects of the Federation. The State Duma, or lower house, consists of 450 deputies chosen for a 4-year term. 225 of these are elected from single-member constituencies on the first-past-the-post system, the remainder from party lists by proportional representation. To qualify for candidacy an individual must obtain signatures from at least 1% of voters in the constituency; a party or electoral alliance must obtain a minimum of 100,000 supporting signatures from at least 7 regions, but not more than 15% from any one region. There is a 5% threshold for the party-list seats. Parties which gain at least 35 seats may register as a faction, which gives them the right to join the Duma Council and chair committees. Any citizen aged over 21 may be elected to the State Duma, but may not at the same time be a member of the upper house or of other representative bodies, and all deputies work on a 'permanent professional basis'. Both houses elect a chair, committees and commissions. The Council of the Federation considers all matters that apply to the Federation as a whole, including state boundaries, martial law, and the deployment of Russian forces elsewhere. The Duma approves nominations for prime minister, and adopts federal laws (they are also considered by the Council of the Federation, but any objection may be overridden by a two-thirds majority; objections on the part of the President may be overridden by both houses on the same basis). The Duma for its part can reject nominations for prime minister, but after the third such rejection it is automatically dissolved. It is also dissolved if it twice votes a lack of confidence in the government as a whole, or if it refuses to express confidence in the government when the matter is raised by the prime minister.

Elections for the State Duma were held on 17 Dec. 1995. The electorate was 107.5m.; turn out was 64.4%. 2,687 candidates stood representing 43 parties or groups. 4 parties exceeded the 5% threshold for party-list seats: Communist Party, 99 seats; Liberal Democratic Party (of Vladimir Zhirinovskiy), 50; Our Home is Russia,

45; Yabloko, 31. Total seats gained: Communist Party, 157 with 22.3% of votes cast (48 with 12.4% in 1993); Our Home is Russia, 55 with 10.13%; Liberal Democratic Party, 51 with 11.18% (64 with 22.92% in 1993); Yabloko, 45 with 6.89% (23 with 7.86% in 1993); Agrarian Party, 20 with 3.78% (33 with 7.99% in 1993); Power to the People, 9 with 1.61%, Russia's Democratic Choice, 9 with 3.86% (70 with 15.51% in 1993); Congress of Russian Communities, 5 with 4.31%; Women of Russia, 3 with 4.61% (23 with 8.13% in 1993); Forward Russia, 3 with 1.94%; Ivan Rybkin's Bloc, 3 with 1.11%; Pamfilova-Gurev-Lysenko, 2 with 1.6%. 78 seats went to independents (141 in 1993) and 10 to minor parties. The Communist Party delegated some seats to the Agrarian Party to enable it to register as a faction. Registered factions (with seats held) in Jan. 1996: Communist Party (149), Our Home is Russia (55), Liberal Democratic Party (51), Yabloko (46), Russian Regions (42), Power to the People (37), Agrarian Party (35).

President: Boris Yeltsin (b. 1931; sworn in 9 Aug. 1996).

On 23 March 1998 President Yeltsin dismissed the government, and appointed Sergei Kiriyenko, formerly Minister for Energy, as acting Prime Minister.

National anthem: No words, tune from an opera by M. Glinka.

Regional and Local Government: There are 49 provinces, 6 territories, 21 republics (including Cechnya) and 10 autonomous areas. The republics are homelands of non-Russian minorities and as such enjoy a high degree of autonomy including the right to elect a president. Provinces (*oblasts*) and territories (*krais*) are led by governors, formerly presidential appointments but now elected. Local councils include 24,230 rural settlements, 2,048 urban settlements, 318 urban districts, 1,086 towns and 1,863 sub-regions.

A presidential decree of Oct. 1993 established a new regime for local authorities. Their membership is limited to 50. During 1996, 47 of the 89 federal units held elections for presidents or governors, these being areas where regional heads had been appointed before elections were instituted in 1995.

DEFENCE. The President of the Republic is C.-in-C. of the armed forces. Conscription was raised from 18 months to 2 years in April 1995.

Army. A Russian Army was created by presidential decree in March 1992. In 1997 forces numbered 420,000 (170,000 conscripts). The Army is deployed in 8 military districts and 1 Group of Forces, and comprises: 14 Army and 8 Corps headquarters, 12 tank, 28 motor rifle, 5 airborne, 4 machine gun/artillery and 4 artillery divisions, and some 47 artillery, 4 heavy artillery, 7 airborne, 8 special forces, 23 surface-to-surface missile, 2 independent tank, and 17 independent motor rifle brigades, and 19 anti-tank and 28 surface-to-air missile regiments. Equipment includes some 16,800 main battle tanks, including T-54/-55, T-62, T-64A/-B, T-72L/-M and T-80/-M9, 200 PT-76 light tanks, 1,962 multiple rocket launchers, 144 surface-to-surface nuclear-capable missile launchers and 2,300 surface-to-air missiles.

The Army air element has some 2,450 helicopters in the inventory, including 2,000 Mi-8/17 transport, assault and battlefield electronic countermeasures and electronic intelligence machines and 950 armed Mi-24s. There are a small number of Mi-6 and Mi-26 heavy-lift helicopters as well as a small number of fixed-wing transport and communications aircraft. Funding shortages have reduced serviceability drastically.

Strategic Nuclear Ground Forces. In 1995 there were 5 rocket armies, each with launcher groups, 10 silos and 1 control centre. Inter-continental ballistic missiles numbered 928. Personnel, 100,000 (50,000 conscripts).

Navy. The Russian Navy continues to reduce steadily and levels of sea-going activity remain very low with activity concentrated on a few operational units in each fleet. The safe deployment and protection of the reduced force of strategic missile-firing submarines remains its first priority; and the defence of the Russian homeland its second. The strategic missile submarine force operates under command of the Strategic Nuclear Force commander whilst the remainder come under the Main Naval Staff in Moscow, through the Commanders of the fleets.

The Northern and Pacific fleets count the entirety of the ballistic missile submarine force, all nuclear-powered submarines, the sole operational aircraft carrier and most major surface warships. The Baltic Fleet organization is based in the St Petersburg area and in the Kaliningrad exclave. Some minor war vessels have been ceded to the Baltic republics. The Black Sea Fleet continues to be the object of wrangling between Russia and Ukraine, and remains operationally paralyzed by the dispute. While a political decision has been made to divide the fleet between the nations, the practical and personnel issues remain unresolved. The small Caspian Sea flotilla, formerly a sub-unit of the Black Sea Fleet, has been divided between Azerbaijan (25%), and Russia, Kazakhstan and Turkmenistan, the littoral republics (75%).

The material state of all the fleets is suffering from continued inactivity and lack of spares and fuel. The nuclear submarine refitting and refuelling operations in the Northern and Pacific Fleets remain in disarray, given the large numbers of nuclear submarines awaiting defuelling and disposal. The strength of the submarine force has now essentially stabilized, but there are still large numbers of decommissioned vessels awaiting their turn for scrapping in a steadily deteriorating state.

The aircraft carrier *Admiral Kuznetsov* is now operational, albeit with a limited aviation capability, and she deployed to the Mediterranean in Dec. 1995.

The overall strength of the Navy at the end of the indicated year was as follows:

Category	1991	1992	1993	1994	1995	1996
Strategic Submarines	59	55	50	46	38	34
Nuclear Attack Submarines	100	95	80	63	66	62
Diesel Submarines	80	75	70	62	55	26
Aircraft Carriers	5	4	3	1	1	1
Cruisers	38	33	31	25	26	24
Destroyers	29	26	22	22	21	20
Frigates	146	129	114	112	101	101

The strength of the disputed Black Sea Fleet at the end of 1996 was 12 diesel-powered submarines, 4 cruisers, 3 destroyers and 22 frigates, as well as some 30 mine warfare amphibious ships and 100 support units. The force of Strategic Submarines is constituted as follows:

Class	No.	Tonnage	Speed	Missiles	Other Weapons
Typhoon	6	27,000	27	20 SS-N-20	Torpedoes
Delta-IV	7	12,350	24	16 SS-N-23	Torpedoes
Delta-III	13	11,900	24	16 SS-N-18	Torpedoes
Delta-II	4	11,500	24	16 SS-N-8	Torpedoe
Delta-I	8	11,000	25	12 SS-N-8	Torpedoes

Some other non-operational strategic submarines continue to be counted to START totals.

The SS-N-20 'Sturgeon' missile carried by the Typhoon carries 6 warheads to a maximum range of 4,500 nautical miles, while the SS-N-23 'Skiff' in the other modern class, the 'Delta-IV', carries 10 warheads over the same range. The other older missiles carry 1 to 3 warheads over ranges varying between 1,300 and 4,000 nautical miles.

The attack submarine fleet comprises a wide range of classes, from the enormous 16,250 tonne 'Oscar' nuclear-powered missile submarine to diesel boats of around 2,000 tonnes. The inventory of anti-ship missile-firing submarines comprises 13 'Oscar I' and 'II' built 1982-1994, 24 SS-N-19 'Shipwreck' missiles, 2 'Charlie-II', 1972-75, 8 SS-N-7 'Starbright'; and 1 'Echo-II', 1961-67, 8 SS-N-3 'Shaddock' or SS-N-12 'Sandbox', all nuclear-propelled. Finally, there are 3 former strategic 'Yankee'-class submarines converted to fire the SS-N-21 'Sampson' land-attack cruise missile, which has a range of 1,600 nautical miles. Torpedo-firing boats currently building are the 'Akula' class, nuclear-powered and of 8,100 tonnes, of which there are 13, and the 'Sierra' class, nuclear-powered, 7,700 tonnes now numbering 4. The 'Victor-III' class, nuclear-powered, 6,400 tonnes, totals 26 units. The diesel-powered 'Kilo' class, of which the Navy operates 17, is still building at a reduced rate mostly for export. There are a further 9 diesel submarines nominally on the active list.

Cruisers (7,500–8,000 tonnes full load and upwards) are divided into 2 categories; those optimized for anti-submarine warfare (ASW) are classified as 'Large Anti-Submarine Ships' and those primarily configured for anti-surface ship operations are classified 'Rocket Cruisers'. The principal surface ships of the Russian Navy include the following classes:

Aircraft Carrier. The *Admiral Kuznetsov* of 65,000 tonnes was completed in 1989, is capable of 30 knots, and armed with 12 SS-N-19 'Shipwreck' anti-ship missiles and SA-N-9 anti-air missiles; it is capable of embarking 25–30 aircraft and 8–10 helicopters. All other aircraft carriers have been decommissioned or scrapped.

Anti-Shipping Rocket Cruisers. The ships of this classification are headed by the 4 ships of the *Admiral Ushakov* (formerly *Kirov*) class, the largest combatant warships, apart from aircraft carriers, to be built since the Second World War. *Admiral Ushakov* (1980), *Admiral Lazarev* (1984), *Admiral Nakhimov* (1988) and *Petr Velikii* (1995). They displace 28,400 tonnes and are capable under combined nuclear and oil-fired steam propulsion of 33 knots and are armed with 20 SS-N-19 anti-ship missiles, 12 batteries of SA-N-6 anti-air missiles, 3 helicopters and a wide range of lesser armaments. There are 4 *Slava* class: *Slava* (1982), *Marshal Ustinov* (1986), *Chervona Ukraina* (1988) and *Admiral Lobov* (1995), each of 12,700 tonnes capable of 34 knots, and armed with 16 SS-N-12 anti-ship missiles, 8 batteries of SA-N-6 anti-air missiles, 8 torpedo tubes and a single helicopter.

Anti-Submarine Cruisers. There are 4 ships of the *Nikolaev* ('*Kara*') class, displacing 9,800 tonnes, capable of 34 knots, completed 1973–79, and armed with SS-N-14 anti-submarine missiles with a secondary anti-ship role, SA-N-3 anti-air missiles, torpedo-tubes and a single helicopter and 12 newer *Udaloy* class, the first of which entered service in 1981. These displace 8,600 tonnes, are capable of 30 knots and are armed with SS-N-14 missiles, torpedo tubes and 100 mm guns, and carry 2 helicopters.

Smaller ships include the 17 *Sovremenny* class guided missile destroyers and the single remaining 'modified *Kashin*' class. There are a further 2 '*Kashin*', 26 large frigates including the first of a new class, the *Neustrashimy*, and 75 smaller frigates.

The coastal defence force includes 80 missile corvettes, 16 fast missile craft, 25 hydrofoil fast torpedo craft and 15 patrol craft (many more are laid up). Mine warfare forces include 3 minelayers and 33 offshore, 80 coastal and about 65 inshore mine countermeasure vessels.

Amphibious ships include 3 large dock landing ships of the *Ivan Rogov* class, 22 *Ropucha* and 7 *Alligator* class tank landing ships, 20 medium landing ships, and some 80 minor craft. Amphibious landing forces are found from the Naval Infantry, 14,000 strong, units of which are assigned to all fleets. Organized into a single division, 7,000 strong, and 3 active independent brigades, its principal equipment includes 240 main battle tanks, 100 amphibious light tanks, 300 artillery pieces and about 900 armoured personnel carriers. A separate force of 6,000 Coastal Defence troops mans artillery and missile batteries as well as conventional mechanized units positioned to defend the main naval bases and ports.

There is 1 multi-purpose underway replenishment ship, the *Berezina*, an additional 6 dual-purpose stores and fuel replenishment ships, 6 purpose-built tankers, and 18 other tankers converted from a commercial design with limited underway replenishment capability. Second line support is provided by 12 tankers, and about 230 maintenance and logistic ships, 60 electronic intelligence gatherers, 70 other special-purpose auxiliaries, and 210 survey, research and space support ships.

The Russian Naval Air Force includes some 100 bombers, 170 maritime patrol and anti-submarine aircraft, 175 fighter/ground attack aircraft and 280 helicopters. Maritime reconnaissance and anti-submarine tasks are performed by 65 Tu-95 and Tu-142 '*Bear*' with numerous shorter range aircraft tasked to anti-submarine operations, electronic countermeasures, intelligence gathering, and tankers. The helicopter force includes 200 anti-submarine, 25 combat assault, and 15 mine countermeasures aircraft.

Personnel in 1997 numbered 220,000, of whom 142,000 were conscripts. Some

13,000 serve in the strategic submarine force, 40,000 in naval aviation, 14,000 marines or naval infantry, and 6,000 in coastal artillery and coastal defence troops.

Coastguard, customs and border patrol duties are performed by the substantial maritime element of the Committee for the Protection of State Borders, which operates some 7 large helicopter-carrying frigates of a modified naval 'Krivak' class, 18 small frigates, 40 coastal and 150 inshore patrol craft divided among all the Russian coastal areas.

Air Force. Russia has both Air Force (1996: 145,000 personnel) and Air Defence Forces (175,000). Under the terms of the Conventional Forces in Europe (CFE) treaty, Russia is allowed to have up to 3,450 combat aircraft, 890 helicopters and 300 naval combat aircraft.

The Air Force is organized into 4 main Commands: Long-Range Aviation, Frontal Aviation, Military Transport Aviation and Reserve and Training Command.

Long-Range Aviation is reported to have 10 Tu-160, 100 Tu-22M, 120 Tu-95 bombers, some equipped to carry nuclear weapons. There are 150 MiG-25s and Su-24s equipped for electronic countermeasures and electronic intelligence missions and 30 Il-78 tanker aircraft. Frontal Aviation has over 3,500 combat and 1,800 support aircraft and is divided into 8 Air Armies, 7 in Russia and 1 in Trans-Caucasia. The main bomber type is the Su-24 of which 500 are available. The MiG-23/27, Su-17/20 and Su-25 serve for fighter and attack missions. There are also MiG-29s for air defence duties. The MiG-21 and most older combat aircraft have been withdrawn from service. Military Transport Aviation has over 300 Il-76s, which are replacing An-12s for heavy-lift operations. The other main transport type is the An-2 of which 300 are available, although there are about 100 An-24/26/32 medium transports and 15 An-124 and 30 An-22 very heavy-lift aircraft. 30-plus Il-62, Tu-134, Tu-154 and Yak-40 aircraft are assigned to VIP transport. Reserve and Training Command uses Yak-18 and Yak-52 primary trainers and L-29s and L-39s for jet conversion, plus two-seat models of many front-line types, such as the MiG-23, MiG-25, MiG-29, Su-17/20 and Su-25. It is being reorganized and slimmed down. Strength (1997), 130,000.

The Border Guards have their own aviation component to patrol Russia's borders. It has An-24 fixed-wing aircraft, now being succeeded by armed An-72Ps and Mi-8 and armed Mi-24 helicopters.

INTERNATIONAL RELATIONS

Membership. Russia is a member of the UN (Security Council), CIS, the Council of Europe and the NATO Partnership for Peace. On 16 May 1997 NATO ratified a 'Fundamental Act on Relations, Co-operation and Mutual Security' with Russia.

ECONOMY

Policy. In Oct. 1991 the President announced an economic programme whose aim was the establishment of a 'healthy mixed economy with a powerful private sector'. As part of this programme the prices of most commodities were freed on 2 Jan. 1992.

A bankruptcy law of Nov. 1992 permits the winding-up of indebted enterprises; further legislation came into force in April 1993. Centralized distribution of resources to enterprises was abolished from 1993.

Privatization is overseen by the State Committee on the Management of State Property, and began with small and medium-sized enterprises. A state programme of privatization of state and municipal enterprises was approved by parliament in June 1992, and vouchers worth 10,000 roubles each began to be distributed to all citizens in Oct. 1992. These may be sold or exchanged for shares. Employees have the right to purchase 51% of the equity of their enterprises. 25 categories of industry (including raw materials and arms) remain in state ownership. The voucher phase of privatization ended on 30 June 1994. A post-voucher stage authorized by presidential decree of 22 July 1994 provides for firms to be auctioned for cash following the completion of the sale of up to 70% of manufacturing industry for vouchers. By Dec. 1997 a total of 127,000 enterprises had been privatized, 33% of which were in

manufacturing, construction, transport and communications, 2·4% in agriculture and 59% in trade, public catering and personal services.

Performance. GDP grew by at least 0·4% in 1997, the first expansion since the Soviet Union's collapse in 1991. But many economists believe that the booming informal economy adds over 25% to the value of GDP.

Budget. Budgetary incomes were valued at 459,224bn. roubles in 1996. The main sources of revenue (in roubles) were: taxes on profits (82,365bn.), value added tax (116,222bn.), income tax (49,185bn.), income from foreign trade (37,016bn.) and excise duties (41,281bn.). Budgetary expenditures were valued at 542,060bn. roubles. Items of expenditure (in roubles) included: National economy, 136,500bn.; socio-cultural (including education, health and social security), 121,335bn.; defence, 53,170bn.; foreign trade 18,315bn.

Currency. The unit of currency is the *rouble* (RUR), of 100 *kopeks*. Banknotes are in denominations of 100, 200, 500, 1,000, 5,000, 10,000, 20,000 and 50,000 roubles. In Jan. 1998 the rouble was redenominated by a factor of a thousand. Gold and currency reserves were valued at US\$18bn. in Jan. 1998. In 1997 the rouble was tied to the US dollar on a sliding scale ranging from US\$1 = 5,500–6,100 roubles on 1 Jan. 1997 to 6 roubles on 31 Jan. 1998. Inflation was 15% in 1997 and 22% in 1996. It was an annualized 197·4% in 1995 and in that year the total external debt was US\$120,461m., most of it inherited from the Soviet Union.

Banking and Finance. The central bank and bank of issue is the State Bank of Russia (*Governor*, Sergei Dubinin). The Russian Bank for Reconstruction and Development and the State Investment Company were created in 1993 to channel foreign and domestic investment. In Jan. 1997 there were some 2,603 commercial banks, about 80% of which were state-owned through ministries or state enterprises. In 1997, the top 6 banks in terms of assets (in US\$m.) were: Sberbank, 29·1; Vneshtorgbank, 3·9; Uneximbank, 3·6; Inkombank, 3·4; National Reserve Bank, 2·0. Sberbank is the only Russian bank to appear in the world top 20. Foreign bank branches have been operating since Nov. 1992.

By 1995 the number of registered commercial banks had increased to around 5,000 but following the Aug. 1997 liquidity crisis, due to the ensuing bankruptcies, mergers and the Central Bank's revoking of licences, the number fell to 2,500. By mid-1997 a further 571 licences were still being revoked. However, licences are still being revoked at an estimated rate of 5 or 6 per week.

By Jan. 1995, 166 exchanges were in operation, and 28,700 firms of brokers.

In 1994 all forms of investment were valued at 108,809,000m. roubles, of which 30·3% was invested in industry, 25·5% in housing and 10·9% in transport; 64·2% was provided by enterprises themselves, 13·4% by the federal budget and 10·6% by regional budgets.

There are stock exchanges in St Petersburg and Vladivostok.

Collective and state farms which wish to start private farming are required to re-register as co-operatives or share companies. Members of collectives may with-

draw with a certificate of land ownership and a share of the collective's equipment or compensation in lieu; members may also elect to remain in co-operatives voluntarily. The decree permits foreign nationals to own land through joint ventures.

In Jan. 1997 the official monthly minimum wage was 83,490 roubles; the average monthly wage was 870,000 roubles. The state Federal Employment Service was set up in 1992. Unemployment benefits are paid for 15 months: 3 months at full salary, 3 months at 75% and a final 9 months at a progressively reducing rate. Annual paid leave is 24 working days. The workforce was 73.1m. on 31 March 1996. A Foreign Investment Agency was set up in Dec. 1992. In Jan. 1994 there were 6,359 joint enterprises in operation, employing 304,000 and accounting for 8% of foreign trade.

SOCIAL INSTITUTIONS

Justice. The Supreme Court is the highest judicial body on civil, criminal and

administrative law. The Supreme Arbitration Court deals with economic cases. The KGB, and the Federal Security Bureau which succeeded it, were replaced in Dec. 1992 by the Federal Counter-Intelligence Service.

A new civil code was introduced in 1993 to replace the former Soviet code. It guarantees the inviolability of private property and includes provisions for the freedom of movement of capital and goods.

12-member juries were introduced in a number of courts after Nov. 1993. A new criminal code came into force on 1 Jan. 1997, based on respect for the rights and freedoms of the individual and the sanctity of private property. The death penalty is retained for 5 crimes against the person. It is not applied to minors, women or men over 65.

In 1996, 2,625,000 crimes were reported; 29.4 thousand were cases of murder or attempted murder; 53.4 thousand were cases of GBH and 10.9 thousand were cases of rape. In 1994, 924,600 sentences were passed, of which 36% involved imprisonment. In 1996 there were 56 executions (86 in 1995; 1 in 1992). Organized crime groups control up to 40,000 commercial organizations.

Religion. The Russian Orthodox Church, represented by the Patriarchate of Moscow, had, in 1996, an estimated 35-40m. adherents, over 14,000, 136 monasteries, and 26 secondary and higher educational institutions. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia (Metropolitan Aleksei II (b. 1929) of St Petersburg and Novgorod, elected June 1990), assisted by the Holy Synod, which has 7 members—the Patriarch himself and the Metropolitans of Krutitsy and Kolomna (Moscow), St Petersburg and Kiev *ex officio*, and 3 bishops alternating for 6 months in order of seniority from the 3 regions forming the Moscow Patriarchate. The Patriarchate of Moscow maintains jurisdiction over 119 eparchies, of which 59 are in Russia; there are parishes of Russian Orthodox abroad, in Belarus, Ukraine, Kazakhstan, Moldova, Uzbekistan, the Baltic states, and in Damascus, Geneva, Prague, New York and Japan. There is a spiritual mission in Jerusalem, and a monastery at Mt Athos in Greece. There are Jewish communities in Moscow and St Petersburg.

The Chechens and Ingushes were conquered by Russia in the late 1850s. In 1918 each nationality separately established its 'National Soviet' within the Terek Autonomous Republic, and in 1920 (after the Civil War) were constituted areas within the Mountain Republic. The Chechens separated out as an Autonomous Region on 30 Nov. 1922 and the Ingushes on 7 July 1924. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as an Autonomous Republic. Grozny was bombed and attacked by Russian ground forces at the end of Dec. 1994 and the presidential palace was captured on 19 Jan. 1995, but fighting continued. On 30 July 1995 the Russian and Chechen authorities signed a ceasefire. On 8 Dec. 1995 an agreement between the Russian and Chechen prime ministers amnestied insurgents who laid down their arms. However, hostilities, raids and hostage-taking continued. The Chechen President was killed during fighting in April 1996. A further ceasefire was concluded on 30 Aug. 1996, and it was agreed that the status of Chechnya would be determined by a referendum in 2001. KEY HISTORICAL EVENTS. From the 16th century to 1959 the Tutsi kingdom of Rwanda shared the history of Burundi. In 1959 an uprising of the Hutu destroyed the Tutsi feudal hierarchy and overthrew the monarchy. Elections and a referendum under the auspices of the UN in Sept. 1961 resulted in an overwhelming majority for the republican party, the Parmehutu (*Parti du Mouvement de l'Emancipation du Bahutu*), and the rejection of the monarchy. The republic proclaimed by the Parmehutu on 28 Jan. 1961 was

recognized by the Belgian administration (but not by the UN) in Oct. 1961. Internal self-government was granted on 1 Jan. 1962, and by decision of the General Assembly of the UN the Republic of Rwanda became independent on 1 July 1962.

Conflict between the Hutu and Tutsi in 1963 was renewed, and again trouble broke out, with much bloodshed, in 1972–73. A coup on 5 July 1973 deposed the first president, Gregoire Kayibanda, and a military government was established. The military leader of this coup, Gen. Juvénal Habyarimana, became president. There was gradual return to civilian rule. In 1978 a new constitution was accepted by a national referendum. President Habyarimana was confirmed in office in elections in 1978 and again in 1983, when candidates from the country's sole political party, the National Revolutionary Democratic Movement, were also returned. However, for much of the time since then the country has contended with the problem of refugees fleeing repression and war in neighbouring Uganda.

In Oct. 1990 rebel Tutsi forces of the Rwandan Patriotic Front (RPF) invaded from Uganda. An agreement was signed on 14 Aug. 1992 to end the civil war, but fighting continued. Rebels and government agreed to merge their forces at peace talks in March 1993. A peace agreement was signed on 4 Aug. 1993 at Arusha (Tanzania). On 5 Oct. the UN Security Council unanimously decided to send a peacekeeping force to oversee the establishment of transitional organs in line with the Aug. agreement. However, President Habyarimana was killed, possibly assassinated, on 6 April 1994. Fatalities in the fighting which broke out included the Prime Minister and UN personnel. Rebel Tutsi forces of the RPF began an attack from the north of the country.

An interim government was formed on 10 April with the Speaker Théodore Sindikubwabo (National Republican Movement for Development; MRND) as President and Jean Kambanda (Democratic Republican Movement; MDR) as Prime Minister.

Most UN forces were withdrawn during the fighting and massacres of April 1994, but following a UN Security Council resolution of 17 May 1994 a new force of 5,500 was sent in.

On 22 June 1994 the UN Security Council approved France's dispatch of 2,000 troops on a humanitarian mission. The RPF, however, said it would treat the force as invaders. The French forces maintained a 'safe zone' for refugees in the south-west of Rwanda until their withdrawal on 21 Aug. 1994. Under the aegis of the OAU at Tunis representatives of the Rwandan interim government and the RPF agreed a ceasefire. At the request of the RPF on 6 July 1994 in Brussels Faustin Twagiramungu agreed to form a 22-member government of national unity in which 8 posts were held by the RPF.

It is estimated that more than 1m. Rwandans were killed in 1994 through genocide and the civil war, and that more than 2m. were forced to flee to neighbouring countries.

On 8 Nov. 1994 the UN Security Council resolved by 13 votes (China abstaining and Rwanda opposing) to set up an international tribunal to try crimes of genocide in Rwanda. It was inaugurated on 27 June 1995 and subsequently merged with that for Yugoslavia.

UN forces (UNAMIR) left Rwanda on 8 March 1996, and although progress has been made since then, the civil strife between the two factions continues, particularly in the north-west of the country. In Dec. 1997 over 300 Tutsis were killed at a large refugee camp.

KEY HISTORICAL EVENTS. An island state of the lesser Antilles in the eastern Caribbean, St Lucia is believed to have been settled by the Arawaks, Amerindians who were subsequently driven out by the warlike Caribs. The island was probably discovered by Columbus in 1502. An unsuccessful attempt to colonize by the British took place in 1605, and again in 1638 when settlers were soon murdered by the Caribs who inhabited the island. France claimed the right of sovereignty, and ceded it to the French West India

Company in 1642. The French settlers fought constant battles with the Caribs until peace was established in 1660. St Lucia regularly and constantly changed hands between Britain and France, until it was finally ceded to Britain in 1814 by the Treaty of Paris.

Since 1924 the island has had representative government. It was a part of the federal government of the Windward Islands until, in Jan. 1960, along with the colonies in the group, it was given its own administrator. In March 1967 St Lucia gained full control of its internal affairs while Britain remained responsible for foreign affairs and defence; the Administrator became the Governor, and a House of Assembly replaced the Legislative Council. On 22 Feb. 1979 St Lucia achieved independence, opting to remain in the British Commonwealth.

KEY HISTORICAL EVENTS. These islands in the eastern Caribbean were originally inhabited by the Carib tribes. St Vincent was discovered by Columbus on 22 Jan. (St Vincent's Day) 1498. British and French settlers occupied parts of the islands after 1627.

In 1773 the Caribs recognized British sovereignty and agreed to a division of territory between themselves and the British. Resentful of British rule, the Caribs rebelled in 1795, aided by the French, but the revolt was subdued within a year. Most of the Carib population was

deported to islands in the Gulf of Honduras and the surviving population was further reduced by eruptions of the volcano Santiere in 1812 and 1902.

The islands were part of the federal government of the Windward Islands until, in Jan. 1960, along with other colonies in the group, they were given their own Administrator. Universal adult suffrage had been in existence on the islands since 1951. On 27 Oct. 1969 St Vincent became an Associated State with the UK responsible only for foreign policy and defence, while the islands were given full internal self-government. SAMOA

O le Malo Tutoatasi o Samoa—

Independent State of Samoa

Capital: Apia

Population: 219,509

GDP per head: (PPP\$) 2,726

HDI/world rank: 0.684/96

KEY HISTORICAL EVENTS. Polynesians settled in the Samoan group of islands in the southern Pacific from about 1000 BC. Shortly before European arrival, stratified society with paramount chiefs and fortified settlements developed. Although probably sighted by the Dutch in 1722, the first European visitor was French in 1768. Treaties were signed between the Chiefs and European nations in 1838–39.

Continuing strife among the chiefs was compounded by British, German and US rivalry for influence. In the

Treaty of Berlin 1889 the three powers agreed to Western Samoa's independence and neutrality. When strife continued, the treaty was annulled and the Samoan group was annexed.

Western Samoa became a German protectorate until in 1914 it was occupied by a New Zealand expeditionary force. The island was administered by New Zealand from 1920 to 1961, at first under a League of Nations Mandate and from 1946 under a United Nations Trusteeship Agreement. In May 1961 a plebiscite held under the supervision of the UN on the basis of universal adult suffrage voted overwhelmingly in favour of independence. In Oct. 1961 the General Assembly of the United Nations passed a resolution to terminate the trusteeship agreement as from 1 Jan. 1962, on which date Western Samoa became an independent sovereign state. In July 1997 the country renamed itself as the Independent State of Samoa.

TERRITORY AND POPULATION. Samoa lies between 13° and 15° S. lat. and 171° and 173° W. long. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 1,093 sq. miles (2,830.8 sq. km), of which 659.4 sq. miles (1,707.8 sq. km) are in Savai'i, and 431.5 sq. miles (1,117.6 sq. km) in Upolu; other islands, 2.1 sq. miles (5.4 sq. km). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

Population at the 1991 census, 161,298. July 1997 estimate, 219,509. The population at the 1986 census was 112,228 in Upolu (including Manono and Apolima) and 44,930 in Savai'i. The capital and chief port is Apia in Upolu (population 32,196 in 1986). Expectation of life was 69.09 years in 1997.

The official languages are Samoan and English.

CLIMATE. A tropical marine climate, with cooler conditions from May to Nov. and a rainy season from Dec. to April. The rainfall is unevenly distributed, with south and east coasts having the greater quantities. Average annual rainfall is about 100" (2,500 mm) in the drier areas. Apia. Jan. 80°F (26.7°C), July 78°F (25.6°C). Annual rainfall 112" (2,800 mm).

The Constitution also provides for a *Council of Deputies* of 3 members, of whom the chairman is the Deputy Head of State.

Before 1991 the 49-member *Legislative Assembly* was elected exclusively by

matai (customary family heads). At the elections of April 1991 the suffrage was universal, but only the approximately 20,000 *matai* could stand as candidates. The electorate was 56,000. At the most recent elections, in April 1996, the Human Rights Protection Party won 24 seats; the Samoan National Development Party, 11; Non-partisans, 13; and others, 1.

SAN MARINO

Repubblica di San Marino

Capital: San Marino

Population: 25,515

KEY HISTORICAL EVENTS. San Marino is a small republic situated on the Adriatic side of central Italy. According to tradition, St Marinus and a group of Christians settled there to escape persecution. By the 12th century San Marino had developed into a commune ruled by its own statutes and consul. Unsuccessful attempts were made to annex the republic to the papal states in the 18th century and when Napoleon invaded Italy in 1797 he respected the rights of the republic and even offered to extend its territories.

In 1815 the Congress of Vienna recognized the independence of the republic. On 22 March 1862 San Marino concluded a treaty of friendship and co-operation, including a *de facto* customs union, with the Kingdom of Italy, thus preserving its ancient independence although completely surrounded by Italian territory. This treaty was renewed in 1872, 1879 and 1939, with several amendments between 1942 and 1987.

TERRITORY AND POPULATION. San Marino is a land-locked state in central Italy, 20 km from the Adriatic. The Progressive Democrats (former Communists) gained 18.6% of votes cast and 11 seats, the Popular Democratic Alliance 4 seats, the Democratic Movement 3 seats and the Refounded Communists 2.

Executive power is exercised by the 10-member *Congress of State*, presided over by the Captains Regent. The *Council of Twelve*, also presided over by the Captains Regent, is appointed by the Great and General Council to perform administrative functions and is a court of third instance.

SÃO TOMÉ E PRÍNCIPE

República Democrática de
São Tomé e Príncipe

Capital: São Tomé
Population: 147,865
GDP per head: (PPP\$) 1,704
HDI/world rank: 0.534/125

KEY HISTORICAL EVENTS. The islands of São Tomé and Príncipe off the west coast of Africa were colonized by Portugal for 5 centuries after being first visited by Portuguese navigators on 21 Dec. 1470. There may have been a few African inhabitants or visitors earlier, but most of the population arrived during the centuries when the islands served as an important slave-trading depot for South America and some slaves were kept on the islands to work on the sugar plantations. In the 19th century the islands

became the first parts of Africa to grow cocoa. Although in 1876 Portugal abolished slavery in name, in practice it continued thereafter with many Angolans, Mozambicans and Cape Verdians being transported to work on the cocoa plantations. Because the slave-descended population was cut off from African culture, São Tomé had a higher proportion than other Portuguese colonies of *assimilados* (Africans acquiring full Portuguese culture and certain rights).

After becoming an Overseas Province of Portugal in 1951, São Tomé saw serious riots against Portuguese rule in 1953. From 1960 a Committee for the Liberation of São Tomé e Príncipe operated from neighbouring African territories. There was, however, no armed resistance on the islands, where in 1970 Portugal introduced some reforms and formed a 16-member legislative council and a provincial consultative council. Following the Portuguese revolution of 1974, the Movement for the Liberation of São Tomé e Príncipe, headed by Manoel Pinto da Costa, held talks with Portugal. A transitional government was formed later that year and, after a period of tension due to landowners' resistance to decolonization and the temporary retention of Portuguese troops, independence came on 12 July 1975. Pinto da Costa became the first president and was re-elected for a further 5 years in 1985.

Independent São Tomé e Príncipe officially proclaimed Marxist-Leninist policies, but it maintained a non-aligned foreign policy and has received aid from Portugal.

TERRITORY AND POPULATION. The republic, which lies about 200 km off the west coast of Gabon, in the Gulf of Guinea, comprises the main islands of São Tomé (845 sq. km) and Príncipe and several smaller islets including Pedras Tinhosas and Rolas. It has a total area of 1,001 sq. km (387 sq. miles). Population (census, 1991) 120,146. Estimate (1997), 147,865.

The areas and populations of the 2 provinces:

Province	Sq. km	Census 1991	Estimate 1995	Chief town	Census 1991
São Tomé	859	114,507	125,200	São Tomé	43,420
Príncipe	142	5,639	5,900	São António	1,000

Vital statistics (1997 estimate): Birth rate per 1,000 population, 33.77; death rate, 8.4; infant mortality (per 1,000 live births), 60.2. Expectation of life, 64.09.

The official language is Portuguese. Lungwa São Tomé, a Portuguese creole, and Fang, a Bantu language, are the spoken languages.

CLIMATE. The tropical climate is modified by altitude and the effect of the cool Benguela current. The wet season is generally from Oct. to May, but rainfall varies very much, from 40" (1,000 mm) in the hot and humid north-east to 150–200" (3,800–5,000 mm) on the plateau. São Tomé. Jan. 79°F (26.1°C), July 75°F (23.9°C). Annual rainfall 38" (951 mm).

CONSTITUTION AND GOVERNMENT. The 1990 constitution was approved by 72% of votes at a referendum of Aug. 1990. It abolished the monopoly of the Movement for the Liberation of São Tomé e Príncipe (MLSTP). The *President* must be over 34 years old, and is elected by universal suffrage for one or two (only) 5-year terms. He or she is also head of government and appoints a Council of Ministers. The 55-member *National Assembly* is elected for 4 years.

At the presidential elections on 21 July 1996 President Trovoada was re-elected by 52.2% of votes cast against 1 opponent.

At the elections on 2 Oct. 1994 the electorate was some 57,000; turn-out was 79%. The MLSTP/Social Democratic Party won 27 seats, the Democratic Convergence Party (DCP), 14 and Independent Democratic Action (IDA), 14.

President, C.-in-C.: Miguel Trovoada (b. 1946; IDA; re-elected 21 July 1996).

KEY HISTORICAL EVENTS. In the 6th century AD Makkah, now in western Saudi Arabia, was a thriving commercial centre. Around 610 the Prophet Mohammed began receiving revelations of the oneness of God through the Angel Gabriel, and he began to attract a following. In 622, learning of an assassination plot against him, he led his followers to the town of Yathrib (now Madinah). This was the *Hijrah*, or migration, which marks the beginning of the Islamic calendar. Battles ensued between Mohammed's followers and the pagans of Makkah, but by 628 Mohammed had united the tribes so successfully he and his

followers entered Makkah without bloodshed. Less than 100 years from the advent of Islam, its empire extended from Spain to areas of India and China. Islamic rule thrived well into the 17th century.

Today the Kingdom of Saudi Arabia is a union of two regions, Nejd and Hejaz. In the 18th century, Nejd was an autonomous region governed from Diriya, the stronghold of the Wahhabis, a puritanical Islamic sect. It subsequently fell under Turkish rule, but in 1913 Abdulaziz Ibn Abdul Rahman Al-Saud defeated the Turks and also captured the Turkish province of al Hasa. In 1920 he captured the Asir, and in 1921 by force of arms he added to his dominions the Jebel Shammar territory of the Rashid family. In 1925 he completed the conquest of the Hejaz.

Great Britain recognized Abdulaziz as an independent ruler, King of the Hejaz and of Nejd and its dependencies, by the Treaty of Jiddah on 20 May 1927. The name was changed to the Kingdom of Saudi Arabia in Sept. 1932. King Abdulaziz ruled until his death in Nov. 1953. During his rule there was considerable development of the oil resources of the country. Although begun before the Second World War, oil exploitation grew greatly with the support of the USA after 1945.

King Abdulaziz was succeeded by his sons, Saud, Faisal, Khalid and Fahd. Saud succeeded to the throne in 1953 but in March 1964 abdicated in favour of Faisal Ibn Abdulaziz who had carried considerable power during the older brother's reign, being for a time prime minister with control over foreign and economic policy. Faisal was assassinated in 1975, and was succeeded by his brother, Khalid Ibn Abdulaziz. On Khalid's death in 1982, Fahd Ibn Abdulaziz became king. In 1995, after King Kahd suffered a stroke, he appointed his half-brother Crown Prince Abdullah Ibn Abdulaziz to act on his behalf.

KEY HISTORICAL EVENTS. The major ethnic groups of Senegal are the Wolof, Serer, Tukulor (or Toucouleur), Soninke (or Sarakole), Mandinka and Diola peoples. Some of them had important traditional kingdoms. In Fouta Toro in the east there was the state of Tekrur and then an Islamic state founded in 1776 by Muslim Tukulors. Islam reached the Senegal river valley by the 11th century, and later the Fulanis (whose migration all over West Africa began from Senegal) and the related Tukulors helped spread Islam over a large

area.

For several centuries, starting in the 14th, the Wolofs had a supreme ruler, the Bourba Jolof, and several important kingdoms under him, notably the kingdom of Kayor (Kajoor) ruled by 30 kings or *damels* from the 16th century to 1886. The last *damel*, the Muslim Lat Dior, was famous for his resistance to French rule.

While in the mid-1400s the Portuguese were the first Europeans to reach the area around the Senegal river estuary; in succeeding centuries the French became the dominant Europeans on the coast in that area, except for the Gambia, where the British were installed. The French founded Saint-Louis in 1659 and also occupied the island of Goree, an important slave-trading depot. By the 18th century Saint-Louis had an important small elite community, partly African, called the *habitants*. In the 19th century French rule, interrupted earlier by occasional British occupation, was confirmed over Saint-Louis and Goree. Frec Africans received the vote in 1833, and the franchise was further extended in 1848 when slavery was abolished in all French colonies. The Africans in Saint-Louis and Goree, and also in Dakar and Rufisque, were in the 19th century called the *originaires* and had the rights of French citizens. They elected a deputy to the French national Assembly and voted for local government councils (or *communes*).

From the late 1870s France began a sustained push up the river and into the interior. Here, groundnuts were already being grown for export to France, but African monarchs still ruled, including the new Islamic conqueror, El Hadj Umar and, after his death in 1864, his son Ahmadu. There was strong resistance to the French, notably that led by Lat Dior from 1882 until his death in action in 1886. French rule was established by the mid-1890s, while the British then consolidated their rule inland in The Gambia; French efforts to obtain cession of that territory, entirely surrounded by Senegal, did not succeed.

The normal French colonial system prevailed, one of its features being the breaking up of traditional kingdoms (completed in Senegal by the 1920s). Senegal was part of French West Africa (*Afrique Occidentale Française*) from 1902 and became an autonomous state within the French Community on 25 Nov. 1958. On 4 April 1959 Senegal joined with French Sudan to form the Federation of Mali, which achieved independence on 20 June 1960, but on 22 Aug. Senegal withdrew from the Federation and became a separate independent republic. Senegal was a one-Party state from 1966 until 1974, when a pluralist system was re-established.

TERRITORY AND POPULATION. Senegal is bounded by Mauritania to the north and north-east, Mali to the east, Guinea and Guinea-Bissau to the south and the Atlantic to the west with The Gambia forming an enclave along that shore. Growth rate (1992), 2·9%; infant mortality (1996), 64 per 1,000 live births; birth rate (1991) per 1,000 population, 43; death rate, 16. Life expectancy in 1996 was 53·75 years for men and 59·3 for women. Age structure : 1–14 years, 48%; 15–64, 49%; 65 and over, 3%.

CONSTITUTION AND GOVERNMENT. The 1963 constitution was revised in 1991. The head of state is the *President*, elected by universal suffrage for not more than two 7-year terms. For the unicameral 120-member National Assembly 60 members are elected in single-member constituencies and 60 by a form of proportional representation for 5-year terms. It was announced in Dec. 1995 that a senate would be established to represent territorial collectives in parliament.

At the presidential elections of 21 Feb. 1993 there were 8 candidates; turn-out was 51.46%. Abdou Diouf was re-elected with 58.4% of votes cast.

Republic of Seychelles

Capital: Victoria

Population: 76,417

GNP: US\$0.5bn.

HDI/world rank: 0.845/52

KEY HISTORICAL EVENTS. The Seychelles were first colonized by the French in 1756 in order to establish plantations for growing spices to compete with the Dutch monopoly. The islands were captured by the English in 1794. During discussions before the Treaty of Paris was signed, Britain offered to return Mauritius and its dependencies which included the Seychelles to France if that country would renounce all claims to her possessions in India. France refused and the Seychelles were formally ceded to Britain as a dependency of

Mauritius. In Nov. 1903 the Seychelles archipelago became a separate British Crown Colony. Internal self-government was achieved on 1 Oct. 1975 and independence as a republic within the British Commonwealth on 29 June 1976.

The first president, James Mancham, was deposed in a *coup* on 5 June 1977 and replaced by his prime minister, Albert René. The National Assembly was dissolved and the constitution suspended. A new constitution came into force on 5 June 1979, under which the Seychelles People's Progressive Front became the sole legal party and nominates all candidates for election. There is a unicameral People's Assembly consisting of 33 seats, of which 22 are directly elected and 11 are allocated on a proportional basis, and an executive president directly elected for a 5-year term. In 1979 and 1984 Albert René was the only candidate in the presidential elections. Under the new constitution approved in June 1993, President René was re-elected against two opponents with 59.5% of the vote.

TERRITORY AND POPULATION. The Seychelles consists of 115 islands in the Indian Ocean, north of Madagascar, with a combined area of 175 sq. miles (455 sq. km) in two distinct groups. The Granitic group of 32 islands cover 92 sq. miles (239 sq. km); the principal island is Mahé, with 59 sq. miles (153 sq. km) and 59,500 inhabitants at the 1987 census, the other inhabited islands of the group being Praslin, La Digue, Silhouette, Fregate and North, which together had 7,100 inhabitants.

The Outer or Coralline group comprises 83 islands spread over a wide area of ocean between the Mahé group and Madagascar, with a total land area of 83 sq. miles (214 sq. km) and a population of about 400. The main islands are the Amirante Isles (including Desroches, Poivre, Daros and Alphonse), Coetivy Island and Platte Island, all lying south of the Mahé group; the Farquhar, St Pierre and Providence Islands, north of Madagascar; and Aldabra, Astove, Assumption and the Cosmoledo Islands, about 1,000 km south-west of the Mahé group. Aldabra (whose lagoon covers 55 sq. miles), Farquhar and Desroches were transferred to the new British Indian Ocean Territory in 1965, but were returned by Britain to the Seychelles on the latter's independence in 1976. Population, 76,417 (1996). Births, 1,611; deaths, 566; infant mortality, 9.3 per 1,000 births.

The official languages are Creole, English and French but 95% of the population speak Creole.

CLIMATE. Though close to the equator, the climate is tropical. The hot, wet season is from Dec. to May, when conditions are humid, but south-east trades bring cooler conditions from June to Nov. CONSTITUTION AND GOVERNMENT. Under the 1979 Constitution the Seychelles People's Progressive Front (SPPF) was the sole legal Party. A constitutional amendment of Dec. 1991 legalized other parties. A commission was elected in July 1992 to draft a new constitution. The electorate was some 50,000; turn-out was

90%. The SPPF gained 14 seats on the commission, the Democratic Party, 8; the latter, however, eventually withdrew. At a referendum in Nov. 1992 the new draft constitution failed to obtain the necessary 60% approval votes. The commission was reconvened in Jan. 1993. At a further referendum on 18 June 1993 the constitution was approved by 73.6% of votes cast.

At the presidential and parliamentary elections of 23 July 1993 turn-out was 60%. President René was re-elected against 2 opponents by 59.5% of votes cast. The SPPF gained 28 seats, the Democratic Party, 4 and the United Opposition, 1.

SIERRA LEONE

Republic of Sierra Leone

Capital: Freetown

Population: 4·46m.

GDP per head: (PPPS) 643

GNP: US\$0·7bn.

HDI/world rank: 0·176/175

KEY HISTORICAL EVENTS. The Colony of Sierra Leone originated in 1787, when English settlers bought a piece of land intended as a home for natives of Africa who were waifs in London. The land was later used as a settlement for Africans rescued from slave-ships. The hinterland was declared a British protectorate on 21 Aug. 1896.

The first constitution was introduced in 1951 and this removed the political component from the privileged status of the Creoles of the colony by giving power to the majority. Sierra Leone became independent as a member state of the British Commonwealth on 27 April 1961. In a general election in March 1967, Dr Siaka Stevens' All People's Congress came to power and was installed despite a military coup to prevent his taking office. Sierra Leone became a republic on 19 April 1971, with Dr Siaka Stevens as executive president.

Following a referendum in June 1978, a new constitution was instituted under which the ruling All People's Congress became the sole legal party.

Stevens remained president until 1985 when he handed over to Maj.-Gen. Dr Joseph Saidu Momoh, the army C.-in-C., who was the only candidate in the presidential election that year and received 99% of the votes cast.

A military coup on 29 April 1992 deposed the president and set up a National Provisional Ruling Council. The chairman of this, Captain Valentine Strasser, was in turn deposed in a bloodless military coup on 16 Jan. 1996, and Gen. Julius Maada Bio assumed power. Presidential and parliamentary elections in Feb.–March 1996 resulted in a new government led by President Ahmed Tejan Kabbah. In May 1997 he was overthrown by a group of junior officers calling themselves the Armed Forces Ruling council (AFRC) in alliance with the Revolutionary United Front (RUF), a rebel gang that had terrorized the south-east of the country in the early 1990s. In Feb. 1998 a Nigerian-led intervention force launched an air and artillery offensive against the military junta. On 10 March President Kabbah returned from exile in Guinea, promising a 'new beginning'.

TERRITORY AND POPULATION. Sierra Leone is bounded on the north-west, north and north-east by Guinea, on the south-east by Liberia and on the south-west by the Atlantic Ocean. The area is 27,925 sq. miles (73,326 sq. km). Population (census 1985), 3,517,530, of whom about 2,000 were Europeans, 3,500 Asiatics and 30,000 non-native Africans. Estimate (1993), 4,460,000 (32% urban); density, 64·3 per sq. km. The capital is Freetown, with 469,776 inhabitants in 1985.

Vital statistics rates (1993, per 1,000 population); Birth, 48·2; death, 21·6; growth rate, 2·7%. Infant mortality was 143 per 1,000 live births in 1990; expectation of life was 43 years.

Sierra Leone is divided into 4 provinces:

	<i>Sq. km</i>	<i>Census 1985</i>	<i>Capital</i>	<i>Estimate 1988</i>
Western Province	557	554,243	Freetown	469,776
Southern Province	19,694	740,510	Bo	26,000
Eastern Province	15,553	960,551	Kenema	13,000
Northern Province	35,936	1,262,226	Makeni	12,000

The provinces are divided into districts as follows: Bo, Bonthe, Moyamba, Pujehun (Southern Province); Kailahun, Kenema, Kono (Eastern Province); Bombali, Kambia, Koinaduga, Port Loko, Toukolili (Northern Province).

The principal peoples are the Mendes (34% of the total) in the south, the Temnes

(31%) in the north and centre, the Konos, Fulanis, Bulloms, Korankos, Limbas and Kissis. English is the official language; a Creole (Krio) is spoken.

CLIMATE. A tropical climate, with marked wet and dry seasons and high temperatures throughout the year. The rainy season lasts from about April to Nov., when humidity can be very high. Thunderstorms are common from April to June and in Sept. and Oct. Rainfall is particularly heavy at Freetown because of the effect of neighbouring relief. Freetown. Jan. 80°F (26.7°C), July 78°F (25.6°C). Annual rainfall 135" (3,434 mm).

CONSTITUTION AND GOVERNMENT. In a referendum in Sept. 1991 some 60% of the 2.5m. electorate voted for the introduction of a new constitution instituting multi-party democracy. There is a 68-member *National Assembly*.

KEY HISTORICAL EVENTS. Singapore Island became part of the Javanese Majapahit Empire in the 14th century. The Portuguese established hegemony in the area in the 16th century, followed by the Dutch a hundred years later. In 1819 Sir Thomas Stamford Raffles, the British East India Administrator, established a trading settlement there. The original lease of the site of a factory to the British East India Company by the Sultan of Johore was followed by the treaty of 2 Aug. 1824 ceding the entire island in perpetuity to the company.

In 1826 Penang, Malacca and Singapore were combined as the Straits Settlements in an Indian presidency. On 1 April 1867 the settlements were transferred from the control of the Indian government to that of the British Secretary of State for the Colonies. With the opening of the Suez Canal in 1869 and the advent of the steamship, an era of prosperity began for Singapore. Growth continued with the export of tin and rubber from the Malay peninsula.

Thought to be impregnable by land, Singapore fell to the Japanese in 1942 whose occupation continued until the end of the Second World War. In 1945 Singapore became a Crown Colony, being separated from Penang and Malacca. In June 1959 the state was granted complete internal self-government. When the Federation of Malaysia was formed in Sept. 1963, Singapore became one of the 14 states of the newly created country.

On 7 Aug. 1965, by agreement with the Malaysian government, Singapore left the Federation of Malaysia and became an independent sovereign state. The name of the state was changed to 'Republic of Singapore' with a president as its head. Singapore and Malaysia agreed to enter into a treaty for external defence and mutual assistance. The British military presence was withdrawn from Singapore in 1971. Continuing economic prosperity has made Singapore a powerful influence in ASEAN.

TERRITORY AND POPULATION. The Republic of Singapore consists of Singapore Island itself, and 64 islets. Singapore Island is situated off the southern extremity of the Malay peninsula, to which it is joined by a 1,056-metre causeway carrying a road, railway and water pipeline. The Straits of Johore between the island and the mainland are 914 metres wide. The island is 647.5 sq. km in area, including the 64 adjacent islets, 20 of which are inhabited.

Census of population (1990): 2,089,400 Chinese, 380,600 Malays, 191,000 Indians and 29,200 others; total 2,690,200. In June 1996 Chinese residents numbered 2,352,700 (77.3%), Malays 430,900 (14.1%), Indians 222,100 (7.3%) and others 38,600 (1.3%); total 3,044,300. 1997 estimate, 3.3m.; density, 5,097 per sq. km. Group representation constituencies may return up to 6 Members of Parliament

(4 before 1996), one of whom must be from the Malay community, the Indian and other minority communities. Opposition parties are constitutionally guaranteed 3 seats between them. There is a common roll without communal electorates.

A Presidential Council to consider and report on minorities' rights was established in 1970.

At the elections of 2 Jan. 1997 opposition parties contested only 36 seats. The People's Action Party (PAP) won 81 seats with 65% of votes cast (77 and 61% in 1991); the Singapore People's Party gained 1 seat and the Workers' Party 1 seat. Under the 3-opposition-seats guarantee, a further non-constituency seat was awarded to the Workers' Party.

KEY HISTORICAL EVENTS. The Czechoslovak State came into existence on 28 Oct. 1918, when the Czech *Národní Výbor* (National Committee) took over the government of the Czech lands upon the dissolution of Austria-Hungary. Two days later the Slovak National Council manifested its desire to unite politically with the Czechs. On 14 Nov. 1918 the first Czechoslovak National Assembly declared the Czechoslovak State to be a republic with T. G. Masaryk as President (1918-35).

The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands

(Bohemia, Moravia, part of Silesia) and Slovakia. To these lands were added as a trust the autonomous province of Subcarpathian Ruthenia.

This territory was broken up for the benefit of Germany, Poland and Hungary by the Munich agreement (29 Sept. 1938) between UK, France, Germany and Italy.

In March 1939 the German-sponsored Slovak government proclaimed Slovakia independent, and Germany incorporated the Czech lands into the Reich as the 'Protectorate of Bohemia and Moravia'. A government-in-exile, headed by Dr Beneš, was set up in London in July 1940.

Liberation by the Soviet Army and US Forces was completed by May 1945.

Territories taken by the Germans, Poles and Hungarians were restored to Czechoslovak sovereignty. Subcarpathian Ruthenia was transferred to the USSR.

Elections were held in May 1946 at which the Communist Party obtained about 38% of the votes.

A coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb. 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police.

In Feb. a predominantly Communist government was formed by Gottwald. In May elections resulted in an 89% majority for the government and President Beneš resigned.

In 1968 pressure for liberalization culminated in the overthrow of the Stalinist leader, Antonín Novotný, and his associates. The Communist Party introduced an 'Action Programme' of far-reaching reforms.

Soviet pressure to abandon this programme was exerted between May and Aug. 1968, and finally, Warsaw Pact forces occupied Czechoslovakia on 21 Aug. The Czechoslovak government was compelled to accept a policy of 'normalization' (i.e., abandonment of most reforms) and the stationing of Soviet forces.

Mass demonstrations demanding political reform began in Nov. 1989. After the authorities' use of violence to break up a demonstration on 17 Nov., the Communist leader resigned. On 30 Nov. the Federal Assembly abolished the Communist Party's sole right to govern, and a new Government was formed on 3 Dec. The protest movement continued to grow, and on 10 Dec. another Government was formed. Gustáv Husák resigned as President, and was replaced by Václav Havel on the unanimous vote of 323 members of the Federal Assembly on 29 Dec.

At the June 1992 elections the Movement for Democratic Slovakia led by Vladimír Mečiar campaigned on the issue of Slovak independence, and on 17 July the Slovak National Council adopted a declaration of sovereignty by 113 to 24 votes. President Havel resigned as Federal president on 20 July.

On 1 Sept. 1992 the Slovak National Council adopted, by 114 votes to 16 with 4 abstentions (and a boycott by the Hungarian deputies), a Constitution for an independent Slovakia to come into being on 1 Jan. 1993.

Economic property was divided between Slovakia and the Czech Republic in accordance with a Czechoslovakian law of 13 Nov. 1992. Real estate became the

property of the republic in which it was located. Other property was divided by specially-constituted commissions in the proportion of 2 (Czech Republic) to 1 (Slovakia) on the basis of population size. Military materiel was divided on the 2:1 principle. Regular military personnel were invited to choose which armed force they would serve in.

Turn-out was 9.8% and the results were declared invalid. 55% of votes cast were against participation.

ECONOMY

Policy. Privatization was proceeding by the issue of vouchers and direct sale. By the end of 1992, 503 large joint stock companies had been privatized by the voucher scheme, and 330 large firms and 9,676 small businesses had been sold off. 3.2m. persons had invested in privatization vouchers by the end of 1994. Banking and Finance. The central bank and bank of issue is the Slovak National Bank, founded in 1993 (*Governor*, Vladimír Masár). It has an autonomous statute modelled on the German Bundesbank, with the duties of maintaining control over monetary policy and inflation, ensuring the stability of the currency, and supervising commercial banks. However, it is now proposed to amend the central bank law to

allow the government to appoint half the members of the board and force the bank to increase its financing of the budget deficit. Decentralization of the banking system began in 1991, and private banks began to operate. Foreign investors may acquire up to 25% of major banks' assets (100% of small banks), but no single investor may acquire more than 10%. There were 26 commercial banks in 1993, and 9 foreign bank branches. Total subscribed bank capital was Ks. 11,800m. in 1993. Savings accounts totalled Ks. 94,859m. in 1992.

Justice. The post-Communist judicial system was established by a federal law of July 1991. This provided for a unified system of 4 types of court: civil, criminal, commercial and administrative. Commercial courts arbitrate in disputes arising from business activities. Administrative courts examine the legality of the decisions of state institutions when appealed by citizens. In addition, there are military courts which operate under the jurisdiction of the Ministry of Defence. There is a Supreme Court, and a hierarchy of courts under the Ministry of Justice at republic, region and district level. District courts are courts of first instance. Cases are usually decided by senates comprising a judge and 2 associate judges, though occasionally by a single judge. (Associate judges are citizens in good standing over the age of 25 who are elected for 4-year terms). Regional courts are courts of first instance in more serious cases and also courts of appeal for district courts. Cases are usually decided by a senate of 2 judges and 3 associate judges, although again occasionally by a single judge. The Supreme Court interprets law as a guide to other courts and functions also as a court of appeal. Decisions are made by senates of 3 judges. The judges of the Supreme Court are nominated by the President; other judges are appointed by the National Council.

Religion. A federal Czechoslovakian law of July 1991 provides the basis for church-state relations and guarantees the religious and civic rights of citizens and churches. Churches must register to become legal entities but operate independently of the state. A law of 1993 restored confiscated property to churches and religious communities unless it had passed into private hands, co-operative farms or trading companies. An official poll of Oct. 1995 showed that 73% of the population were religious. Of these, 75% were Roman Catholic, 12% Protestant and 7% Uniate.

its soil. At a referendum on 23 Dec. 88·5% of participants voted for independence. On 25 June 1991 Slovenia declared independence, but agreed to suspend this for 3 months at peace talks sponsored by the EU. Federal troops moved into Slovenia on 27 June to secure Yugoslavia's external borders, but after some fighting withdrew by the end of July. After the agreed 3-month moratorium Slovenia (and Croatia) declared their independence from the Yugoslav Federation on 8 Oct. 1991.

Jamhuriyadda Dimugradiga

(Somali Democratic Republic)

Capital: Mogadishu

Population: 6·59m.

KEY HISTORICAL EVENTS. The origins of the Somali people can be traced back 2,000 years when they migrated to the region, displacing and absorbing an earlier Arabic people. They converted to Islam in the 10th century and were organized in loose Islamic states by the 19th century. The northern part of Somaliland was created a British protectorate in 1884. The southern part belonged to two local rulers who, in 1889, accepted Italian protection for their lands. The Italian invasion of Ethiopia in 1935 was launched from Somaliland and in 1936 Somaliland was incorporated with Eritrea and Ethiopia to become Italian

East Africa. In 1940 Italian forces invaded British Somaliland but in 1941 the British, with South African and Indian troops, recaptured this territory as well as occupying Italian Somaliland. After the Second World War British Somaliland reverted to its colonial status and ex-Italian-Somaliland became the UN Trust Territory of Somaliland, administered by Italy.

The independent Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which first became independent on 26 June 1960, and the Italian Trusteeship Territory of Somaliland. Aden Abdullah Osman was elected president of the new republic, and the legislatures of the two territories were merged to create a single national assembly.

On 21 Oct. 1969 Maj.-Gen. Mohammed Siyad Barre, the C.-in-C. of the armed forces, took power in a *coup*. He suspended the constitution and formed a Supreme Revolutionary Council to administer the country, which was renamed the Somali Democratic Republic.

Various insurgent forces combined to oppose the Barre regime in a bloody civil war. Barre fled on 27 Jan. 1991. Ali Mahdi Muhammad, of the United Somali Congress, became president in Aug. 1991, but interfactional fighting continued. In Aug. 1992 a new coalition government agreed a UN military presence to back up relief efforts to help the estimated 1·5-2m. victims of famine. In accordance with a unanimous UN Security Council resolution of 3 Nov. 1992, troops from the USA and other countries mounted a mission to ensure the supply of aid to victims of the civil war and drought. On 11 Dec. 1992 the leaders of the two most prominent of the warring factions, Ali Mahdi Muhammad and Muhammad Farah Aidid, agreed to a peace plan under the aegis of the UN, and a pact was signed on 15 Jan. 1993. At the end of March, the warring factions agreed to disarm and form a 74-member National Transitional Council.

Following the killing of 24 Pakistani soldiers of the UN 29-nation peacekeeping force on 17 June 1993, UN troops attacked and seized the stronghold of Muhammad Aidid and sought his arrest. After an escalation of violence in which hundreds of Somalis were killed, an envoy from the US President negotiated the release of hostages from Gen. Aidid and it was agreed to set up an independent commission of enquiry. After Dec. 1993 various national contingents began to leave the peace-keeping force, including US forces in March 1994. A unanimous UN National Security Council resolution of 4 Feb. 1994 laid stress on the need for reconciliation and the promotion of democratic government, and scaled down the number of UN forces in the country. On 4 Nov. 1994 the UN Security Council unanimously decided to withdraw UN forces; the last of these left on 2 March 1995.

The principal insurgent group in the north of the country, the Somali National Movement, declared the secession of an independent '**Somaliland Republic**' on 17 May 1991, based on the territory of the former British protectorate, with a capital at Hargeisa and a port at Berbera. Its president is Muhammad Ibrahim Egal. The

Somalian government rejected the secession. Clan warfare broke out in Hargeisa in Nov. 1994, and Muhammad Aidid's forces launched a campaign to reoccupy the 'Republic' in Jan. 1996.

Muhammad Farah Aidid was assassinated in July 1996 and succeeded by his son Hussein Aidid (b. 1965). Fighting between the Ali Mahdi Muhammad and the Hussein Aidid factions broke out in Dec. 1996 in Mogadishu, but on 20 Jan. 1997 the factions agreed to unify the city.

TERRITORY AND POPULATION. Somalia is bounded north by the Gulf of Aden, east and south by the Indian ocean, and west by Kenya, Ethiopia and Djibouti. Total area 637,657 sq. km (246,201 sq. miles). Estimated population: 6,590,325 (1997). Aid and relief agencies have produced a lower estimate (6m.); population counting is complicated due to large number of nomads and refugee movements due to famine and clan warfare. Vital statistics, 1997 estimate (rates per 1,000 population): Birth, 45.49; death, 18.34; infant mortality, 125.8; growth, 3.03%. Life expectancy in 1997, 46.23 years.

The country is administratively divided into 18 regions (with chief cities): Awdal (Saylac), Bakol (Xuddur), Bay (Baydhabo), Benadir (Mogadishu), East (Boosaso), Galgudug (Duusa Marreeb), Gedo (Garbahaarrey), Hiran (Beledweyne), Central Juba (Jilib), Lower Juba (Kismaayo), Mudug (Gaalkacyo), Nogal (Gaarowe), North-West (Hargeysa), Sanaag (Ceerigabo), Central Shabele (Jawhar), Lower Shabele (Marka), Sol (Las Anod), Togder (Burao). KEY HISTORICAL EVENTS. The Dutch first established a trading post at the Cape in 1652. The hinterland was then inhabited by the Khoisan peoples and, further east and north, by Bantu-speaking peoples. There was some white settlement over the next century. During the Napoleonic Wars, Britain took possession of the Cape and later many Boer (Dutch) settlers migrated north-east in the Great Trek. In the mid-19th century Britain ruled the Cape Colony and Natal along the coast of southern African, while in the interior the Afrikaners

or Boers, descendants of Dutch settlers, established their own independent republics in the Transvaal and the Orange Free State. Some Bantu African peoples remained unconquered, notably the Xhosas east of the Cape Colony and, north of Natal, the Zulus, whose leader Shaka (died 1828) had formed a powerful kingdom in a great political and demographic upheaval called the *Mfecane*. The Sothos, who formed another new state under Moshoeshoe, resisted the Boers' encroachment on their land, until in 1868 Britain granted Moshoeshoe's request for a protectorate over Basutoland. Meanwhile, British settlers emigrated to Cape Colony and Natal in the 19th century, and from the 1860s many Indians were brought to Natal as indentured labourers on the sugar plantations. The population of the Cape Colony included many Afrikaners as well as the 'Coloured' community, descendants of Dutch settlers and indigenous Khoisan women and of Malay slaves. Most coloureds spoke Afrikaans, the offshoot of Dutch spoken by the Boers.

Britain annexed the Transvaal in 1877, and fought in 1879 with the Zulus who, under King Ketshwayo, won a victory at Isandhlwana but were then defeated at Ulundi. Britain restored independence to the Transvaal (South African Republic) in 1884 but annexed Zululand in 1887. Both the British and the Boers fought African resistance for many years, the last major rising being in Natal in 1906. However, the British and Boers were also rivals for supremacy, especially after the discovery of diamonds at Kimberley in 1867 and of gold in the Transvaal in 1884. This led to an economic boom and wealth for many, of whom Cecil Rhodes, for a time prime minister of the Cape, was the dominant entrepreneurial figure.

In the South African War of 1899–1902, the British defeated and annexed the Boer republics. The Boer republics were given self-government again in 1907, and on 31 May 1910 Cape Colony, Natal, the Transvaal and the Orange Free State combined to form the Union of South Africa, a self-governing dominion under the British Crown. The Union was ruled by the white minority; the franchise accorded to some non-whites in Cape Colony was kept, but not extended to the other three provinces.

The Union's economy was based on gold and diamond mining, for which there was organized recruitment of migrant African labourers from Union territory and other parts of Africa. Pass Laws were in operation, controlling Africans' movements in the towns and industrial areas, where they were regarded officially as temporary residents and segregated in 'townships'. By an Act of 1913 87% of the land was reserved for white ownership only, much of it being owned by white farmers while Africans farmed as tenants or squatters.

African protests at segregation and lack of political rights were led by the African National Congress (ANC). From 1918 there were also many African labour protests. African rights were further suppressed after the coming to power in 1924 of the

Afrikaner Nationalist Party, led by J. B. Hertzog. Hertzog's government secured recognition of full independence for South Africa by the Statute of Westminster on 11 Dec. 1931. It also promoted the status of the Afrikaans language and introduced new segregation measures. From 1948 the National Party government reinforced the segregation system, developing it into the system of Apartheid, enforced under prime ministers Malan (1948–54), Strijdom (1954–58), Verwoerd (1958–66) and Voerster (1966–78). The shooting by police of protesters against the Pass Laws at Sharpeville on 21 March 1960 led to a major crisis from which, however, the government emerged only stronger. The ANC and the Pan African Congress were banned, and the leaders forced to operate from exile after internal ANC leaders, including Nelson Mandela, were gaoled in 1964.

On 31 May 1961 South Africa became a Republic outside the Commonwealth.

When P. W. Botha became prime minister in 1978, elements of the Apartheid system were modified. Africans were allowed to form legal trade unions, creation of Black local government authorities in cities was enacted, and the Acts banning marriage and sexual relations between people of different races were repealed.

A new constitution, approved in a referendum of white voters on 2 Nov. 1983 and in force from 3 Sept. 1984, created a new three-part parliament, with a House of Assembly for the Whites, a House of Representatives for the Coloureds, and a House of Delegates for the Indians; Africans remained without representation. At the same time an executive presidency was created, to which Botha was elected. Boycotts ensured low polls in the elections for the Coloured and Indian houses held on 22 and 28 Aug. 1984 respectively. The Whites retained their House of Assembly as elected in 1981 with its massive National Party majority.

From late 1984 Blacks in the cities and industrial areas staged large-scale protests, including strikes. Largely spontaneous—though the gaoled ANC leader Mandela was seen as the Africans' hero—the protests involved large-scale violence. In June 1986 a state of emergency was imposed. Foreign condemnation of this led to the first economic sanctions against South Africa imposed by a number of countries including the USA.

By 1989 the restrictions of Apartheid began to be removed, and the government announced its willingness to consider the extension of Black South Africans' political rights. In Feb. 1990 a 30-year ban on the African National Congress (ANC) was lifted and its leader, Nelson Mandela, released from prison.

At the Whites-only referendum on 17 March 1992 on the granting of constitutional equality to all races turn-out was 85.6%. 1,924,186 (68.7%) votes were in favour; 875,619 against.

On 22 Dec. 1993 parliament approved (by 237 votes to 45) a Transitional Constitution paving the way for a new multi-racial parliament which was elected on 26–29 April 1994 and South Africa rejoined the Commonwealth. On 9 May 1994 Nelson Mandela was elected President and sworn in the following day. A new Constitution was signed into law in Dec. 1996. Also in Dec. 1996, South Africa set up the Truth and Reconciliation Commission in an effort to rescue the country from denial and lies about the past, to give dignity to those who had suffered, and to extend a hand of forgiveness to the perpetrators of civil crimes.

TERRITORY AND POPULATION. South Africa is bounded in the north by Namibia, Botswana and Zimbabwe, north-east by Mozambique and Swaziland, east by the Indian Ocean and south and west by the South Atlantic with Lesotho forming an enclave. Area: 1,224,691 sq. km. This area includes the uninhabited Prince Edward Island (41 sq. km) and Marion Island (388 sq. km) lying 1,900 km south-east of Cape Town and taken possession of in Dec. 1947. In 1994 Walvis Bay was ceded to Namibia and Transkei, Bophuthatswana, Venda and Ciskei were re-integrated into South Africa.

At the census of 1991 the population was 37,713,951 (19,055,846 females; 5,061,242 Whites). Official population estimate, Oct. 1995, (in 1,000): 41,544 (females, 21,167; urban, 20,647; Whites, 5,224; Coloureds, 3,508; Asians, 1,015; Blacks, 31,461). Growth rate, 1995, 1.9%. Urban population in Oct. 1995 was 49.7% (20,647,000).

Due to under-registration and the high percentage of late registration, the collection of Black birth information was discontinued in 1981–89. English is the sole language of command and instruction in the armed forces.

At the 1991 census 67,387 persons declared themselves bilingual in Afrikaans and English, and 685,120 spoke other languages, 8 of which are recognized by the Constitution and promoted by a special board.

CLIMATE. There is abundant sunshine and relatively low rainfall. The south-west has a Mediterranean climate, with rain mainly in winter, but most of the country has a summer maximum, though quantities show a decrease from east to west. Pretoria. CONSTITUTION AND GOVERNMENT. A Transitional Constitution was adopted on 27 April 1994 to be in force for 5 years. Under it the National Assembly and Senate form a *Constitutional Assembly* (chaired by Cyril Ramaphosa, b. 1952; ANC) which had the task of adopting a definitive constitution by a two-thirds

majority. This was adopted on 9 May 1996 and signed into law in Dec. 1996. The 1994 Constitution provides for an executive *President*, elected by parliament, *Deputy Presidents*, nominated one each by parties gaining at least 20% of electoral votes, and a parliament of 2 houses: a National Assembly and a National Council of Provinces. The 1999 Constitution defines the powers of the President, Parliament, the national executive, the judiciary, public administration and the security services. It incorporates a Bill of Rights appertaining to education, housing, the food and water supply and security as well as political rights. A section defines the relationship between central and provincial aspect; this section was challenged by the Constitutional Court and is being re-drafted.

A *Constitutional Court*, consisting of a president, a deputy president and 9 other judges, was inaugurated in Feb. 1995. Of the Court's judges, 6 are appointed by the President of the Republic on the advice of the Judicial Service Commission, and 4 are appointed from among the judges of the Supreme Court. A Constitutional Court judge is appointed for a non-renewable term of 12 years, but must retire at the age of 70. The Court reviews the actions of the legislature, executive and judiciary in the light of the Bill of Rights, and can overturn legislation. Its remit includes approval of the post-1999 constitution prior to its adoption by parliament.

The *National Assembly* is a legislature consisting of 400 members directly elected for 5 years, 200 from a national list, and 200 from provincial lists in the following proportions: Eastern Cape, 28; Free State, 14; Gauteng, 44; KwaZulu-Natal, 42; Mpumalanga, 11; Northern Cape, 4; Northern Province, 25; North-West, 12; Western Cape, 20. Parties gaining at least 5% of votes are entitled to Cabinet representation. The 9 provincial parliaments are elected at the same time, and candidates may stand for both, choosing if elected to both whether to sit in the national or provincial assembly; in the former case the runner-up is elected to the provincial assembly. The *Senate* consists of 90 members (10 from each province) indirectly elected by the provincial legislatures by proportional representation.

Bills may be introduced in either house, but must be passed by both. If a bill is rejected by one house, it is referred back to both after consideration by a joint National Assembly-Senate committee. Bills relating to the provinces must be passed by the Senate.

Parliamentary elections were held on 26–28 April 1994 (extended to 29 April in some areas). The electorate was 22.7m.; turn-out was 86%. 19 parties stood. The African National Congress (ANC) gained 252 seats with 62.7% of votes cast, the National Party (NP) 82 with 20.4%, the Inkatha Freedom Party 43 with 10.5%, the Freedom Front (FF) 9 with 2.2%, the Democratic Party 7 with 1.7%, the Pan-Africanist Congress (PAC) 5 with 1.2% and the African Christian Democratic Party 2 with 0.5%.

The party composition of the Senate in Dec. 1994 was: ANC, 10; NP, 17; Inkatha, 5; FF, 5; DP, 3. Its *President* is Dr Kobie Coetsee.

A Government of National Unity took office on 6 May 1994 which, after the withdrawal of NP members, in March 1998 comprised:

President: Nelson Mandela (b. 1918; ANC; elected 9 May 1994, sworn in 10 May).

Provincial Government. The 1994 Transitional Constitution provides for 9 provinces, which may with a two-thirds majority adopt a constitution for the province in question. A provincial constitution may not be inconsistent with the provisions of the transitional Constitution except that different legislative and executive structures may be provided for. A provincial constitution only becomes effective after the Constitutional Court has certified that it is in accordance with the provisions of the Constitution. Each province has a provincial legislature in which the legislative authority of that province vests and which accordingly has the power to make laws for the province. A provincial legislature must consist of a minimum of 30 and a maximum of 100 members elected by proportional representation. A provincial legislature is elected for 5 years or less in certain circumstances. If a legislature adopts a motion of no-confidence in the executive council of the province, including the Premier, the Premier must resign or dissolve the legislature for an election.

The executive council of a province consists of the Premier as chairperson and a maximum of 10 members who are proportionally divided between all parties holding at least 10% of the seats in the provincial legislature. The Premier allocates portfolios to the parties in question after consultation with the respective leaders and appoints members of the council.

A provincial legislature has legislative authority and an executive council has executive authority with regard to the following functional areas or topics: Agriculture, education (excluding universities and technikons), health service, welfare services, housing, local government, police, cultural affairs, nature conservation, soil conservation, the environment, animal control and diseases, abattoirs, markets and pounds, gambling, language policy, public media, regional airports, transport, road traffic, regional planning and development, provincial sport and recreation, tourism, trade and industrial promotion, consumer protection, indigenous law and customary law, traditional authorities, and urban and rural development. A province does not automatically enjoy authority over these matters. Existing laws on these topics are administered by the national government until a province requests a transfer of them. The condition for such a transfer is that the province must have the administrative capacity to perform the powers and functions in question.

(For details of the individual provinces *see below*).

Local Government. Elections were held on 1 Nov. 1995 for 688 metropolitan, town and rural councils. The electorate was 12.3m.; it is estimated that only 75% of eligible voters were registered. The ANC gained 66.37% of all votes cast and a majority in some 400 councils; the NP, 16.22%; the Freedom Front, 5%. Elections in Western Cape and KwaZulu-Natal were postponed until 29 May and 26 June 1996 respectively.

DEFENCE. The Department of Defence (DoD) is in the process of radical change involving its design, structure and force levels. Transformation is being driven by a White Paper on Defence and a major Defence Review which, in turn, has resulted from dramatic changes in the strategic environment. The country has been welcomed back into many regional and international organizations and is now expected to play an active role in peace and security in Africa and Southern Africa in particular. The Defence Review will consist of three reports, of which the first two have been completed and approved by Parliament.

The first report presented options for the design of a core force. The recommended option was styled 'The Growth Core Force Design'. This provided for a combat element consisting of 22,000 full-time component members and 69,400 members of the part-time component. It was costed at a little over R5bn. In addition the combat element will be backed by approximately 44,000 full-time civilian and

military members in the support and command and control roles. The provision of new equipment for the SANDF formed part of the recommendations. This includes submarines and corvettes for the Navy, fighter, maritime control and transport aircraft for the Air Force and new armoured vehicles. Further planning and decisions will take place to determine what is militarily, fiscally and industrially viable.

The second report dealt with the structure of the Department. The structure of the DoD has been redesigned so that the top structure, incorporates the Minister, Deputy Minister and the DoD Head Office, collectively known as the Ministry of Defence. The Head Office will combine as an integrated whole the former Arms of Service Headquarters, Defence Headquarters and the Defence Secretariat. The divisions aim to be fully operational on or as soon as possible after 1 April 1998. The main divisions will formulate policy and be responsible for the provision, preparation and support of the forces necessary to fulfil any DoD assignments. As a new feature, and following certain international trends, the employment of these forces will fall under a Joint Operations Division.

The new structure of the DoD will still contain four Arms of the Service, namely the SA Army, SA Air Force, SA Navy and SA Medical Service. However, there will be new intermediate structures, progressively replacing the present territorial commands, for which various options have been approved in principle. The number of units on the ground and their shape and functions will be determined in the final planning stages of the Defence Review and the transformation process. It is not possible at this stage to provide specific details on the organization, strength, armaments and equipment of each individual arm of the service.

The full-time and part-time components of the DoD are being embodied in a 'one force concept' and the SANDF will be an all volunteer force.

The final force design and shape of the DoD and its human resource content has yet to be decided. A key element is a major improvement in the ration of combat troops to support troops. It has been recommended that a strength of some 70,000 personnel, including civilians, will provide a viable full-time force component. The present regular content of the DoD is approximately 95,000 personnel.

It will be necessary, therefore, to proceed with a rationalization programme to bring the force strength down to the approved level. This will be accomplished in part by normal attrition, voluntary severance packages, demobilization, the termination of contracts and transfers to other departments. However, there will inevitably be an element of retrenchment for which the procedures, including compensation, are being formulated.

The establishment of the Service Corps is designed to assist with the re-integration of ex-service members into civil society with appropriate vocational and life skills. Planning is in hand to set up Service Corps centres in each province of South Africa in conjunction with the relevant authorities.

The Part-time Component is an integral and essential element of the SANDF and will form a key part of the core defence capability. The PTC has two main elements; conventional units and territorial units. The conventional units will be trained and prepared to conduct the land battle in conjunction with the regular combat units. The Part-time Conventional Force will now consist of one division, with divisional troops and three similarly organized brigades.

The territorial units are responsible for area defence and provide assistance to the SA Police Service in the prevention of crime and violence and the maintenance of public order.

Army. Currently, equipment includes some 250 Mk 1A Olifant main battle tanks and about 180 Rooikat armoured combat vehicles. The Army numbered 54,300 in 1998.

There is a paramilitary South African Police Service 140,000 strong.

Navy. The Navy includes 3 French-built diesel submarines of which 1 is fully operational, 6 fast missile armed patrol craft (3 more in reserve), 8 coastal minesweepers, 3 inshore patrol craft, 1 British-built survey ship, 1 fleet replenishment ship and a naval-manned Antarctic supply ship, the latter 2 with helicopter facilities. There are additionally some 6 service craft. Forces are based at Simonstown and Durban and 6 reserve units are situated in major centres.

Navy personnel in 1998 totalled 8,000.

Air Force. There is 1 fighter-bomber squadron with 30 Mirage F1-AZ ground attack aircraft and another with Atlas Cheetahs including some equipped for reconnaissance; and 1 coastal patrol squadron with C-47s. Transport squadrons have 7 C-130B Hercules, more than 20 C-47s, 10 Caravan 1s, 4 Boeing 707s and 3 twin-jet HS.125s. 3 helicopter squadrons have 60 Alouette IIIs and 48 Oryx. PC-7s are used for primary training, followed by advanced training on Impalas and Atlas Cheetahs, weapons training on Impalas, and multiengine crew training on C-47s. Total strength (1998) was about 11,000 with 234 combat aircraft and at least 14 armed helicopters.

INTERNATIONAL RELATIONS

Membership. South Africa is a member of the UN, the Commonwealth (except during 1961-94), SADC and the OAU.

ECONOMY

Policy. A Reconstruction and Development Programme (RDP) was instituted under a government minister in 1994 (since 1996 the minister of finance) to run until 1999. Its policy aims are to meet basic needs, develop human resources, build the economy and democratize the state and society, and include as targets: Redistributing 30% of agricultural land; raising the annual number of houses built from 50,000 to 0.3m.; providing safe drinking water for 12m. persons; providing sanitation for 21m.; creating 0.3m. non-agricultural jobs; reversing privatization 'contrary to the public interest'; introducing anti-trust legislation; 'de-racializing' business ownership; improving industrial relations. In 1996 a decision was taken to integrate the RDP Fund into the budgets of the various delivery departments.

Budget. Total revenue and expenditure of the central government's State Revenue Account in R1m.:

	1994-95	1995-96	1996-97	1997-98
Revenue	111,950	127,269	144,857	161,976
Expenditure	140,231	157,360	173,659	186,747

In December 1997 the Minister of Finance released a 3-year budget policy statement, which sets out the following spending and revenue targets (in Rbn.):

	1998-99	1999-2000	2000-01
Revenue	178.1	195.7	216.2
Expenditure	202.1	218.5	241.5

The main sources of State Revenue Fund, 1997-98, were: Income tax, R93,604m.; sales tax/VAT, R38,880m.; excise duties, R7,031m.; customs duties, R6,965m.; fuel levy, R10,795m. Consolidated main expenditure of government: education, R40,270m.; defence, R10,716m.; health, R20,223m.; social security; R18,433m.; housing, R4,162m.; economic services, R18,885m.; interest on public debt, R38,549m.

From Sept. 1991 VAT at 10% replaced the 13% general sales tax. From 7 April 1993 the rate at which VAT is levied was increased from 10% to 14%. Corporate tax was reduced from 50% to 48% as from April 1991. In the March 1993 Budget the company tax rate was lowered from 48% to 40% of taxable income, but an additional tax of 15% on distributed profits was introduced.

Public debt on 31 March 1997, R309,507m., of which R11,523m. was foreign debt; internal debt, R294,332m. Growth in GDP in 1996 was 3%, and inflation in 1997 8%.

Currency. The unit of currency is the *rand* (ZAR) of 100 *cents*. There are notes of R10, R20, R50, R100 and R200 and coins of 1c, 2c, 5c, 10c, 20c, 50c, R1, R2 and R5. Gold and foreign exchange reserves totalled R26,540m. on 30 Nov. 1997. A single free-floating exchange rate replaced the former 2-tier system on 13 March 1995.

Banking and Finance. The central bank and bank of issue is the South African Reserve Bank (established 1920), which functions independently. Its *Governor* is Dr Chris Stals. Total deposits, 30 Nov. 1997, R8,094m.; assets, R45,756m.

At 31 Oct. 1997 there were 43 registered banks, 5 mutual banks and 9 branches of foreign banks, collectively having total deposits of R416,373m. and total assets of R544,079m. There were 59 foreign banks with representative offices as at 31 Oct. 1997. Post Office Savings Bank deposits (31 Dec. 1993), R1,191m.

The Banks Act, 1990 (Act No. 94 of 1990) governs the operations and prudential requirements of banks. As at 31 Oct. 1997 the minimum capital adequacy requirement was 8%.

There is a stock exchange at Johannesburg (JSE). Foreign nationals have been eligible for membership since March 1996.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. There were (1996) 23 coal-fired power stations, 1 nuclear, 1 bagasse, 10 hydro-electric, 3 pumped storage and 3 gas turbine in service. Production available for consumption (1996) was 187,837m. MWh.

Oil and Gas. In 1994 reserves were sufficient to yield 30,000 bbls. a day of refined petroleum products until 2001 from gas produced at sea and converted on land. In 1995, 8,900,000 metric tonnes of oil were produced. 72,000 metric tonnes of natural gas and 348,362 tonnes of condensate were brought ashore in 1995.

Water. South Africa's average annual rainfall of about 470 mm is well below the world average. The unevenly distributed rainfall and high evaporation rate greatly affects the reliability and variability of river flow. Only about 62% or 33,000m. cu. metres of the mean annual run-off can be exploited economically. In addition about 5,400m. cu. metres may be obtainable from underground sources. Government activities are governed by the Water Act, 1956, which is due to be replaced by a new Water Act during 1998. It is administered by the Department of Water Affairs and Forestry which manages water quantity and quality as well as the demand for the resource. A Water Research Commission was established in 1971 to co-ordinate and promote water research. Water availability is distributed poorly in relation to regions of economic growth and major inter-basin water transfer schemes are therefore a feature of the South African infrastructure. The latest such scheme under construction is the Lesotho Highlands Water Project which will divert the Orange River headwaters within Lesotho through tunnels into the Vaal River System which serves an area where about 60% of the industrial production of the country is generated. Lesotho is to receive royalties in exchange.

Black farmers were farming 17m. ha and 55,000 Whites with 1.1m. Black labourers were farming 102m. ha. Dispossessed landowners are entitled to restitution from the state, though the rights of present landowners must be respected and compensation paid.

Much of the land suitable for mechanized farming has unreliable rainfall. Of the total area natural pasture occupies 69% (58.2m. ha) and planted pasture 2% (2m. ha). Annual crops and orchards are cultivated on 9.9m. ha of dry land and 1.2m. ha under irrigation. There were some 66,000 commercial farming units in 1996.

Cotton-growing is undertaken by some farmers, the plant being found a better drought resistant than either tobacco or maize. Viticulture and fruit-growing are important, and were valued at R5,106m. for 1996.

In 1996 the gross value of agricultural production was R39,190m. (field crops, R14,457m.; livestock products, R15,935m.; horticultural products, R8,797m.).

The Employment Standards Act, 1997, shortened the working week to 40 hours.

The Labour Relations Act, 1996, aims to move industrial relations from an adversarial approach towards co-operation. It encourages the establishment of workplace forums and imposes collective bargaining in manufacturing industries. The Act set up the *Commission for Conciliation and Arbitration*.

Trade Unions. In 1994 there were 213 registered and 65 unregistered trade unions. Total membership of all trade unions (registered and unregistered) represented about

23.7% of the economically active population. There were 9 trade union federations, but most unions were not affiliated to these. The Congress of South African Trade Unions (COSATU; *General Secretary*, Sam Shilowa) has formed links with the ANC. It had 1.3m. members in 1994.

FOREIGN ECONOMIC RELATIONS. International sanctions on trade with South Africa were lifted by 1993.

SOCIAL INSTITUTIONS

Justice. The common law of the republic is the Roman–Dutch law—that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the former Cape Province, and it has also largely influenced civil and criminal procedure throughout the republic. In all other matters, family relations, property, succession, contract, etc., Roman–Dutch law rules, English decisions being valued only so far as they agree therewith.

The Supreme Court of South Africa is constituted as follows: (i) The Supreme Court of Appeal consists of a Chief Justice, a Deputy Chief Justice and a number of judges as the President may stipulate. It is the highest court of appeal, except in constitutional matters, and its decisions are binding on all courts. Except for contempt of court in *faciae curiae*, it has no original jurisdiction, but is purely a court of appeal. (ii) The High Courts may decide any constitutional matter, except a matter that only the Constitutional Court may decide, or a matter which is assigned to another court

of a status similar to a High Court by an Act of Parliament. The High Courts are divided into Provincial and Local Divisions. (iii) Provincial Divisions. The Judge President of a provincial division may divide the area under his jurisdiction into circuit districts. In each such district there shall be held at least twice in every year and at such times and places determined by the Judge President, a court which shall be presided over by a judge of the division in which that district is situated. Such a court is known as the circuit local division for the district in question and is deemed to be a local division. (iv) Local Divisions. The judges hold office till they attain the age of 70 years. A judge is expected to be available to perform service for an aggregate of 3 months a year until the age of 75. No judge can be removed from office except by the President after the National Assembly (at least two-thirds support from its members) has called for such judge to be removed on the grounds of incapacity, incompetence or gross misconduct.

The 9 provinces are further divided into 435 magisterial districts, each with a magistrate's court having a prescribed civil and criminal jurisdiction. There are (1998) 1,566 magistrates appointed. From this court there is an appeal to the provincial divisions of the High Court, and thence to the Supreme Court of Appeal. Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a judge. In addition, several regional divisions consisting of a number of districts have been constituted. Convictions of such courts are not subject to automatic review by a judge, but to appeal in the normal way.

All criminal and civil cases are dealt with by judges (in the Supreme Courts) and magistrates (in the lower courts). Judges and magistrates are entitled to take judicial cognizance of customary (indigenous) laws and must, where relevant, apply them. A limited civil and criminal jurisdiction is conferred upon the Black chief or headman over his own tribe.

In 1997 there were 114 small claims courts, which have been introduced in a number of areas since 1985. These courts (where Commissioners preside) have civil jurisdiction only, limited by the quantum of damages and the nature of the claim.

The death penalty was abolished in June 1995. No executions had taken place since 1989.

Education. Until April 1994 the provision of education was assigned to various state departments responsible for executing education policy, which was determined by the Minister of National Education. These state departments were largely racially-based, in accordance with the tricameral system then in effect.

The 1994 Transitional Constitution introduced a new education system. Education up to tertiary level falls within the legislative authority of the provinces, though the national parliament may legislate in this field to ensure nationwide uniform standardization and effective implementation.

In 1994 the Council of Education Ministers was set up to oversee the operation of the new system. It comprises the national Minister and Deputy Minister of Education

and the members of the provincial executive councils responsible for education. The Council meets once a month.

It is intended that the first 10 years of schooling should be free and compulsory, but for economic reasons only the first year's primary schooling was free in 1995.

There is a policy to change syllabuses to remove bias, factual incorrectness and insensitivity without replacing textbooks. In 1996 over 25% of adults were illiterate.

Pre-primary Education. In 1995 there were 286,663 children and 10,525 teachers in 3,060 schools.

Primary and Secondary Education. In 1995 there were 8,060,506 children and 213,890 teachers in 20,428 primary schools; 3,571,395 pupils and 128,784 teachers in secondary schools.

Higher Education. In 1994 a Commission on Higher Education was appointed to investigate this sector in the light of the new goals and policies.

In 1995, there were 16 universities, 1 Christian university and 1 medical university, with 617,897 students and 27,099 academic staff. There are also 2 open (distance) universities, and 30 institutes of higher education (12 in agriculture, 4 in nursing and 14 technikons).

All the universities are open to all population groups but each has a different cultural ethos and the medium of instruction is English and/or Afrikaans. Technikons provide education at an advanced tertiary level for a variety of technical, commercial and general courses of study. They have the right to confer degrees. Technical colleges are mainly responsible for the training of apprentices and the education, on a part-time basis, of persons not subject to compulsory school attendance.

In 1993 there were 93,044 students and 3,735 teachers in technical colleges, 59,918 students and 4,865 teachers in teacher training colleges and 137,168 students and 2,415 teachers in technikons.

Adult literacy rate in 1995 was 81.8%. Public expenditure on education (1995) was R32,293m. (6.8% of GNP).

Health. In 1994 there were 26,452 medical practitioners of whom 7,167 had specialist qualifications, 4,029 dentists, 331 dental specialists, 9,622 pharmacists and 158,538 nurses and midwives. In 1995 there were 834 hospitals with about 150,000 beds, of which 18% were provided by private medical care.

Treatment in the public health service covers 75–80% of the population and is free of charge for the indigent, children under 6 years and pregnant mothers. Other patients are charged on a sliding scale based on their means. 60% of private health care is funded by medical insurance schemes and the remainder by privately paying patients. The free medical treatment scheme amounts to about R500m.

Welfare. Under the Social Assistance Act, 1992, grants are made to the aged, war veterans, blind and disabled, as well as maintenance grants to single mothers with inadequate income, and foster child grants. Assistance in the form of social relief is given to individuals and families unable to meet their primary needs.

The social welfare service is a partnership between the private and the public sectors. Services are delivered by private welfare organizations which are subsidized by the state.

In 1993 there were 1,742 registered private welfare organizations, partially funded by the state for services rendered. All are registered under the National Welfare Act, 1978.

The changing political situation necessitated the development of a new welfare dispensation to cope with the demands of the 'new' South Africa. Welfare services are divided into service fields, namely, family and child care, care of the aged, care of the disabled, drug dependent care, care of offenders and social security.

The Child Care Act, 1983 (as amended in 1991), is designed to protect children against neglect, abuse, ill-treatment and exploitation. The Act provides for preventive child care services, foster care and also for various children's allowances and financial assistance to children's homes and creches. The Primary School Nutrition Scheme was set up in 1994 to alleviate hunger which affects school attendance and

concentration. It is administered jointly by the Department of Health and the Department of Education.

Policy regarding aging has moved away from care of the aged to age management. A national Discussion Group on Aging was instituted in 1994 to advise the Department of Welfare on legislation, policy, standards and criteria on financing. The consumers of services are involved in the design of affordable, accessible and equitable age management.

The National Strategy against the Abuse of Alcohol and other Drugs directs research into drug abuse. The Drug Advisory Board advises the Minister of Welfare and Population Development and brings together the voluntary and government agencies working on drug abuse.

The Committee for Marriage and Family Life of the South African Welfare Council was commissioned by the government to promote the quality of family life.

Excessive population growth and widespread illegal immigration and a low rate of economic development are seen as two facets of the same problem. The Chief Directorate Population Development is located in the Department of Welfare to ensure that population factors and objectives (accommodating to increasing population size, influencing demographic processes—especially high fertility) are integrated in overall socio-economic development policy. These are embodied in the government's Reconstruction and Development Programme (RDP).

KEY HISTORICAL EVENTS. The modern Spanish state was founded with the marriage in 1469 of the heirs of the crowns of Castile and Aragón, respectively Isabel I and Fernando V. Under their joint reign Spain recovered Granada, the last Islamic territory in the Iberian peninsula, and sponsored the modern discovery of America, both events in 1492. This dynasty ended in 1700 and subsequently the French Bourbon dynasty was enthroned, with Felipe V as its first king; the present monarch, Juan Carlos I, installed

in 1975, is his direct descendant.

Queen Isabel II, who came to the throne in 1833, was deposed and exiled in 1868 by a liberal revolution. A provisional government, headed by the Duke de la Torre, established universal male suffrage and convened a constituent election for Jan. 1869. The Cortes (Parliament) approved a new constitution, and the deputies chose as the new king Amadeo I, of the then reigning Italian dynasty of Savoy. He reigned as a scrupulous democrat from 2 Jan. 1871, but unable to adapt to Spanish politics, abdicated on 11 Feb. 1873. The Cortes immediately proclaimed a republic.

The first brief republican experience saw great instability. On 29 Dec. 1874, in Sagunto, Gen. Martínez Campos led a *coup* and restored the Bourbon monarchy, with Alfonso XII as king, the son of the exiled Queen Isabel II. A general election took place early in 1876 and the new Cortes approved a constitution which was effective until 1923. This period, known as the Restoration, saw the reimposition of a restricted suffrage (the universal one was not re-established until 1890), and was dominated by two parties, Conservative and Liberal, led respectively by A. Cánovas del Castillo and P. M. Sagasta, both of whom served as prime minister several times in the last quarter of the 19th century.

Alfonso XII died in 1885. His wife María Cristina of Hapsburg was regent till their son, Alfonso XIII, reached his majority in 1902.

During the period of the Restoration, Spain still had a very backward economy and very low standards of living. At the same time Spain was embroiled in external conflicts, with wars in northern Morocco and in the remaining colonies of Cuba and the Philippines. The US intervention led to the cession of Philippines, Puerto Rico and Guam, and also of Cuba which formally became independent in 1901.

Spain was neutral in the First World War, leading to a boom in industry and trade. A new industrial working class was then emerging, amongst a climate of industrial unrest and with a growing opposition to conscription for the war in the north of Morocco.

In Sept. 1923 Gen. Primo de Rivera led a *coup* and abolished the 1876 constitution, closed down the Cortes and governed by decree until his resignation in Jan. 1930. During his dictatorship the war in the Spanish Protectorate in Morocco came to an end.

An interim period followed until the municipal elections of 12 April 1931, which were won by a republican-socialist coalition in Madrid, provincial capitals and other urban areas. Two days later Alfonso XIII exiled himself and the republic was proclaimed a second time. In June a new Cortes was elected; it drafted a new constitution, which was in force by Dec. 1931. Complete religious freedom and an agrarian reform were the significant landmarks of this period. An election in 1932, for the first time with female suffrage, established a very conservative coalition government, which resulted in serious rioting in Oct. 1934. An election in Feb. 1936 gave power to the Popular Front, a coalition of all left parties, including the then tiny Communist party.

On 18 July 1936 the colonial army in northern Morocco, led by Gen. Francisco Franco, and some other military units rebelled against the government. The rebellion

was crushed in a few days in Madrid, Barcelona, Valencia and almost all industrial and mining areas. But the rural regions were easily controlled by the rebels who received substantial help in men, tanks and aircraft from Germany, Italy and Portugal. The government, however, suffered from the 'non-intervention' policy declared by the democracies, notably Britain and France. The International Brigades, a volunteer force, and conditional aid from the USSR were the only significant foreign support received by the Spanish republic. Franco's forces finally overcame all resistance and the war ended on 1 April 1939. Gen. Franco was chief of state till his death on 20 Nov. 1975. His brutal régime was modelled on those of the Axis countries. Nevertheless, Franco's Spain did not take part in the Second World War. The 15 years following the Civil War saw extremely depressed economic conditions.

A nominal monarchy existed from 1947, but with a vacant throne until 1969 when the francoist state accepted the future succession in favour of Juan Carlos de Borbón, grandson of Alfonso XIII. Franco recognized the independence of Morocco in 1956 and ceded the small Spanish protectorate to the Moroccan Government. Spain also withdrew from Equatorial Guinea in 1968 but continued to occupy Western Sahara until 1976.

On 22 Nov. 1975, following Gen. Franco's death, Juan Carlos was proclaimed king. A gradual return to democracy began. A referendum held in Dec. 1976 endorsed some key reforms making possible a free election on 15 June 1977. The elected bicameral Cortes drafted a new constitution which came into force on 29 Dec. 1978.

Languages. The Constitution states that 'Castilian is the Spanish official language of the State', but also that 'All other Spanish languages will also be official in the corresponding Autonomous Communities'. At the last census (1991) Catalan (an official EU language since 1990) was spoken in Catalonia by 68% of people, Balears (66.9%), Valencian Community (51%, where it is frequently called Valencian), and in Aragón, a narrow strip close to the Catalanian and Valencian Community boundaries. Galician, a language very close to Portuguese, was spoken by a majority of people in Galicia (91%); Basque by a significant and increasing minority in the Basque Country (26.3%), and by a small minority in north-west Navarra (12%). It is estimated that one third of all Spaniards speaks one of the other 3 official languages as well as standard Castilian. In bilingual communities, both Castilian and the regional language are taught in schools and universities.

In the Basque region terrorist activity by the separatist organisation ETA has brought a reaction from the local population in the form of a strong peace movement. In 1994 it was believed that 10 ETA units were operational in Spain.

CLIMATE. Most of Spain has a form of Mediterranean climate with mild, moist winters and hot, dry summers, but the northern coastal region has a moist, equable climate, with rainfall well-distributed throughout the year, mild winters and warm summers, and less sunshine than the rest of Spain. The south, in particular Andalusia, is dry and prone to drought. At the Earth Summit in New York in 1997, the President of the Spanish Government, José María Aznar, highlighted the problem of desertification in Spain and the need to combat it.

ROYAL HOUSE. The reigning king is Juan Carlos I, born 5 Jan. 1938. The eldest son of Don Juan, Conde de Barcelona, Juan Carlos was given precedence over his father as pretender to the Spanish throne in an agreement in 1954 between Don Juan and General Franco. Don Juan, who resigned his claims to the throne in May 1977, died on 1 April 1993. King (then Prince) Juan Carlos married, in 1962, Princess Sophia of Greece, daughter of the late King Paul of the Hellenes and Queen Frederika. *Offspring:* Elena, born 20 Dec. 1963, married 18 March 1995 Jaime de Marichalar; Cristina, born 13 June 1965, married 4 Oct. 1997 Iñaki Urdangarín; Felipe, Prince of Asturias, Heir to the throne, born 30 Jan. 1968.

The King receives an allowance, part of which is taxable, approved by parliament each year. In 1997 it was 990m. pesetas. There is no formal court; the (private) *Diputación de la Grandeza* represents the interests of the aristocracy.

CONSTITUTION AND GOVERNMENT. Following the death of General Franco in 1975 and the transition to a democracy, the first democratic elections were held on 15 June 1977. A new Constitution was approved by referendum on 6 Dec. 1978, and came into force 29 Dec. 1978. It established a parliamentary monarchy, with King Juan Carlos I as head of state. Legislative power is vested in the *Cortes Generales*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house).

The *Congress of Deputies* has not less than 300 nor more than 400 members (350 in the general election of 1996) elected in a proportional system under which electors choose between party lists of candidates in multi-member constituencies.

The *Senate* has 257 members of whom 208 are elected by a majority system: the 47 mainland provinces elect 4 senators each, regardless of population; the island provinces 5 (Balears, Las Palmas) or 6 (Santa Cruz de Tenerife); and Ceuta and Melilla, 2 senators each. To these are added 49 senators elected by the parliaments of the autonomous communities as regional representatives. Deputies and senators are elected by universal secret suffrage for 4-year terms. The Prime Minister is elected by the Congress of Deputies.

The *Constitutional Court* is empowered to solve conflicts between the State and the Autonomous Communities; to determine if legislation passed by the Cortes is contrary to the Constitution; and to protect the constitutional rights of individuals violated by any authority. Its 12 members are appointed by the monarch: 4 on the proposal of the Congress of Deputies; 4 on the proposal of the Senate; 2 on the proposal of the General Council of the Judicial Power (*see under* JUSTICE, *below*); and 2 on the proposal of the Cabinet. It has a 9-year term, with a third of the membership being renewed every 3 years.

The last general election took place on 3 March 1996 (the next is due by March 2000). 67 parties presented candidates. The electorate was 24,985,343; turn-out was 78.06%. In the *Congress of Deputies* the Popular Party (PP) won 156 seats with 38.2% of votes cast; the Spanish Workers' Socialist Party (PSOE), 141 with 37.4%; the Communist-led United Left Coalition (IU), 21 with 10.5%; Convergence and Union (CiU; Catalan nationalists), 16 with 4.6%; Basque Nationalist Party (PNV), 5 with 1.2%; Canarian Coalition (CC), 4 with 0.8%; Galician Nationalist Bloc (BNG), 2 with 0.8% (first time in Parliament); the Basque separatist Herri Batasuna Party (HB), 2 with 0.7%; the Catalan separatist Esquerra Republicana de Catalunya (ERC), 1 with 0.6%; the non-radical Basque separatist Eusko Alkartasuna Party (EA), 1 with 0.4%; Valencian Union (UV), 1 with 0.3%. In the *Senate*, the Popular Party won 112 seats; PSOE, 81; CiU, 8; PNV, 4; CC, 1; others, 1 each.

A government was formed in May 1996. José María Aznar, leader of the democratic right-wing Popular Party, was appointed President of the *Council of Ministers* at the head of a minority PP government supported by 3 regionalist parties, from Catalonia, the Basque Country and Canary Islands, of which the most decisive is the Catalan nationalist coalition, the CiU. In March 1998, the government comprised:

President: José María Aznar López (b. 1953; PP; elected 3 March 1996; sworn in 5 May 1996); *Deputy Vice-President and Minister of the Prime Minister's Office:* Francisco Álvarez Cascos (PP). *Deputy Vice-President and Minister of Economy and Finance:* Rodrigo Rato Figaredo (PP). *Foreign Affairs:* Abel Matutes Juan (PP). *Justice:* Margarita Mariscal de Gante y Mirón (ind). *Defence:* Eduardo Serra i Rexach (ind). *Interior:* Jaime Mayor Oreja (PP). *Development:* Rafael Arias-Salgado y Montalvo (PP). *Education and Culture:* Esperanza Aguirre y Gil de Biedma (PP). *Labour and Social Affairs:* Javier Arenas Bocanegra (PP). *Industry, Energy and Tourism:* Josep Piqué i Camps (ind). *Agriculture, Fisheries and Food:* Loyola de Palacio del Valle-Lersundi (PP). *Public Administration:* Mariano Rajoy Brey (PP). *Health and Consumer Affairs:* José Manuel Romay Beccaria (PP). *Environment:* Isabel Tocino Biscarolasaga (PP). The *Speaker* (and President) of the Congress of

Deputies is Federico Trillo (PP); the *Speaker* (and President) of the Senate is José Ignacio Barrero (PP).

The IU (United Left Coalition) adopted 6 resolutions in Sept. 1997 which effectively provoked the break-up of the coalition and distancing from it of its former regionalist elements, among them the Catalan Left.

National anthem: 'Marcha Real' ('Royal March'); no words, tune anonymous.

European Parliament. Spain has 64 representatives. At the June 1994 elections turnout was 59.1%. The PP won 28 seats with 40.2% of votes cast (political affiliation in European Parliament: European People's Party); the PSOE, 22 with 30.6% (European Socialist Party); the IU, 9 with 13.4% (European United Left); the CiU, 3 with 4.6% (European People's Party; European Liberal Democratic and Reformist Group); the Nationalist Coalition, 2 with 2.8% (European People's Party).

Regional Government. The Constitution of 1978 establishes a semi-federal system of regional administration, with the Autonomous Community (*Comunidad Autónoma*) as its basic element. There are 17 autonomous communities, each of them having a Parliament elected by universal vote, and a regional government; all possess exclusive legislative and executive power in many matters, as listed in the national Constitution and in their own fundamental law (*estatuto de autonomía*). The 17 communities comprise 50 provinces (established by the administrative division of 1833): 7 communities (Asturias, Baleares, Cantabria, La Rioja, Madrid, Murcia and Navarre) are composed of 1 province only; the other 10 are formed by 2 or more.

In Sept. 1994 Ceuta and Melilla gained limited autonomous status, with legislative assemblies replacing their municipal councils. In 1997, 10 Communities (Aragón, Asturias, Baleares, Cantabria, Castilla-La Mancha, Castilla y León, Extremadura, Madrid, Murcia, La Rioja) gained authority (not previously held) over matters such as health and education, under new statutes (Art 143 of the Constitution); and an all-party initiative to re-examine the constitutional status of the Basque Country and neighbouring part-Basque province of Navarre was mooted. This was following a year during which the government consolidated a tough approach to Basque separatist terrorism after national outrage in July over ETA's assassination of a young local councillor.

Date of last elections and party composition of the autonomous communities: *Andalusia* (March 1996), PSOE 52, PP 40, IU, 13, Andalusian Party 4. *Aragón* (May 1995), PP 27, PSOE 19, Aragonese Regionalist Party 14, IU 5, others 2. *Asturias* (May 1995), PP 21, PSOE 17, IU 6, others 1. *Baleares* (May 1995), PP 30, PSOE 16, nationalists 6, IU 3, others 4. *Basque Country* (Oct. 1994), PNV 22, PSOE-Euskadiko Ezquerria 12, HB 11, PP 11, EA 8, United Left-Ezker Batua 6, Alavese Unity 5. *Canary Islands* (May 1995), PP 18, PSOE 16, CC 22, others 4. *Cantabria* (May 1995), PP 13, PSOE 10, regionalists 6, IU 3, others 7. *Castilla-La Mancha* (May 1995), PSOE 24, PP 22, IU 1. *Castilla y León* (May 1995), PP 50, PSOE 27, IU 5, others 2. *Catalonia* (Nov. 1995), CiU 60, PSOE 34, PP 17, ERC 13, Iniciativa per Catalunya 11. *Extremadura* (May 1995), PSOE 31, PP 27, IU 6, others 1. *Galicia* (Oct. 1993), PP 43, PSOE 19, BNG 13 (elections were held in Oct. 1997). *La Rioja* (May 1995), PP 17, PSOE 12, regionalists 2, IU 2. *Madrid* (May 1995), PP 54, PSOE 32, IU 17. *Murcia* (May 1995), PP 26, PSOE 15, IU 4. *Navarra* (May 1995), PP 17, PSOE 11, regionalists 10, HB 5, EA 2, IU 5. *Valencian Community* (May 1995), PP 42, PSOE 32, UV 5, IU 10.

Local Government. The Provincial Council (*Diputación Provincial*) is the administrative organ of the province, except in the 7 autonomous communities composed of only one province, where there are only the regional legislative and executive powers. The provincial council is indirectly elected, except in the 3 Basque provinces where they are elected by universal suffrage every 4 years. Each of the 7 main islands of the Canaries has a directly elected corporation, the *Cabildo Insular*, to rule its special interests; in the main islands of the Balearics there is an elected *Consell Insular*.

The provinces are constituted by the association of municipalities (8,095 in 1997). Municipalities are autonomous in their own sphere. At their head stands the Municipal Council (*Ayuntamiento*), members of which are elected in a universal

ballot every 4 years, and they, in turn, elect one amongst them as Mayor (*Alcalde*). In 1997 6,462 municipalities had fewer than 3,000 inhabitants (3,713 less than 500). Resource-poor municipalities may form associations (*Mancomunidades*) to share services. Elections were held in May 1995 for 65,732 municipal councillors. The electorate was 32,019,932. Turn-out was 69.79%. The Popular Party won 35.2% of votes east (25.1% in 1991), the PSOE 30.8% (38.5%), the IU coalition 11.6% (8.5%).

DEFENCE. Conscription is for 9 months. Civilian service may be offered as an alternative. Recruits to the national police are exempt from conscription. Since 1989 women have been accepted in all sections of the armed forces. In 1996 the government began the phased abolition of conscription (starting with males born in 1984).

Army. The Army is divided into 8 Regional Operation Commands (including 2 overseas) and consists of 1 mechanized division, 2 armoured cavalry, 1 mountain, 3 light infantry, 1 airborne, 1 artillery, 1 engineer and 1 air-portable brigade; 3 island garrisons, 3 special operations battalions and the Spanish Legion. A Rapid Reaction Force is formed from the Spanish Legion and the airborne and air-portable brigades. There is also an Army Aviation brigade. Equipment includes 210 AMX-30, 164 M-48A5E and 294 M-60 main battle tanks. The Aviation Brigade consists of 170 helicopters (40 attack).

Strength (1997) 128,500 (including 81,500 conscripts). Of these 2,500 are stationed on the Balearic Islands, 6,500 on the Canary Islands and 10,000 in Ceuta and Melilla.

Guardia Civil. The paramilitary *Guardia Civil* numbers 75,000 (2,200 conscripts).

Navy. The principal ship of the Navy is the 17,000-tonne *Príncipe de Asturias*, a light vertical/short take-off and landing aircraft carrier. Her air group comprises 8 AV-8S Matador, 8 Sea King anti-submarine helicopters, 2 Sea King early warning helicopters and about 4 AB-212 light helicopters. There are also 8 French-designed submarines (4 Daphne class, 4 Agosta class), 6 US-design Santa María guided missile frigates with Standard SM-1 surface-to-air missiles, 5 other guided missile frigates, and 6 smaller frigates, 5 offshore patrol vessels, 10 coastal and 16 inshore patrol craft, 4 ocean minesweepers, 8 coastal minesweepers, 2 amphibious troop transports, 2 tank landing ships and 13 landing craft. Major auxiliaries include 3 tankers, 2 transports, 5 ocean tugs, 1 training ship, 4 water carriers and 6 survey ships. There are about 80 minor auxiliaries and service craft.

The Naval Air Service operates 20 AV-8S Matador and EAV-8B Harrier-II attack aircraft, 34 S-70B Seahawk, Sea King, SH 60B, AB-212 and Hughes 500 anti-submarine helicopters, 3 radar early warning Sea Kings and a few additional training and utility aircraft. The Air Force operates 7 Orion maritime patrol aircraft on anti-submarine tasks.

There are 8,000 marines, who provide 1 amphibious regiment and garrison regiments at the main bases. Main naval bases are at Ferrol, Rota, Cádiz, Cartagena, Palma de Mallorca, Mahón and Las Palmas (Canary Islands).

In 1997 personnel totalled 39,000 (13,500 conscripts) including the marines and 1,000 naval air arm.

Air Force. The Air Force is organized as an independent service, dating from 1939. It is administered through 4 operational commands. These are geographically oriented following a reorganization in 1991 and comprise Central Air Command, Straits Air Command, Eastern Air Command and Air Command of the Canaries.

The Tactical Air Command has 2 fighter-bomber squadrons of Spanish-built Northrop SF-5s and 1 aero-naval co-operation squadron with P-3 Orion anti-submarine aircraft. Air Combat Command has 1 squadron of RF-4C Phantom IIs, 4 squadrons of F-18 Hornets and 3 squadrons of Mirage F-1s. 2 Boeing 707 and 5 KC-130H tankers support the fighter squadrons. 3 wings of Air Transport Command operate C-130 Hercules, CN-235s and Spanish-built CASA Aviocars. Air Command of the Canaries has 3 squadrons, equipped with Aviocar transports, Mirage F1 fighter-bombers, F27 Maritime aircraft and Super Puma helicopters for search and rescue. Other equipment includes 3 Boeing 707s, 8 Falcons and helicopters for VIP

transport; and aircraft for photographic, firefighting, target towing and research duties. Air-sea rescue units have Aviocars and Super Puma helicopters.

American-built F33 Bonanza and Chilean-built Pillan piston-engined aircraft are used for basic training, after which pupil pilots progress to CASA C-101 jet aircraft. Two-seat versions of operational types are used as advanced trainers. Other training types include Hughes 300 and S-76 helicopters.

Strength (1997) 30,000 (13,000 conscripts).

INTERNATIONAL RELATIONS

Membership. Spain is a member of the UN, the Council of Europe, NATO, WEU, the EU, OSCE and OECD, and is a signatory to the Schengen Accord (*see* EUROPEAN UNION *under* MAJOR POLICY AREAS, *above*).

ECONOMY

Performance. Spain's current account on its balance of payments came out of deficit in 1995 for the first time since the mid-1980s. The balance showed a surplus of 586,500m. pesetas for the first 9 months of 1997; forecast 1997 (in US\$): 1,400m. Real GDP growth was 2.1% in 1996 (2.8% in 1995) and was officially estimated at 3% for 1997. Total GDP (estimate 1997, in US\$): 604,400m. Government debt (1996, % of GDP): 69.5%. Foreign debt (1995, in US\$): 277,500m.

Spain and EMU. With inflation low, interest rates down (cut to 4% in 1997) and its budget deficit under control, in Jan. 1998 Spain looked on course to meet EU (Maastricht) criteria for first-wave entrants to EMU.

Budget. A Convergence Plan covering 1997-2000 envisages an annual GDP growth of 3.2%, a reduction of public debt to 1.6% of GDP, the limitation of inflation to below 2.5%, and the creation of 1m. jobs by deregulating and increasing the flexibility of the economy and redistributing taxes. Government expenditure (1996, % of GDP): 43.1% (1997 forecast: 41.6%).

Revenue and expenditure in 1m. pesetas:

VAT is normally 16%, with a rate of 7% on certain services (catering and hospitality), and 4% on basic foodstuffs.

Currency. The unit of currency is the peseta (notionally divided into 100 *céntimos* though they have not been in use since 1984). Bank-notes of 10,000, 5,000, 2,000 and 1,000 pesetas, and coins of 1, 5, 10, 25, 50, 100, 200 and 500 pesetas are in circulation. On 30 Nov. 1997 the circulation of bank-notes was 8,240,600m. pesetas; of coins, 350,000m. pesetas. Currency and gold reserves were US\$72,000m. in 1997; reserves at 30 Nov. 1997 (in 1,000m. pesetas): gold 338; IMF 241; SDRs 67; foreign exchange 7,328; ecus 1,811; others 30. Inflation in 1997 was 2% (3.2% in Dec. 1996).

Banking and Finance. The central bank is the Bank of Spain (*Governor:* Luis Ángel Rojo) which gained autonomy under an ordinance of 1994. Its governor is appointed

for a 6-year term. The Banking Corporation of Spain, *Argentaria*, groups together the shares of all state-owned banks, and competes in the financial market with private banks. In 1993 the government sold 49.9% of the capital of *Argentaria*; the remainder in 2 flotations ending on 13 Feb. 1998.

In terms of assets held in Nov. 1997 (in 1m. pesetas), the main banks were: Grupo Santander, 12,277,367; Banco Bilbao Vizcaya, 13,077,448; Banco Central Hispano, 10,444,037; Banco Popular, 2,433,008; Banesto, 5,305,252; *Argentaria* (no consolidated balance). On 31 Oct. 1997 Spanish banks deposits (in 1,000m. pesetas) amounted to 17,721 (private banks, 10,178; government banks, 7,543); foreign banks, 1,667; savings banks, 24,525; rural (farmers) savings banks, 3,235.

There are stock exchanges in Madrid, Barcelona, Bilbao and Valencia. The flotation in 1997 of public-sector holdings brought some 2m. new domestic investors into the Spanish equity market; privatization receipts in 1997 were expected to total 1,600,000m. pesetas.

Weights and Measures. The metric system was introduced in 1859.

ENERGY AND NATURAL RESOURCES

Electricity. Nuclear and hydroelectric power stations provided just over half of Spain's electricity in 1990. Electric power stations had a total installed capacity of 45.2m. kW in 1991; nuclear power stations (9 in 1997) had a net capacity of 7.3m. kW. The government announced in 1991 that no new nuclear power stations would commence operating before 2000. The total electricity output in 1996 amounted to 175,604m. kWh, of which 41,619m. was hydroelectric, 56,204m. nuclear, and 77,781m. other (carbon, natural gas, petroleum).

In Feb. 1997 the government disposed of a 25% stake in Endesa, the country's main electricity generator and distributor, reducing its shareholding in the group to 41%; full privatization is expected by 1999 or earlier. The Electrical Protocol drawn up between the government and electricity utilities to meet EU requirements is to be completed over a 10-year period, and will largely dismantle the highly regulated, interventionist structure which preceded it. This should provide for a more open market; construction of new generators will be liberalized and prices are expected to fall in real terms by 25-30% over 5 years. Industry analysts forecast a market which will favour hydro- and gas-powered generators.

Oil. Spain is heavily dependent on imported oil; Mexico is its largest supplier. Crude oil production (1996), 554,000 tonnes.

Gas. The government sold its remaining stake in the oil, gas and chemicals group Repsol in 1997. Natural gas production (1996) totalled 596m. cu. metres. Efforts are being made to increase consumption; on 1 Nov. 1996 Spain opened the Algerian gas link (Maghreb-Europe Pipeline), which is expected to supply 6,200m. cu. metres by 2000.

Minerals. Spain has a relatively wide range of minerals; the mining sector accounted for 1% of GDP in 1994. Coal production (1995), 13m. tonnes; other principal minerals (1992, in 1,000 tonnes): anthracite, 6,177; lignite, 18,689; iron, 1,334; pyrites, 406; copper, 9; lead, 30; zinc, 205; fluorspar, 97; potassium salts, 594; (1992, in tonnes) uranium, 862; tin, 7. The Huelva copper smelter capacity expanded by 20% from 150,000 tonnes to 180,000 tonnes in 1995. Also in 1995, a large mercury deposit was found in southern Spain which could raise mercury levels to within a quarter of proven world reserves. A modern gold mine in Asturias (opened Oct. 1996) is expected to produce about 1,000 troy ounces a year.

Agriculture. Agriculture contributed 4.8% of GDP in 1994 and employed about 10.1% of the workforce. Crop production accounted for 62.2% of total agricultural production in 1990; animal production for 37.8%.

19,354,700 ha were under cultivation in 1995, including 4,372,600 ha under irrigation and 6,434,000 ha under pasture. There were (1992) 766,267 tractors, 280,989 motor ploughs and 47,795 harvesters in use.

Spain has more land dedicated to the grape than any other country in the world and is ranked third among wine producers (behind Italy and France). Wine exports have increased in value by nearly 600% from 1991-97. Total export receipts in 1996 totalled some £600m. A large part of Spain's output goes to Italy for bottling. In 1992, 1,333,000 ha were under vines. Production of wine (1996), 32,720,000 hectolitres; of grapes, 3.3m. tonnes.

The area under onions in 1996 was 28,200 ha, yielding 1,018,100 tonnes; of tomatoes, 58,400 ha, 3,224,800 tonnes (21% of EU production).

In fruit, Spain contributes a fifth of EU total harvest, and more than half of all citrus fruits. Fruit production (1996, in tonnes; ha, 1992): Oranges and mandarins, 3.5m. (201,282 ha); lemons, 433,100 (45,022 ha); apples, 893,600; peaches, 892,300.

Production of olive oil (1996), 670,000 tonnes. EU policy to reform the complex aid system for olive-oil (based on hand-outs per tree rather than oil production) is strongly opposed in all 5 EU olive oil-producing countries, nowhere more than Spain which, in Andalusia, has the world's largest producing zone. In 1997 Spain's olive growers marched on Madrid in protest over the reforms, which have provoked fear of plantation neglect and loss of employment.

Other important products are esparto, flax, tobacco, hemp and pulse; raw cotton production (1995): 88,000 tonnes.

Livestock (1995): Cattle, 5.51m.; sheep, 21.32m.; goats, 2.60m.; pigs, 18.16m.; laying hens, 45.72m.; horses, 0.24m; asses and mules (1992), 0.25m. Livestock density per 100 ha is among the lowest in the EU. Livestock products (1995 in 1,000 tonnes): Pork, 2,174; beef, 508.49; mutton, 227.12; poultry meat, 924.31; goat, 14.93; rabbit, 110.88. Milk (1993), 6.7m. tonnes; eggs (1991), 888.3m. dozen; honey (1991), 24,000 tonnes.

Forestry. Spain is among the most wooded countries in the EU (around 26m. ha, 50.7% of its total area) and together with France and Germany, it has the largest areas of forest also (8.2m. ha in 1990). Wood production (1992), 10,378,000 cu. metres; other forest products (in tonnes): Resins, 1,771; cork, 72,090; esparto, 792. Total value of forest products (1992): 127,815m. pesetas.

Fisheries. Spain is the second largest fishing country in the EU after Denmark. Its annual catch is around 1.4m. tonnes and accounts for a fifth of the EU's annual catch. Fishing vessels had a total tonnage of 524,602 tonnes in 1995 (596,441 GRT in 1994); fleets have been gradually reduced from 20,558 boats in 1991 to 18,091 in 1996. Total catch (1993), 1,443,581 tonnes. Fish-farming output (1991), 222,427 tonnes, of which 200,922 were molluscs and shellfish, 21,505 fish; Spain supplies around half of total EU mussel production.

INDUSTRY. The industrial sector represented 28.1% of GNP in 1995. In 1996-97 industrial production was up by 3.3% on the previous 12 months, and industry accounted for 22.9% of the labour force (29.7% in 1994).

Principal textile production (1993, in 1,000 tonnes): Yarn, 227; cotton cloth, 64; synthetic and artificial fabrics, 62; knitwear, 23. Industrial products (1993, in tonnes): Sulphuric acid, 1,161,000; nitrogenous fertilizers, 642,000; plastics, 2.7m.; pulp and paper, 6.06m.; cement (1995), 24.47m.; crude oil refined (1995, in the 9 oil refineries), 55.2m. tonnes; steel production (1996), 12.3m.

The number of vehicles manufactured in 1995 was 2,333,785 of which 1,958,789 were passenger cars and 374,998 commercial. In 1996 1.39m. refrigerators and

freezers, 2.6m. cookers, hotplates and microwaves, and 1.53m. washing machines, dishwashers and clothes driers were manufactured; the number of TV sets (1993), 3.8m. There are also important toy and shoe industries.

Labour. The economically active population numbered 16.03m. in 1996. Of these, 12.52m. were employed: 1.05m. in agriculture and fishing, 2.5m. in industry, 1.2m. in construction and 7.73m. in trade, transport and other public and personal services. Post-Franco legislation brought radical changes to the labour market, including the legalization in 1984 of fixed-term contracts. A third of Spain's wage earners were on temporary contracts by 1998. The monthly minimum wage for adults (1998) was 68,040 pesetas; the average monthly wage for workers in industry and services was 190,500 pesetas (1,331 pesetas an hour); average hourly earnings increased by 4% in 1997. The retirement age is 65 years.

In terms of unemployment, Spain has the highest rate among developed countries. 22.7% of the active population was unemployed at the end of 1997. On 17 Sept. 1997, the Council of Ministers passed the Multi-Year Employment Plan which co-ordinates the actions of 9 ministries with the aim of creating 1m. jobs to bring unemployment down to 17% by the year 2000. The scheme represents a 20% increase in budget spending for job creation.

Trade Unions. The Constitution guarantees the establishment and activities of trade unions provided they have a democratic structure. The most important trade unions are *Unión General de Trabajadores* (UGT) and *Comisiones Obreras* (CO). In Jan. 1997 the UGT and CO and employers' associations signed an agreement to be in force until 2000 providing for compulsory mediation before strike action; in April, employers' associations and trade unions reached an agreement covering 1997-2000 to combat job insecurity and reform collective bargaining. A National Employment Committee was subsequently set up to oversee the workings of the agreement.

FOREIGN ECONOMIC RELATIONS. In the first quarter of 1997 exports were up by 15%, imports by 8%. The economy recorded a foreign trade surplus of 302,000m. pesetas and a 32% reduction in the trade deficit (1997 forecast in US\$: 16,000m.).

Total foreign investments (Jan-July 1997), 535,202,000m. pesetas, representing a 16% increase on 1996: 21% to EU countries; and 61% to Latin America (forged mainly by Tisa, the international arm of Telefonica, which operates 10m. lines and services 1m. cable TV and cellular phone subscribers in the region, with assets of US\$ 5,000m.).

In 1997 tourism accounted for 10.4% of GDP with net receipts up by 15% at 2,535,000m. pesetas (an expected revenue of £15,000m.). In 1996, 62m. tourists visited Spain (41.4m. staying overnight). There is a high-speed standard-gauge (1,435 mm) railway from Madrid to Seville. In 1995 freight carried was 26m. tonnes (4.2% of total freight) and 464.8m. passengers (5.9% of internal passenger traffic). There are metros in Madrid (112 km), Barcelona (72 km) and Bilbao (26 km), and a light railway in Valencia.

There are international airports at Madrid (Barajas), Barcelona (Prat del Llobregat), Alicante, Almería, Bilbao, Gerona, Gran Canaria, Ibiza, Lanzarote, Málaga, Palma de Mallorca, Santiago de Compostela, Seville, Tenerife (Los Rodeos and Reina Sofia), Valladolid, Valencia and Zaragoza. telephones in use in 1994. The government disposed of its remaining 21% stake in Telefonica in Feb. 1997, bringing 1.4m. shareholders into the company's equity base. A second operator, R  t  vision, is expected to account for 10% of the domestic market, which is scheduled to be wholly deregulated by the end of 1998. The cellular phone business was deregulated in 1995; the market is shared by Telefonica and Airtel.

Radio Nacional de Espa  a broadcasts 5 programmes on medium-waves and FM, as well as many regional programmes; it has one commercial programme. The most successful domestic network is that of an independent, Cadena SER (*Sociedad Espa  ola de Radiodifusi  n*); *Cadena de Ondas Populares Espa  olas* (COPE) is owned by the Roman Catholic church. Two independent radio networks cover the whole of Spain. They are *Antena 3* and *Radio 80* (taken over by SER in 1992). *Radio Exterior* broadcasts abroad, and *Antena 3* has been broadcasting to 400,000 subscribers in Miami since Sept. 1997.

SOCIAL INSTITUTIONS

Justice. Justice is administered by Tribunals and Courts, which jointly form the Judicial Power. Judges and magistrates cannot be removed, suspended or transferred except as set forth by law. The Constitution of 1978 established the *General Council of the Judicial Power*, consisting of a President and 20 magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the state's legislative and executive organs. Its members are appointed by the *Cortes Generales*. Its President is that of the Supreme Court (*Tribunal Supremo*), who is appointed by the monarch on the proposal of the General Council of the Judicial.

The Judicature is composed of the Supreme Court; 17 Higher Courts of Justice, 1 for each autonomous community; 52 Provincial High Courts; Courts of First Instance; Courts of Judicial Proceedings, not passing sentences; and Penal Courts, passing sentences.

The Supreme Court consists of a President, and various judges distributed among 7 chambers: 1 for civil matters, 3 for administrative purposes, 1 for criminal trials, 1 for social matters and 1 for military cases. The Supreme Court has disciplinary faculties; is court of appeal in all criminal trials; for administrative purposes decides

in first and second instance disputes arising between private individuals and the State; and in social matters makes final decisions.

A new penal code came into force in May 1996, replacing the code of 1848. It provides for a maximum of 30 years imprisonment in specified exceptional cases, with a normal maximum of 20 years. Sanctions with a rehabilitative intent include fines adjusted to means, community service and week-end imprisonment. The death penalty was abolished by the 1978 Constitution. The prison population in 1996 was 43,033 (39,051 men, 3,982 women); 901,696 criminal offences were reported in 1994.

A juvenile criminal law of 1995 lays emphasis on rehabilitation. It raised the age of responsibility from 12 to 14 years. Criminal conduct on the part of children under 14 is a matter for legal protection and custody. 14- and 15-year-olds are classified as 'minors'; 16- and 17-year-olds as 'young persons'; and the legal majority for criminal offences is set at 18 years. Persons up to the age of 21 may, at the courts' discretion, be dealt with as juveniles.

A jury system commenced operating in Nov. 1995 in criminal cases (first trials in May 1996). Juries consist of 9 members. In Sept. 1997 at the opening ceremony of the Judicial Year, presided over by the king, the President of the General Council of the Judicial Power called for a general agreement from Parliament and the government on legal reform for solving the problems in the administration of justice, namely its slowness and esoteric nature.

The *Audiencia Nacional* deals with terrorism, monetary offences and drug-trafficking where more than 1 province is involved. Its president is appointed by the General Council of the Judicial Power.

There is an Ombudsman (*Defensor del Pueblo*), who in 1994 received 18,594 complaints.

Religion. There is no official religion. Roman Catholicism is the religion of the majority. There are 11 metropolitan sees and 52 suffragan sees, the chief being Toledo, where the Primate resides. The archdioceses of Madrid-Alcalá and Barcelona depend directly from the Vatican. There are about 0.25m. other Christians, including several Protestant denominations, Jehovah's Witnesses (about 60,000) and Mormons, and 0.45m. Moslems, including Spanish Moslems in Morocco. The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of people of Judaist faith is estimated at about 15,000.

Education. In 1991 the General Regulation of the Educational System Act came into force. This Act gradually extends the school-leaving age to 16 years and determines the following levels of education: Infants (3-5 years of age), primary (6-11), secondary (12-15) and baccalaureate or vocational and technical (16-17). Primary and secondary levels of education are now compulsory and free. Religious instruction is optional.

In Sept. 1997 a joint declaration with trade unions, parents' and schools' associations was signed in support of a new finance law guaranteeing that spending on education will reach 6% of GDP within 5 years, thus protecting it from changes in the political sphere.

A new compulsory secondary education programme has replaced the Basic General Education programme which was in force since 1970. In addition, university entrance exams underwent reform in 1997, resulting in greater emphasis now being placed on the teaching of Humanities at secondary level.

In 1997-98 pre-primary education (under 6 years) was undertaken by 2,522 schools, with 1,123,003 pupils; primary or basic education (6 to 14 years): 13,037 schools, with 2,607,602 pupils. There were 215,584 teachers in pre-primary and primary schools. Secondary education (14-17 years), including high schools and technical schools, was conducted at 5,449 schools, with 3,492,726 pupils and 150,220 teachers.

In 1997-98 there were 60 universities: 40 public state universities, 3 polytechnic universities, 13 private universities (including 3 Catholic), and 4 Open universities. In 1997-98 there were 1,571,300 students at state universities; 64,423 at private universities.

Health. In 1995 there were 162,089 doctors (3.8 per 1,000 inhabitants), 13,242 dentists, 40,323 pharmacists and 167,957 nurses (including 6,105 midwives). Number of hospitals (1992), 801, with 161,537 beds.

Welfare. The social security budget was 12,134,637m. pesetas in 1997. The budget for 1998 was: for pensions, 8,356,100m. pesetas; health, 3,822,000m.; social benefits and incapacity, 1,554,000m.; unemployment, 1,495,400m. The minimum monthly pension in 1996 was 53,435 pesetas.

In 1997 the system of contributions to the social security and employment scheme was: For pensions, sickness, invalidity, maternity and children, a contribution of 28.3% of the basic wage (23.6% paid by the employer, 4.7% by the employee); for unemployment benefit, a contribution of 7.8% (6.2% paid by the employer, 1.6% by the employee). There are also minor contributions for a Fund of Guaranteed Salaries, working accidents and professional sicknesses, and for vocational training.

KEY HISTORICAL EVENTS. In the 18th century the central kingdom, Kandy, was the only surviving independent state on the island of Ceylon. The Dutch, who had obtained their first coastal possessions in 1636, had driven out the preceding Portuguese interests and become the dominant power in most of the island. The Dutch attacked Kandy but were unable to hold it. The interior terrain was mountainous and thickly forested and the king of Kandy's forces were well-trained to make use of it as guerrillas.

The king attracted British attention by asking for help against the Dutch. In 1796 the British East India Company sent a naval force to Ceylon (as the British then called it). The Dutch surrendered their possessions, which left the British in control of the maritime areas surrounding Kandy. These areas were at first attached to the Madras Presidency of India, whence the naval force had come, but in 1802 they were constituted a separate colony under the Crown.

Once the British began to develop their new territory they came to see Kandy as a threat. An attack in 1803 failed, but by 1815 the chiefs of Kandy were discontented with their king who was of alien (south Indian) stock and a despot. The chiefs approached the British, who invaded Kandy with their help. The king was deposed and the British crown succeeded him as sovereign.

The Kandyan Convention of 1815 annexed Kandy to British Ceylon while recognizing most of the traditional rights of the chiefs. However, in 1817, dissatisfied with the terms, the chiefs rebelled. The rebellion was suppressed and the rights established by the Convention were abolished.

Ceylon was then united for the first time since the 12th century. The British (like the preceding Dutch and Portuguese) built up a plantation economy. Coffee was dominant until an outbreak of *Hoemia vastatrix* fungus destroyed the plants in 1870. Spices, cocoa and rice all followed but tea became the main cash crop after successful experiments in the 1880s.

Foreign rule served to subdue the traditional hostility between northern Tamils and southern Sinhalese, providing as it did a new frame of reference to an alien culture. The Ceylon National Congress, formed in 1919, contained both Sinhalese and Ceylon Tamil groups. (The Indian Tamils brought in as a labour force for the tea estates were a separate community.) Tamil national feeling, however, was expressed over the issue of the use of Tamil languages in schools.

On 4 Feb. 1948 the Ceylon Independence Act took effect, and Ceylon became a Dominion of the Commonwealth. UK defence forces were to be allowed to remain as mutually agreeable, although it was later decided that all UK bases should be transferred or withdrawn by 1962.

In 1956 Solomon Bandaranaike became prime minister at the head of the People's United Front, advocating neutral foreign policy and the promotion of Sinhalese national culture at home. In Sept. 1959 he was murdered; his widow Sirimavo Bandaranaike succeeded him in July 1960 at the head of an increasingly socialist government. Agreements were made with India (in 1964 and 1974) for the repatriation of Indian nationals. In May 1972 Ceylon became a republic and adopted the name Sri Lanka.

In July 1977 Mrs Bandaranaike's government fell, mainly because of economic failures and the repression of non-Sinhalese elements. The United National Party (dominant until 1956) returned to power and in 1978 a new constitution provided a presidential system with the United National Party leader Junius Jayawardene as the

first executive president. Economic problems were approached through large-scale investment of foreign capital.

The problem of communal unrest remained unsolved and Tamil separatists were active. In 1983 the Tamil United Liberation Front members of parliament were asked to renounce their objective for a separate Tamil state. They refused and withdrew from parliament. Militant Tamils then began armed action which developed into civil war.

A state of emergency ended on 11 Jan. 1989, but violence continued. President Ranasinghe Premadasa was assassinated on 1 May 1993. A ceasefire was signed on 3 Jan. 1995, but fighting broke out again in April. The 'Liberation Tigers of Tamil Eelam' stronghold of Jaffna was captured by government forces in Dec. 1995 and by mid-1997 was firmly under government control. Government forces also made progress in opening a supply route along the northern highway to Jaffna, home to 0.5m. Tamils. The 14-year ethnic war has claimed up to 50,000 lives.

TERRITORY AND POPULATION. Sri Lanka is an island in the Indian Ocean, south of the Indian peninsula from which it is separated by the Palk Strait. On 28 June 1974 the frontier between India and Sri Lanka in the Palk Strait was redefined, giving to Sri Lanka the island of Kachchativu.

KEY HISTORICAL EVENTS. In 1821 the area that is now Sudan was conquered by the Egyptians. In 1881 Muhammad Ahmad, proclaiming himself the Mahdi, led an uprising and gained control until, in 1899, an Anglo-Egyptian army defeated the Mahdi and established an Anglo-Egyptian condominium.

On 19 Dec. 1955 the Sudanese parliament passed unanimously a declaration that a fully independent state should be established forthwith, and that a Council of State should assume the duties of head of state. The UK and Egypt gave their assent on 31 Dec. 1955 and on 1 Jan. 1956 Sudan was

proclaimed a sovereign independent republic.

In 1958 there was a coup that established a military government until the end of 1964 when a civilian government was re-established. On 8 July 1965 the Constituent Assembly elected Ismail al Azhari as President of the Supreme Council, but the government was faced with constant difficulties from the southern provinces which considered themselves dominated by the north. Rebellions began in 1965.

On 23 April 1969 the prime minister, Muhammad Ahmed Mahgoub resigned; and on 25 May the government was taken over by a 10-man Revolutionary Council under Col. Jaafar al Nemery. The Council was dissolved in 1972, and a new constitution was introduced in 1973. Legislative power was placed with a National Assembly, an elected body; and some measure of self-government was granted to the southern provinces. However, discontent in these latter provinces continued, and in addition Nemery met considerable opposition in his attempts to make Sudan a formal Islamic state. On 6 April 1985 he was deposed in a military coup led by Gen. Abel-Rahman Swar al-Dahab, who established a Military Council to which the Cabinet was responsible prior to the promised re-establishment of civilian rule. Elections were held, although they were suspended in parts of the southern provinces, in April 1986.

On 30 June 1989 Brig.-Gen. (later Lieut.-Gen.) Omar Hassan Ahmad al-Bashir overthrew the civilian government in a military coup.

The rebel Sudan People's Liberation Army (SPLA), consisting of non-Moslem southerners, maintains guerrilla activities in the south while the National Democratic Alliance (NDA), northern Moslems opposed to the ruling National Islamic Front, and non-Moslem southerners of the SPLA fight on in the north. Fighting also erupted in Jan. 1997 along the border with Ethiopia. On 9 July 1997 at a meeting attended by representatives of Djibouti, Eritrea, Ethiopia, Kenya and Uganda the Sudanese government accepted a 'Declaration of Principles' as a framework for negotiations to end the civil war, including the separation of state and religion and self-determination for the south of Sudan.

After 14 years Sudan's civil war has killed some 1.3m. people and reduced the south to a level barely above subsistence.

TERRITORY AND POPULATION. Sudan is bounded in the north by Egypt, north-east by the Red Sea, east by Eritrea and Ethiopia, south by Kenya, Uganda and the Democratic Republic of the Congo, west by the Central African Republic and Chad, and north-west by Libya. Its area is 967,500 sq. miles (2,505,813 sq. km). Population (1983 census), 20,564,364; estimate (1997), 32,594,000.

Vital statistics rates, 1997 estimates (per 1,000 population). Births, 40.6; deaths, 11.2. Infant mortality (per 1,000 live births), 74.3. Expectation of life in 1997 was 55.5 years (54.6 for males and 56.5 for females). Growth rate, 3.06% per annum.

In Feb. 1994 the former 9 regions were subdivided to form 26 federal states as follows:

<i>Former region</i>	<i>New states</i>
Khartoum	Khartoum
Bahr al-Ghazal	Western Bahr al-Ghazal; Northern Bahr al-Ghazal; Warab
Central	Gezira; White Nile; Sinnar; Blue Nile
Darfur	Northern Darfur; Southern Darfur; Western Darfur
Eastern	Red Sea; Gedaref; Kassala
Equatoria	Eastern Equatoria; Western Equatoria; Bahr al-Jabal
Kurdufan	Northern Kurdufan; Southern Kurdufan; Western Kurdufan
Northern	Nile; Northern State

The chief cities (census, 1983) are the capital, Khartoum (476,218), its suburbs Omdurman (526,287) and Khartoum North (341,146), Port Sudan (206,727), Wadi Medani (141,065), al-Obeid (140,024), Kassala (98,751 in 1973), Atbara (73,009), al-Qadarif (66,465 in 1973), Kosti (65,257 in 1973) and Juba (56,737 in 1973).

The northern and central thirds of the country are populated by Arab and Nubian peoples, while the southern third is inhabited by Nilotic and Bantu peoples; Arabic, the official language, is spoken by 60% of inhabitants.

CLIMATE. Lying wholly within the tropics, the country has a continental climate and only the Red Sea coast experiences maritime influences. Temperatures are generally high throughout the year, with May and June the hottest months. Winters are virtually cloudless and night temperatures are consequently cool. Summer is the rainy season inland, with amounts increasing from north to south, but the northern areas are virtually a desert region. On the Red Sea coast, most rain falls in winter. Khartoum. Jan. 74°F (23·3°C), July 89°F (31·7°C). Annual rainfall 6" (157 mm). Juba. Jan. 83°F (28·3°C), July 78°F (25·6°C). Annual rainfall 39" (968 mm). Port Sudan. Jan. 74°F (23·3°C), July 94°F (34·4°C). Annual rainfall 4" (94 mm). Wadi Halfa. Jan. 60°F (15·6°C), July 90°F (32·2°C). Annual rainfall 0·1" (2·5 mm).

CONSTITUTION AND GOVERNMENT. The constitution was suspended after the 1989 coup and a 12-member Revolutionary Council has ruled. A 300-member Provisional National Assembly was appointed in Feb. 1992 as a transitional legislature pending elections. These were held on 6–17 March 1996. The National assembly now has 400 members, 275 of whom are directly elected by popular vote and 125 indirectly. Presidential elections were also held in March 1996. President al-Bashir was re-elected by 75% of votes cast.

In March 1998 the government comprised:

The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

Lesser crimes are tried by Minor Courts consisting of 3 Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts.

KEY HISTORICAL EVENTS. The modern Spanish state was founded with the marriage in 1469 of the heirs of the crowns of Castile and Aragón, respectively Isabel I and Fernando V. Under their joint reign Spain recovered Granada, the last Islamic territory in the Iberian peninsula, and sponsored the modern discovery of America, both events in 1492. This dynasty ended in 1700 and subsequently the French Bourbon dynasty was enthroned, with Felipe V as its first king; the present monarch, Juan Carlos I, installed

in 1975, is his direct descendant.

Queen Isabel II, who came to the throne in 1833, was deposed and exiled in 1868 by a liberal revolution. A provisional government, headed by the Duke de la Torre, established universal male suffrage and convened a constituent election for Jan. 1869. The Cortes (Parliament) approved a new constitution, and the deputies chose as the new king Amadeo I, of the then reigning Italian dynasty of Savoy. He reigned as a scrupulous democrat from 2 Jan. 1871, but unable to adapt to Spanish politics, abdicated on 11 Feb. 1873. The Cortes immediately proclaimed a republic.

The first brief republican experience saw great instability. On 29 Dec. 1874, in Sagunto, Gen. Martínez Campos led a *coup* and restored the Bourbon monarchy, with Alfonso XII as king, the son of the exiled Queen Isabel II. A general election took place early in 1876 and the new Cortes approved a constitution which was effective until 1923. This period, known as the Restoration, saw the reimposition of a restricted suffrage (the universal one was not re-established until 1890), and was dominated by two parties, Conservative and Liberal, led respectively by A. Cánovas del Castillo and P. M. Sagasta, both of whom served as prime minister several times in the last quarter of the 19th century.

Alfonso XII died in 1885. His wife María Cristina of Hapsburg was regent till their son, Alfonso XIII, reached his majority in 1902.

During the period of the Restoration, Spain still had a very backward economy and very low standards of living. At the same time Spain was embroiled in external conflicts, with wars in northern Morocco and in the remaining colonies of Cuba and the Philippines. The US intervention led to the cession of Philippines, Puerto Rico and Guam, and also of Cuba which formally became independent in 1901.

Spain was neutral in the First World War, leading to a boom in industry and trade. A new industrial working class was then emerging, amongst a climate of industrial unrest and with a growing opposition to conscription for the war in the north of Morocco.

In Sept. 1923 Gen. Primo de Rivera led a *coup* and abolished the 1876 constitution, closed down the Cortes and governed by decree until his resignation in Jan. 1930. During his dictatorship the war in the Spanish Protectorate in Morocco came to an end.

An interim period followed until the municipal elections of 12 April 1931, which were won by a republican-socialist coalition in Madrid, provincial capitals and other urban areas. Two days later Alfonso XIII exiled himself and the republic was proclaimed a second time. In June a new Cortes was elected; it drafted a new constitution, which was in force by Dec. 1931. Complete religious freedom and an agrarian reform were the significant landmarks of this period. An election in 1932, for the first time with female suffrage, established a very conservative coalition government, which resulted in serious rioting in Oct. 1934. An election in Feb. 1936 gave power to the Popular Front, a coalition of all left parties, including the then tiny Communist party.

On 18 July 1936 the colonial army in northern Morocco, led by Gen. Francisco Franco, and some other military units rebelled against the government. The rebellion

was crushed in a few days in Madrid, Barcelona, Valencia and almost all industrial and mining areas. But the rural regions were easily controlled by the rebels who received substantial help in men, tanks and aircraft from Germany, Italy and Portugal. The government, however, suffered from the 'non-intervention' policy declared by the democracies, notably Britain and France. The International Brigades, a volunteer force, and conditional aid from the USSR were the only significant foreign support received by the Spanish republic. Franco's forces finally overcame all resistance and the war ended on 1 April 1939. Gen. Franco was chief of state till his death on 20 Nov. 1975. His brutal régime was modelled on those of the Axis countries. Nevertheless, Franco's Spain did not take part in the Second World War. The 15 years following the Civil War saw extremely depressed economic conditions.

A nominal monarchy existed from 1947, but with a vacant throne until 1969 when the francoist state accepted the future succession in favour of Juan Carlos de Borbón, grandson of Alfonso XIII. Franco recognized the independence of Morocco in 1956 and ceded the small Spanish protectorate to the Moroccan Government. Spain also withdrew from Equatorial Guinea in 1968 but continued to occupy Western Sahara until 1976.

On 22 Nov. 1975, following Gen. Franco's death, Juan Carlos was proclaimed king. A gradual return to democracy began. A referendum held in Dec. 1976 endorsed some key reforms making possible a free election on 15 June 1977. The elected bicameral Cortes drafted a new constitution which came into force on 29 Dec. 1978.

TERRITORY AND POPULATION. Spain is bounded in the north by the Bay of Biscay, France and Andorra, east and south by the Mediterranean and the Straits of Gibraltar, south-west by the Atlantic and west by Portugal and the Atlantic. ¹ Ceuta and Melilla gained limited autonomous status in 1994.

The capitals of the autonomous communities are: *Andalusia*: Seville; *Aragón*: Zaragoza (Saragossa); *Asturias*: Oviedo; *Balears*: Palma de Mallorca; *Basque Country*: Vitoria; *Canary Islands*, dual and alternative capital, Las Palmas and Santa Cruz de Tenerife; *Cantabria*: Santander; *Castilla-La Mancha*: Toledo; *Castilla y León*: Valladolid; *Catalonia*: Barcelona; *Extremadura*: Mérida; *Galicia*: Santiago de Compostela; *Madrid*: Madrid; *Murcia*: Murcia (but regional parliament in Cartagena); *Navarra*: Pamplona; *La Rioja*: Logroño; *Valencian Community*: Valencia.

The capitals of the provinces are the towns from which they take the name, except in the cases of Álava (capital, Vitoria), Asturias (Oviedo), Balears (Palma de Mallorca), Cantabria (Santander), Guipúzcoa (San Sebastián), La Rioja (Logroño), Navarra (Pamplona) and Vizcaya (Bilbao).

The islands which form the Balearics include Majorca, Minorca, Ibiza and Formentera. Those which form the Canary Archipelago are divided into 2 provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, La Palma, Gomera and Hierro; that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos.

Places under Spanish sovereignty in Morocco (Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez) constitute the 2 provinces of Ceuta and Melilla.

Languages. The Constitution states that 'Castilian is the Spanish official language of the State', but also that 'All other Spanish languages will also be official in the corresponding Autonomous Communities'. At the last census (1991) Catalan (an official EU language since 1990) was spoken in Catalonia by 68% of people, Balears (66·9%), Valencian Community (51%, where it is frequently called Valencian), and in Aragón, a narrow strip close to the Catalanian and Valencian Community boundaries. Galician, a language very close to Portuguese, was spoken by a majority of people in Galicia (91%); Basque by a significant and increasing minority in the Basque Country (26·3%), and by a small minority in north-west Navarra (12%). It is estimated that one third of all Spaniards speaks one of the other 3 official languages as well as standard Castilian. In bilingual communities, both Castilian and the regional language are taught in schools and universities.

In the Basque region terrorist activity by the separatist organisation ETA has brought a reaction from the local population in the form of a strong peace movement. In 1994 it was believed that 10 ETA units were operational in Spain.

CLIMATE. Most of Spain has a form of Mediterranean climate with mild, moist winters and hot, dry summers, but the northern coastal region has a moist, equable climate, with rainfall well-distributed throughout the year, mild winters and warm summers, and less sunshine than the rest of Spain. The south, in particular Andalusia, is dry and prone to drought. At the Earth Summit in New York in 1997, the President of the Spanish Government, José María Aznar, highlighted the problem of desertification in Spain and the need to combat it.

Madrid. Jan. 41°F (5°C), July 77°F (25°C). Annual rainfall 16·8" (419 mm).
Barcelona. Jan. 46°F (8°C), July 74°F (23·5°C). Annual rainfall 21" (525 mm).
Cartagena. Jan. 51°F (10·5°C), July 75°F (24°C). Annual rainfall 14·9" (373 mm).
La Coruña. Jan. 51°F (10·5°C), July 66°F (19°C). Annual rainfall 32" (800 mm).
Sevilla. Jan. 51°F (10·5°C), July 85°F (29·5°C). Annual rainfall 19·5" (486 mm).
Palma de Mallorca. Jan. 51°F (11°C), July 77°F (25°C). Annual rainfall 13·6" (347 mm).
Santa Cruz de Tenerife. Jan. 64°F (17·9°C), July 76°F (24·4°C). Annual rainfall 7·72" (196 mm).

ROYAL HOUSE. The reigning king is Juan Carlos I, born 5 Jan. 1938. The eldest son of Don Juan, Conde de Barcelona, Juan Carlos was given precedence over his father as pretender to the Spanish throne in an agreement in 1954 between Don Juan and General Franco. Don Juan, who resigned his claims to the throne in May 1977, died on 1 April 1993. King (then Prince) Juan Carlos married, in 1962, Princess Sophia of Greece, daughter of the late King Paul of the Hellenes and Queen Frederika. *Offspring:* Elena, born 20 Dec. 1963, married 18 March 1995 Jaime de Marichalar; Cristina, born 13 June 1965, married 4 Oct. 1997 Iñaki Urdangarín; Felipe, Prince of Asturias, Heir to the throne, born 30 Jan. 1968.

The King receives an allowance, part of which is taxable, approved by parliament each year. In 1997 it was 990m. pesetas. There is no formal court; the (private) *Diputación de la Grandeza* represents the interests of the aristocracy.

CONSTITUTION AND GOVERNMENT. Following the death of General Franco in 1975 and the transition to a democracy, the first democratic elections were held on 15 June 1977. A new Constitution was approved by referendum on 6 Dec. 1978, and came into force 29 Dec. 1978. It established a parliamentary monarchy, with King Juan Carlos I as head of state. Legislative power is vested in the *Cortes Generales*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house).

The *Congress of Deputies* has not less than 300 nor more than 400 members (350 in the general election of 1996) elected in a proportional system under which electors choose between party lists of candidates in multi-member constituencies.

The *Senate* has 257 members of whom 208 are elected by a majority system: the 47 mainland provinces elect 4 senators each, regardless of population; the island provinces 5 (Balears, Las Palmas) or 6 (Santa Cruz de Tenerife); and Ceuta and Melilla, 2 senators each. To these are added 49 senators elected by the parliaments of the autonomous communities as regional representatives. Deputies and senators are elected by universal secret suffrage for 4-year terms. The Prime Minister is elected by the Congress of Deputies.

The *Constitutional Court* is empowered to solve conflicts between the State and the Autonomous Communities; to determine if legislation passed by the Cortes is contrary to the Constitution; and to protect the constitutional rights of individuals violated by any authority. Its 12 members are appointed by the monarch: 4 on the proposal of the Congress of Deputies; 4 on the proposal of the Senate; 2 on the proposal of the General Council of the Judicial Power (*see under* JUSTICE, *below*); and 2 on the proposal of the Cabinet. It has a 9-year term, with a third of the membership being renewed every 3 years.

The last general election took place on 3 March 1996 (the next is due by March 2000). 67 parties presented candidates. The electorate was 24,985,343; turn-out was 78.06%. In the *Congress of Deputies* the Popular Party (PP) won 156 seats with 38.2% of votes cast; the Spanish Workers' Socialist Party (PSOE), 141 with 37.4%; the Communist-led United Left Coalition (IU), 21 with 10.5%; Convergence and Union (CiU; Catalan nationalists), 16 with 4.6%; Basque Nationalist Party (PNV), 5 with 1.2%; Canarian Coalition (CC), 4 with 0.8%; Galician Nationalist Bloc (BNG), 2 with 0.8% (first time in Parliament); the Basque separatist Herri Batasuna Party (HB), 2 with 0.7%; the Catalan separatist Esquerra Republicana de Catalunya (ERC), 1 with 0.6%; the non-radical Basque separatist Eusko Alkartasuna Party (EA), 1 with 0.4%; Valencian Union (UV), 1 with 0.3%. In the *Senate*, the Popular Party won 112 seats; PSOE, 81; CiU, 8; PNV, 4; CC, 1; others, 1 each.

A government was formed in May 1996. José María Aznar, leader of the democratic right-wing Popular Party, was appointed President of the *Council of Ministers* at the head of a minority PP government supported by 3 regionalist parties, from Catalonia, the Basque Country and Canary Islands, of which the most decisive is the Catalan nationalist coalition, the CiU. In March 1998, the government comprised:

President: José María Aznar López (b. 1953; PP; elected 3 March 1996; sworn in 5 May 1996); *Deputy Vice-President and Minister of the Prime Minister's Office:* Francisco Álvarez Cascos (PP). *Deputy Vice-President and Minister of Economy and Finance:* Rodrigo Rato Figaredo (PP). *Foreign Affairs:* Abel Matutes Juan (PP). *Justice:* Margarita Mariscal de Gante y Mirón (ind). *Defence:* Eduardo Serra i Rexach (ind). *Interior:* Jaime Mayor Oreja (PP). *Development:* Rafael Arias-Salgado y Montalvo (PP). *Education and Culture:* Esperanza Aguirre y Gil de Biedma (PP). *Labour and Social Affairs:* Javier Arenas Bocanegra (PP). *Industry, Energy and Tourism:* Josep Piqué i Camps (ind). *Agriculture, Fisheries and Food:* Loyola de Palacio del Valle-Lersundi (PP). *Public Administration:* Mariano Rajoy Brey (PP). *Health and Consumer Affairs:* José Manuel Romay Beccaría (PP). *Environment:* Isabel Tocino Biscarolasaga (PP). The *Speaker* (and President) of the Congress of

Deputies is Federico Trillo (PP); the *Speaker* (and President) of the Senate is José Ignacio Barrero (PP).

The IU (United Left Coalition) adopted 6 resolutions in Sept. 1997 which effectively provoked the break-up of the coalition and distancing from it of its former regionalist elements, among them the Catalan Left.

National anthem: 'Marcha Real' ('Royal March'); no words, tune anonymous.

European Parliament. Spain has 64 representatives. At the June 1994 elections turnout was 59.1%. The PP won 28 seats with 40.2% of votes cast (political affiliation in European Parliament: European People's Party); the PSOE, 22 with 30.6% (European Socialist Party); the IU, 9 with 13.4% (European United Left); the CiU, 3 with 4.6% (European People's Party; European Liberal Democratic and Reformist Group); the Nationalist Coalition, 2 with 2.8% (European People's Party).

Regional Government. The Constitution of 1978 establishes a semi-federal system of regional administration, with the Autonomous Community (*Comunidad Autónoma*) as its basic element. There are 17 autonomous communities, each of them having a Parliament elected by universal vote, and a regional government; all possess exclusive legislative and executive power in many matters, as listed in the national Constitution and in their own fundamental law (*estatuto de autonomía*). The 17 communities comprise 50 provinces (established by the administrative division of 1833): 7 communities (Asturias, Baleares, Cantabria, La Rioja, Madrid, Murcia and Navarre) are composed of 1 province only; the other 10 are formed by 2 or more.

In Sept. 1994 Ceuta and Melilla gained limited autonomous status, with legislative assemblies replacing their municipal councils. In 1997, 10 Communities (Aragón, Asturias, Baleares, Cantabria, Castilla-La Mancha, Castilla y León, Extremadura, Madrid, Murcia, La Rioja) gained authority (not previously held) over matters such as health and education, under new statutes (Art 143 of the Constitution); and an all-party initiative to re-examine the constitutional status of the Basque Country and neighbouring part-Basque province of Navarre was mooted. This was following a year during which the government consolidated a tough approach to Basque separatist terrorism after national outrage in July over ETA's assassination of a young local councillor.

Date of last elections and party composition of the autonomous communities: *Andalusia* (March 1996), PSOE 52, PP 40, IU, 13, Andalusian Party 4. *Aragón* (May 1995), PP 27, PSOE 19, Aragonese Regionalist Party 14, IU 5, others 2. *Asturias* (May 1995), PP 21, PSOE 17, IU 6, others 1. *Baleares* (May 1995), PP 30, PSOE 16, nationalists 6, IU 3, others 4. *Basque Country* (Oct. 1994), PNV 22, PSOE-Euskadiko Ezquerria 12, HB 11, PP 11, EA 8, United Left-Ezker Batua 6, Alavese Unity 5. *Canary Islands* (May 1995), PP 18, PSOE 16, CC 22, others 4. *Cantabria* (May 1995), PP 13, PSOE 10, regionalists 6, IU 3, others 7. *Castilla-La Mancha* (May 1995), PSOE 24, PP 22, IU 1. *Castilla y León* (May 1995), PP 50, PSOE 27, IU 5, others 2. *Catalonia* (Nov. 1995), CiU 60, PSOE 34, PP 17, ERC 13, Iniciativa per Catalunya 11. *Extremadura* (May 1995), PSOE 31, PP 27, IU 6, others 1. *Galicia* (Oct. 1993), PP 43, PSOE 19, BNG 13 (elections were held in Oct. 1997). *La Rioja* (May 1995), PP 17, PSOE 12, regionalists 2, IU 2. *Madrid* (May 1995), PP 54, PSOE 32, IU 17. *Murcia* (May 1995), PP 26, PSOE 15, IU 4. *Navarra* (May 1995), PP 17, PSOE 11, regionalists 10, HB 5, EA 2, IU 5. *Valencian Community* (May 1995), PP 42, PSOE 32, UV 5, IU 10.

Local Government. The Provincial Council (*Diputación Provincial*) is the administrative organ of the province, except in the 7 autonomous communities composed of only one province, where there are only the regional legislative and executive powers. The provincial council is indirectly elected, except in the 3 Basque provinces where they are elected by universal suffrage every 4 years. Each of the 7 main islands of the Canaries has a directly elected corporation, the *Cabildo Insular*, to rule its special interests; in the main islands of the Balearics there is an elected *Consell Insular*.

The provinces are constituted by the association of municipalities (8,095 in 1997). Municipalities are autonomous in their own sphere. At their head stands the Municipal Council (*Ayuntamiento*), members of which are elected in a universal

ballot every 4 years, and they, in turn, elect one amongst them as Mayor (*Alcalde*). In 1997 6,462 municipalities had fewer than 3,000 inhabitants (3,713 less than 500). Resource-poor municipalities may form associations (*Mancomunidades*) to share services. Elections were held in May 1995 for 65,732 municipal councillors. The electorate was 32,019,932. Turn-out was 69.79%. The Popular Party won 35.2% of votes cast (25.1% in 1991), the PSOE 30.8% (38.5%), the IU coalition 11.6% (8.5%).

DEFENCE. Conscription is for 9 months. Civilian service may be offered as an alternative. Recruits to the national police are exempt from conscription. Since 1989 women have been accepted in all sections of the armed forces. In 1996 the government began the phased abolition of conscription (starting with males born in 1984).

Army. The Army is divided into 8 Regional Operation Commands (including 2 overseas) and consists of 1 mechanized division, 2 armoured cavalry, 1 mountain, 3 light infantry, 1 airborne, 1 artillery, 1 engineer and 1 air-portable brigade; 3 island garrisons, 3 special operations battalions and the Spanish Legion. A Rapid Reaction Force is formed from the Spanish Legion and the airborne and air-portable brigades. There is also an Army Aviation brigade. Equipment includes 210 AMX-30, 164 M-48A5E and 294 M-60 main battle tanks. The Aviation Brigade consists of 170 helicopters (40 attack).

Strength (1997) 128,500 (including 81,500 conscripts). Of these 2,500 are stationed on the Balearic Islands, 6,500 on the Canary Islands and 10,000 in Ceuta and Melilla.

Guardia Civil. The paramilitary *Guardia Civil* numbers 75,000 (2,200 conscripts).

Navy. The principal ship of the Navy is the 17,000-tonne *Principe de Asturias*, a light vertical/short take-off and landing aircraft carrier. Her air group comprises 8 AV-8S Matador, 8 Sea King anti-submarine helicopters, 2 Sea King early warning helicopters and about 4 AB-212 light helicopters. There are also 8 French-designed submarines (4 Daphne class, 4 Agosta class), 6 US-design Santa Maria guided missile frigates with Standard SM-1 surface-to-air missiles, 5 other guided missile frigates, and 6 smaller frigates, 5 offshore patrol vessels, 10 coastal and 16 inshore patrol craft, 4 ocean minesweepers, 8 coastal minesweepers, 2 amphibious troop transports, 2 tank landing ships and 13 landing craft. Major auxiliaries include 3 tankers, 2 transports, 5 ocean tugs, 1 training ship, 4 water carriers and 6 survey ships. There are about 80 minor auxiliaries and service craft.

The Naval Air Service operates 20 AV-8S Matador and EAV-8B Harrier-II attack aircraft, 34 S-70B Seahawk, Sea King, SH 60B, AB-212 and Hughes 500 anti-submarine helicopters, 3 radar early warning Sea Kings and a few additional training and utility aircraft. The Air Force operates 7 Orion maritime patrol aircraft on anti-submarine tasks.

There are 8,000 marines, who provide 1 amphibious regiment and garrison regiments at the main bases. Main naval bases are at Ferrol, Rota, Cádiz, Cartagena, Palma de Mallorca, Mahón and Las Palmas (Canary Islands).

In 1997 personnel totalled 39,000 (13,500 conscripts) including the marines and 1,000 naval air arm.

Air Force. The Air Force is organized as an independent service, dating from 1939. It is administered through 4 operational commands. These are geographically oriented following a reorganization in 1991 and comprise Central Air Command, Straits Air Command, Eastern Air Command and Air Command of the Canaries.

The Tactical Air Command has 2 fighter-bomber squadrons of Spanish-built Northrop SF-5s and 1 aero-naval co-operation squadron with P-3 Orion anti-submarine aircraft. Air Combat Command has 1 squadron of RF-4C Phantom IIs, 4 squadrons of F-18 Hornets and 3 squadrons of Mirage F-1s. 2 Boeing 707 and 5 KC-130H tankers support the fighter squadrons. 3 wings of Air Transport Command operate C-130 Hercules, CN-235s and Spanish-built CASA Aviocars. Air Command of the Canaries has 3 squadrons, equipped with Aviocar transports, Mirage F1 fighter-bombers, F27 Maritime aircraft and Super Puma helicopters for search and rescue. Other equipment includes 3 Boeing 707s, 8 Falcons and helicopters for VIP

transport; and aircraft for photographic, firefighting, target towing and research duties. Air-sea rescue units have Aviocars and Super Puma helicopters.

American-built F33 Bonanza and Chilean-built Pillan piston-engined aircraft are used for basic training, after which pupil pilots progress to CASA C-101 jet aircraft. Two-seat versions of operational types are used as advanced trainers. Other training types include Hughes 300 and S-76 helicopters.

Strength (1997) 30,000 (13,000 conscripts).

INTERNATIONAL RELATIONS

Membership. Spain is a member of the UN, the Council of Europe, NATO, WEU, the EU, OSCE and OECD, and is a signatory to the Schengen Accord (*see* EUROPEAN UNION *under* MAJOR POLICY AREAS, *above*).

ECONOMY

Performance. Spain's current account on its balance of payments came out of deficit in 1995 for the first time since the mid-1980s. The balance showed a surplus of 586,500m. pesetas for the first 9 months of 1997; forecast 1997 (in US\$): 1,400m. Real GDP growth was 2.1% in 1996 (2.8% in 1995) and was officially estimated at 3% for 1997. Total GDP (estimate 1997, in US\$): 604,400m. Government debt (1996, % of GDP): 69.5%. Foreign debt (1995, in US\$): 277,500m.

Spain and EMU. With inflation low, interest rates down (cut to 4% in 1997) and its budget deficit under control, in Jan. 1998 Spain looked on course to meet EU (Maastricht) criteria for first-wave entrants to EMU.

Budget. A Convergence Plan covering 1997-2000 envisages an annual GDP growth of 3.2%, a reduction of public debt to 1.6% of GDP, the limitation of inflation to below 2.5%, and the creation of 1m. jobs by deregulating and increasing the flexibility of the economy and redistributing taxes. Government expenditure (1996, % of GDP): 43.1% (1997 forecast: 41.6%).

Revenue and expenditure in 1m. pesetas:

	1995	1996	1997	1998

VAT is normally 16%, with a rate of 7% on certain services (catering and hospitality), and 4% on basic foodstuffs.

Currency. The unit of currency is the peseta (notionally divided into 100 *céntimos* though they have not been in use since 1984). Bank-notes of 10,000, 5,000, 2,000 and 1,000 pesetas, and coins of 1, 5, 10, 25, 50, 100, 200 and 500 pesetas are in circulation. On 30 Nov. 1997 the circulation of bank-notes was 8,240,600m. pesetas; of coins, 350,000m. pesetas. Currency and gold reserves were US\$72,000m. in 1997; reserves at 30 Nov. 1997 (in 1,000m. pesetas): gold 338; IMF 241; SDRs 67; foreign exchange 7,328; ecus 1,811; others 30. Inflation in 1997 was 2% (3.2% in Dec. 1996).

Banking and Finance. The central bank is the Bank of Spain (*Governor:* Luis Ángel Rojo) which gained autonomy under an ordinance of 1994. Its governor is appointed

for a 6-year term. The Banking Corporation of Spain, *Argentaria*, groups together the shares of all state-owned banks, and competes in the financial market with private banks. In 1993 the government sold 49.9% of the capital of *Argentaria*; the remainder in 2 flotations ending on 13 Feb. 1998.

In terms of assets held in Nov. 1997 (in 1m. pesetas), the main banks were: Grupo Santander, 12,277,367; Banco Bilbao Vizcaya, 13,077,448; Banco Central Hispano, 10,444,037; Banco Popular, 2,433,008; Banesto, 5,305,252; *Argentaria* (no consolidated balance). On 31 Oct. 1997 Spanish banks deposits (in 1,000m. pesetas) amounted to 17,721 (private banks, 10,178; government banks, 7,543); foreign banks, 1,667; savings banks, 24,525; rural (farmers) savings banks, 3,235.

There are stock exchanges in Madrid, Barcelona, Bilbao and Valencia. The flotation in 1997 of public-sector holdings brought some 2m. new domestic investors into the Spanish equity market; privatization receipts in 1997 were expected to total 1,600,000m. pesetas.

Weights and Measures. The metric system was introduced in 1859.

ENERGY AND NATURAL RESOURCES

Electricity. Nuclear and hydroelectric power stations provided just over half of Spain's electricity in 1990. Electric power stations had a total installed capacity of 45.2m. kW in 1991; nuclear power stations (9 in 1997) had a net capacity of 7.3m. kW. The government announced in 1991 that no new nuclear power stations would commence operating before 2000. The total electricity output in 1996 amounted to 175,604m. kWh, of which 41,619m. was hydroelectric, 56,204m. nuclear, and 77,781m. other (carbon, natural gas, petroleum).

In Feb. 1997 the government disposed of a 25% stake in Endesa, the country's main electricity generator and distributor, reducing its shareholding in the group to 41%; full privatization is expected by 1999 or earlier. The Electrical Protocol drawn up between the government and electricity utilities to meet EU requirements is to be completed over a 10-year period, and will largely dismantle the highly regulated, interventionist structure which preceded it. This should provide for a more open market; construction of new generators will be liberalized and prices are expected to fall in real terms by 25-30% over 5 years. Industry analysts forecast a market which will favour hydro- and gas-powered generators.

Oil. Spain is heavily dependent on imported oil; Mexico is its largest supplier. Crude oil production (1996), 554,000 tonnes.

Gas. The government sold its remaining stake in the oil, gas and chemicals group Repsol in 1997. Natural gas production (1996) totalled 596m. cu. metres. Efforts are being made to increase consumption; on 1 Nov. 1996 Spain opened the Algerian gas link (Maghreb-Europe Pipeline), which is expected to supply 6,200m. cu. metres by 2000.

Minerals. Spain has a relatively wide range of minerals; the mining sector accounted for 1% of GDP in 1994. Coal production (1995), 13m. tonnes; other principal minerals (1992, in 1,000 tonnes): anthracite, 6,177; lignite, 18,689; iron, 1,334; pyrites, 406; copper, 9; lead, 30; zinc, 205; fluorspar, 97; potassium salts, 594; (1992, in tonnes) uranium, 862; tin, 7. The Huelva copper smelter capacity expanded by 20% from 150,000 tonnes to 180,000 tonnes in 1995. Also in 1995, a large mercury deposit was found in southern Spain which could raise mercury levels to within a quarter of proven world reserves. A modern gold mine in Asturias (opened Oct. 1996) is expected to produce about 1,000 troy ounces a year.

Agriculture. Agriculture contributed 4.8% of GDP in 1994 and employed about 10.1% of the workforce. Crop production accounted for 62.2% of total agricultural production in 1990; animal production for 37.8%.

19,354,700 ha were under cultivation in 1995, including 4,372,600 ha under irrigation and 6,434,000 ha under pasture. There were (1992) 766,267 tractors, 280,989 motor ploughs and 47,795 harvesters in use.

Spain has more land dedicated to the grape than any other country in the world and is ranked third among wine producers (behind Italy and France). Wine exports have increased in value by nearly 600% from 1991-97. Total export receipts in 1996 totalled some £600m. A large part of Spain's output goes to Italy for bottling. In 1992, 1,333,000 ha were under vines. Production of wine (1996), 32,720,000 hectolitres; of grapes, 3.3m. tonnes.

The area under onions in 1996 was 28,200 ha, yielding 1,018,100 tonnes; of tomatoes, 58,400 ha, 3,224,800 tonnes (21% of EU production).

In fruit, Spain contributes a fifth of EU total harvest, and more than half of all citrus fruits. Fruit production (1996, in tonnes; ha, 1992): Oranges and mandarins, 3.5m. (201,282 ha); lemons, 433,100 (45,022 ha); apples, 893,600; peaches, 892,300.

Production of olive oil (1996), 670,000 tonnes. EU policy to reform the complex aid system for olive-oil (based on hand-outs per tree rather than oil production) is strongly opposed in all 5 EU olive oil-producing countries, nowhere more than Spain which, in Andalusia, has the world's largest producing zone. In 1997 Spain's olive growers marched on Madrid in protest over the reforms, which have provoked fear of plantation neglect and loss of employment.

Other important products are esparto, flax, tobacco, hemp and pulse; raw cotton production (1995): 88,000 tonnes.

Livestock (1995): Cattle, 5.51m.; sheep, 21.32m.; goats, 2.60m.; pigs, 18.16m.; laying hens, 45.72m.; horses, 0.24m; asses and mules (1992), 0.25m. Livestock density per 100 ha is among the lowest in the EU. Livestock products (1995 in 1,000 tonnes): Pork, 2,174; beef, 508.49; mutton, 227.12; poultry meat, 924.31; goat, 14.93; rabbit, 110.88. Milk (1993), 6.7m. tonnes; eggs (1991), 888.3m. dozen; honey (1991), 24,000 tonnes.

Forestry. Spain is among the most wooded countries in the EU (around 26m. ha, 50.7% of its total area) and together with France and Germany, it has the largest areas of forest also (8.2m. ha in 1990). Wood production (1992), 10,378,000 cu. metres; other forest products (in tonnes): Resins, 1,771; cork, 72,090; esparto, 792. Total value of forest products (1992): 127,815m. pesetas.

Fisheries. Spain is the second largest fishing country in the EU after Denmark. Its annual catch is around 1.4m. tonnes and accounts for a fifth of the EU's annual catch. Fishing vessels had a total tonnage of 524,602 tonnes in 1995 (596,441 GRT in 1994); fleets have been gradually reduced from 20,558 boats in 1991 to 18,091 in 1996. Total catch (1993), 1,443,581 tonnes. Fish-farming output (1991), 222,427 tonnes, of which 200,922 were molluscs and shellfish, 21,505 fish; Spain supplies around half of total EU mussel production.

INDUSTRY. The industrial sector represented 28.1% of GNP in 1995. In 1996-97 industrial production was up by 3.3% on the previous 12 months, and industry accounted for 22.9% of the labour force (29.7% in 1994).

Principal textile production (1993, in 1,000 tonnes): Yarn, 227; cotton cloth, 64; synthetic and artificial fabrics, 62; knitwear, 23. Industrial products (1993, in tonnes): Sulphuric acid, 1,161,000; nitrogenous fertilizers, 642,000; plastics, 2.7m.; pulp and paper, 6.06m.; cement (1995), 24.47m.; crude oil refined (1995, in the 9 oil refineries), 55.2m. tonnes; steel production (1996), 12.3m.

The number of vehicles manufactured in 1995 was 2,333,785 of which 1,958,789 were passenger cars and 374,998 commercial. In 1996 1.39m. refrigerators and

freezers, 2.6m. cookers, hotplates and microwaves, and 1.53m. washing machines, dishwashers and clothes driers were manufactured; the number of TV sets (1993), 3.8m. There are also important toy and shoe industries.

Labour. The economically active population numbered 16.03m. in 1996. Of these, 12.52m. were employed: 1.05m. in agriculture and fishing, 2.5m. in industry, 1.2m. in construction and 7.73m. in trade, transport and other public and personal services. Post-Franco legislation brought radical changes to the labour market, including the legalization in 1984 of fixed-term contracts. A third of Spain's wage earners were on temporary contracts by 1998. The monthly minimum wage for adults (1998) was 68,040 pesetas; the average monthly wage for workers in industry and services was 190,500 pesetas (1,331 pesetas an hour); average hourly earnings increased by 4% in 1997. The retirement age is 65 years.

In terms of unemployment, Spain has the highest rate among developed countries. 22.7% of the active population was unemployed at the end of 1997. On 17 Sept. 1997, the Council of Ministers passed the Multi-Year Employment Plan which co-ordinates the actions of 9 ministries with the aim of creating 1m. jobs to bring unemployment down to 17% by the year 2000. The scheme represents a 20% increase in budget spending for job creation.

Trade Unions. The Constitution guarantees the establishment and activities of trade unions provided they have a democratic structure. The most important trade unions are *Unión General de Trabajadores* (UGT) and *Comisiones Obreras* (CO). In Jan. 1997 the UGT and CO and employers' associations signed an agreement to be in force until 2000 providing for compulsory mediation before strike action; in April, employers' associations and trade unions reached an agreement covering 1997-2000 to combat job insecurity and reform collective bargaining. A National Employment Committee was subsequently set up to oversee the workings of the agreement.

FOREIGN ECONOMIC RELATIONS. In the first quarter of 1997 exports were up by 15%, imports by 8%. The economy recorded a foreign trade surplus of 302,000m. pesetas and a 32% reduction in the trade deficit (1997 forecast in US\$: 16,000m.).

Total foreign investments (Jan-July 1997), 535,202,000m. pesetas, representing a 16% increase on 1996: 21% to EU countries; and 61% to Latin America (forged mainly by Tisa, the international arm of Telefonica, which operates 10m. lines and services 1m. cable TV and cellular phone subscribers in the region, with assets of US\$ 5,000m.).

Commerce. Foreign trade of Spain (including Balears, Canaries, Ceuta, Melilla, in 1m. pesetas):

There is a high-speed standard-gauge (1,435 mm) railway from Madrid to Seville. In 1995 freight carried was 26m. tonnes (4.2% of total freight) and 464.8m. passengers (5.9% of internal passenger traffic). There are metros in Madrid (112 km), Barcelona (72 km) and Bilbao (26 km), and a light railway in Valencia.

A second operator, R  t  vision, is expected to account for 10% of the domestic market, which is scheduled to be wholly deregulated by the end of 1998. The cellular phone business was deregulated in 1995; the market is shared by Telefonica and Airtel.

Radio Nacional de Espa  a broadcasts 5 programmes on medium-waves and FM, as well as many regional programmes; it has one commercial programme. The most successful domestic network is that of an independent, Cadena SER (*Sociedad Espa  ola de Radiodifusi  n*); *Cadena de Ondas Populares Espa  olas* (COPE) is owned by the Roman Catholic church. Two independent radio networks cover the whole of Spain. SOCIAL INSTITUTIONS

Justice. Justice is administered by Tribunals and Courts, which jointly form the Judicial Power. Judges and magistrates cannot be removed, suspended or transferred except as set forth by law. The Constitution of 1978 established the *General Council of the Judicial Power*, consisting of a President and 20 magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the state's legislative and executive organs. Its members are appointed by the *Cortes Generales*. Its President is that of the Supreme Court (*Tribunal Supremo*), who is appointed by the monarch on the proposal of the General Council of the Judicial.

The Judicature is composed of the Supreme Court; 17 Higher Courts of Justice, 1 for each autonomous community; 52 Provincial High Courts; Courts of First Instance; Courts of Judicial Proceedings, not passing sentences; and Penal Courts, passing sentences.

The Supreme Court consists of a President, and various judges distributed among 7 chambers: 1 for civil matters, 3 for administrative purposes, 1 for criminal trials, 1 for social matters and 1 for military cases. The Supreme Court has disciplinary faculties; is court of appeal in all criminal trials; for administrative purposes decides

in first and second instance disputes arising between private individuals and the State; and in social matters makes final decisions.

A new penal code came into force in May 1996, replacing the code of 1848. It provides for a maximum of 30 years imprisonment in specified exceptional cases, with a normal maximum of 20 years. Sanctions with a rehabilitative intent include fines adjusted to means, community service and week-end imprisonment. The death penalty was abolished by the 1978 Constitution. The prison population in 1996 was 43,033 (39,051 men, 3,982 women); 901,696 criminal offences were reported in 1994.

A juvenile criminal law of 1995 lays emphasis on rehabilitation. It raised the age of responsibility from 12 to 14 years. Criminal conduct on the part of children under 14 is a matter for legal protection and custody. 14- and 15-year-olds are classified as 'minors'; 16- and 17-year-olds as 'young persons'; and the legal majority for criminal offences is set at 18 years. Persons up to the age of 21 may, at the courts' discretion, be dealt with as juveniles.

A jury system commenced operating in Nov. 1995 in criminal cases (first trials in May 1996). Juries consist of 9 members. In Sept. 1997 at the opening ceremony of the Judicial Year, presided over by the king, the President of the General Council of the Judicial Power called for a general agreement from Parliament and the government on legal reform for solving the problems in the administration of justice, namely its slowness and esoteric nature.

The *Audiencia Nacional* deals with terrorism, monetary offences and drug-trafficking where more than 1 province is involved. Its president is appointed by the General Council of the Judicial Power.

There is an Ombudsman (*Defensor del Pueblo*), who in 1994 received 18,594 complaints.

Religion. There is no official religion. Roman Catholicism is the religion of the majority. There are 11 metropolitan sees and 52 suffragan sees, the chief being Toledo, where the Primate resides. The archdioceses of Madrid-Alcalá and Barcelona depend directly from the Vatican. There are about 0.25m. other Christians, including several Protestant denominations, Jehovah's Witnesses (about 60,000) and Mormons, and 0.45m. Moslems, including Spanish Moslems in Morocco. The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of people of Judaist faith is estimated at about 15,000.

Education. In 1991 the General Regulation of the Educational System Act came into force. This Act gradually extends the school-leaving age to 16 years and determines the following levels of education: Infants (3–5 years of age), primary (6–11), secondary (12–15) and baccalaureate or vocational and technical (16–17). Primary and secondary levels of education are now compulsory and free. Religious instruction is optional.

In Sept. 1997 a joint declaration with trade unions, parents' and schools' associations was signed in support of a new finance law guaranteeing that spending on education will reach 6% of GDP within 5 years, thus protecting it from changes in the political sphere.

A new compulsory secondary education programme has replaced the Basic General Education programme which was in force since 1970. In addition, university entrance exams underwent reform in 1997, resulting in greater emphasis now being placed on the teaching of Humanities at secondary level.

In 1997–98 pre-primary education (under 6 years) was undertaken by 2,522 schools, with 1,123,003 pupils; primary or basic education (6 to 14 years): 13,037 schools, with 2,607,602 pupils. There were 215,584 teachers in pre-primary and primary schools. Secondary education (14–17 years), including high schools and technical schools, was conducted at 5,449 schools, with 3,492,726 pupils and 150,220 teachers.

In 1997–98 there were 60 universities: 40 public state universities, 3 polytechnic universities, 13 private universities (including 3 Catholic), and 4 Open universities. In 1997–98 there were 1,571,300 students at state universities; 64,423 at private universities.

Health. In 1995 there were 162,089 doctors (3.8 per 1,000 inhabitants), 13,242 dentists, 40,323 pharmacists and 167,957 nurses (including 6,105 midwives). Number of hospitals (1992), 801, with 161,537 beds.

Welfare. The social security budget was 12,134,637m. pesetas in 1997. The budget for 1998 was: for pensions, 8,356,100m. pesetas; health, 3,822,000m.; social benefits and incapacity, 1,554,000m.; unemployment, 1,495,400m. The minimum monthly pension in 1996 was 53,435 pesetas.

In 1997 the system of contributions to the social security and employment scheme was: For pensions, sickness, invalidity, maternity and children, a contribution of 28.3% of the basic wage (23.6% paid by the employer, 4.7% by the employee); for unemployment benefit, a contribution of 7.8% (6.2% paid by the employer, 1.6% by the employee). There are also minor contributions for a Fund of Guaranteed Salaries, working accidents and professional sicknesses, and for vocational training.

KEY HISTORICAL EVENTS. In the 18th century the central kingdom, Kandy, was the only surviving independent state on the island of Ceylon. The Dutch, who had obtained their first coastal possessions in 1636, had driven out the preceding Portuguese interests and become the dominant power in most of the island. The Dutch attacked Kandy but were unable to hold it. The interior terrain was mountainous and thickly forested and the king of Kandy's forces were well-trained to make use of it as guerrillas.

The king attracted British attention by asking for help against the Dutch. In 1796 the British East India Company sent a naval force to Ceylon (as the British then called it). The Dutch surrendered their possessions, which left the British in control of the maritime areas surrounding Kandy. These areas were at first attached to the Madras Presidency of India, whence the naval force had come, but in 1802 they were constituted a separate colony under the Crown.

Once the British began to develop their new territory they came to see Kandy as a threat. An attack in 1803 failed, but by 1815 the chiefs of Kandy were discontented with their king who was of alien (south Indian) stock and a despot. The chiefs approached the British, who invaded Kandy with their help. The king was deposed and the British crown succeeded him as sovereign.

The Kandyan Convention of 1815 annexed Kandy to British Ceylon while recognizing most of the traditional rights of the chiefs. However, in 1817, dissatisfied with the terms, the chiefs rebelled. The rebellion was suppressed and the rights established by the Convention were abolished.

Ceylon was then united for the first time since the 12th century. The British (like the preceding Dutch and Portuguese) built up a plantation economy. Coffee was dominant until an outbreak of *Hoemilia vastatrix* fungus destroyed the plants in 1870. Spices, cocoa and rice all followed but tea became the main cash crop after successful experiments in the 1880s.

Foreign rule served to subdue the traditional hostility between northern Tamils and southern Sinhalese, providing as it did a new frame of reference to an alien culture. The Ceylon National Congress, formed in 1919, contained both Sinhalese and Ceylon Tamil groups. (The Indian Tamils brought in as a labour force for the tea estates were a separate community.) Tamil national feeling, however, was expressed over the issue of the use of Tamil languages in schools.

On 4 Feb. 1948 the Ceylon Independence Act took effect, and Ceylon became a Dominion of the Commonwealth. UK defence forces were to be allowed to remain as mutually agreeable, although it was later decided that all UK bases should be transferred or withdrawn by 1962.

In 1956 Solomon Bandaranaike became prime minister at the head of the People's United Front, advocating neutral foreign policy and the promotion of Sinhalese national culture at home. In Sept. 1959 he was murdered; his widow Sirimavo Bandaranaike succeeded him in July 1960 at the head of an increasingly socialist government. Agreements were made with India (in 1964 and 1974) for the repatriation of Indian nationals. In May 1972 Ceylon became a republic and adopted the name Sri Lanka.

In July 1977 Mrs Bandaranaike's government fell, mainly because of economic failures and the repression of non-Sinhalese elements. The United National Party (dominant until 1956) returned to power and in 1978 a new constitution provided a presidential system with the United National Party leader Junius Jayawardene as the

first executive president. Economic problems were approached through large-scale investment of foreign capital.

The problem of communal unrest remained unsolved and Tamil separatists were active. In 1983 the Tamil United Liberation Front members of parliament were asked to renounce their objective for a separate Tamil state. They refused and withdrew from parliament. Militant Tamils then began armed action which developed into civil war.

A state of emergency ended on 11 Jan. 1989, but violence continued. President Ranasinghe Premadasa was assassinated on 1 May 1993. A ceasefire was signed on 3 Jan. 1995, but fighting broke out again in April. The 'Liberation Tigers of Tamil Eelam' stronghold of Jaffna was captured by government forces in Dec. 1995 and by mid-1997 was firmly under government control. Government forces also made progress in opening a supply route along the northern highway to Jaffna, home to 0.5m. Tamils. The 14-year ethnic war has claimed up to 50,000 lives.

TERRITORY AND POPULATION. Sri Lanka is an island in the Indian Ocean, south of the Indian peninsula from which it is separated by the Palk Strait. On 28 June 1974 the frontier between India and Sri Lanka in the Palk Strait was redefined, giving to Sri Lanka the island of Kachchativu.

KEY HISTORICAL EVENTS. In 1821 the area that is now Sudan was conquered by the Egyptians. In 1881 Muhammad Ahmad, proclaiming himself the Mahdi, led an uprising and gained control until, in 1899, an Anglo-Egyptian army defeated the Mahdi and established an Anglo-Egyptian condominium.

On 19 Dec. 1955 the Sudanese parliament passed unanimously a declaration that a fully independent state should be established forthwith, and that a Council of State should assume the duties of head of state. The UK and Egypt gave their assent on 31 Dec. 1955 and on 1 Jan. 1956 Sudan was

proclaimed a sovereign independent republic.

In 1958 there was a coup that established a military government until the end of 1964 when a civilian government was re-established. On 8 July 1965 the Constituent Assembly elected Ismail al Azhari as President of the Supreme Council, but the government was faced with constant difficulties from the southern provinces which considered themselves dominated by the north. Rebellions began in 1965.

On 23 April 1969 the prime minister, Muhammad Ahmed Mahgoub resigned; and on 25 May the government was taken over by a 10-man Revolutionary Council under Col. Jaafar al Nemery. The Council was dissolved in 1972, and a new constitution was introduced in 1973. Legislative power was placed with a National Assembly, an elected body; and some measure of self-government was granted to the southern provinces. However, discontent in these latter provinces continued, and in addition Nemery met considerable opposition in his attempts to make Sudan a formal Islamic state. On 6 April 1985 he was deposed in a military coup led by Gen. Abel-Rahman Swar al-Dahab, who established a Military Council to which the Cabinet was responsible prior to the promised re-establishment of civilian rule. Elections were held, although they were suspended in parts of the southern provinces, in April 1986.

On 30 June 1989 Brig.-Gen. (later Lieut.-Gen.) Omar Hassan Ahmad al-Bashir overthrew the civilian government in a military coup.

The rebel Sudan People's Liberation Army (SPLA), consisting of non-Moslem southerners, maintains guerrilla activities in the south while the National Democratic Alliance (NDA), northern Moslems opposed to the ruling National Islamic Front, and non-Moslem southerners of the SPLA fight on in the north. Fighting also erupted in Jan. 1997 along the border with Ethiopia. On 9 July 1997 at a meeting attended by representatives of Djibouti, Eritrea, Ethiopia, Kenya and Uganda the Sudanese government accepted a 'Declaration of Principles' as a framework for negotiations to end the civil war, including the separation of state and religion and self-determination for the south of Sudan.

After 14 years Sudan's civil war has killed some 1.3m. people and reduced the south to a level barely above subsistence.

TERRITORY AND POPULATION. Sudan is bounded in the north by Egypt, north-east by the Red Sea, east by Eritrea and Ethiopia, south by Kenya, Uganda and the Democratic Republic of the Congo, west by the Central African Republic and Chad, and north-west by Libya. Its area is 967,500 sq. miles (2,505,813 sq. km). Population (1983 census), 20,564,364; estimate (1997), 32,594,000.

Vital statistics rates, 1997 estimates (per 1,000 population). Births, 40.6; deaths, 11.2. Infant mortality (per 1,000 live births), 74.3. Expectation of life in 1997 was 55.5 years (54.6 for males and 56.5 for females). Growth rate, 3.06% per annum.

In Feb. 1994 the former 9 regions were subdivided to form 26 federal states as follows:

<i>Former region</i>	<i>New states</i>
Khartoum	Khartoum
Bahr al-Ghazal	Western Bahr al-Ghazal; Northern Bahr al-Ghazal; Warab
Central	Gezira; White Nile; Sinnar; Blue Nile
Darfur	Northern Darfur; Southern Darfur; Western Darfur
Eastern	Red Sea; Gedaref; Kassala
Equatoria	Eastern Equatoria; Western Equatoria; Bahr al-Jabal
Kurdufan	Northern Kurdufan; Southern Kurdufan; Western Kurdufan

The chief cities (census, 1983) are the capital, Khartoum (476,218), its suburbs Omdurman (526,287) and Khartoum North (341,146), Port Sudan (206,727), Wadi Medani (141,065), al-Obeid (140,024), Kassala (98,751 in 1973), Atbara (73,009), al-Qadiri (66,465 in 1973), Kosti (65,257 in 1973) and Juba (56,737 in 1973).

The northern and central thirds of the country are populated by Arab and Nubian peoples, while the southern third is inhabited by Nilotic and Bantu peoples; Arabic, the official language, is spoken by 60% of inhabitants.

CLIMATE. Lying wholly within the tropics, the country has a continental climate and only the Red Sea coast experiences maritime influences. Temperatures are generally high throughout the year, with May and June the hottest months. Winters are virtually cloudless and night temperatures are consequently cool. Summer is the rainy season inland, with amounts increasing from north to south, but the northern areas are virtually a desert region. On the Red Sea coast, most rain falls in winter. Khartoum. Jan. 74°F (23·3°C), July 89°F (31·7°C). Annual rainfall 6" (157 mm). Juba. Jan. 83°F (28·3°C), July 78°F (25·6°C). Annual rainfall 39" (968 mm). Port Sudan. Jan. 74°F (23·3°C), July 94°F (34·4°C). Annual rainfall 4" (94 mm). Wadi Halfa. Jan. 60°F (15·6°C), July 90°F (32·2°C). Annual rainfall 0·1" (2·5 mm).

CONSTITUTION AND GOVERNMENT. The constitution was suspended after the 1989 coup and a 12-member Revolutionary Council has ruled. A 300-member Provisional National Assembly was appointed in Feb. 1992 as a transitional legislature pending elections. These were held on 6–17 March 1996. The National assembly now has 400 members, 275 of whom are directly elected by popular vote and 125 indirectly. Presidential elections were also held in March 1996. President al-Bashir was re-elected by 75% of votes cast.

Civil Justice is administered by the courts constituted under the Civil Justice Ordinance, namely the High Court of Justice—consisting of the Court of Appeal and Judges of the High Court, sitting as courts of original jurisdiction—and Province Courts—consisting of the Courts of Province and District Judges. The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice for the Moslem population has always been administered by the Islamic law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts; President of the Sharia Division is the Grand Kadi. In Dec. 1990 the government announced that Sharia would be applied in the non-Moslem southern parts of the country as well.

Criminal Justice is administered by the courts constituted under the Code of Criminal Procedure, namely major courts, minor courts and magistrates' courts. Serious crimes are tried by major courts, which are composed of a President and 2 members and have the power to pass the death sentence. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

Lesser crimes are tried by Minor Courts consisting of 3 Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts.

KEY HISTORICAL EVENTS. The first Europeans to reach the area were the Spanish in 1499, but it was the British who established a colony in 1650. At the peace of Breda (1667) between Great Britain and the United Netherlands, the area known as Suriname was assigned to the Netherlands in exchange for the colony of New Netherland in North America. This was confirmed by the treaty of Westminster of Feb. 1674. Suriname was twice in British possession during the Napoleonic Wars in 1799-1802 (when it was restored to the Batavian Republic at the peace of Amiens) and 1804-16, when it was returned to the Netherlands.

On 25 Nov. 1975, Suriname gained full independence and was admitted to the UN on 4 Dec. 1975. On 25 Feb. 1980 the government was ousted in a *coup*, and a National Military Council (NMC) established. A further *coup* on 13 Aug. replaced several members of the NMC and the State President. Other attempted *coups* took place in 1981 and 1982, with the NMC retaining control. In Oct. 1987 a new constitution was approved by referendum and following elections in Nov. Suriname returned to democracy in Jan. 1988 but on 24 Dec. 1990 a further military coup deposed the government. Ronald Venetiaan was elected President in Sept. 1991.

The government and rebel guerrilla groups reached a peace agreement in Aug. 1992 and after the elections of May 1993 Jules Wijdenbosch, a candidate of the National Democratic Party, was elected President.

KEY HISTORICAL EVENTS. The Swazi migrated into the country to which they have given their name in the last half of the 18th century. They settled first in what is now southern Swaziland, but moved northwards under their chief, Sobhuza – known also to the Swazi as Somhlolo. Sobhuza died in 1838 and was succeeded by Mswati. The further order of succession has been Mbandzeni and Bhunu, whose son, Sobhuza II, was installed as King of the Swazi nation in 1921 after a long minority.

The independence of the Swazis was guaranteed in the conventions of 1881 and 1884 between the British Government and the Government of the South African Republic. In 1890, soon after the death of Mbandzeni, a provisional government was established representative of the Swazis, the British and the South African Republic Governments. In 1894 the South African Republic was given powers of protection and administration. In 1902, after the conclusion of the Boer War, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory, through the special commissioner. Swaziland became independent on 6 Sept. 1968.

On 25 April 1967 the British Government gave the country internal self-government, changing the country's status to that of a protected state. The Ngwenyama, Sobhuza II, was recognized as King of Swaziland and head of state. King Sobhuza died on 21 Aug. 1982. On 25 April 1986, King Mswati III was installed as King of Swaziland. Despite a secret pact with the Republic of South Africa concluded in 1982 and providing for joint operations against guerrillas fighting apartheid, the South Africans launched an armed raid into Swaziland in Aug. 1986 aimed at the (South African) African National Congress. There is conflict within the Swazi government over the role of the royal family and relations with the Republic of South Africa.

in 2 rounds, the second being a run-off between the 5 candidates who come first in each constituency.

KEY HISTORICAL EVENTS. Sweden was organized as an independent unified state in the 10th century when the Swedes in the north of the country and the Goths in the south were united by Olof. Finland was acquired in the 13th century. In the 14th century Sweden was joined with Norway and Denmark in the Kalmar Union; however, under Gustav I, Sweden regained her independence in 1523.

Sweden became a constitutional monarchy in 1809, in which year she also ceded Finland to Russia. Norway was united with Sweden in 1815, but became independent in 1905. Sweden remained neutral during the two world wars of 1914-18 and 1939-45. From 1932 to 1976, Sweden was governed by the Social Democratic Party which set the model for welfare reform combined with rapid economic growth. But high taxation brought a reaction in the 1970s when the Centre Party (representing chiefly small farmers and traders) and the Conservatives staged a comeback which brought them to power in coalition with the Liberal Party in 1976. However, in 1981 the Social Democrat leader, Olaf Palme, became prime minister with support from the Communist Party. On 28 Feb. 1986 Palme was assassinated in Stockholm by unknown assailants; Ingvar Carlsson succeeded him as prime minister. In 1991, a Conservative-led coalition took over the government at a time of recession. Austerity measures helped in the revival of the Social Democrats who returned to power in 1994 but with a commitment to economic stringency.

TERRITORY AND POPULATION. Sweden is bounded in the west and north-west by Norway, east by Finland and the Gulf of Bothnia, south-east by the Baltic Sea and south-west by the Kattegat. The area is 449,964 sq. km. At the 1990 census the population was 8,587,353. Estimate, July 1997, 8,865,051. About 80-85% of the population live in the densely populated areas.

CONSTITUTION AND GOVERNMENT. Under the 1975 Constitution Sweden is a representative and parliamentary democracy. The King is Head of State, but does not participate in government. Parliament is the single-chamber *Riksdag* of 349 members elected for a period of 4 years in direct, general elections.

The manner of election to the *Riksdag* is proportional. The country is divided into 29 constituencies. In these constituencies 310 members are elected. The remaining 39 seats constitute a nation-wide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency, if it has obtained at least 12% of the votes cast there.

At the elections of 18 Sept. 1994 turn-out was 86%. The Social Democratic Party (SDP) won 162 seats with 45.3% of votes cast (138 with 37.6% in 1991), the Moderate Party 80 with 22.4% (80 with 21.9%), the Centre Party 27 with 7.7% (31 with 8.5%), the Liberal Party 26 with 7.2% (33 with 9.1%), the Left Party (ex-Communists) 22 with 6.2% (16 with 4.5%), the Green Party 18 with 5% and the Christian Democratic Party 14 with 4.1% (26 with 7.1%).

The parishes, 2,544 in 1996, are the local units of the Swedish Lutheran Church and have the same status as municipalities. SOCIAL INSTITUTIONS

Justice. The administration of justice is independent. The Attorney-General (appointed by the Government) and 3 Ombudsmen exercise a check on judicial affairs administration. In 1995–96 the Ombudsmen received altogether 5,121 cases; of these, 125 were instituted on their own initiative.

There is a 3-tier hierarchy of courts: The Supreme Court; 6 intermediate courts of appeal and 97 district courts. Of the district courts 27 also serve as real estate courts and 6 as water rights courts.

District courts are courts of first instance and deal with both civil and criminal cases. Petty cases are tried by 1 judge. Civil and criminal cases are tried as a rule by 3 to 4 judges or in minor cases by 1 judge. Disputes of greater consequence relating to the Marriage Code or the Code relating to Parenthood and Guardianship are tried by a judge and a jury of 3–4 lay assessors. More serious criminal cases are tried by a judge and a jury of 5 members (lay assessors) in felony cases, and of 3 members in misdemeanour cases. The cases in courts of appeal are generally tried by 4 or 5 judges.

Those with low incomes can receive free legal aid out of public funds. In criminal cases a suspected person has the right to a defence counsel, paid out of public funds.

The Attorney-General and the Judicial Commissioner for the Judiciary and Civil Administration (Ombudsman) supervise the application in the public sector of acts of Parliament and regulations.

There were 76 penal and correctional institutions for offenders in 1996 with an average population of 6,000 inmates (including offenders in remand prison).

Religion. The national church is the Swedish Lutheran Church, due to be disestablished in 2000. It is headed by Archbishop Karl Gustaf Hammar (b. 1943) and has its metropolitan see at Uppsala. In 1996 there were 13 bishoprics and 2,544 parishes. The clergy are chiefly supported from the parishes and the proceeds of the church lands. In secondary education at the higher stage (the integrated upper secondary school), there were 66,561 pupils in Oct. 1995 (excluding pupils in the fourth year of the technical course regarded as third-level education). The folk high schools, 'people's colleges', had 37,148 pupils in courses of more than 10 weeks in 1994–95.

In municipal adult education there were 155,971 students in 1995.

There are also special schools for pupils with visual and hearing handicaps (766 pupils in 1995) and for those who are mentally retarded (13,417 pupils).

All schemes are compulsory, except for unemployment insurance. Benefits are usually income-related. Most social security schemes are at present undergoing extensive discussion and changes. Recent proposals include the introduction of a new pension scheme.

KEY HISTORICAL EVENTS. The history of Switzerland can be traced back to Aug. 1291 when the Uri, Schwyz and Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1515, 13. Various territories were acquired either by single cantons or by several in common, and in 1648 the league became formally independent of the Holy Roman Empire. No addition was made to the number of cantons until 1798, in which year, under the influence of France, the unified Helvetic Republic was formed. This

failed to satisfy the Swiss, and in 1803 Napoleon, in the Act of Mediation, gave a new constitution, and out of the lands formerly allied or subject increased the number of cantons to 19. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Spain and Sweden, and the Federal Pact, which included 3 new cantons, was accepted by the Congress of Vienna. In 1848 a new constitution was passed. The 22 cantons set up a federal government (consisting of a federal parliament and a federal council) and a federal tribunal. This constitution, in turn, was on 29 May 1874 superseded by the present constitution, which also combines the federal principle with a national and local use of referendums. Though women constitute a third of the work-force, female franchise dates only from Feb. 1971. In a national referendum held in Sept. 1978, 69·9% voted in favour of the establishment of a new canton, Jura, which was established on 1 Jan. 1979.

Switzerland was neutral in both world wars. After the First World War, it joined the League of Nations, which was based in Geneva. But after the Second World War neutrality was thought to conflict with membership of the UN, though Switzerland participates in its agencies and since 1948 has been a contracting party to the Statute of the International Court of Justice.

TERRITORY AND POPULATION. Switzerland is bounded in the west and north-west by France, north by Germany, east by Austria and south by Italy. Area and population by canton (with date of establishment), according to the census held on 1 Dec. 1980 and estimates of 31 Dec. 1994 and 31 Dec. 1997:

German, French and Italian are the official languages; Romansch (spoken mostly in Graubünden), hitherto a national language, was upgraded to 'semi-official' in 1996. German is spoken by the majority of inhabitants in 19 of the 26 cantons, French in Fribourg, Vaud, Valais, Neuchâtel, Jura and Geneva, and Italian in Ticino. At the 1990 census 63.6% of the population gave German as their mother tongue, 19.2% French, 7.6% Italian, 0.6% Romansch and 8.9% other languages. 1997 statistics are 65% German, 18.4% French, 9.8% Italian, and 0.8% Romansch.

CONSTITUTION AND GOVERNMENT. The Constitution dates from 29 May 1879. Switzerland is a republic. The highest authority is vested in the electorate, *i.e.*, all Swiss citizens over 18. This electorate, besides electing its representatives to the Parliament has the voting power on amendments to, or on the revision of, the Constitution. It also takes decisions on laws and international treaties if requested by 50,000 voters or 8 cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support required for such demands being 100,000 voters (popular initiative).

The Federal Government is supreme in matters of peace, war and treaties; it regulates the army, the railway, telecommunication systems, the coining of money, the issue and repayment of bank-notes and weights and measures. It also legislates on matters of copyright, bankruptcy, patents, sanitary policy in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zurich and at Lausanne, 2 federal universities and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or

great part of Switzerland, such as those relating to rivers, forests and the construction of national highways and railways. By referendum of 13 Nov. 1898 it is also the authority in the entire spheres of common law. In 1957 the Federation was empowered to legislate on atomic energy matters and in 1961 on the construction of pipelines of petroleum and gas.

The legislative authority is vested in a parliament of 2 chambers: the Council of States (*Ständerat/Conseil des États*) and the National Council (*Nationalrat/Conseil National*). The Council of States is composed of 46 members, chosen and paid by the 23 cantons of the Confederation, 2 for each canton. The mode of their election and the term of membership depend on the canton. 3 of the cantons are politically divided—Basel into Town and Country, Appenzell into Outer-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden. Each of these 'half-cantons' sends 1 member to the State Council.

The National Council has 200 members directly elected for 4 years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least 1 member. The members are paid from federal funds. The parliament sits for 16 three-day sessions annually.

The 200 members are distributed among the cantons as follows:

Zurich	35	Appenzell—Outer- and Inner-Rhoden	3
Berne	29	St Gallen (St Gall)	12
Lucerne	9	Graubünden (Grisons)	5

A general election takes place by ballot every 4 years. Every citizen of the republic who has entered on his 18th year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 50,000 citizens or 8 cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

On 22 Oct. 1995 elections were held for both chambers of the federal parliament; turn-out was 42%. In the Council of States, the Radical Democratic Party (RDP) gained 17 seats (18 in 1991); the Christian Democratic Party (CDP), 16 (16); the Swiss Socialist Party (SSP), 5 (nil); the Swiss People's Party or Democratic Centre Union (SPPDCU), 5 (4); others, 3. In the National Council, SSP gained 54 seats (41 in 1991); RDP, 45 (44); CDP, 34 (35); SPPDCU, 29 (25); others, 38.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of 7 members, elected from 7 different cantons for 4 years by the *United Federal Assembly*, i.e., joint sessions of both chambers. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either chamber, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible to become a member of the executive.

The *President* of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation. Both are elected by the United Federal Assembly for 1 calendar year from among the Federal Councillors, and are not immediately re-eligible to the same offices. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation (1998): Flavio Cotti (CDP).

The 7 members of the Federal Council act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

In March 1998 the Federal Council comprised:

Foreign Affairs: Flavio Cotti (CDP). *Interior:* Ruth Dreifuss (SSP). *Justice and Police:* Arnold Koller (CDP). *Military:* Adolf Ogi (SPPDCU). *Finance:* Kaspar Villiger (RDP). *Public Economy:* Jean-Pascal Delamuraz (RDP). *Transport, Communications and Energy:* Moritz Leuenberger (SSP).

National anthem: 'Trittst im Morgenrot daher'/'Sur nos monts quand le soleil'/'Quando il eiel' di porpora' ('Step into the rosy dawn'); German words by Leonard Widmer, French by C. Chatelanat, Italian by C. Valsangiacomo, tune by Alberik Zwyssig.

Cantonal and Local Government. Each of the 26 cantons and demi-cantons is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; all cantonal governments, though different in organization (membership varies from 5 to 11, and terms of office from 1 to 5 years), are based on the principle of sovereignty of the people.

In 21 cantons a body chosen by universal suffrage, usually called the *Great Council*, or *Canton Council*, exercises the functions of a parliament. In all the cantonal constitutions except those of the 5 cantons which have a *Landsgemeinde*, the referendum has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revisions of the Constitution, must be submitted to the popular vote. In the 5 cantons of Appenzell, Glarus and Unterwalden the people exercise their powers direct in the *Landsgemeinde*, i.e., the assembly in the open air of all citizens of full age. In all the cantons the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungsstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, mayor or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its officials.

DEFENCE. There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destruction of bridges, tunnels and defiles are prepared for an emergency.

Army. There are about 3,400 regular soldiers, but some 360,000 conscripts undergo training annually in the following phases: At 20 years of age, 15 weeks recruit training; between 21 and 32, reservist refresher training (*Auszug*); between 33 and 42, 39 days training for the Militia (*Landwehr*). Proposals ('Army 95') implemented in 1995 envisaged a more flexible army to protect the population against military or natural catastrophes, combat terrorism and take part in international peacekeeping. The conscript sign-off age was reduced to 42 years, the number of conscripts reduced to 360,000, and the number of regular soldiers (including women) increased.

The Army is divided into 3 field corps each of 1 armoured and 2 infantry divisions and support groups, a corps with 3 mountain divisions, and independent redoubt-, fortress- and territorial-brigades.

The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments.

In peace-time the Army has no general; in time of war the Federal Assembly in joint session of both Houses appoints a general.

Equipment includes about 370 Leopard, 186 Pz-68 and 186 Pz-68/88 main battle tanks.

Air Corps. The Air Corps is part of the Army. It has 3 flying regiments. The fighter squadrons are equipped with Swiss-built F-5E Tiger IIs (6 squadrons), Mirage IIIS supersonic interceptor/ground-attack (2 squadrons), Mirage IIIRS fighter/reconnaissance (3 squadrons), and Bloodhound surface-to-air missile batteries are operational.

Training aircraft are Pilatus PC-7 Turbo-Trainers and Hawks; there are also communications and transport aircraft and helicopters. Personnel (1996), 32,600 on mobilization, with 150 combat aircraft.

SYRIA

Jumhuriya al-Arabya
as-Suriya

(Syrian Arab Republic)

Capital: Damascus

Population: 16·14m.

GDP per head: (PPP\$) 5,397

HDI/world rank: 0·755/78

KEY HISTORICAL EVENTS. Syria was under Turkish control from the 12th century, and part of the Ottoman Empire from the 16th century until the First World War. Following the defeat of the Turks in that war, the League of Nations granted to France a mandate for Syria from 1920. On 27 Sept. 1941, Gen. Catroux, the Free French C.-in-C., in the name of the Allies, proclaimed the independence of Syria at Damascus. On 27 Dec. 1943 an agreement was signed between representatives of the French National Committee of Liberation and of Syria, by which most of the powers and capacities exercised hitherto

by France under mandate were transferred as from 1 Jan. 1944 to the Syrian government. The evacuation of all foreign troops in April 1946 marked the complete independence of Syria, but the political situation was unsettled and military *coups* were staged in Dec. 1949 and in Feb. 1954.

Syria merged with Egypt to form the United Arab Republic from 2 Feb. 1958 until 29 Sept. 1961, when Syrian independence was resumed following a *coup* the previous day. Following the fifth *coup* of the decade, Lieut.-Gen. Hafez el Assad became prime minister on 13 Nov. 1970, and assumed the presidency on 22 Feb. 1971.

A new constitution, approved by plebiscite on 12 March 1973, confirmed the Arab Socialist Renaissance (Ba'ath) Party as the 'leading party in the state and society'.

TERRITORY AND POPULATION. Syria is bounded by the Mediterranean and Lebanon on the west, by Israel and Jordan on the south, by Iraq on the east and by Turkey on the north. The frontier between Syria and Turkey was settled by the Franco-Turkish agreement of 22 June 1929. The area is 185,180 sq. km (71,498 sq. miles). The census of 1994 gave a population of 13,782,000. Estimate (1997), 16,137,899 (50% urban); density, 74 per sq. km. Life expectancy was 66·4 years in 1992 (1997 estimate, 67·44; male, 66·21; female, 68·74). Population growth (1997) 3·3%.

Area and population (1996 estimate, in 1,000) of the 14 districts (*mohafaza*):

Arabic is the official language, spoken by 89% of the population, while 6% speak Kurdish (chiefly Hasakah governorate), 3% Armenian and 2% other languages.

CLIMATE. The climate is Mediterranean in type, with mild wet winters and dry, hot summers, though there are variations in temperatures and rainfall between the coastal regions and the interior, which even includes desert conditions. KEY HISTORICAL EVENTS. At the end of the 17th century the inhabitants of Zanzibar drove out the Portuguese with the assistance of the Arabs of Oman. Thereafter an Arab governor from Oman was sent to Zanzibar, but the government of the interior remained in the hands of a local ruler. In 1832 Seyyid Said bin Sultan, ruler of Oman, established his capital at Zanzibar. Arab merchants explored the mainland in search of slaves and ivory and soon the whole of that island and the island of Pemba together with a large

strip of the east African mainland coast came under his effective rule. Seyyid Said died in 1856. Five years later his former African possessions were, under an arbitration award made by the British Governor-General of India, declared to be independent of Oman. In 1887 the Sultan of Zanzibar handed over the administration of his possessions to the north of Vanga on the African continent to the British East Africa Association. These territories eventually passed to the British government and are now part of Kenya. In 1888 a similar concession was granted to the German East Africa Association of the Sultan's mainland territories between the River Umba and Cape Delgado. In 1890 the German government bought these territories outright for 4m. marks. In 1892 the administration of the Benadir Ports (which had in 1889 been conceded to the British East Africa Association) was, with the consent of the Sultan, transferred to the Italian government in consideration of a quarterly payment of Rs 40,000. In 1886 the Sultan renounced in favour of Portugal all claims to the coast to the south of Cape Delgado.

German East Africa was conquered by the Allies in the first world war and subsequently divided between the Belgians, the Portuguese and the British. Ruanda and Urundi went to the Belgians, the Kionga triangle to Portugal, and Tanganyika to Britain. The country was administered as a League of Nations mandate until 1946, and then as a UN trusteeship territory until 9 Dec. 1961.

Tanganyika achieved responsible government in Sept. 1960 and full self-government on 1 May 1961. On 9 Dec. 1961 Tanganyika became a sovereign independent member state of the Commonwealth of Nations. The first prime minister, Dr Julius Nyerere, resigned in Jan. 1962; but on 9 Dec 1962 the country adopted a republican form of government (still within the British Commonwealth), and Dr Nyerere was elected as the first president.

On 24 June 1963 Zanzibar became an internal self-governing state, and on 9 Dec. 1963 she became independent from British rule. On 12 Jan. 1964 her sultanate was overthrown and the Sultan sent into exile by a revolt of the Afro-Shirazi Party leaders, who established the People's Republic of Zanzibar. Also in Jan. 1964 there was an attempted *coup* against Nyerere, who had to seek British military help to suppress it. On 26 April 1964 Tanganyika, Zanzibar and Pemba combined to form the United Republic of Tanzania.

Before independence the East Africa High Commission had been administering services of an inter-territorial nature for Kenya, Tanzania and Uganda and this continued after independence. The arrangement was changed to the East African Community in 1967. The Community practically ceased to function after 30 June 1977, chiefly because of the failure to agree a budget and the refusal of President Nyerere to negotiate with President Idi Amin of Uganda. In 1978 President Amin attacked Tanzania and the following year Tanzania invaded Uganda, overthrew the Amin régime and remained in occupation until 1981.

In 1991 a presidential commission recommended a multi-party political system. In 1993 regional parliaments for Zanzibar and mainland Tanzania (Tanganyika) were set up. The first multi-party elections were held in 1995.

KEY HISTORICAL EVENTS. The Thais migrated to the present territory from Nan Chao in the Yunnan area of China in the 8th and 9th centuries. Thais today look back to the state of Sukhothai, a Buddhist kingdom which grew up in the central plain of Thailand in the 13th century, as their first historical state. A hundred years later Sukhothai was succeeded by the new kingdom of Ayutthaya, which served until the Burmese invasion of 1767. After some years of confusion Thailand's leading general, Chao Phraya

Chakkri, assumed the throne in 1782, thus establishing the dynasty which still heads the Thai state.

Siam, as Thailand was called until 1939, remained an independent state ruled by an absolute monarchy until 24 June 1932. Discontented with the social, political and economic stagnation of the country, a group of rebels calling themselves the People's Party and headed by a young lawyer, Pridi Phanomyong, precipitated a bloodless *coup*. The rebels seized control of the army, imprisoned many royal officials and persuaded the king to accept the introduction of constitutional monarchy.

When, the following year, the king tried to dissolve the newly appointed General Assembly, the army moved to prevent him, thus becoming the dominant force behind the government, which they have remained ever since. Nationalism dominated political life through the 1930s. In 1939 Field Marshal Pibul Songgram became premier and embarked on a pro-Japanese irridentist policy that eventually brought Thailand into the second world war on Japan's side.

After 1945 political life was characterized by periods of military rule interspersed with short attempts at democratic, civilian government. Thus, three years of civilian rule from 1945 to 1948 were brought to an end when Songgram came back to power for a nine-year period. In 1957 power was seized from him by another army leader, Sarit Thanarat, who abolished the constitution and ruled without outside interference until his death in 1963, when he was replaced by the new Commander-in-Chief, Thanu Kittikachon. Democratic government was reintroduced for a short time after 1963, when 100 students were killed in clashes with the army and again from 1969 to 1971 when another successful military *coup* was staged, aimed at checking the high crime rate and the growth of Communist insurgency. A new, moderately democratic constitution was introduced in 1978.

On 23 Feb. 1991 a military junta seized power, deposing the prime minister. Following the appointment of Gen. Suchinda Kraprayoon as Prime Minister on 17 April 1992 there were massive anti-government demonstrations over several weeks in the course of which many demonstrators were killed. Gen. Suchinda resigned, and in May the legislative assembly voted that future prime ministers should be elected by its members rather than appointed by the military. A new government was elected on 13 Sept. led by Chuan Leekpai of the Democratic Party (DP). The 1995 election was fought against a background of political and financial corruption. The result was a coalition government which proved as ineffective as its predecessor in coming to grips with fundamental problems in the country. After the 1996 election a new constitution was drafted allowing for the separation of the executive, legislative and judicial branches of government.

KEY HISTORICAL EVENTS. The Africans of Togo are of several tribes, including the Ewes of the south (also living in Ghana and Benin), and the Kabres, Dagombas, Tyokossis and others in the north. They had small pre-colonial states but were dominated by the powerful kingdoms of Ashanti to the west and Dahomey to the east. Europeans, beginning with the Portuguese who first visited the area in 1471-72, traded on the coast for centuries, especially in slaves, but the area between the Gold Coast forts and Whydah was for long

relatively unimportant for them. In the 19th century, however, palm oil exports flourished at Anecho, Agoue and Porto Seguro, where British, French and German traders operated. Several prominent Togolese families of partly Brazilian or Portuguese origin, still important among the coastal African élite, arose at that time. Protestant and Catholic missions began working before the establishment of colonial rule. Despite the important rival influences of Britain and France in the area, it was Germany that established colonial rule on the coast in 1884.

German control was then extended inland but encountered strong resistance from the Kabres, Konkombas and other peoples, and only in 1912 was the colony fully subdued.

German Togo was overrun by the Allies in 1914. It was partitioned in 1919 into British and French Mandated Territories under the League of Nations. After the Second World War French Togo and British Togoland became Trust Territories under the United Nations. In British Togoland a referendum was held on 9 May 1956, in which a majority voted for union with Gold Coast, although most people in the south voted for union with French Togo. The whole territory was merged with what soon afterwards became independent Ghana, but many Togolese objected. In French Togo partial self-government was granted in 1956. On 27 April 1960 the country became independent and Sylvanus Olympio was elected president.

On 13 Jan. 1963 the President Olympio was murdered by soldiers. His successor, Nicolas Grunitzky, was deposed in a bloodless military coup in Jan. 1967 and on 14 April 1967 Gen. (then Col.) Gnassingbé Eyadéma assumed the Presidency. Following a general strike in June 1991 the government agreed to hold a National Conference, and this elected an interim Supreme Republican Council. A new constitution was approved in 1992.

TONGA

Kingdom of Tonga

Capital: Nuku'alofa

Population: 107,335

GNP: US\$170m.

KEY HISTORICAL EVENTS. The Tongatapu group of islands in the south western Pacific Ocean was discovered by Tasman in 1643. The Kingdom of Tonga attained unity under Taufa'ahau Tupou (George I) who became ruler of his native Ha'apai in 1820, of Vava'u in 1833 and of Tongatapu in 1845. By 1860 the kingdom had become converted to Christianity (George himself having been baptized in 1831). In 1862 the king granted freedom to the people from arbitrary rule of minor chiefs and gave them the right to the allocation of

land for their own needs. These institutional changes, together with the establishment of a parliament of chiefs, paved the way towards the democratic constitution under which the kingdom is now governed.

The kingdom continued up to 1899 as a neutral region in accordance with the Declaration of Berlin of 6 April 1886. By the Anglo-German Agreement of 14 Nov. 1899 subsequently accepted by the USA, the Tonga Islands were left under the Protectorate of Great Britain. A protectorate was proclaimed on 18 May 1900 and a British Agent and Consul appointed. The Protectorate was dissolved on June 4 1970 when Tonga, the only ancient kingdom surviving from the pre-European period in Polynesia, achieved complete independence within the Commonwealth.

TERRITORY AND POPULATION. The Kingdom consists of some 169 islands and islets with a total area of 289 sq. miles (748 sq. km; including inland waters), and lies between 15° and 23° 30' S. lat and 173° and 177° W. long, its western boundary being the eastern boundary of Fiji. The islands are split up into the following groups reading from north to south: The Niuas, Vava'u, Ha'apai, Tongatapu and 'Eua. The 3 main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north.

The capital is Nuku'alofa on Tongatapu, population (1986) 29,018.

There are 5 divisions comprising 23 districts:

<i>Division</i>	<i>Sq. km</i>	<i>Census 1986</i>	<i>Capital</i>

KEY HISTORICAL EVENTS. Trinidad and Tobago lie just off the coast of Venezuela in the Caribbean Sea. When Columbus visited Trinidad in 1498 the island was inhabited by Arawak Indians. Tobago was occupied by the Caribs. Trinidad remained a neglected Spanish possession for almost 300 years until it was surrendered to a British naval expedition in 1797. The main crop on the island was tobacco.

The British first attempted to settle Tobago in 1721 but the French captured the island in 1781 and transformed it into a sugar producing colony. In 1802 the British acquired Tobago and in 1899 it was administratively combined with Trinidad. When slavery was abolished in the late 1830s, the British subsidized immigration from India to replace plantation labourers. Sugar and cocoa declined towards the end of the 19th century. Oil and asphalt became the dominant sources of income.

On 31 Aug. 1962 Trinidad and Tobago became an independent member state of the Commonwealth. A Republican Constitution was adopted on 1 Aug. 1976.

During an attempted coup in July 1990 by a Moslem sect the prime minister was taken hostage and wounded.

Altogether, the islands cover 5,124 sq. km (1,978 sq. miles) of which Trinidad (including the islets) has 4,821 sq. km (1,861 sq. miles) and Tobago 303 sq. km (117 sq. miles). KEY HISTORICAL EVENTS. Settled by the Phoenicians, this area of the north African coast developed into the Carthaginian Empire and was later incorporated into the Roman Empire. It became a powerful state under the dynasty of the Berber Hafsids (1207-1574).

Tunisia was nominally a part of the Ottoman Empire from the end of the 17th century and descendants of the original Ottoman ruler remained Beys of Tunis until the modern state of Tunisia was established. A French

protectorate since 1883, Tunisia saw considerable anti-French activity in the late 1930s including a general strike in 1938 led by the *Néo-Destour* party (renamed *Parti Socialiste Destourien* – PSD – in 1964) under Habib Bourguiba. Tunisia did, however, support the Allies in the Second World War and was the scene of heavy fighting.

France granted internal self-government in 1955 and Tunisia became fully independent on 20 March 1956. A constitutional assembly was established and Habib Bourguiba became prime minister. A republic was established in 1957, the Bey deposed and the monarchy was abolished; Bourguiba became president. In 1975 the constitution was changed so that Bourguiba could be made President-for-life.

Tunisia was a one-party (PSD) state until 1981. When elections were held on 2 Nov. 1986 all seats in the national assembly were won by *Front National*, an alliance of the PSD and the *Union générale des travailleurs tunisiens*. All other parties boycotted the elections.

Bourguiba was overthrown in a bloodless *coup* in 1987. His successor as president, Zine El Abidine Ben Ali, introduced democratic reforms but a long running struggle with Islamic fundamentalists has been marked by sporadic violence and the suspension of political rights.

TERRITORY AND POPULATION. Tunisia is bounded in the north and east by the Mediterranean Sea, west by Algeria and south by Libya. The area is 154,530 sq. km. The 1996 official estimate put the total population at 9,092,000. Vital statistics rates (1993): Birth, 24.4 per 1,000 population; death, 6.1. Expectation of life was 67.1 years in 1992. Growth rate, 1993, 1.9%.

KEY HISTORICAL EVENTS. In the 13th century the kingdom of Othman I became the dominant power in Asia Minor (now the Asian part of Turkey). In 1453 the Turks captured Constantinople and destroyed the Eastern Roman Empire. Thereafter, the Ottoman Empire expanded to include an area from Morocco to Persia and westwards into the Balkans. From the 17th century, however, the Empire began to decline, its power weakening rapidly in the 19th century.

The Turkish War of Independence (1919-22), following the disintegration of the Ottoman Empire, was led and won by Mustafa Kemal (Atatürk) on behalf of the Grand National Assembly which first met in Ankara on 23 April 1920. On 20 Jan. 1921 the Grand National Assembly voted a constitution which declared that all sovereignty belonged to the people and vested all power, both executive and legislative, in the Grand National Assembly. The name 'Ottoman Empire' was later replaced by 'Turkey'. On 1 Nov. 1922 the Grand National Assembly abolished the office of Sultan and Turkey became a republic on 29 Oct. 1923.

Religious courts were abolished in 1924, Islam ceased to be the official state religion in 1928, women were given the franchise and western-style surnames were adopted in 1934.

On 27 May 1960 the Turkish Army, directed by a National Unity Committee under the leadership of Gen. Cemal Gürsel, overthrew the government of the Democratic Party. The Grand National Assembly was dissolved and party activities were suspended. Party activities were legally resumed on 12 Jan. 1961. A new constitution was approved in a referendum held on 9 July 1961 and general elections were held the same year.

On 12 Sept. 1980, the Turkish armed forces overthrew the Demirel Government (Justice Party). Parliament was dissolved and all activities of political parties were suspended. The Constituent Assembly was convened in Oct. 1981, and prepared a new constitution which was enforced after a national referendum on 7 Nov. 1982.

In the face of mounting Islamicization of government policy, the Supreme National Security Council convened on 28 Feb. 1997 and reaffirmed its commitment to the secularity of the state. On 6 March Prime Minister Neçmettin Erbakan, leader of the pro-Islamist Welfare Party, agreed to sign a list of measures to combat Moslem fundamentalism. In June he was forced to resign by a campaign led by the Army.

On 16 Jan. 1998 a Constitutional Court ruling ordered the closure of the Welfare Party. In Feb. Mr Erbakan and 5 other party members were expelled from parliament and banned from political office for 5 years.

There are quarrels with Greece over the division of Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast.

Turkey is bounded in the west by the Aegean Sea and Greece, north by Bulgaria and the Black Sea, east by Georgia, Armenia and Iran, and south by Iraq, Syria and the Mediterranean. The area (including lakes) is 779,452 sq. km (300,947 sq. miles). At the 1990 census the population was 56,473,035. A census is scheduled for 2000. KEY HISTORICAL EVENTS. Descended from the Oghuz tribes who migrated to Central Asia in the 10th century, the Turkmen were conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by an agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia

was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920 and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925 when the new states of Uzbekistan, Turkmenistan and Tadzhikistan were accepted into the USSR as Union Republics.

Following the break up of the Soviet Union, the Turkmen Supreme Soviet unanimously adopted a declaration of sovereignty in 1990. In Oct. 1991, following 94.1% support in a referendum, it adopted a declaration of independence. It became a member of the CIS in Dec. 1991.

TUVALU

Capital: Fongafale

Population: 10,500

KEY HISTORICAL EVENTS. Formerly known as the Ellice Islands, Tuvalu is a group of nine islands in the western central Pacific. Traditions recorded by missionaries in the 19th century indicate Samoa or Tonga as the original home of Tuvalu's first Polynesian settlers. Tuvaluan language supports this and genealogical data suggests settlement dates back to 1325. A number of castaways and beachcombers settled and intermarried with the Tuvuluans during 1820–70, when whalers frequented the surrounding seas.

In 1892 when the British established the Gilbert Islands Protectorate, the Tuvalu islanders were encouraged to join. They became the Gilbert and Ellice Islands colony in 1916.

After the Japanese occupied the Gilbert Islands in 1942, US forces occupied the Ellice Islands and built air strips on 3 islands. Many Tuvuluans emigrated to Tarawa in the Gilberts after the Second World War for employment; rivalry between them and the Kiribatisans set the stage for separation. On the recommendation of a commissioner, appointed by the British Government to consider requests that the island group be separated from the Gilbert islands, a referendum was held in 1974. There was a large majority in favour of separation and this took place in Oct. 1975. Independence was achieved on 1 Oct. 1978. Early in 1979 the US signed a treaty of friendship with Tuvalu and relinquished its claim to the four southern islands in return for access to its Second World War bases, and the right to veto any other nation's request to use any of Tuvalu's islands for military purposes.

TERRITORY AND POPULATION. Tuvalu lies between 5° 30' and 11° S. lat. and 176° and 180° E. long. and comprises Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti (administrative centre), Nukulaelae and Niulakita. Population (census 1991) 10,090, of whom 1,097 were working abroad, mainly in Nauru. Estimate, 1995, 10,500, of whom 1,000 were working abroad. Area approximately 9½ sq. miles (24 sq. km). The population is of a Polynesian race.

Vital statistics rates, 1996 (per 1,000 population): Births, 24; deaths, 9; infant mortality (per 1,000 live births), 28. Expectation of life: Males, 62; females, 65.

Rainfall ranges from 120" (3,000 mm) to over 160" (4,000 mm). Funafuti. Jan. 84°F (28.9°C), July 81°F (27.2°C). Annual rainfall 160" (4,003 mm). Although the islands are north of the recognized hurricane belt, they have been badly hit by hurricanes in the 1990s, raising fears for the long-term future of Tuvalu as the sea level continues to rise.

KEY HISTORICAL EVENTS. The Luo (a Nilotic-speaking people) invaded the territory of present-day Uganda in the late 15th and 16th centuries, and while assimilating with the existing Bantu-speaking inhabitants, also founded several strong centralized kingdoms. Buganda was the most prominent of these and prospered through the 19th century, assisting British forces in the conquest of its neighbours. Uganda became a British Protectorate in 1894, the province of Buganda being recognized as a native kingdom under its Kabaka. In 1961, Uganda was granted internal self-government

with federal status for Buganda.

Uganda became a fully independent member of the Commonwealth on 9 Oct. 1962 after nearly 70 years of British rule. Full sovereign status was granted by the Ugandan Independence Act 1962. The post of Governor-General was on 9 Oct. 1963 replaced by that of President as head of state, elected by the National Assembly for a five year term. Uganda became a republic on 8 Sept. 1967.

President Milton Obote set about returning land given to the Buganda by the British in 1900 to its original Bunyoro owners. He also abolished Buganda's federal status and autonomy in the country. A rebellion by Buganda was quelled, but in 1971 Obote was overthrown by troops under Gen. Idi Amin. Amin's rule was characterized by widespread repression and the expulsion of Asian residents in 1972.

In April 1979, a force of the Tanzanian Army and Ugandan exiles advanced into Uganda, taking Kampala on 11 April. Amin fled into exile. On 14 April, Dr. Yusuf Lule was sworn in as president and the country was administered, initially, by the Uganda National Liberation Front.

The former Attorney-General, Godfrey Lukonwa Binaisa QC, was appointed president by the National Consultative Council on 20 June 1979. Dr Lule subsequently left the country. Dr Binaisa was overthrown in May 1980 by the Military Commission, the military arm of the Uganda National Liberation Front.

In Dec. 1980, following elections, Dr Obote again became president, but on 27 July 1985 was overthrown, the constitution was suspended and the borders closed. Lieut. Gen. Tito Okello became head of state on 29 July, but on the following day the National Resistance Army (NRA) was not prepared to co-operate with the new régime.

After an abortive ceasefire between the NRA and government forces on 17 Dec. 1985 the NRA fought its way into Kampala and Yoweri Museveni was installed as President on 27 Jan. 1986.

There is insurgent activity near Gulu and Kitgun in Northern Uganda. Rebels belonging to a religious sect, the Lords Resistance Army, are covertly supported by Sudan.

TERRITORY AND POPULATION. Uganda is bounded on the north by Sudan, on the east by Kenya, on the south by Tanzania and Rwanda, and the west by the Democratic Republic of the Congo. Total area 241,038 sq. km, including 43,938 sq. km of water.

KEY HISTORICAL EVENTS. Kiev was the centre of the Rus principality in the 11th and 12th centuries and is still known as the Mother of Russian cities. In the 13th century the area was invaded by Tatar-Mongols, and the western Ukraine principality of Galicia was annexed by Poland in the 14th century. At about the same time, Kiev and the Ukrainian principality of Volhynia were conquered by Lithuania before being absorbed by Poland. Poland, however, could not subjugate the Ukrainian cossacks, who allied

themselves with Russia. The lands east of the Dnepr River were ceded to Russia in 1667 (some parts of Ukraine had been annexed by Muscovy much earlier), and the remainder of Ukraine, except for Galicia (part of the Austrian Empire; 1772-1919), was incorporated into the Russian Empire after the second partition of Poland in 1793.

The Ukrainians under Austrian rule in Galicia and Bukovina and in the region of Hungary known as the Carpatho-Ukraine preserved their identity as a separate group and engendered a forceful nationalist movement. In 1917, following the Bolshevik revolution, the Ukrainians in Russia established an independent republic. Austrian Ukraine proclaimed itself a republic in 1918 and was federated with its Russian counterpart. The Allies ignored Ukrainian claims to Galicia, however, and in 1918 awarded that area to Poland. In 1919 the Russian Ukrainian republic, under the leader Simon Petlyura, declared war on Poland. In the same year Ukrainian Communists established a second government and declared the existence of the Ukrainian SSR. In 1920 the advance of the Russian Bolshevik armies caused the Petlyura government and Poland to become allies but they were unable to prevent the Soviet government from taking control of the country.

From 1922 to 1932, drastic efforts were made by the USSR to suppress Ukrainian nationalism. Ukraine suffered from the forced collectivization of agriculture and the expropriation of foodstuffs; the result was the famine of 1932-33 when more than 7m. people died.

Following the Soviet seizure of eastern Poland in Sept. 1939, Polish Galicia was incorporated into the Ukrainian SSR. When the Germans invaded Ukraine in 1941 hopes that an autonomous or independent Ukrainian republic would be set up under German protection were disappointed. Ukraine was retaken by the USSR in 1944. Parts of Bessarabia and northern Bukovina were added to Ukraine together with the Ruthenian region of Czechoslovakia. The Crimean region was joined to Ukraine in 1954.

On 5 Dec. 1991 the Supreme Soviet unanimously repudiated the 1922 Treaty of Union and declared Ukraine's independence. Ukraine was one of the founder member of the CIS in Dec. 1991.

After independence, political tension developed in Ukraine over several domestic and international issues. Crimea, which was part of Russia until 1954, became a source of contention between Moscow and Kiev. Shortly after Ukrainian independence in 1991, a Russian-led movement to secede from Ukraine was formed in Crimea, which succeeded in changing the status of the Crimean oblast to an autonomous republic. Crimea also issued a declaration of independence, which was rescinded in May 1992. In the same month, however, the Supreme Soviet of Russia declared the 1954 transfer of Crimea null and void. The Russian Supreme Soviet also laid claim to the Crimean port city of Sevastopol, the home port of the 350-ship Black Sea Fleet, despite an agreement to divide the fleet which was signed by President Kravchuk and Russian President Boris Yeltsin in Aug. 1992. Conflict between Ukraine and Russia also developed over possession and transfer of nuclear weapons, delivery of Russian fuel to Ukraine, the division of Soviet assets, and military and political integration within the CIS.

A second separatist movement developed in eastern Ukraine, where coal miners and other workers in eastern Ukraine went on strike in June 1993 to protest against the poor state of the economy. A political crisis developed within the government over the pace of economic reform in 1993. In May 1993, Prime Minister Leonid Kuchma threatened to resign if he was not granted additional powers. In response to the threat of resignation, President Kravchuk proposed that the Ukrainian parliament grant Kuchma additional executive powers. The parliament rejected Kuchma's resignation and most of Kravchuk's proposals, but they did grant Kravchuk the power to rule by decree on some economic issues. Leonid Kuchma was elected President in 1994.

TERRITORY AND POPULATION. Ukraine is bounded in the east by Russia, north by Belarus, west by Poland, Slovakia, Hungary, Romania and Moldova, and south by the Black Sea and Sea of Azov. Area, 603,700 sq. km (231,990 sq. miles). The 1995 census population was 51.7m. of whom 73% were Ukrainians, 22% Russians, 1% Jews and 4% other – Belarusians, Moldovans, Hungarians, Bulgarians, Poles and Crimean Tatars (most of the Tatars were forcibly transported to Central Asia in 1944 for anti-Soviet activities during the Second World War). Estimate, 1997, 50.9m. (68% urban).

Vital statistics rates (per 1,000 population), 1996 estimate: Births, 11.2; deaths, 15.2; growth, -0.4; infant mortality (per 1,000 live births), 22.5. Life expectancy, 1996 estimate: Males, 61.5 years, females, 72.3.

The 1996 Constitution made Ukrainian the sole official language and abolished dual citizenship, previously available if there was a treaty with the other country (there was no such treaty with Russia). Anyone resident in Ukraine since 1991 may be naturalized.

CLIMATE. Temperate continental with a subtropical Mediterranean climate prevalent on the southern portions of the Crimean Peninsula. The average monthly

temperature in winter ranges from 17·6°F to 35·6°F (−8°C to 2°C), while summer temperatures average 62·6°F to 77°F (17°C to 25°C). The Black Sea coast is subject to freezing and no Ukrainian port is permanently ice-free. Precipitation generally decreases from north to south; it is greatest in the Carpathians where it exceeds more than 58·5" (1500 mm) per year, and least in the coastal lowlands of the Black Sea where it averages less than 11·7" (300 mm) per year.

CONSTITUTION AND GOVERNMENT. In a referendum on 1 Dec. 1991 90·3% of votes cast were in favour of independence. Turn-out was 83·7%.

A new Constitution was adopted on 28 June 1996. It defines Ukraine as a sovereign, democratic, unitary state governed by the rule of law and guaranteeing civil rights. The head of state is the *President*. Parliament is the 450-member unicameral *Supreme Council*, elected by universal suffrage for 4-year terms. For an election to be valid, turn-out in an electoral district must reach 50%. The Prime Minister is nominated by the President with the agreement of more than half the Supreme Council. There is an 18-member *Constitutional Court*, 6 members being appointed by the President, 6 by parliament and 6 by a panel of judges. Constitutional amendments may be initiated at the President's request to parliament, or by at least one third of parliamentary deputies. The Communist part was officially banned in the country in 1990, but was renamed the Socialist party of Ukraine and has retained political control. Hard-line Communists protested the ban, which was rescinded by the Supreme Council in May 1993. Several important democratic institutions have recently appeared in Ukraine, however, including a free press, a new constitution, and several popular opposition groups, such as Rukh and New Ukraine. Elections were held in 4 rounds in March, April, July and Nov. 1994 with run-offs in Aug. 1994. The electorate was 38,204,100. 5,833 candidates stood initially, of whom 3,633 were nominated by groups of voters, 1,557 by workers' collectives and 643 by political parties. The Communist Party gained 91 seats; Agrarian Party, 52; Centre Party, 37; Unity Party, 34; Inter-Regional Bloc for Reform, 34; Reform Party, 31; Statist Party, 30; Socialist Party, 30; Rukh, 27; ind, 34.

Presidential elections were held in 2 rounds on 26 June and 10 July 1994. At the first round, turn-out was 69%. President Leonid Kravchuk gained 37·8% of votes cast against 6 opponents. At the 2nd round, turn-out was 71·6%. Leonid Kuchma was elected against President Kravchuk by 51·5% of votes cast.

DEFENCE. The 1996 Constitution bans the stationing of foreign troops on Ukrainian soil, but permits Russia to retain naval bases. Conscription is for 18 months. On 31 May 1997 the presidents of Ukraine and Russia signed a Treaty of Friendship and Co-operation which provided *inter alia* for the division of the former Soviet Black Sea Fleet and shore installations.

Army. In 1997 ground forces numbered about 187,800 organized as follows: Ministry of Defence troops comprised 1 training tank brigade, 1 training artillery division, 1 artillery, 1 anti-tank and 3 engineer brigades; Western Operations Command comprised 1 artillery division, 1 training tank division, 1 surface-to-surface missile brigade and 1 engineer regiment, and 3 corps (1 with 2 motor rifle divisions, 2 mechanized, 1 artillery and 1 engineer brigade, 1 multiple rocket launcher and 1 anti-tank regiment; 1 with 2 mechanized divisions, 1 mechanized and 1 artillery brigade, 1 reserve anti-tank and 1 reserve multiple rocket launcher regiment; and 1 with 1 tank division and 1 anti-tank regiment); Southern Operations Command comprised 2 mechanized, 1 air mobile and 1 artillery division, 1 surface-to-surface missile, 2 surface-to-air missile and 2 artillery brigades, and 3 corps (1 with 2 mechanized and 1 artillery brigade and 1 anti-tank, 1 multiple rocket launcher and 2 reserve artillery brigades; 1 with 1 reserve motor rifle and 1 mechanized division, and 1 multiple rocket launcher and 1 reserve anti-tank regiment; and 1 with 1 tank and 2 mechanized divisions, 1 artillery brigade and 1 anti-tank and 1 multiple rocket launcher regiment); 2 special forces units. Navy. The former Soviet Black Sea Fleet continues to be the object of wrangling between Russia and Ukraine, and is financially and operationally paralyzed by the dispute. In 1996, the undisputed Ukrainian elements numbered 16,000, including 7,000 Naval Aviation and 4,000 in coastal defence, with fleet units based at Sevastopol and Odessa. The operational forces include 3 submarines, 2 Krivak-3 frigates, 2 smaller frigates and some 40 patrol craft and 6 amphibious units.

The aviation forces of the former Soviet Black Sea Fleet under Ukrainian command constitute about 40 bombers and about 40 anti-submarine and maritime reconnaissance aircraft. Main bomber types are Tu-26 'Backfire' and Tu-16 'Badger' armed principally with stand-off anti-ship missiles. There are also some 50 armed helicopters, most of seagoing types. The personnel of the Ukrainian Naval Aviation Force numbered (1996) about 7,000.

Air Force. Ukraine has taken over more than 2,000 ex-Soviet aircraft, nearly 1,500 of them combat equipment. It is limited to 1,090 combat aircraft and 330 armed helicopters under the Conventional Forces in Europe agreement and will have to dispose of some materiel. Equipment includes 190 MiG-29 and 60 Su-27 interceptors, several hundred MiG-23/27 and Su-17 fighter-bombers, 200 Su-24 strike aircraft, Tu-22M strategic bombers and 30 Il-76 tankers. Support equipment includes 200 Il-76 transports and 250 armed Mi-24 and 400 transport helicopters. Personnel (including Air Defence), 1996, 124,000.

INTERNATIONAL RELATIONS

Membership. Ukraine is a member of the UN, CIS, the Council of Europe, the Central European Initiative and the NATO Partnership for Peace.

ECONOMY

Policy. After considerable delay, the process of economic reform began in Ukraine. Prices on food, transportation and other services were deregulated in January 1993, although food prices remained low in comparison to prices in neighbouring countries. The government issued privatization certificates and set up the western city of Lviv as a model for future privatization. The country's leadership attempted to re-establish close economic ties with former Soviet republics, supporting economic cooperation between the member states of the CIS. In July 1993 Ukraine also agreed

in principle to establish an economic and customs union with Russia and Belarus. In Feb. 1998 a 10-year economic agreement was signed between Ukraine and Russia.

Budget. 1993 budget (in 1,000m. karbovanets): Revenue, 49,621·8; expenditure, 57,248·8. Sources of revenue included: VAT, 17,206·5; profits tax, 14,473·6. Expenditure included: Welfare, 13,825·1; subsidies to state enterprises, 11,039·8; defence, 2,765·7; administration, 1,261·1.

Currency. The unit of currency is the *hryvna* of 100 *kopiykas*, which replaced karbovanets on 2 Sept. 1996 at 100,000 karbovanets = 1 hryvna. There are notes of 1, 5, 10, 50, 100 and 200 hryvnas. Inflation was 38% in 1996.

Banking and Finance. A National Bank was founded in March 1991. It operates under government control, its Governor being appointed by the President with the approval of parliament. Its *governor* is Viktor Yushchenko. There were 219 banks in all in 1996.

There is a stock exchange in Kiev.

ENERGY AND NATURAL RESOURCES

Electricity. Power output was 202,900m. kWh in 1994. In 1997 there were 5 nuclear power stations producing 40% of output. A Soviet programme to greatly expand nuclear power generating capacity in the country was abandoned in the wake of the 1986 accident at Chernobyl.

Oil and Gas. In 1993 output of crude oil and gas concentrate was 4·2m. tonnes, and of natural gas 19,200m. cu. metres.

Minerals. Ukraine's industrial economy, accounting for more than a quarter of total employment, is based largely on the republic's vast mineral resources. The Donetsk Basin contains huge reserves of coal and the nearby iron-ore reserves of Kryvy Rih are equally rich. Among Ukraine's other mineral resources are manganese, bauxite, titanium and salt. Coal accounts for roughly 30% of the country's energy production.

Agriculture. Ukraine has extremely fertile black-earth soils in the central and southern portions, totalling nearly two-thirds of the territory. The original vegetation of the area formed three broad belts that crossed the territory of Ukraine latitudinally. Mixed forest vegetation occupied the northern third of the country, forest-steppe the middle portion and steppe the southern third of the country. Now, however, much of the original vegetation has been cleared and replaced by cultivated crops. Ukraine is a major producer and exporter of a wide variety of agricultural products, including wheat and sugar beets. Other crops include potatoes, vegetables, fruit, sunflowers and flax. Livestock raising is also important. Agricultural production has suffered greatly since independence, however, and domestic food consumption has decreased. Crops include wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant *kok-sagyz*, fruit and vegetables. The area under cultivation was 40·4m. ha in 1993.

State farm members may leave and receive a portion of land free; the land may be resold.

Output (in 1m. tonnes) in 1993: Grain, 45·6; sugar-beet, 33·6; potatoes, 20·9; vegetables, 5·8; fruit and berries, 2·9; meat, 2·9; milk, 18·1; 11,766m. eggs. On 1 Jan. 1994 there were 21·6m. cattle, 15·3m. pigs, 6·9m. sheep and goats.

Forestry. In 1991, 7·8m. cu. metres of timber were produced.

INDUSTRY. In 1993 there were 9,100 industrial enterprises. Output, 1993, (in tonnes): Rolled ferrous metals, 24m.; mineral fertilizer, 2·5m.; synthetic fibre, 80,000; paper, 181,000; cement, 15,000; lathes, 25,800 units; motor cars, 140,000 units; tractors, 55,500 units; sugar, 3·8m.; milk products, 2·7m.; processed meats, 1·1m.; butter, 706,000; fabrics, 574m. sq. metres; footwear, 101m. pairs; TV sets, 1·9m.; refrigerators, 0·76m.

Labour. In 1993, 29.4m. persons were of working age, of whom 23.9m. were in paid employment (18.2m. in the state sector and 1.2m. in the private sector). In July 1994, 91,900 persons were registered as unemployed.

Trade Unions. There are 13 trade unions grouped in a Trades Union Federation (*Chair*, Oleksandr Stoyan).

FOREIGN ECONOMIC RELATIONS. In June 1994 total foreign debt was US\$6,000m.

Commerce. Total foreign trade by year (in US\$1m.):

	1994	1995
Imports	13,894	14,244
Exports	16,469	16,946

Main exports, 1995 (% share of trade): Ferrous metals and ferrous alloy products, 34.2%; machinery, 12%; transport equipment, 6.7%; fertilizer, 5.4%; mineral fuel, 4.5%; sugar, 4.3%. In 1997 Russia accounted for 47% of Ukraine's trade.

COMMUNICATIONS

CRIMEA

The Crimea is a peninsula extending southwards into the Black Sea with an area of 25,881 sq. km. Population (1991 estimate), 2,549,800 (Ethnic groups, Sept. 1993: Russians, 61·6%; Ukrainians, 23·6%; Tatars, 9·6%). The capital is Simferopol.

It was occupied by Tatars in 1239, conquered by Ottoman Turks in 1475 and retaken by Russia in 1783. In 1921 after the Communist revolution it became an autonomous republic, but was transformed into a province (*oblast*) of the Russian Federation in 1945 after the deportation of the Tatar population in 1944 for alleged collaboration with the German invaders in the Second World War. It was transferred

to the Ukraine in 1954 and became an autonomous republic in 1991. About half the surviving Tatar population of 0.4m. had returned from exile by mid-1992.

At elections held in 2 rounds on 16 and 30 Jan. 1994 Yuri Meshkov was elected *President* for a 4-year term by 38.5% and 72% of votes cast against 5 opponents. The electorate was 1.8m. There is a 94-member local parliament. Parliamentary elections were held on 27 March 1994. The Russia Bloc gained 54 seats, Kurultai (Tatars) 14, ind 21.

On 2 Nov. 1995 parliament adopted a new constitution which defines the Crimea as 'an autonomous republic forming an integral part of Ukraine'. The status of 'autonomous republic' was confirmed by the 1996 Ukrainian Constitution, which provides for Crimea to have its own constitution as approved by its parliament. The Prime Minister is appointed by the Crimean parliament with the approval of the Ukrainian parliament.

The *Prime Minister* is Anatoliy Franchuk.

KEY HISTORICAL EVENTS. From Sha'am, 35 miles south-west of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Trucial Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers signed a treaty prescribing peace with the British Government. This treaty was followed by further agreements providing for the suppression of the slave trade and by a series of other engagements, of which the most important were the Perpetual Maritime Truce (May 1853)

and the Exclusive Agreement (March 1892). Under the latter, the sheikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, cede, sell or give for occupation any part of their territory save to the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby the UK had been responsible for the defence and foreign relations of the Trucial States were terminated, being replaced on 2 Dec. 1971 by a treaty of friendship between the UK and the United Arab Emirates. The United Arab Emirates (formed 2 Dec. 1971) consists of the former Trucial States: Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qaiwain, Ras al-Khaimah (joined in Feb. 1972) and Fujairah. The small state of Kalba was merged with Sharjah in 1952.

UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

KEY HISTORICAL EVENTS. Great Britain became a political unit when England and Wales united with Scotland in a single parliament in 1707.

By 1790 British government was conducted by ministers responsible to Parliament, but The Church of England enjoyed extensive privileges while Non-conformists and Roman Catholics were penalized, the latter heavily because they were considered politically dangerous.

Ireland was governed by English law through a nominally independent parliament. The people, mainly Catholic, rebelled in 1798. The settlement proposed was

legislative union and Catholic emancipation; the latter was delayed until 1828–29 (when Nonconformists also received full civic rights) but the union took effect in 1801, as the United Kingdom of Great Britain and Ireland.

In 1793 revolutionary France declared war, and was not finally defeated until 1815. The demands of war stimulated the new, steam-powered industries. After 1815 there was frequent unrest as an increasingly urban and industrial society found its interests poorly represented by a parliament composed chiefly of landowners.

The Reform Act of 1832 improved representation in Parliament, and further acts (1867, 1884, 1918 and 1928) led gradually to universal adult suffrage. Early industrial development produced great national wealth but its distribution was extremely uneven and the condition of the poor improved slowly. Legislation to improve working conditions, education and public health did not keep pace with the growth of industrial cities. The 1840s saw much immigration from Ireland (where there was famine) and from areas of political unrest in continental Europe; a second wave of immigration from the continent occurred after 1880, including Jewish refugees.

Abroad, there was war with Russia in the Crimea (1854–56); most wars, however, were fought to conquer or pacify colonies. The 19th century empire included India, Canada, Australasia, and vast territories in Africa and Eastern Asia. After 1870 the Suez Canal enabled Britain to control the empire more efficiently; she became a 40% shareholder in 1875 and the controlling power in Egypt in 1882.

The most serious imperial wars were the Boer Wars of 1881 and 1899–1902. British opinion was deeply divided, and the Liberal government elected in 1905 negotiated a Union of South Africa, by which South Africa enjoyed the same autonomy which had been agreed for Canada (1867), Australia (1901) and later New Zealand (1907). The ‘dominion status’ of these countries was clarified by the Statute of Westminster (1931).

Whereas early Victorian reforms were responses to obvious distress, governments after 1868 were more inclined towards preventive state action. The budget of 1910 was designed largely to finance a programme of welfare; its rejection in Parliament by the House of Lords led to the Parliament Act (1911) which ended the Lords’ power to veto bills.

On 3 Aug. 1914 Germany invaded Belgium and Britain was obliged by treaty to retaliate by declaring war.

During the war with Germany a rebellion was staged in Ireland, born of the failure of successive attempts to agree a formula for Irish Home Rule. The issue was complicated by factional disagreement in southern Ireland and the wish of northern Ireland to remain in the United Kingdom. In 1920 after four years’ conflict the

Government of Ireland Act partitioned the country. The northern six counties remained British, a parliament was created and a Unionist government took office. The southern 26 counties moved by stages to complete independence as the Republic of Ireland.

After the First World War there followed a long period of economic decline and industrial difficulty. There was an unsuccessful General Strike in 1926. In 1931 an emergency coalition National Government was formed to deal with the impact of world depression.

The UK has no written constitution. Since the death of George IV in 1830 there had been steady progress to a fully constitutional monarchy, pragmatically developed, and though George V (1910–36) ruled actively he always adhered to this principle.

Germany revived as a military power in the 1930s, and invaded Poland on 1 Sept. 1939. Britain, bound once more by treaty, declared war.

The Second World War ended with German and Japanese defeat in 1945. It was a time of great social upheaval. In the 1945 election a Labour government was returned with a large majority and a socialist programme. Subsequent governments modified but generally accepted the changes then introduced. After 1979, however, Conservative governments reversed much of this legislation before Labour regained power in 1997.

Beginning with the independence and partition of India and Pakistan in 1947, a policy was adopted of rapid progress to independence of the colonies. The new concept was of a Commonwealth of freely-associated states, recognizing the British monarch as symbolic Commonwealth head (some states chose to retain the monarch as head of state).

In 1961 an application to join the European Economic Community was vetoed by France. A second application in 1973 was successful, and membership was endorsed by referendum in 1975.

British Citizenship. Under the British Nationality Act 1981 there are 3 main forms of citizenship: Citizenship for persons closely connected with the UK; British Dependent Territories citizenship; British Overseas citizenship. British citizenship is acquired automatically at birth by a child born in the UK if his or her mother or father is a British citizen or is settled in the UK. A child born abroad to a British citizen is a British citizen by descent. British citizenship may be acquired by registration for stateless persons, and for children not automatically acquiring such citizenship or born abroad to parents who are citizens by descent; and, for other adults, by naturalization. Requirements for the latter include 5 years' residence (3 years for applicants married to a British citizen). The Hong Kong (British Nationality) Order 1986 created the status of British National (Overseas) for citizens connected with Hong Kong before 1997, and the British Nationality (Hong Kong) Act 1990 made provision for up to 50,000 selected persons to register as British citizens.

In 1995, 40,500 persons were granted citizenship and a further 26,000 under the Hong Kong Act.

Emigration and Immigration. Immigration is mainly governed by the Immigration Act 1970 and Immigration Rules made under it. British and Commonwealth citizens with the right of abode before 1983 are not subject to immigration control, nor are citizens of European Economic Area countries. Other persons seeking to work or settle in the UK must obtain a visa or entry clearance.

Migration statistics are derived from the government's International Passenger Survey, and exclude the Republic of Ireland.

CLIMATE. The climate is cool temperate oceanic, with mild conditions and rainfall evenly distributed over the year, though the weather is very changeable because of cyclonic influences. In general, temperatures are higher in the west and lower in the east in winter and rather the reverse in summer. Rainfall amounts are greatest in the west, where most of the high ground occurs.

The Queen's legal title rests on the statute of 12 and 13 Will. III, ch. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor. On 8 Feb. 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor.

Lineage to the throne: 1. Prince of Wales. 2. Prince William of Wales. 3. Prince Henry of Wales. 4. Duke of York. 5. Princess Beatrice of York. 6. Princess Eugenie of York.

For the Royal Style and Titles of Queen Elizabeth *see* Commonwealth section. By letters patent of 30 Nov. 1917 the titles of Royal Highness and Prince or Princess are restricted to the Sovereign's children, the children of the Sovereign's sons and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the royal household, after the surrender of hereditary revenues, by the settlement of the Civil List soon after the beginning of each reign. The Civil List Act of 1 Jan. 1972 provided for a decennial, and the Civil List (Increase of Financial Provision) Order 1975 for an annual review of the List, but in July 1990 it was again fixed for one decade.

The Civil List of 1991–2000 provided for an annuity of £7,900,000 to the Queen; £360,000 to Prince Philip; £640,500 to Queen Elizabeth (the Queen Mother); £230,500 to the Princess Royal; £220,000 to the Princess Margaret; £250,000 to the Duke of York; £100,000 to Prince Edward; £90,000 to Princess Alice. However, since April 1993 only the Queen, Prince Philip and the Queen Mother have received payments from the Civil List. The income of the Prince of Wales derives from the Duchy of Cornwall. The Civil List was exempted from taxation in 1910. The Queen has paid income tax on her private income since April 1993.

CONSTITUTION AND GOVERNMENT. The supreme legislative power is vested in Parliament, which consists of the Crown, the House of Lords and the House of Commons and dates in its present form from the middle of the 14th century. A Bill which is passed by both Houses and receives Royal Assent becomes an Act of Parliament and part of statute law.

Parliament is summoned, and a General Election is called, by the sovereign on the advice of the Prime Minister. A Parliament may last up to 5 years, normally divided into annual sessions. A session is ended by prorogation, and all Public Bills which have not been passed by both Houses then lapse. A Parliament ends by dissolution, either by will of the sovereign or by lapse of the 5-year period.

Under the Parliament Acts 1911 and 1949, all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the Lords without amendment, may become law without their concurrence within 1 month of introduction in the Lords. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the Commons in 2 successive sessions and rejected each time by the Lords, may become law without being passed by the Lords provided that 1 year has elapsed between Commons second reading in the first session and third reading in the second session, and that the Bill reaches the Lords at least 1 month before the end of the second session. In 1991 the War Crimes Act was passed in this way. This was the first time since 1949, because the Lords today respect the privileges of the elected House, especially as regards taxes and public spending, and act mainly as a revising chamber.

Peccages are created by the sovereign, with no limits on their number. There are 4 types of Lord: 1) *Lords Spiritual*, comprising 2 archbishops and 24 diocesan bishops of the Church of England, who leave the House when they retire; 2) *hereditary peers*—in August 1997 there were 752 peers who had succeeded to a peerage on the death of a relative and 10 who had themselves been granted a hereditary peerage; 3) *life peers*—there were 409 lords who had been given a peerage for their own

lifetime only under the Life Peerages Act 1958; 4) *Lords of Appeal* (both active and retired)—there were 26 peers, granted a peerage for life under the Appellate Jurisdiction Act 1876, in order to enable them to hear appeal cases in the House of Lords. The full House thus consists of 1,223 lords, of whom 86 are women. The average attendance at each sitting of the House is approximately 380.

The House of Commons consists of members (of both sexes) representing constituencies determined by the Boundary Commissions. Persons under 21 years of age, Clergy of the Church of England and of the Scottish Episcopal Church, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen, most judicial officers and other office-holders named in the House of Commons (Disqualification) Act are disqualified from sitting in the House of Commons. No peer eligible to sit in the House of Lords can be elected to the House of Commons unless he has disclaimed his title, but Irish peers and holders of courtesy titles, who are not members of the House of Lords, are eligible.

The Representation of the People Act 1948, abolished the business premises and University franchises, and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote in more than one constituency at a general election. Persons may apply on certain grounds to vote by post or by proxy. Elections are held on the first-past-the-post system, in which the candidate who receives the most votes is elected.

All persons over 18 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of Ireland are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register and are entitled to vote at elections held during the period for which the register remains in force.

Members of the armed forces, Crown servants employed abroad, and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as 'service voters' provided they make a 'service declaration'. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register. In certain circumstances, British subjects living abroad may also vote.

The Parliamentary Constituencies Act 1986, as amended by the Boundary Commissions Act 1992, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions' last reports were made in 1995, and thereafter reports are due at intervals of not less than 8 and not more than 12 years, and to submit reports from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each the register in 1994 numbered 43,786,734, of whom 36,455,151 were in England, 2,222,091 in Wales, 3,947,157 in Scotland and 1,162,335 in Northern Ireland. The registered electorate for the United Kingdom was 44,203,694 in May 1997. In 1991 it was officially estimated that 7.1% of eligible voters failed to register on the electoral roll.

At the general election held in 1997, 659 members were returned, 529 from England, 72 from Scotland, 40 from Wales and 18 from Northern Ireland. Every constituency returns a single member.

In Aug. 1911 provision was first made for the payment of a salary of £400 per annum to members of the Commons, other than those already in receipt of salaries as officers of the House, as Ministers or as officers of Her Majesty's household. For current salaries *see below*. Members of the House of Lords are unsalaried but may recover expenses incurred in attending sittings of the House within maxima for each day's attendance of £33.50 for day subsistence, £75.50 for night subsistence and £32.50 for secretarial and research assistance and office expenses. Additionally, Members of the House who are disabled may recover the extra cost of attending the House incurred by reason of their disablement. In connection with attendance at the House and parliamentary duties within the UK Lords may also recover the cost of travelling to and from home.

The executive government is vested nominally in the Crown, but practically in a

committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons. The head of the Cabinet is the *Prime Minister*, a position first constitutionally recognized in 1905. The Prime Minister's colleagues in the Cabinet are appointed on his recommendation.

It consists of all Cabinet members, the Archbishops of Canterbury and York, the Speaker of the House of Commons and senior British and Commonwealth statesmen. There are a number of advisory Privy Council committees. The *Judicial Committee* is the final court of appeal from courts of the UK dependencies, the Channel Islands and the Isle of Man, and some Commonwealth countries.

European Parliament: The United Kingdom has 87 representatives. At the June 1994 elections turn-out was 36.4%. The Labour Party won 62 seats with 44.2% of votes cast (group in European Parliament: European Socialist Party); the Conservative Party, 18 with 27.8% (Popular European Party); the Liberal Democratic Party, 2 with 16.7% (Liberal, Democratic and Reformist Group); the Scottish National Party, 2 with 3.2% (European Radical Alliance). Voting for these parties was on the first-past-the-post system. Voting in Northern Ireland was by the single transferable vote system: the Democratic Ulster Unionist Party, the Social Democrat and Labour Party (European Socialist Party) and the Official Ulster Union Party (Popular European Party) gained 1 seat each.

Local Administration: This is carried out by 4 different types of bodies, namely: (i) local branches of some central ministries, such as the Departments of Health and Social Security; (ii) local sub-managements of nationalized industries; (iii) specialist authorities such as the National Rivers Authority; and (iv) the system of local government described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils. There are separate systems for England, Wales and Scotland. For local government finance *see* Budget: *Local Taxation*, below.

The Local Government Act 1992 established a Local Government Commission, which completed its report in 1996 on whether the two-tier local government structure should be replaced by unitary authorities in some areas. Following its recommendations, 27 new unitary councils had been established by April 1997. The Commission is currently reviewing electoral arrangements.

Local Government: One of the main aspects of the Government's programme of constitutional reform is Scottish and Welsh devolution. In the referendum on Scottish devolution on 11 Sept. 1979, 1,775,045 votes (74.3%) were cast in favour of a Scottish parliament and 614,400 against (25.7%). The turn-out was 60.4%, so around 44.8% of the total electorate voted in favour. For the second question, on the Parliament's tax-raising powers, 1,512,889 votes were cast in favour (63.5%) and 870,263 against (36.5%). This represented 38.4% of the total electorate.

On 18 Sept. 1997 in Wales there were 559,419 votes cast in favour of a Welsh assembly (50.3%) and 552,698 against (49.7%). The turn-out was 51.3%.

Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Department of the Environment in England, and through the Welsh and Scottish Offices. In England the Home Office and the Department of Education and Employment are also concerned with some local government functions. (These are performed by departments within the Welsh and Scottish Offices). Ministers have powers of intervention to protect individuals' rights and safeguard public health, and the Government has power to cap (i.e. limit) local authority budgets.

Local government is conducted by elected councils at different levels of administration. England, Wales and Scotland have different systems. In England, changes introduced by the Local Government Commission set up in 1992 included the introduction of single-tier unitary authorities alongside the previous two-tier county and district administrations. By 1997 there were (*two-tier*) 35 non-metropolitan county councils under which were 274 district councils and the Scilly Isles and (*single-tier*) 27 unitary authorities, 36 metropolitan district councils and 32 Greater London borough councils. In Wales, the Local Government (Wales) Act 1994 set up 22 unitary authorities (9 counties and 13 county boroughs), and in Scotland the Local Government (Scotland) Act 1994 set up 29 unitary authorities alongside the existing 3 Island Authority Areas. Greater London and the 6 metropolitan counties no longer have councils, the former county functions having devolved to the boroughs and districts, but some services (e.g. fire services) are administered by joint authorities nominated by the latter. In England there are also some 10,000 parishes, of which about 800 have elected councils. About 300 are former small boroughs or urban districts which became successor parishes. Parish councils manage local facilities and may act as agents for district council functions. In Wales, similar functions are

discharged by 730 community councils. In Scotland there are about 1,000 community councils, but unlike their English and Welsh counterparts, they do not have statutory powers.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may (at age 18) vote and (at age 21) stand for election. In England, councils are elected for 4 years, except that in the metropolitan and one-third of the other districts, one-third of councillors are elected in each of the 3 years that no county council election is held. Counties are divided into electoral divisions and districts into wards. In Wales, elections for the full councils are held every 4 years, and in Scotland every 3 years. The chair of the council is one of the councillors elected by the rest. In boroughs and cities his or her title is Mayor. Mayors of cities may have the title of Lord Mayor conferred on them. 51 towns in England and Wales and 4 in Scotland have the status of city. This status is granted by the personal command of the monarch and confers no special privileges or powers. In Scotland, the chair of city councils is deemed Lord Provost, and is elsewhere known as Convenor or Provost. In Wales, the chair is called Chairman in counties and Mayor in county boroughs. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community. Basic and other allowances are payable to councillors (except Scottish community councillors).

Functions. Legislation in the 1980s initiated a trend for local authorities to arrange for the provision of services by, or in collaboration with, commercial or voluntary bodies rather than provide them directly. Savings in expenditure are encouraged by compulsory competitive tendering. In England, county councils are responsible for strategic planning, transport planning, non-trunk roads and regulation of traffic, personal social services, consumer protection, disposal of waste, the fire and library services and partially for education. District councils are responsible for environmental health, housing, local planning applications (in the first instance) and refuse collection. Unitary authorities combine the functions of both levels.

Finance. Revenue is derived from the Council Tax, which supports about one-fifth of current expenditure, the remainder being funded by central government grants and by the redistribution of revenue from the national non-domestic rate (property tax). Capital expenditure is financed by borrowing within government-set limits and sales of real estate.

Election Results. Elections for one third of the seats on the councils of the 32 London boroughs, 36 metropolitan districts and 118 non-metropolitan districts were held on 5 May 1994. The Labour Party gained control of 93 councils; the Liberal Democratic Party, 19; the Conservative Party, 15; ind, 5. There was no overall majority in 54 councils.

Elections were held outside the metropolitan areas ('the shires') on 4 May 1995. Labour made a net gain of 155 councils, the Liberal Democrats 45 and the Conservatives lost 51.

At the elections of 2 May 1996 for 32 metropolitan and 114 non-metropolitan and unitary councils, Labour took control of 84 councils and gained 431 seats, the Liberal Democrats took control of 23 councils and gained 142 seats, the Conservatives took control of 3 councils and lost 534 seats, and independents took control of 3 councils and lost 29 seats. In 33 councils no party gained an absolute majority.

On 6 April 1995 elections were held for the 29 newly-created unitary councils. 1,161 seats were contested. Labour won 614 seats with 47% of votes cast, and gained control of 20 of the councils; the Scottish National Party won 181 seats with 26% and gained 3 councils; the Liberal Democrats won 123 seats with 10%; the Conservative Party won 81 seats with 11%. Independents gained control of 3 councils, and 3 councils had no overall control.

County council elections and those for 19 further new unitary authorities took place on 1 May 1997. Elections for the 1,014 seats on the unitary authorities created shadow councils whose job was to prepare the area for transfer to the new status in April 1998. Councillors for these areas did not stand for election but will step down in April 1998 leaving those elected on 1 May 1997 in charge.

The next elections in Wales and Scotland are scheduled for 1999.

DEFENCE. The Defence Council was established on 1 April 1964 under the chairmanship of the Secretary of State for Defence, who is responsible to the Sovereign and Parliament for the defence of the realm. Vested in the Defence Council are the functions of commanding and administering the Armed Forces. The Secretary of State heads the Department of Defence. There are 3 subordinate Ministers; 2 Ministers of State and 1 Parliamentary Under-Secretary of State.

Defence Council membership comprises the Secretary of State, the 3 Ministers mentioned above, the Chief of the Defence Staff, the 3 single Service Chiefs of Staff, the Vice-Chief of Defence Staff, the Chief of Defence Procurement, the Chief Scientific Adviser, the Permanent Under-Secretary of State and the Second Permanent Under Secretary of State.

There are 3 Service Boards, each of which enjoys delegated powers for the administration of matters relating to the naval, military and air forces respectively.

Defence policy decision making is a collective Governmental responsibility. Important matters of policy are considered by the full Cabinet or, more frequently, by the Defence and Overseas Policy Committee under the chairmanship of the Prime Minister. Other members of this Committee include the Secretary of State for Defence, the Foreign and Commonwealth Secretary and the Home Secretary.

The Procurement Executive is responsible for procurement of equipment and supplies.

The ban on homosexuals serving in the armed forces was upheld by a House of Commons vote in May 1996.

Defence Budget: 1996–97, £21,425m. Estimates for 1997–98, £21,923m.; 1998–99, £22,624m.

Army. Control of the British Army is vested in the Defence Council and is exercised through the Army Board. The Secretary of State for Defence is Chairman of the Army Board. The other civilian members are the 3 subordinate Ministers and the Second Permanent Under Secretary of State.

The Military members of the Army Board are the Chief of the General Staff, the Adjutant General, the Quartermaster General, the Master General of the Ordnance, the C.-in-C. Land Command and the Assistant Chief of General Staff. The Chief of the General Staff is the professional head of his Service and the professional adviser to Ministers on the Army aspects of military matters. He is responsible for the fighting efficiency of his Service; for Army advice on the conduct of operations; and for the issuing of such single Service operational orders as may be appropriate resulting from defence policy decisions. He is also responsible for the Territorial Army. The Chief of the General Staff is a member of the Chiefs of Staff Committee which is chaired by the Chief of the Defence Staff, who is responsible to HM Government for professional advice on strategy and military operations and on the military implication of defence policy. The Adjutant-General is responsible for recruiting and selection of army manpower; for the administration and individual training of military personnel; for the discipline of the Army; for pay and allowances and pensions; for legal services; for the veterinary and remount services; for the Army Cadet Forces; for questions of Army welfare and education including school children overseas; and for resettlement and sports. The Quartermaster-General is responsible for logistic planning for the Army; for the storage, distribution, maintenance, repair and inspection of equipment, stores and ammunition; for development of stores; for supply, transport and accommodation; for the development, production and inspection of clothing; for military movements and transportation; for the Army postal, catering, salvage and fire services; and for questions connected with canteens, institutes and military labour. The Master General of the Ordnance is a member of both the Army Board and of the Procurement Executive Management Board. He is responsible to the Chief of Defence Procurement for the financial and technical management of the approved programme for the procurement of service equipment for the Armed Services, and to the Army Board for the co-ordination of the Army's total equipment programme.

The Field Army is run from Headquarters Land Command, based at Wilton. This consists of 2 operational divisions, 3 reserve divisions, 2 districts and United

Kingdom Support Command (Germany) (UKSC(G)). 1 (UK) Armoured Division, based in Germany, has 3 armoured brigades each consisting of 2 tank regiments, 2 armoured infantry battalions and supported by artillery, engineers, aviation, air defence and logistics units. 3 (UK) Division, based in the UK, consists of 2 mechanized and 1 airborne brigade, together with artillery, engineers, aviation, air defence and logistics units. Other forces assigned to NATO's Rapid Reaction Corps (ARRC) include 24 Airmobile Brigade, a reconnaissance Brigade, intelligence and Electronic Warfare units, signals regiments, a depth artillery brigade, air defence regiments, engineers and some general duty infantry battalions.

The Ministry of Defence retains direct control of units in Northern Ireland, although day to day military responsibility is given to the Chief of the General Staff. The Permanent Joint Headquarters, recently formed at Northwood, is responsible for overseas garrisons, which include the Falkland Islands, Cyprus and Brunei.

The established strength of the Regular Army in 1996 was 114,000 which includes soldiers under training and Gurkhas. In addition there were some 4,000 Royal Irish Home Service soldiers. The strengths of the Regular Reserves was 212,000.

The role of the Territorial Army (TA) is to act as a general Reserve for the Army by reinforcing it as required, with individuals, sub-units and other units, either in the UK or overseas; and by providing the framework and basis for regeneration and reconstruction to cater for unforeseen in times of national emergency. The TA also provides a nationwide link between the military and civil communities. Strength, 1996, 55,000. In addition, men who have completed service in the Regular Army normally have some liability to serve in the Regular Reserve. All members of the TA and Regular Reserve may be called out by a Queen's Order in time of emergency of imminent national danger and most of the TA and a large proportion of the Regular Reserve may be called out by a Queen's Order when warlike operations are in preparation or in progress. The Home Service Battalions of the Royal Irish Regiment are only liable for service in Northern Ireland.

Men, women and juniors enlist in the Army for up to 22 years' active service and reserve service up to 45 years of age. Soldiers enlist for a minimum of 3 years and can leave active service thereafter on one year's notice. Bonuses are paid to those who serve for certain periods and there are manning control points at which the Army may require soldiers to terminate their service, again on one year's notice. Those enlisting in certain technical trades must agree to serve for a minimum of 3 years. Recruits under the age of 17½ on reaching the age of 18 are entitled either to confirm their original engagement or to reduce their period of service to 3 years.

Equipment includes 426 Challenger, 36 Challenger 2 and 79 Chieftain main battle tanks, 8 Scorpion light tanks, 1,225 armoured fighting vehicles, 524 artillery pieces, 63 multiple rocket launchers, 880 anti-tank guided weapons and 562 surface-to-air missiles.

Women serve throughout the Army in the same regiments and corps as men. There are only a few roles in which they are not employed such as the Infantry and Royal Armoured Corps.

Navy. Control of the Royal Navy is vested in the Defence Council and is exercised through the Admiralty Board, chaired by the Secretary of State for Defence. The other civilian members are the Ministers of State for the Armed Forces and Defence Procurement, the Parliamentary Under Secretary for Defence and the Second Permanent Under Secretary of State. The naval members are the Chief of Naval Staff (First Sea Lord) responsible for management, fighting efficiency, planning and operational advice; the combined Second Sea Lord and C.-in-C. Naval Home Command, responsible for the manning of the Fleet and all personnel aspects; the Controller of the Navy, responsible for procurement of ships, their weapons and equipment; the Chief of Fleet Support, responsible for logistic support, stores, fuels and transport, naval dockyards and the auxiliary services; the C.-in-C. Fleet, and the Assistant Chief of Naval Staff, responsible for co-ordinating advice on certain policy and operational

matters. The Navy Board, an executive sub-committee of the Admiralty Board, is responsible for the professional management of the service.

In 1996, the changes in management structure, reductions in strength, base closures and rationalization initiated in 1994 began to approach completion. The Chief of Fleet Support and Controller of the Navy are now located in the Bristol area and their various support agencies rationalized. The naval bases at Rosyth and Portland closed in 1995. Although the dockyards at Rosyth and Devonport remain largely committed to naval refit work, both yards have now been sold to commercial operators.

The C.-in-C. Fleet, headquartered at Northwood, is responsible for the command of the fleet, while command of naval establishments in the UK is exercised by the C.-in-C. Naval Home Command from Portsmouth. Main naval bases are at Devonport, Portsmouth and Faslane, with a minor base overseas at Gibraltar.

The Royal Naval Reserve (RNR) and the Royal Marines Reserve (RMR) are volunteer forces which together in 1996 numbered 3,450. The RNR provides trained personnel in war to supplement regular forces. The main roles of the RMR are reinforcement and other specialist tasks with the UK-Netherlands Amphibious Force. In addition, men who have completed service in the Royal Navy and the Royal Marines have a commitment to serve in the Royal Fleet Reserve, currently 23,000 strong.

Royal Navy and Queen Alexandra's Royal Naval Nursing Service (QARNNS) ratings, both male and female, and Royal Marine ranks enlist on the 'Open Engagement' to complete 22 years active service with the option to leave at 18 months notice on completion of a minimum of 2 and a half years productive service. Those who leave before completing 22 years have a liability for up to 3 years service in the Royal Fleet Reserve.

The roles of the Royal Navy are first, to deploy the national strategic nuclear deterrent, second to provide maritime defence of the UK and its dependent territories, third to contribute to the maritime elements of NATO's force structure and fourth to meet national maritime objectives outside the NATO area. Personnel strength has reduced steadily over the past 5 years and is now stabilizing at about 47,500 (including Royal Marines) in 1997, with operational strength at 12 nuclear attack submarines, 2 aircraft carriers and about 35 destroyers and frigates.

The strategic deterrent is now borne principally by the new Trident submarines, of which the first 3 of 4, *Vanguard*, *Victorious* and *Vigilant*, each of 15,250 tonnes, and deploying 16 US-built Trident-2 D5 UGM-133A missiles with up to 96 British warheads per operational load, are now operational. The fourth ship, *Vengeance*, is scheduled to be operational in 1999. The last missile submarine of the Resolution class, *Renown*, deploying Polaris missiles, decommissioned in Aug. 1996.

The strength of the fleet's major units at the end of the respective years:

	1991	1992	1993	1994	1995	1996
Strategic Submarines	4	4	4	3	3	3
Nuclear Submarines	15	13	13	12	12	12
Diesel Submarines	6	4	4	nil	nil	nil
Aircraft Carriers	2 ¹	2 ¹	2 ¹	2 ¹	2 ¹	2 ¹
Destroyers	12	12	12	12	12	12
Frigates	33	30	25	24	23	23

¹ Following Government policy, of the 3 Carriers held, only 2 are kept in operational status.

The nuclear-powered submarine force numbers 12, of 2 classes, armed with torpedoes and Harpoon anti-ship missiles. There are 7 Trafalgar class, (5,300 tonnes) completed 1983-1991 and 5 Swiftsure (4,900 tonnes) completed 1973-79. The 4 diesel-electric submarines of the Upholder class were decommissioned in 1994 but remain serviceable awaiting a possible purchaser.

The principal surface ships are the Light vertical/short take-off and landing Aircraft Carriers of the Invincible class, (*Invincible*, *Illustrious* and *Ark Royal*), 20,900 tonnes, completed 1980-85, embarking an air group of 8 Sea Harrier vertical/short take-off and landing fighters, 9 anti-submarine Sea King and 3 radar early warning Sea King helicopters, armed with 1 twin Sea Dart surface-to-air

missile system. 2 of these ships are maintained in the operational fleet, with the third (currently *Ark Royal*) either in refit or reserve.

The 12 destroyers are all Type 42 (completed 1976–85), armed with 1 twin Sea Dart surface-to-air missile system. Frigates comprise 10 Type 22 (completed 1979–89) and 13 Norfolk class (Type 23) completed 1989–96.

The lightly-armed patrol force comprises 1 ice patrol ship, 16 other offshore patrol vessels and 16 inshore patrol craft mostly employed in training. Mine counter-measures capability is provided by 13 offshore hunter/sweepers and 5 coastal mine-hunters. Amphibious lift for the Royal Marines is provided by 1 dock landing ship (with a second in reserve) and 5 tank landing ships (civil manned, and in peacetime employed on army freighting), supported by about 32 small amphibious craft. A new Helicopter Carrier, specifically designed for amphibious operations, *HMS Ocean*, 16,000 tonnes, has completed initial sea trials and is fitting out for entry into service in 1998.

Comprehensive support to the fleet is provided by 27 major auxiliaries including 5 replenishment and 4 support tankers, 2 multi-purpose fuel and ammunition ships, 3 ammunition and stores ships, 1 repair ship, 2 ocean tugs, 5 survey ships, 1 trials ship, 1 aviation training ship, 2 armament transports and the Royal Yacht. Second-line support is provided by about 200 harbour and coastal service craft and minor auxiliaries.

The Fleet Air Arm, 5,500 strong in 1996, has some 300 aircraft, in 19 operational, training and search-and-rescue squadrons, including 40 Sea Harrier vertical/short take-off and landing fighter aircraft, 70 Sea King and 76 Lynx anti-submarine helicopters, 10 Sea King airborne early warning helicopters and 36 Sea King (commando transports) and 70 miscellaneous support and training craft.

The Royal Marines corps, 6,750 strong in 1996, provides a commando brigade comprising 3 commando groups, each approximately 1,000 strong with artillery, air defence, engineering and logistic support, and three light utility helicopter squadrons. The Special Boat Squadron and specialist defence units complete the operational strength. Equipment includes 15 helicopters and 30 light assault craft.

The total number of male and female personnel (including Royal Marines) was (in 1,000) on 31 March: 1993, 59.4; 1994, 55.8; 1995, 50.9; 1996, 48.5 and 1997 (estimated), 47.5.

Air Force. In May 1912 the Royal Flying Corps first came into existence with military and naval wings, of which the latter became the independent Royal Naval Air Service in July 1914. On 2 Jan. 1918 an Air Ministry was formed, and on 1 April 1918 the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force (RAF).

In 1937 the units based on aircraft carriers and naval shore stations again passed to the operational and administrative control of the Admiralty, as the Fleet Air Arm. In 1964 control of the RAF became a responsibility of the Ministry of Defence.

The RAF is administered by the Air Force Board, of which the Secretary of State for Defence is Chairman. The Minister of State for the Armed Forces is Vice-Chairman, and normally acts as Chairman on behalf of the Secretary of State. Other members of the Board are the Minister of State for Defence Procurement, the Under-Secretary of State for Defence, the Chief of the Air Staff, Air Member for Personnel, Air Member for Logistics, Air Officer Commanding-in-Chief Strike Command, Controller of Aircraft and the Second Permanent Under-Secretary of State.

The RAF is organized into 3 commands: Strike Command, Personnel and Training Command and Logistics Command.

Strike Command is responsible for all of the RAF's frontline forces, although day-to-day control of most operations is delegated to its 3 Groups. No 1 Group is responsible for strike/attack, offensive air support, support helicopters and reconnaissance. Tornado GR1s and Tornado GR1As are used in the strike, attack and reconnaissance roles, while Tornado GR1Bs are used primarily in the maritime attack role. Jaguars are used in the attack, reconnaissance and light anti-shipping roles. Battlefield

support forces comprise Harrier GR7s, as well as Chinook, Puma and Wessex helicopters. No 1 Group also operates Canberra aircraft in the strategic photographic reconnaissance role. No 11/18 Group controls the air defence forces, Tornado F3 fighters and Boeing E-3D Airborne Early Warning aircraft, together with ground environment radars, associated communications systems and the Ballistic Missile Early Warning System at Fylingdales. Maritime air operations, together with the RAF's search and rescue flights, are also under the operational control of No 11/18 Group. A maritime patrol and anti-submarine warfare capability is provided by Nimrod aircraft, which also have a capability against surface ships. The search and rescue flights are equipped with Sea King helicopters. Additionally No 11/18 Group operates Nimrod Reconnaissance aircraft. No 38 Group is responsible for air-to-air refuelling and strategic air transport, which is carried out by VC10, Tristar and Hercules aircraft. No 38 Group also controls the aircraft of No 32 (The Royal) Squadron, comprising British Aerospace 146 and 125 aircraft and Wessex and Twin Squirrel helicopters. RAF forces in Germany, which are made up of Tornado GR1s, Harrier GR7s and Chinook and Puma helicopters, are under the day-to-day control of No 1 Group. The Military Air Traffic Operations organization also has the status of a Group.

The RAF Regiment, which is under the control of No 38 Group, has field squadrons in service with No 1 Group and short-range air defence squadrons armed with Rapier in service with No 1 Group and No 11/18 Group.

As well as the forces in Germany, the RAF has a flight of Tornado F3s, a flight of Hercules and a combined squadron comprising RAF Chinooks and Royal Navy Sea King helicopters based in the Falkland Islands, and a squadron of Wessex helicopters in Cyprus. In addition, Strike Command forces are deployed overseas in support of UN/WEU and Coalition operations.

Headquarters RAF Strike Command is based at RAF High Wycombe.

Personnel and Training Command was formed at RAF Innsworth on 1 April 1994.

2 agencies fall under the Command, the Training Group Defence Agency and the Personnel Management Agency (which formed on 1 Feb. 1997). The main RAF units within the Command are, for Ground Training: RAF Cosford, RAF Cranwell, RAF Halton and RAF Locking; for Flying Training: RAF Cranwell (where the Red Arrows are based), RAF Linton-on-Ouse, RAF Shawbury and RAF Valley. Initial Officer Training for commissioned candidates is undertaken at the RAF College, Cranwell. Further command and staff training for officers takes place at the Joint Service Command and Staff College, which was formed on 1 Jan. 1997 at Bracknell. Recruit training is undertaken at RAF Halton. A single, tri-Service Defence Helicopter Flying School was formed at RAF Shawbury on 1 April 1997.

Personnel and Training Command is equipped with the following aircraft types: Bulldog and Slingsby Firefly as primary trainers, Tucano as basic trainers for fast jet aircrew, Hawk as advanced fast jet trainers, Jetstreams for multi-engine pilot training, and Dominies for training navigators and other non-pilot aircrew. The Defence Helicopter Flying School uses Squirrel and Griffin helicopters.

Logistics Command was formed on 1 April 1994, with its headquarters at RAF Brampton and nearby RAF Wyton. The Command is responsible for providing the full range of logistics support activities to all RAF units worldwide and Joint Service support to Royal Navy and Army units for rationalized equipment ranges. It is responsible for: Support chain management, including the provisioning, storage, distribution and disposal of equipment; repair, overhaul, maintenance and modification programmes at 3rd and 4th line; provision and management of communications and information systems; RAF catering.

RAF personnel, 1 Jan. 1998, 56,064 (including 5,017 women). Since Dec. 1991 women have been eligible to fly combat aircraft. Total trained personnel, 1 Jan. 1998, 52,978.

ECONOMY

Following the recession of 1990–92, the British economy has experienced continuous growth combined with low inflation; total output was in mid-1997 13% above the previous peak reached in 1990, although, within this overall figure, manufacturing output is only just under 5% higher.

The Treasury's Red Book, which sets out the government's tax and spending plans, says the aim of the 1998 Budget is to 'help turn the ambitions of many into achievements', by securing economic stability, rewarding work and encouraging enterprise. It includes details of the government's reforms to the tax and benefits system.

Spending. Government spending—excluding privatization proceeds—will be £326.5bn. in 1998–99. There are no privatization proceeds forecast for 1998–99. Spending plans over the medium term will be set after the Comprehensive Spending Review has been completed.

Tax changes. In total, the Budget increases annual tax receipts by £1.75bn., £2.25bn. and £2.75bn., between 1998–99 and 2000–01. Most of this extra revenue reflects the measures on company taxation and cars. Total receipts are projected to be £330bn. in 1998–99, rising to £344bn. in 1999–2000. Revenue in 1998–99 includes £126bn. from the Inland Revenue, net of tax credits, and £95.6bn. from Customs and Excise. VAT receipts are projected to rise from £51bn. to £53.3bn. in 1998–99. Taxes and social security contributions as a percentage of GDP will be 0.5 percentage points higher in 1998–99 over the previous year, at 37.7%. Total receipts will be 39.6% of GDP. Total net tax receipts are projected to have grown by 9.5% in 1997–98. Net tax receipts are projected to grow by 6% in 1998–99, reflecting real increases in fuel and tobacco duties.

The UK economy's momentum is unlikely to be maintained. A slowdown in real income growth is expected, employment growth is likely to slow and the exceptional growth in financial incomes seen in recent years is expected to weaken. Business investment is forecast to decelerate, although it is projected to rise as a share of GDP.

Growth. Depending on an improvement in labour market performance, GDP is forecast to grow 2-2.5% this year. The outlook for exports in the traded goods sector is problematic, with the effect of sterling's 25% appreciation compounded by financial developments in Asia. Consumer spending is forecast to grow 3.75-4% this year. Growth in 1999 is projected at 1.75-2.25%. The savings ratio is assumed to decline to 9% by 2000.

Inflation. In March 1998 the Treasury forecast slightly weaker inflationary pressures since its pre-Budget report in November 1997, reflecting slower growth in the early part of 1998 together with direct downward pressure on traded goods prices. In March 1998 the Retail Price Index was forecast to be around 3% in the second quarter of the year, and 2.75% in the fourth quarter. But 'downstream' inflationary pressure could be stronger than expected if demand and wage pressures are higher than forecast.

Currency. The unit of currency is the *pound sterling* (£; GBP) of 100 *pence* (p.). (Before decimalization on 15 Feb. 1971 £1 = 20 shillings (s) of 12 pence (d). A gold standard was adopted in 1816, the sovereign or twenty-shilling piece weighing 7.98805 grammes 0.9162 $\frac{2}{3}$ fine. Currency notes for £1 and 10s. were first issued by the Treasury in 1914, replacing the circulation of sovereigns. The issue of £1 and 10s. notes was taken over by the Bank of England in 1928. 10s. notes were withdrawn in 1970 and £1 notes (in England and Wales) in 1988. The UK is a member of the EU European Monetary System (EMS), but on 16 Sept. 1992 it suspended its membership of the Exchange Rate Mechanism (ERM), which it had entered on 8 Oct. 1990. Inflation was 2.9% in Dec. 1994 (1.9% in Dec. 1993).

Coinage. There are coins of 1, 2, 5, 10, 20 and 50p. and £1 and £2. A new, smaller 50p. coin was issued on 1 Sept. 1997 and a new, bi-colour £2 coin on 1 Nov. The old 50p was demonetized on 28 Feb. 1998.

There are in addition Britannia gold bullion coins with a face value of £100, £50, £20 and £10, and commemorative £5 crowns and £2 coins.

Coins in circulation at 31 Dec. 1996: £1, 1,095m.; 50p, 442m.; 20p, 1,630m.; 10p, 1,416m.; 5p, 2,999m.; 2p, 4,411m.; 1p, 7,239m.

Bank notes. The Bank of England issues notes in denominations of £5, £10, £20 and £50 for the amount of the fiduciary issue. Under the provisions of the Currency Act, 1983 the amount of the fiduciary issue is limited, but can be altered by direction of HM Treasury on the advice of the Bank of England. Since Feb. 1993 the limit has been £20,600m.

In Scotland the Bank of Scotland, Clydesdale Bank and the Royal Bank of Scotland have note-issuing powers. There is a £1 note in Scotland.

The total amount of Bank of England notes issued at 31 Dec. 1996 was £22,620m., of which £22,609m. represented notes with other banks and the public, and £11m. notes in the Banking Department of the Bank of England.

Banking and Finance. The Bank of England, Thrcadncedle Street, London, is the Government's banker and the 'banker's bank'. It has the sole right of note issue in England and Wales and manages the National Debt. It was founded by Royal Charter in 1694 and nationalized in 1946. The capital stock has, since 1 March 1946, been held by HM Treasury. The *Governor* (appointed for 5-year terms) is Eddie George (b. 1938; took office 1993).

The statutory Bank Return is published weekly. End-Dec. figures for the past 4 years are as follows (in £1m.):

	<i>Notes in circulation</i>	<i>Notes and coin in Banking Department</i>	<i>Public deposits (government)</i>	<i>Other deposits¹</i>

In 1996 there were 520 overseas banks from 76 countries.

In May 1997 the power to set base interest rates was transferred from the Treasury to the Bank of England. The government continues to set the inflation target but the bank has responsibility for setting interest rates to meet the target. Base rates are now set by a 9-member Monetary Policy Committee at the Bank; members include the Governor. Membership of the Court (the governing body) was widened. Responsibility for supervising banks was transferred from the Bank to the Securities and Investments Board.

The interest rate was lowered twice during the year; from 2.75% to 2.5%, payable to accounts with a minimum balance of £500, and from 1.75% to 1.5% on accounts with a minimum balance of less than £500. Interest is earned on each whole pound on deposit for complete calendar months.

There are stock exchanges in Belfast, Birmingham, Glasgow and Manchester, which function mainly as representative offices for the London Stock Exchange (called International Stock Exchange until May 1991). In July 1991 the 91 shareholders voted unanimously for a new memorandum and articles of association which devolves power to a wider range of participants in the securities industry and replaces the Stock Exchange Council with a 14-member board.

Weights and Measures. Conversion to the metric system, which replaced the imperial system, became obligatory on 1 Oct. 1995. The use of the pint for milk deliveries and bar sales, and use of miles and yards in road signs, is exempt indefinitely, and the use of the pound (weight) in selling greengrocery is exempt until 1999.

ENERGY AND NATURAL RESOURCES

Electricity. The Electricity Act of 1989 implemented the restructuring and transfer to the private sector of the electricity supply industry.

The Office of Electricity Regulation (Offer) was set up under the Act to protect consumer interests following privatization.

Generators. Under the provisions of the 1989 Electricity Act, National Power and PowerGen took over the fuel-fired and hydro-electric power stations, and were privatized in 1991. Nuclear Electric, responsible for operating the 12 nuclear power stations, and Scottish Nuclear were merged as a single holding company in 1996 with

2 new operating subsidiaries, Magnox Electric and British Energy. These were privatized in 1996. Under licence generating companies may also be involved in electricity supply.

A levy (Non-Fossil Fuel Obligation) is being imposed on generators until 1998 to fund the decommissioning of ageing nuclear plant and finance renewable energy sources, mainly wind generation, which in 1995 supplied 2% of demand.

Suppliers. The 12 Area Electricity Boards were replaced under the 1989 Electricity Act by 12 successor companies which were privatized in 1990. These are Eastern Electricity; East Midlands Electricity; London Electricity; Manweb; Midlands Electricity; Northern Electric; NORWEB; SEEBOARD; Southern Electric; SWALEC; South Western Electricity; Yorkshire Electricity. The companies are responsible for maintaining and operating their local distribution networks, and have a statutory duty to supply electricity to their tariff customers. Their main business, therefore, is in electricity supply. Some of the companies are involved in the retailing of electrical goods and electrical contracting. Some have diversified into other business activities.

The *Electricity Association* is the trade association of the UK electricity companies, providing a forum for members to discuss matters of common interest, a collective voice for the electricity industry when needed and specialist research and professional services.

The National Grid Company is responsible for operating the transmission system and for co-ordinating the operation of power stations connected to it. The company also operates the cross-Channel link with France and the interconnection with the Scottish power system.

In Scotland there are 3 main electricity companies. ScottishPower and Scottish Hydro-Electric are vertically-integrated companies carrying out generation, transmission, distribution and supply of electricity within their areas. Scottish Nuclear, responsible for operating the 2 Scottish nuclear power stations was merged with Nuclear Electric in 1996.

The electricity industry accounts for about 6% of total output production and 1.6% of GDP in the UK. Output capacity of all UK power stations as at the end of March 1997 was 73,261 MW. 42% of electricity generated was coal-fired, 28% nuclear, 21% gas, 4% oil, 3.3% combined heat and power schemes and 1.7% renewables (including hydro-electric). 298,878 GWh were supplied to 26.9m. customers in 1996, of which domestic users took 36%, industrial users 31% and commercial and other users 33%. The net electricity supplied in 1996 was 327,209 GWh.

Following the Gas Act of 1986, British Gas plc became the successor company to the British Gas Corporation. It conducts its operations under 3 business units: the UK gas business, exploration and production worldwide and Global Gas. The UK gas business has a headquarters and 12 regions. The Gas Act 1995 is extending competition to the domestic market progressively throughout Britain. Under the Act companies are licensed as Public Gas Transporters, who operate pipelines; Gas Shippers, who contract for gas to be transported through transporters' pipelines; and Gas Suppliers, who market gas. In 1997 there were 9 suppliers in addition to British Gas.

Gas reserves are some 590,000m. cu. metres. Production was 777,483,000 MW-hours in 1995, 35% of which was used by industrial or commercial consumers.

The Office of Gas Supply ('Ofgas') is the regulator charged with protecting gas consumers' interests.

Wind. In 1996 there were 31 wind farms with turbines for the generation of electricity.

Water. The Water Act of Sept. 1989 privatized the 10 water authorities in England and Wales: Anglian; North West; Northumbrian; Severn Trent; South West; Southern; Thames; Welsh; Wessex; Yorkshire. The Act also inaugurated the National Rivers Authority, with environmental and resource management responsibilities, and the 'regulator' Office of Water Services (Ofwat), charged with protecting consumer interests.

In Scotland water supply is the responsibility of the Regional and Island local authorities. 7 river purification boards are responsible for environmental management.

Minerals. Legislation to privatize the coal industry was introduced in 1994 and a new Coal Authority has taken over from British Coal. The Coal Authority is the owner of coal reserves; it licenses private coal-mining and deals with claims in former mining areas and disposes of unworked assets. In 1995 there were 15 British Coal collieries and 32 large deep mines in the private sector employing some 13,500 mineworkers. Total production from deep mines was 35.1m. tonnes in 1995 (31.9m. in 1994). 91 opencast sites were operating in 1996. Output, 1994, 16.8m. tonnes; 1995, 16.4m. tonnes. In 1995 inland coal consumption was 77m. tonnes, of which 78% was used by electricity generators, 11% by coke ovens and 3.7% by domestic consumers.

Farmers receiving financial support under the EU's Common Agricultural Policy are obliged to 'set-aside' land in order to control production. In 1995 such set-aside totalled 633,000 ha (728,000 ha in 1994).

The number of workers employed in agriculture in the UK was, in June 1995 (in 1,000), 243.4. Of these, 159.4 (12.9 females) were engaged full-time, 56.2 (24.3 females) part-time, and 84 (27.2 females) were seasonal or casual workers. In addition, there were in 1995 170,000 whole-time and 112,000 part-time farmers, partners, directors and 75,000 of their spouses engaged in farm work. There were some 234,900 farm holdings in 1995, about 66% owner-occupied. Average size of holdings, 72.4 ha.

Construction. Total value (in £1m.) of constructional work in Great Britain in 1994 (and 1995) was 49,439 (52,643), including new work, 25,086 (26,672), of which housing, 7,417 (7,135).

Labour. In June 1996 the UK workforce (*i.e.* all persons in employment plus the claimant unemployed) totalled (in 1,000) 27,969 (12,403 females), of whom 25,819 (11,884 females) were in employment, 22,216 (10,974 females) were employees, 3,282 (817 females) were self-employed and 221 (16 females) were in HM Forces. UK employees by form of employment in 1996 (in 1,000): Agriculture, forestry and fishing, 278; energy and water supply, 207; manufacturing industry, 4,015; construction, 825; wholesale trade, 960; retail trade, 2,276; hotels and restaurants, 1,289; transport and communications, 1,315; finance, 984; estate agency, 2,782; public administration, 1,391; education, 1,848; health and social work, 2,559. Registered unemployed in UK as at July (in 1,000; figures adjusted for seasonality and discontinuities): 1991, 2,294 (females, 554); 1992, 2,723 (634); 1993, 2,912 (674); 1994, 2,632; 1995, 2,311; 1996, 2,126. In Dec. 1996 the Government headline unemployment figure was 1,884,700. In Dec. 1992, 955,600 persons (165,200 females) had been unemployed for more than a year. In July 1996 there were 230,000 vacancies at Jobcentres.

Workers (in 1,000) involved in industrial stoppages (and working days lost): 1992, 148 (0.53m.); 1993, 385 (0.69m.); 1994, 107 (0.28m.); 1995, 174.

The Wages Councils set up in 1909 to establish minimum rates of pay (in 1992 of 2.5m. workers) were abolished in 1993. The Labour Government elected in May 1997 is committed to the introduction of a National Wage and has established a Low Pay Commission to advise on its implementation.

Trade Unions. In Jan. 1997 there were 75 unions affiliated to the Trades Union Congress (TUC) with a total membership of 6,799,619 (6,756,544 in 1996) (2.6m. of them women). The unions affiliated to the TUC in 1997 ranged in size from UNISON with 1.37m. members, to the Sheffield Wool Shear Workers' Union with 11 members. The 4 largest unions, however, account for more than half the total membership. In

1996, 61% of public sector employees and 21% of private sector employees were unionized. 46% of employees were in workplaces where trade unions were recognized for collective bargaining.

The TUC's executive body, the General Council, is elected at the annual Congress. Congress consists of representatives of all unions according to the size of the organization, and is the principal policy-making body.

The General Secretary (John Monks, b. 1945) is elected by the Congress but is not subject to annual re-election. The TUC draws up policies and promotes and publicizes them. It makes representations to government, employers and international bodies. The TUC also carries out research and campaigns and provides a range of services to unions including courses for union representatives.

The TUC is affiliated to the International Confederation of Free Trade Unions, the Trade Union Advisory Committee of OECD, the Commonwealth Trade Union Council and the European Trade Union Confederation. The TUC provides a service of trade union education. It provides members to serve, with representatives of employers, on the managing boards of such bodies as the Health and Safety Commission and the Advisory, Conciliation and Arbitration Service.

Until 1992 all overseas trade statistics were compiled from Customs declarations. With the inception of the Single Market on 1 Jan. 1993, however, the requirement for Customs declarations in intra-EU trade was removed; trade figures for EU countries since 1993 are compiled from VAT returns. The totals given in the table below include figures for 'Below Threshold Trade' (minimal) and a non-response estimate.

In 1996 the UK's trade with non-EU countries was: Imports, £84,647,464; exports, £72,302,591.

Foreign Tourism. There were 26m. overseas visitors in 1997 spending £12,600m. 41·87m. UK residents journeyed abroad in 1995. The main countries of origin for foreign visitors in 1996 were: France (3·70m.), USA (3·08m.), Germany (2·98m.), Ireland (2·07m.) and Belgium (1·56m.).

COMMUNICATIONS

Roads. Responsibility for the construction and maintenance of trunk roads belongs to central government (in England, the Department of Transport, in Wales the Welsh Office and in Scotland the Scottish Office). Roads not classified as trunk roads are the responsibility of county or unitary councils.

In 1995 there were 366,999 km of public roads, classified as: Motorways, 3,189 km; trunk roads, 12,208 km; principal roads, 35,957 km; others, 315,744 km.

Motor vehicles for which licences were current at 31 Dec. 1995, numbered (in 1,000) 25,369, including 20,505 private cars, 594 mopeds, scooters and motor cycles, 82 public transport vehicles and 421 goods vehicles. New vehicle registrations in 1995, 2,307. Driving tests, 1995 (in 1,000): Applications, 1,631·4; tests held, 1,489; tests passed, 684·2. The driving test was extended in 1996 to include a written examination.

Road casualties in Great Britain, 1994, 315,189 including 3,650 killed; in 1995, 310,506 including 3,621 killed (the lowest figure since records began in 1926).

Inter- and intra-urban bus and coach journeys average 44,000m. passenger-km annually. Passenger journeys by public road transport, 1994–95, 5,050m., including 4,420m. by local bus services. For London buses *see* London Transport *under* RAILWAYS, *below*.

Railways. In 1994 the nationalized railway network was restructured to allow for privatization. Ownership of the track, stations and infrastructure was vested in a government-owned company, Railtrack, which was privatized in May 1996.

Passenger operations were reorganized into 25 train-operating companies, wholly-owned subsidiaries of the British Railways Board, and all had been transferred to the private sector by February 1997. These pay Railtrack for access to the rail network, and lease their rolling stock from 3 private sector companies. All freight operations have also now been privatized. Eurotunnel PLC holds a concession from the government to operate the Channel Tunnel (49·4 km), through which vehicle-carrying and Eurostar passenger trains are run in conjunction with French and Belgian railways. A new dedicated high speed line is planned to connect the Channel Tunnel to London

St Pancras. This line will be used by both international and domestic trains. Construction is due to begin in 1999 and the line should be completed in 2003.

In 1997 total route length was 16,666 km (5,176 km electrified). For the year 1996-97, passenger journeys totalled 884m. (32,200m. passenger km). 101m. tonnes of freight were lifted.

London Transport is responsible to the Secretary of State for the Environment, Transport and the Regions for the operations of the capital's metro, London Underground, and for the planning and procurement of bus services. In 1996, London Underground, its wholly-owned subsidiary, carried 2.7m. passengers a day to and from 267 stations (including 21 managed by Railtrack) on 12 lines. Some 5,000 buses run under contract to London Transport by independent companies carried 3.7m. passengers a day on some 700 routes.

The privately-franchised Docklands Light Railway is operated in east inner London.

There are metros in Glasgow and Newcastle, and light rail systems in Manchester and Sheffield.

Civil Aviation. Scheduled airports at Aberdeen, Birmingham, Bristol, Cardiff, Derby (East Midlands), Edinburgh, Glasgow, Leeds/Bradford, Liverpool, London (Gatwick), London (Heathrow), London (Luton), London (Stansted), London City, Manchester, Newcastle and Prestwick each handled more than 150,000 international passengers in 1996.

Following the Civil Aviation Act 1971, the Civil Aviation Authority (CAA) was established as an independent public body responsible for the economic and safety regulation of British civil aviation. A CAA wholly-owned subsidiary, National Air Traffic Services, operates air traffic control. Highlands and Islands Airports Ltd is owned by the Scottish Office and operates 8 airports.

Operating and traffic statistics of UK airlines on scheduled services during the calendar year 1995 (and 1994): Aircraft-km flown, 680m. (636m.); revenue passengers carried, 47.5m. (43.9m.); cargo (freight and mail) carried 643,181 (618,067) tonnes. Traffic between UK airports and places abroad in 1995 (and 1994) on all services included 968,493 (932,499) air transport aircraft movements.

There were 15,303 civil aircraft registered in the UK at 31 Dec. 1996.

British Airways is the largest UK airline. It operates long and short haul international services, as well as an extensive domestic network. In 1996 it operated 10 A320-100/200s, 22 B-737-200 Advs, 17 B-737-400s, 15 B-747-100s, 13 B-747-200Bs, 3 B-747-200B Combis, 34 B-747-400s, 44 B-757-200s, 11 B-767-300ERs, 13 B-767-300s, 14 BAe ATPs, 7 Concorde and 7 DC-10-30s. British Airways also have franchise agreements with other UK operators: British Regional Airways, Brymon Airways, City Flyer Express, GB Airways, Loganair and Maersk Air. Other airlines operating scheduled flights in 1996 (with numbers of aircraft): Air Belfast (3); Air UK (41); British Midland Airways (33); British World Airlines (19); Channel Express (14); Hunting Cargo (5); Jersey European Airways (16); Manx Airlines (27); Monarch Airlines (27); Virgin Atlantic Airways (15).

Shipping. The UK-owned merchant fleet (trading vessels over 100 GT) in June 1997 totalled 619 ships of 10.8m. DWT and 7.9m. GT. The UK-owned and registered fleet totalled 348 ships of 2.2m. DWT.

The average age of the UK-owned fleet was 16.7 years, while that of the world fleet was 13.8 years. Total gross international revenue in 1996 was £5,072m. The net contribution to the UK balance of payments was £905m.; there were import savings of £1,652m., giving a total contribution of £2,557m. The container and roll-on-roll-off (RoRo) shipping sectors are the leading revenue earners.

The principal ports are (with 1m. tonnes of cargo handled in 1996): London (52.9), Grimsby and Immingham (46.8), Forth (45.6), Tees and Hartlepool (44.6), Sullom Voe (38.2), Milford Haven (36.6), Southampton (34.2), Liverpool (30.9), Felixstowe (25.8), Medway (14.1), Dover (13.2), Port Talbot (13.2), Belfast (12.5), Orkneys (11.5) and Hull (9.7).

Inland Waterways. There are approximately 3,500 miles of navigable canals and river navigations in Great Britain. Of these, the publicly-owned British Waterways

(BW) is responsible for some 385 miles (620 km) of commercial waterways (maintained for freight traffic) and some 1,160 miles (1,868 km) of cruising waterways (maintained for pleasure cruising, fishing and amenity). BW is also responsible for a further 450 miles (732 km) of canals, some of which are not navigable. BW's external turnover for the year to 31 March 1997 was £46.8m. This comprised principally Freight Activities (£2.1m.), Leisure (£10.9m.), the Estate (£19.5m.) and Water Charges (£3.4m.). Additionally, British Waterways was in receipt of Department of the Environment grants of £51.8m.

River navigations and canals managed by other authorities include the Thames, Great Ouse and Nene, Norfolk Broads and Manchester Ship Canal.

Postal Services. The Post Office operates as a group of 4 distinct businesses: Royal Mail (letter delivery), Parcelforce (parcel delivery), Post Office Counters (retailing and agency services) and Subscription Services Ltd (television licensing). Every area of the country is served by regional offices for each of the businesses. Royal Mail collects and delivers 72m. letters a day to the 26m. UK addresses. Other services include electronic mail, guaranteed parcel deliveries (same-day and overnight to UK addresses) and swift deliveries to 140 other countries and territories. The British Postal Consultancy Service provides advice to administrations abroad.

In 1997 there were almost 20,000 post offices, 606 operated directly by the Post Office, the remainder (sub-post offices) on a franchise or agency basis; and 120,000 posting points. Staff numbered 193,000 in 1996-97. 17,296m. letters were posted in 1996-97.

The Post Office has a monopoly on the carriage of letters within the UK, but the government has suspended this subject to a minimum delivery charge of £1 and licensed mail transferred between document exchanges. Private services are permitted to handle door-to-door deliveries subject to a minimum fee of £1.

Telecommunications. In 1997 there were 148 licensed telecommunications operators: 125 cable operators, 19 national and regional public telecommunications operators and 4 mobile telephone (cellular) operators. Fixed-link telephone services are offered by BT, Mercury Communications, Kingston Communications (Hull), most of the cable operators and the public telecommunications operators. BT (then British Telecom) was established in 1981 to take over the management of telecommunications from the Post Office. In 1984 it was privatized as British Telecommunications plc, changing its trading name from British Telecom to BT in 1991.

In 1994 there were 7,327 digital or electronic analogue exchanges serving 84% of BT's customers' lines. The trunk network is completely digital. Almost 3m. km of optical fibre have been installed. In 1996 there were 20.5m. residential and 6.5m. business lines, 132,000 public payphones, 200,000 private rented payphones and 20,000 UK telex connections. BT handles a daily average of 103m. telephone calls a day and 22m. calls to emergency fire, police or ambulance service a year. In 1991 there were 0.9m. fax terminals. Electronic services include electronic mail ('email') and a complete corporate global messaging network. BT telephone, television and business services are carried by 15-20 satellites. In 1995 BT had some 20 offices worldwide and employed 137,561 persons.

In 1997 there were more than 7m. mobile telephone users.

Telecommunications services are regulated by OFTEL in the interests of consumers.

Broadcasting. Radio and television services are provided by the British Broadcasting Corporation (BBC), by licensees of the Radio Authority and the Independent Television Commission (ITC) and by the Welsh-language Sianel Pedwar Cymru (S4C, Channel 4 Wales). The BBC, constituted by Royal Charter until 31 Dec. 1996, has responsibility for providing domestic and external broadcast services, the former financed from the television licence revenue, the latter by Government grant. The domestic services include 2 national television services, 5 national radio network services and a network of local radio stations. Government proposals for the future of the BBC after 1996 were published in July 1994.

The ITC is responsible for licensing and regulating all non-BBC TV services (except S4C), including ITV (regional and breakfast-time licensees), Channel 4,

Channel 5, cable and satellite and additional services, such as teletext, carried on the spare capacity of TV signals. The Radio Authority is responsible for licensing and regulating independent national and local radio services. S4C is transmitted in Wales, and is funded by the government. It acts as both broadcaster and regulator.

The BBC's domestic radio services are available on Long Wave, FM and VHF; those of the Radio Authority on FM and VHF. Television services other than those only on cable and satellite are broadcast at UHF in 625-line definition and in colour (by PAL). The BBC World Service, which started life in 1932 as the Empire Service, broadcast in 42 languages to an audience estimated at 140m. in 1997. As the self-financed BBC Worldwide TV, the BBC is also involved in commercial joint ventures to provide international television services.

The broadcasting authorities, whose governing bodies are appointed (by HM the Queen in the case of the BBC and by the Secretary of State for National Heritage in the case of the ITC, the Radio Authority and S4C) as trustees for the public interest in broadcasting, are independent of government and are publicly accountable to Parliament for the discharge of their responsibilities. Their duties and powers are laid down in the BBC Royal Charter and the Broadcasting Act 1990.

All independent (non-BBC) radio and television services other than S4C are financed by the sale of broadcasting advertising time, commercial sponsorship, or, in some cable and satellite services, by subscription.

In 1981 the Broadcasting Complaints Commission was set up to consider and adjudicate upon complaints of unfair or unjust treatment in broadcast programmes or of unwarranted infringement of privacy in or in the making of programmes. These statutory functions have been continued in the Broadcasting Act of 1990. The Broadcasting Standards Council was set up in 1988 to act as a focus for public concern about the portrayal of violence and sex on television and radio. The Council's role is to monitor programmes, receive and examine complaints from the public, undertake and commission research, and to draw up a code of practice on the portrayal of sex and violence, and on matters of taste and decency. The Broadcasting Act 1990 requires the broadcasters to reflect the Council's code in their programme guidelines. It also empowers the Council to consider and adjudicate upon complaints and publish their findings.

The number of television receiving licences in force on 31 March 1996 was 21,105,000, including 20,505,000 for colour. There were 779,461 cable television subscribers in 1994.

Cinemas. In 1995 cinemas had 2,019 screens. By 2000 this will have increased to more than 2,200. Admissions were 130m. in 1996 (123m. in 1994, from a low point of 54m. in 1984). 127 full-length films were made in 1996.

Press. In 1996 there were 10 national dailies with a combined average circulation in June of 13,202,574, and 9 national Sunday newspapers (15,174,032). There were also about 100 morning, evening and Sunday regional newspapers and 2,000 weeklies (about 1,000 of these for free distribution). There were about 6,500 other commercial periodicals and 4,000 professional and business journals. In 1996, an average of 18.3m. newspapers were sold per day.

In Jan. 1991 the Press Complaints Commission replaced the former Press Council. It has 15 members and a chair (Lord Wakeham) including 7 editors. It is funded by the newspaper industry.

In 1996, 101,504 book titles were published, including 89,984 non-fiction. 95,064 titles were published in 1995.

SOCIAL INSTITUTIONS

Justice. *England and Wales.* The legal system of England and Wales, divided into civil and criminal courts has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and Northern Ireland, as well as some appeals in criminal cases. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, although in certain cases an appeal may lie direct to the

House of Lords from the decision of the High Court. An appeal can be brought from a decision of the Court of Appeal or the Divisional Court of the Queen's Bench Division of the High Court in a criminal case provided that the Court is satisfied that a point of law 'of general public importance' is involved, and either the Court or the House of Lords is of the opinion that it is desirable in the public interest that a further appeal should be brought. As a judicial body, the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as hold or have held high judicial office. The final court of appeal for certain of the Commonwealth countries is the Judicial Committee of the Privy Council which, in addition to Privy Counsellors who are or have held high judicial office in the UK, includes others who are or have been Chief Justices or Judges of the Superior Courts of Commonwealth countries.

Civil Law. The main courts of original civil jurisdiction are the High Court and county courts.

The High Court has exclusive jurisdiction to deal with specialist classes of case e.g. Judicial Review. It has concurrent jurisdiction with county courts in cases involving contract and tort although it will only hear those cases where the issues are complex or important. The High Court also has appellate jurisdiction to hear appeals from lower tribunals.

The judges of the High Court are attached to one of its 3 divisions: Chancery, Queen's Bench and Family; each with its separate field of jurisdiction. The Heads of the 3 divisions are the Lord Chief Justice (Queen's Bench), the Vice-Chancellor (Chancery) and the President of the Family Division. In addition there are 95 High Court judges. For the hearing of cases at first instance, High Court judges sit singly. Appellate jurisdiction is usually exercised by Divisional Courts consisting of 2 (sometimes 3) judges, though in certain circumstances a judge sitting alone may hear the appeal. High Court business is dealt with in the Royal Courts of Justice and by over 130 District Registries outside London.

County courts can deal with all contract and tort cases and recovery of land actions, regardless of value. They have upper financial limits to deal with specialist classes of business such as equity and Admiralty cases. Certain county courts have been designated to deal with family, bankruptcy, patents and discrimination cases.

There are about 260 county courts located throughout the country each with its own district. A case may be heard by a Circuit Judge or by a District Judge, (the latter generally being restricted to cases valued at £5,000 or less). County courts have a small claims jurisdiction for actions for money worth £3,000 or less; this is an informal procedure where parties are encouraged to present cases without the need for legal representation.

The Restrictive Practices Court was set up in 1956 under the Restrictive Trade Practices Act and is responsible for deciding whether a restrictive trade agreement is in the public interest. It is presided over by a High Court judge, but laymen sit on the bench also. Another specialist court is the Employment Appeal Tribunal, with similar composition, which hears appeals in employment cases from lower tribunals.

The Court of Appeal (Civil Division) hears appeals in civil actions from the High Court and county courts and certain special courts such as the Restrictive Practice Court and Employment Appeal Tribunal. Its President is the Master of the Rolls, aided by up to 35 Lords Justices of Appeal setting in 6 or 7 divisions of 2 or 3 judges each.

Civil proceedings are instituted by the aggrieved person, but as they are a private matter, they are frequently settled by the parties through their lawyers before the matter comes to trial. In very limited classes of dispute (e.g. libel and slander), a party may request a jury to sit to decide questions of fact and the award of damages.

Criminal Law. At the base of the system of criminal courts in England and Wales are the magistrates' courts which deal with over 97% of criminal cases. In general, in exercising their summary jurisdiction, they have power to pass a sentence of up to six months imprisonment and to impose a fine of up to £5,000 on any one offence. They also deal with the preliminary hearing of cases triable at the Crown Court. In addition to dealing summarily with over 2.3m. cases, which include thefts, assaults, drug abuse, etc, they also have a limited civil and family jurisdiction.

Magistrates' courts normally sit with a bench of 3 lay justices. Although unpaid they are entitled to loss of earnings and travel and subsistence allowance. They undergo training after appointment and they are advised by a professional justices' clerk. In central London and in some provincial areas full-time stipendiary magistrates have been appointed. Generally they possess the same powers as the lay bench, but they sit alone. On 1 Jan. 1997 the total strength of the lay magistracy was 30,374 including 14,516 women. Justices are appointed on behalf of the Queen by the Lord Chancellor, except in Greater Manchester, Merseyside and Lancashire where they are appointed by the Chancellor of the Duchy of Lancaster.

Justices are selected and trained specially to sit in Youth and Family Proceedings Courts. Youth Courts deal with cases involving children and young persons up to the age of 18 charged with criminal offences (other than homicide and other grave offences). These courts normally sit with 3 justices, including at least one man or one woman, and are accommodated separately from other courts.

Family Proceedings Courts deal with matrimonial applications, Children Act matters, including care, residence and contact and adoption. These courts normally sit with three justices including at least one man and one woman.

Above the magistrates' courts is the Crown Court. This was set up by the Courts Act 1971 to replace quarter sessions and assizes. Unlike quarter sessions and assizes, which were individual courts, the Crown Court is a single court which is capable of sitting anywhere in England and Wales. It has power to deal with all trials on indictment and has inherited the jurisdiction of quarter sessions to hear appeals, proceedings on committal of persons from the magistrates' courts for sentence, and certain original proceedings on civil matters under individual statutes.

The jurisdiction of the Crown Court is exercisable by a High Court judge, a Circuit judge or a Recorder or Assistant Recorder (part-time judges) sitting alone, or, in specified circumstances, with justices of the peace. The Lord Chief Justice has given directions as to the types of case to be allocated to High Court judges (the more serious cases) and to Circuit judges or Recorders respectively.

Appeals from magistrates' courts go either to a Divisional Court of the High Court (when a point of law alone is involved) or to the Crown Court where there is a complete re-hearing on appeals against conviction and/or sentence. Appeals from the Crown Court in cases tried on indictment lie to the Court of Appeal (Criminal Division). Appeals on questions of law go by right, and appeals on other matters by leave. The Lord Chief Justice or a Lord Justice sits with judges of the High Court to constitute this court. Thereafter appeals in England and Wales can be made to the House of Lords.

There remains as a last resort the invocation of the royal prerogative exercised on the advice of the Home Secretary. In 1965 the death penalty was abolished for murder.

All contested criminal trials, except those which come before the magistrates' courts, are tried by a judge and a jury consisting of 12 members. The prosecution or defence may challenge any potential juror for cause. The jury decides whether the accused is guilty or not. The judge is responsible for summing up on the facts and explaining the law; he sentences convicted offenders. If, after at least 2 hours and 10 minutes of deliberation, a jury is unable to reach a unanimous verdict it may, on the judge's direction, provided that in a full jury of 12 at least 10 of its members are agreed, bring in a majority verdict. The failure of a jury to agree on a unanimous verdict or to bring in a majority verdict may involve the retrial of the case before a new jury.

The Employment Appeal Tribunal. The Employment Appeal Tribunal which is a superior Court of Record with the like powers, rights, privileges and authority of the High Court, was set up in 1976 to hear appeals on questions of law against decisions of industrial tribunals and of the Certification Officer. The appeals are heard by a High Court Judge sitting with 2 members (in exceptional cases 4) appointed for their special knowledge or experience of industrial relations either on the employer or the trade union side, with always an equal number on each side. The great bulk of their work is concerned with the problems which can arise between employees and their employers.

Military Courts. Offences committed by persons subject to service law under the Army Act 1955, the Air Force Act 1955 or the Naval Discipline Act 1957 may be dealt with either summarily or by courts-martial.

The Personnel of the Law. All full-time judicial officers except the Lord Chancellor (who is a member of the Cabinet) are independent of Parliament and the Executive. They are appointed by the Crown on the advice of the Prime Minister or the Lord Chancellor, or by the Lord Chancellor, and hold office until retiring age. Under the Judicial Pensions and Retirement Act 1993 judges normally retire at age 70 years, though they may be called upon by the Lord Chancellor to serve till age 75. The legal profession is divided; barristers, who advise on legal problems and can conduct cases before all courts, usually act for the public only through solicitors, who deal directly with the legal business brought to them by the public and have rights to present cases before certain courts. Long-standing members of both professions are eligible for appointment to most judicial offices.

In 1994 the Lord Chancellor introduced developments to the procedures for making all judicial appointments below the level of the High Court. Suitably qualified practitioners are invited to apply for advertised vacancies, and shortlisted applicants are interviewed by a panel consisting of a judge, an official and a lay member. Panels make recommendations to the Lord Chancellor, who retains the right of final recommendation to the Sovereign or appointment, as appropriate. Most vacancies for full-time and part-time appointments below the level of High Court Bench are now filled under this procedure. The new arrangements are progressively being extended to the remaining tribunal and similar appointments for which the Lord Chancellor is responsible.

Legal Aid. Broadly there are 3 kinds of legal aid available in England and Wales. Firstly there is legal advice and assistance, otherwise known as the 'Green Form' scheme. This includes advice and assistance on almost any question of English law, both civil and criminal, but does not normally cover any form of representation before a court or tribunal. Qualification for 'Green Form' is dependent on the means of the applicant. As an extension of the scheme, however, assistance by way of representation is available for certain proceedings, chiefly civil, in magistrates' courts. Assistance by way of representation is also means-tested. In 1996-97 there were 1.5m. payments under the Legal Advice and Assistance Scheme. The net cost to the Legal Aid Fund of this part was £162.5m., of which £11.8m. was accounted for by assistance by way of representation. Legal advice and assistance also provides for duty solicitor schemes at magistrates' courts and police stations. Under the magistrates' courts scheme, initial advice, and representation where necessary, is available to unrepresented defendants at court from duty solicitors either in attendance at courts or on call. The scheme covers advice to a defendant in custody, making a bail application, representing a defendant in custody on a guilty plea, and certain other cases. The advice and assistance at police stations scheme enables any person who has been arrested and taken to a police station, or who is assisting the police with their enquiries, to receive advice and assistance, from either a duty solicitor or the person's own solicitor. The cost of these schemes, which are not subject to means test or contribution, is met from the Legal Aid Fund and in 1996-97 amounted to £103.8m. Secondly, under Part IV of the Legal Aid Act 1988, there is legal aid for civil court proceedings. Under regulations, aid is available to those of low or moderate means either free or subject to a contribution, depending on means. In 1996-97, 345,986 civil legal aid certificates were issued. The cost of legal aid is met from (a) contributions from assisted persons; (b) the operation of the statutory charge which gives the Legal Aid Board a first charge on money or property recovered or preserved for an assisted person; (c) costs recovered from opposing parties and (d) a grant from the Exchequer. The net cost of civil legal aid to the state (excluding administration costs of the scheme) in 1996-97 amounted to £670.6m. Thirdly under Part V of the Legal Aid Act 1988 a court dealing with criminal proceedings may order legal aid to be given if it considers it is desirable in the interests of justice and if it also considers that the defendant (or appellant) requires financial assistance in meeting the costs he or she may incur. The factors to be taken into account when determining whether it is in the interests of justice that criminal legal aid be granted are defined by statute to

include cases where, for example, the defendant is likely to be deprived of his or her liberty, consideration of a substantial question of law may be involved, or the defendant may be unable to understand the proceedings or to state his or her case due to inadequate knowledge of English, mental illness or other mental or physical disability. Legal aid must be granted, subject to means, in the following circumstances: Where a person is committed for trial on a charge of murder, where the prosecutor appeals or applies for leave to appeal from the criminal division of the Court of Appeal or the Courts-Martial Appeal Court to the House of Lords, and in certain circumstances where the court is considering depriving a defendant of his liberty.

The costs of legal aid in criminal proceedings are paid by the central government, but courts have power to require legally aided persons to contribute towards the cost of legal aid given to them. The net cost of legal aid in criminal proceedings in 1996-97 was £539m. £313m. of this was for legal aid in the higher courts which is paid for out of the Lord Chancellor's vote, and £226m. for legal aid in the magistrates' courts which is paid from the Legal Aid Fund.

Police. In England and Wales outside London there are 41 police forces each maintained by a police authority typically comprising 9 local councillors, 3 magistrates and 5 independent members. In Scotland, the unitary councils are the police authorities. London is policed by the Metropolitan Police Service (responsible to the Home Secretary) and the City of London Police. In April 1995 the Home Office gave up central control of police manpower and authorized establishments of police no longer exist. Instead, chief constables recruit according to their budgets. The Home Office collates police strength in March and Sept. each year. The actual strength of the police service in England and Wales in Sept. 1997 was 126,798 (including 19,357 women). In addition there were 19,163 special constables (including 6,857 women). The estimated total revenue expenditure on the police service for 1996-97 was £6,700m.

SCOTLAND. The High Court of Justiciary is the supreme criminal court in Scotland and has jurisdiction in all cases of crime committed in any part of Scotland, unless expressly excluded by statute. It consists of the Lord Justice General, the Lord Justice Clerk and 24 other Judges, who are the same Judges who preside in the Court of Session, the Scottish Supreme Civil Court. One Judge is seconded to the Scottish Law Commission. The court is presided over by the Lord Justice General, whom failing, the Lord Justice Clerk, and exercises an appellate jurisdiction as well as being a court of first instance. The home of the High Court is Edinburgh, but the court visits other towns and cities in Scotland on circuit and indeed the busiest High Court sitting is in Glasgow. The court sits in Edinburgh both as a Court of Appeal (the *quorum* being 2 judges if the appeal is against sentence or other disposals and 3 in all other cases) and on circuit as a court of first instance. The decisions of the court are not subject to review by the House of Lords. One Judge sitting with a Jury of 15 persons can, and usually does, try cases, but 2 or more Judges (with a Jury) may do so in important or complex cases. The court has a privative jurisdiction over cases of treason, murder, rape, breach of duty by Magistrates and certain statutory offences under the Official Secrets Act 1911 and the Geneva Conventions Act 1957. It also tries the most serious crimes against person or property and those cases in which a sentence greater than imprisonment for 3 years is likely to be imposed. Moreover, the court has inherent power to try and to punish all acts which are plainly criminal though previously unknown to the law.

The appellate jurisdiction of the High Court of Justiciary extends to all cases tried on indictment, whether in the High Court or the Sheriff Court, and persons so convicted may appeal to the court against conviction or sentence or both except where the sentence is fixed by law. In such an appeal, a person may bring under review any alleged miscarriage of justice including an alleged miscarriage of justice based on the existence and significance of evidence not heard at the original proceedings provided there is reasonable explanation of why it was not heard and an alleged miscarriage of justice where the Jury returned a verdict which no reasonable Jury, properly directed, could have returned. It is also a court of review from courts of summary jurisdiction, and on the final termination of any summary prosecution the convicted

person may appeal to the court by way of stated case on questions of law, but not on questions of fact, except in relation to a miscarriage of justice alleged by the person accused on the basis of the existence and significance of additional evidence not heard at the original proceedings provided that there is a reasonable explanation of why it was not heard. Before cases proceed to a full hearing, leave of appeal must first be granted. Grounds of appeal and any relevant reports are sifted by a Judge sitting alone in chambers, who will decide if there are arguable grounds of appeal. Should leave of appeal be refused, this decision may be appealed to the High Court within 14 days, when the matter will be reviewed by 3 Judges. The Lord Advocate is entitled to appeal to the High Court against any sentence passed on indictment on the ground that it is unduly lenient, or on a point of law. Both the prosecution and defence, at any time in solemn and summary proceedings, may appeal by way of Bill of Advocation in order to correct irregularities in the preliminary stages of a case. In summary proceedings the accused may appeal by Bill of Suspension where he desires to bring under review a warrant, conviction or judgement issued by an inferior Judge. In summary proceedings the accused can also appeal against sentence alone by way of Stated Case. In summary proceedings the Crown can appeal against a sentence on the grounds that it is unduly lenient. The court also hears appeals under the Courts-martial (Appeals) Act 1951.

The Sheriff Court has an inherent universal criminal jurisdiction (as well as an extensive civil one) limited in general to crimes and offences committed within a sheriffdom (a specifically defined region), which has, however, been curtailed by statute or practice under which the High Court of Justiciary has exclusive jurisdiction in relation to the crimes mentioned above. The Sheriff Court is presided over by a Sheriff Principal or a Sheriff, who when trying cases on indictment sits with a Jury of 15 people. His powers of awarding punishment involving imprisonment are restricted to a maximum of 3 years, but he may under certain statutory powers remit the prisoner to the High Court for sentence if this is felt to be insufficient. The Sheriff also exercises a wide summary criminal jurisdiction and when doing so sits without a Jury; and he has concurrent jurisdiction with every other court within his Sheriff Court district in regard to all offences competent for trial in summary courts. The great majority of offences which come before courts are of a more minor nature and as such are disposed of in the Sheriff Summary Courts or in the District Courts (*see below*). Where a case is to be tried on indictment either in the High Court of Justiciary or in the Sheriff Court, the Judge may, before the trial, hold a preliminary or first diet to decide questions of a preliminary nature, whether relating to the competency or relevancy of proceedings or otherwise. Any decision at a preliminary diet (other than a decision to adjourn the first or preliminary diet or discharge trial diet) can be the subject of an appeal to the High Court of Justiciary prior to the trial.

In cases to be tried on indictment in the Sheriff Court a first diet is mandatory before the trial diet to decide questions of a preliminary nature and to identify cases which are unlikely to go to trial on the date programmed. Likewise in summary proceedings, an intermediate diet is again mandatory before trial. In High Court cases such matters may be dealt with at a preliminary diet.

District Courts have jurisdiction in more minor offences occurring within a district which before recent local government reorganization corresponded to district council boundaries. These courts are presided over by Lay Magistrates, known as Justices, who have limited powers for fine and imprisonment. In Glasgow District there are also Stipendiary Magistrates, who are legally qualified, and who have the same sentencing powers as Sheriffs.

The Court of Session, presided over by the Lord President (the Lord Justice General in criminal cases), is divided into an inner-house comprising 2 divisions of 4 judges each with a mainly appellate function, and an outer-house comprising 18 single Judges sitting individually at first instance; it exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

Police. Establishment levels in Scotland were abolished on 1 April 1996. The actual strength at 31 March 1997 was 12,752 men and 2,036 women. There were 1,876 special constables. The total police net expenditure in Scotland for 1995–96 was £615.3m.

¹ Crimes are generally the more serious criminal acts and offences the less serious. 'Crimes' are not equivalent in coverage to 'indictable/triable either way offences'.

In 1996 the average prison population in England and Wales was 55,280; in Scotland it was 5,900.

Religion. The Anglican Communion has originated from the Church of England and parallels in its fellowship of autonomous churches the evolution of British influence beyond the seas from colonies to dominions and independent nations. The Archbishop of Canterbury presides as *primus inter pares* at the decennial meetings of the bishops of the Anglican Communion at the Lambeth Conference and at the

biennial meetings of the Primates and the Anglican Consultative Council. The last Conference was held in Canterbury in 1988 and was attended by 518 bishops.

The Anglican Communion consists of 33 member Churches or Provinces. These are Australia, Brazil, Burma, Burundi, Rwanda and Zaïre, Canada, Central Africa, Ceylon, England, Indian Ocean, Ireland, Japan, Jerusalem and the Middle East, Kenya, Korea, Melanesia, Mexico, New Zealand, Nigeria, Papua New Guinea, the Philippines, Scotland, Southern Africa, Southern Cone of America, Sudan, Tanzania, Uganda, USA, Wales, West Africa, West Indies. There are also areas which come under the metro-political jurisdiction of the Archbishop of Canterbury. These are Bermuda, the Diocese in Europe, Falkland Islands, The Council of the Churches of East Asia, The Diocese of Hong Kong and Macao, Sabah, Kuching, Singapore, West Malaysia, The Lusitanian Church (Portugal) and The Spanish Reformed Episcopal Church.

England and Wales. The established Church of England, which baptizes about 25% of the children born in England (*i.e.* excluding Wales but including the Isle of Man and the Channel Islands), is Anglican. Civil disabilities on account of religion do not attach to any class of British subject. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province.

The Queen is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The Queen, on the advice of the First Lord of the Treasury, also appoints to such deaneries, prebendaries and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 2 archbishops (at the head of the 2 Provinces of Canterbury and York), and 42 diocesan bishops including the bishop of the diocese in Europe, which is part of the Province of Canterbury. Dr George Carey was enthroned as *Archbishop of Canterbury* in April 1991. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitan, jurisdiction. In Dec. 1996 there were 68 suffragan and assistant bishops, 37 deans and provosts of cathedrals and 108 archdeacons. The *General Synod*, which replaced the Church Assembly in 1970 in England, consists of a House of Bishops, a House of Clergy and a House of Laity, and has power to frame legislation regarding Church matters. Each House has a veto over the others. The first two Houses consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops and elected representatives of the suffragan bishops, 6 for Canterbury province and 3 for York (forming an Upper House), deans, provosts, and archdeacons, and a certain number of proctors elected as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, 4 representatives of the Universities of Oxford, Cambridge, London and the Southern Universities and in the case of York 2 representatives for the Universities of Durham and Newcastle and the other Northern Universities; 3 archdeacons to the Armed Forces, the Chaplain General of Prisons and 2 representatives of the Religious Communities (forming the Lower House). The House of Laity is elected by the lay members of the Deanery Synods but also includes 3 representatives of the Religious Communities and *ex-officio* Church Commissioners and Ecclesiastical Judges. Every Measure passed by the General Synod must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker. This committee reports on each Measure to Parliament, and the Measure receives the Royal Assent and becomes law if each House of Parliament resolves that the Measure be presented to the Queen.

Parochial affairs are managed by annual parochial church meetings and parochial church councils. At 30 June 1996 there were 12,982 ecclesiastical parishes, inclusive of the Isle of Man and the Channel Islands. These parishes do not, in many cases, coincide with civil parishes. Although most parishes have their own churches, not every parish nowadays can have its own incumbent or minister.

In Dec. 1996 there were 5,735 beneficed clergy excluding dignitaries, 1,821 other clergy of incumbent status and 1,758 assistant curates working in the parishes.

Women have been admitted to Holy Orders (but not the Episcopate) as deacons since 1987 and as priests since 1994. On 11 Nov. 1992 the General Synod voted for the ordination of women to the priesthood (the Upper House, by 39 votes to 13; the Lower House, by 176 to 74; the House of Laity, by 169 to 82). The legislation received the Royal Assent on 5 Nov. 1993 and the Canon permitting women's ordination came into effect on 22 Feb. 1994. At 31 Dec. 1996 there were 859 full-time stipendiary women clergy, 816 of whom were in the parochial ministry. Over 2,000 non-stipendiary clergy hold a bishop's licence to officiate at services. In July 1995 the General Synod stated that 304 clergymen had left the Church of England because they disagreed with the ordination of women, and that perhaps 75% of these had joined the Roman Catholic Church.

Private persons possess the right of presentation to over 2,000 benefices; the patronage of the others belongs mainly to the Queen, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In addition to the 6,147 dignitaries and parochial incumbents, there were (1996) 124 cathedral, 3,202 parochial and 313 non-parochial clergy working within the diocesan framework. Although these figures account for the majority of active clergy in England, there are many others serving in parishes and institutions who cannot be quantified with any certainty. They include some 1,300 full-time hospital, Forces, prison, industrial and school and college chaplains.

Of the 40,397 buildings registered for the solemnization of marriages at 30 June 1994, (statistics from the Office of Population Censuses and Surveys) 16,538 belonged to the Established Church and the Church in Wales and 23,859 to other religious denominations (Methodist, 6,739; Roman Catholic, 3,331; Baptist, 3,109; United Reformed, 1,689; Congregational, 1,264; Calvinistic Methodist, 1,093; Jehovah's Witnesses, 786; Brethren, 744; Salvation Army, 737; Unitarians, 165; other Christian, 3,857; Sikhs, 129; Moslems, 90; other non-Christian, 126). Of the 306,756 marriages celebrated in 1991 (331,150 in 1990), 102,840 were in the Established Church and the Church in Wales, 52,583 in other denominations and 151,333 were civil marriages in Register Offices.

Roman Catholics in England and Wales were estimated at 4,404,056 in 1996. There are 22 dioceses in 5 provinces. There are 5 archbishops, 17 diocesan bishops and 10 auxiliary or assistant bishops. There are 5,732 priests in active ministry and 2,856 parish churches. There are 1,286 convents of female religious, who number 10,100.

Membership of other denominations in the UK in 1991 (and 1975):

Presbyterians, 1,291,672 (1.65m.); Methodists, 483,387 (0.61m.); Baptists, 241,842 (0.27m.); other Protestants, 123,677; independent churches, 408,999; Orthodox, 265,258 (0.2m.); Afro-Caribbean churches, 69,658; Mormons (1994), 163,800; Jehovah's Witnesses, 0.12m.; Spiritualists, 60,000; Moslems, 0.99m. (0.4m.); Sikhs, 0.39m. (0.12m.); Hindus, 0.14m. (0.1m.); Jews, 108,400 (0.11m.).

The Salvation Army is established in 94 countries. In 1991 in the UK and Ireland it had 1,792 ministers, 55,000 members and 837 churches.

There is a 400-member Board of Deputies of British Jews.

Scotland. The Church of Scotland, which was reformed in 1560, subsequently developed a presbyterian system of church government which was established in 1690 and has continued to the present day.

The supreme court is the General Assembly, which now consists of some 800 members, ministers and elders in equal numbers, together with members of the diaconate commissioned by presbyteries. It meets annually in May, under the presidency of a Moderator appointed by the Assembly. The Queen is normally represented by a Lord High Commissioner, but has occasionally attended in person. The royal presence in a special throne gallery in the hall but outside the Assembly symbolises the independence from state control of what is nevertheless recognised as the national Church in Scotland.

There are also 46 presbyteries in Scotland, roughly co-terminous with District Councils, together with 1 presbytery of England, 1 presbytery of Europe, and 1 presbytery of Jerusalem. At the base of this conciliar structure of Church courts are the kirk sessions, of which there were 1,603 on 31 Dec. 1996, with a total of 683,397 members.

The Episcopal Church of Scotland is a province of the Anglican Church and is one of the historic Scottish churches. It consists of 7 dioceses. As at 31 Dec. 1996 it had 316 churches and missions, 367 clergy and 53,599 members, of whom 32,833 were communicants.

There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists and Unitarians.

The Roman Catholic Church which celebrated the centenary of the restoration of the Hierarchy in 1978, had in Scotland (1995) 1 cardinal archbishop, 1 archbishop, 6 bishops, 964 clergy, 461 parishes, and 730,835 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1995 was: Church of Scotland, 36.5%; Roman Catholic, 9.6%; Episcopal, 1.5%; others, 6%; civil, 46.4%.

Education (England and Wales). *The Publicly Maintained System of Education:* Compulsory schooling begins at the age of 5 and the minimum leaving age for all pupils is 16. No tuition fees are payable in any publicly maintained school (but it is open to parents, if they choose, to pay for their children to attend other schools). The post-school or tertiary stage, which is voluntary, includes universities, further education establishments and other higher education establishments (including those which provide courses for the training of teachers), as well as adult education centres and the youth service. Financial assistance (grants and loans) is generally available to students on higher education courses in the university and non-university sectors and to some students on other courses in further education.

National Curriculum. The Education Reform Act 1988 established a National Curriculum for gradual introduction into primary and secondary schools. It was revised in 1995. Statutory subjects at 5 to 11 years: English (and Welsh in Wales), mathematics, science (core subjects); design and technology, information technology, geography, history, physical education, art and music. At 11 to 14 years a foreign language is added. Statutory subjects at 14 to 16: English, mathematics, science, technology, a foreign language and physical education. Religious education and, at secondary level, sex education, are not prescribed in the curriculum but are requirements; parents may withdraw their children from these lessons. Careers education is also statutory at secondary level.

Nursery Education. Provision for children under 5 is made in either nursery schools or in nursery or infant classes in primary schools. In the public sector no fees are payable. In Jan. 1996 there were 547 public sector nursery and 5,581 primary schools with nursery classes in England; in addition, there were 1,531 independent schools with provision for children under 5. In 1996 there were 52,177 pupils under 5 attending nursery schools and 656,316 pupils under-5 in nursery and infant classes in primary schools. About 48% of all these children were attending part-time. In Wales there were 52 maintained nursery schools in 1995 and 52,360 pupils under 5 years provided for in nursery or infant classes in primary schools.

Primary Schools. These provide for pupils from the age of 5 up to the age of 11. In Jan. 1997 there were 18,186 primary schools in England of which 2,376 were infant schools providing for pupils up to the age of about 7, the remainder mainly taking pupils from age 5 through to 11. Nearly all primary schools take both boys and girls. 16% of primary schools had 100 full time pupils or less.

In Jan. 1996 there were 1,681 primary schools in Wales. In those primary schools (and some secondary schools) which are in the predominantly Welsh-speaking areas, the main language of instruction is Welsh. There are also 'Welsh', or, more accurately, bilingual schools in mainly English-speaking parts of Wales. Generally children transfer from primary to secondary schools at 11.

Middle Schools. A number of local education authorities operate a middle school system. These provide for pupils from the age of 8, 9 or 10 up to the age of 12, 13 or 14. In Jan. 1997 there were 590 middle schools in England deemed either primary or secondary according to the age range of the school concerned.

Secondary Schools. These usually provide for pupils from the age of 11 upwards. In Jan. 1997 there were 3,185 secondary schools in England and 228 in Wales. In England some local authorities have retained selection at age 11 for entry to grammar schools of which there were 158 in 1997. There were a small number of technical schools in 1997 which specialise in technical studies. There were 91 secondary modern schools in 1997 providing a general education up to the minimum school leaving age of 16, although exceptionally some pupils stay on beyond that age.

Almost all local education authorities operate a system of comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1997 there were 2,882 such schools in England with over 2.6m. pupils. With the development of comprehensive education various patterns of secondary schools have come into operation. Principally these are: 1. All through schools with pupils aged 11 to 18 or 11 to 16; pupils over 16 being able to transfer to an 11 to 18 school or a sixth form college providing for pupils aged 16 to 19. (There were 115 sixth form colleges in England in 1992). 2. Local education authorities operating a three-tier system involving middle schools where transfer to secondary school is at ages 12, 13 or 14. These correspond to 12 to 18, 13 to 18 and 14 to 18 comprehensive schools respectively; or 3. In areas where there are no middle schools a two-tier system of junior and senior comprehensive schools for pupils aged 11 to 18 with optional transfer to these schools at age 13 or 14.

The majority of secondary schools in Wales are classified as comprehensive. In 1996, 67 schools used Welsh as a teaching medium.

Grant Maintained Schools. Local education authority maintained secondary, middle and primary schools can apply for Grant Maintained (GM) status as self-governing state schools. Under GM status schools receive funding directly from the Funding Agency for Schools or, in Wales, from the Welsh Office. Their governing bodies are responsible for all aspects of school management, including the deployment of funds, employment of staff and provision of most of the educational support services for staff and pupils. The first GM primary schools were incorporated in 1991. By Sept. 1997 there were 1,196 GM schools in England (507 primary, 668 secondary and 21 special schools) and by Sept. 1997, 5 GM primary, 1 middle and 11 secondary schools in Wales.

Specialist Schools. 1. Technology Colleges, Language Colleges, Arts Colleges and Sports Colleges. A programme to help existing maintained secondary schools to specialize in a particular area of the curriculum, while continuing to cover the full National Curriculum. To be included in the programme, schools must raise sponsorship and then prepare development plans, in competition with other schools, to seek extra government funding. They must demonstrate how they will share their resources and expertise with local schools and the wider community. The first Technology Colleges operated from Sept. 1994. 2. City Technology Colleges. 15 independent all-ability secondary schools established in partnership between government and business sponsors, under the Education Reform Act 1988. They teach the full National Curriculum but give special emphasis to technology, science and mathematics. Government meets all recurrent costs. By Sept. 1997 some 258 schools had been designated in one or other of the categories of specialist school.

Assisted Places Scheme. It is no longer possible to get a place under the Assisted Places Scheme (APS). The Education (Schools) Act 1997 which came into force on 1 Sept. has the effect of preventing any further intakes to assisted places after the beginning of the 1997/98 academic year. The Government has a manifesto commitment to phase out the APS and use the resources saved to reduce class sizes for those children who are currently being educated in overcrowded infant classes.

Commitments to children holding assisted places at the start of the 1997/98 academic year will be honoured. Secondary school aged pupils will hold their assisted places until they complete their education at their current school—usually age 18. Primary aged children will normally hold their places until the end of their primary education—usually age 11.

Music and Ballet Scheme. The 'Aided Pupil Scheme' for boys and girls with outstanding talent in music or ballet helps parents with the fees and boarding costs at

seven specialist private schools. This scheme provides a specialist provision not readily available in the maintained sector and will therefore continue to operate.

Special Education. Under the Education Act 1996 children have special educational needs if they have a learning difficulty which calls for special educational provision to be made for them. It has been estimated that, nationally, some 20% of the school population will have special educational needs at some time during their school career. In a minority of cases, perhaps just over 2% of children, the Local Education Authority will need to make a statutory assessment of special educational needs under the Education Act 1996, which may ultimately lead to a 'statement'. In England the total number of pupils with statements in 1997 was over 234,000 (14,521 in Wales in 1995). In England in 1997 there were 1,171 maintained special schools and 68 non-maintained special schools.

The Education Act 1996 and regulations made thereunder build upon the principles and practices first set out in the 1981 Education Act. They place duties and responsibilities on Local Education Authorities and schools, and all those who help them work with children with special educational needs. Maintained schools must use their best endeavours to make provision for such pupils. The Code of Practice on the Identification and Assessment of Special Educational Needs, which came into force on 1 Sept. 1994, gives practical guidance to these bodies as to how they fulfil their duties. Provision for all children with special educational needs will be made by the most appropriate agency, which in most cases will be the child's mainstream school. The Code of Practice recognizes that there is a continuum of needs and a continuum of provision, which may be made in a variety of different forms. However, even before reaching statutory school age, a child may have special educational needs requiring the intervention of the Local Education as well as the Health Authority.

Some pupils with statements remain in school after the age of 16. Local Education Authorities remain responsible for such pupils until they are 19. Others with statements leave school at 16, moving perhaps to a college within the further education sector, or to social services provision.

Ancillary Services. Local Education Authorities (LEAs) and the governing bodies of GM schools may provide registered pupils at schools maintained by them with meals, milk and other refreshment and make such charges as they think fit. However, they must charge the same price for the same quantity of the same item. It is for LEAs and GM schools to decide on the presentation and content of school meals. They must provide meals free of charge to pupils whose parents receive income support or income-based jobseekers' allowance, or to pupils who receive income support in their own right. Where LEAs or GM schools decide to provide milk, it must be free to these categories of pupils. The provision of free meals and milk must be made in the middle of the day.

Further Education (Non-University). There are 437 institutions in the further education sector in England providing FE programmes both academic and vocational, though mainly the latter. The colleges vary in size from those specializing in single areas to large institutions with courses from foundation to degree level, and offer life-long learning opportunities mostly for people aged over 16. In 1996/97 some 4m. students enrolled, over three-quarters of whom were adults, and the majority study part-time. The majority of these courses were funded by the Further Education Funding Council (FEFC).

FE programmes were also provided in higher education institutions, local authority and voluntary adult education centres and other FE provider institutions. Some of these courses are also funded by the FEFC.

Education at institutions of further education is not free, but fees are generally low, and are not charged for students under the age of 19.

In Wales in Nov. 1996 there were 29 institutions in the further education sector and 191,385 students.

The Youth Service. The Youth Service forms part of the education system and is mainly concerned with the provision of personal and social education for young people to enable them to become responsible citizens. The Youth Service is chiefly

provided by Local Education Authorities (the statutory sector) and a wide range of voluntary organizations. The priority age group for the service is usually regarded as 13-19 years old but this target age group extends to 11-25 year olds. A duty is laid upon Local Education Authorities by the provision of the (Consolidation) Education Act 1996 which has superseded earlier Education Acts, to secure adequate provision of further education which includes the Youth Service. Provision is usually in the form of a wide range of leisure-time activities or through 'detached' or outreach work aimed at young people at risk. The Department of Education and Employment awards grants to the headquarters of national voluntary youth organizations through its Grant Scheme. The current Scheme runs from 1996-97 until the end of 1998-99. Total funding will amount to £9.1m. over 3 years. Some 60 organizations are being funded to pursue approved programmes of work concerned with the social and personal education of young people, particularly those aged 13-19. The Scheme aims to widen access to the youth services especially for those who are disadvantaged, who have disabilities, who come from minority ethnic groups or inner city or rural areas and for girls and young women. It also places priority on work which aims to contribute to crime prevention and health education and encourage the involvement of volunteers.

Awards to Students. Local Education Authorities in England and Wales are currently responsible for making mandatory awards to eligible students enrolled on designated full-time or sandwich courses leading to a first degree or comparable qualification and on certain courses of initial teacher-training for existing students. These awards cover fees and maintenance but the maintenance grants are subject to the income of the student and his or her parents or spouse. For new students in 1998-99, awards to cover both fees (up to £1,000 a year) and maintenance will depend on income. In addition studentships may be available both from universities and other sources. The authorities may also give discretionary awards to students who are not eligible for mandatory awards including those taking non-degree level courses. In 1998-99 loans will form about three-quarters and grants about a quarter of the grant and loan package. Loans will not be available to help contribute towards tuition fees. Support for students through grants and loans rose in line with inflation, resulting in a 2.5% increase over the 1996-97 levels. In 1996-97 the Government provided further and higher education institutions with £27.7m. for Access Funds to help students with severe financial difficulties.

The Student Loans scheme was introduced by the Government in 1990 to supplement mandatory awards. Eligible students apply for loans to the Student Loans Company which is funded wholly by the Government. On leaving higher education former students begin to repay loans over a 5-year period when they reach an income threshold of 85% of average earnings. New students in 1998-99 will have new repayment arrangements once they have graduated and their income is at least £10,000 a year. They will begin to pay back their loans on an income contingent basis. In 1996-97 63% of students took out loans averaging £1,487.

In Scotland a broadly similar student support system is administered by the Student Awards Agency for Scotland. The Agency offers means-tested awards to eligible Scottish domiciled students undertaking courses of Higher Education. The arrangements described above for new students in 1998-99 will also apply to Scottish students. The Agency also administers the Postgraduate Students' Allowance Scheme and the Scottish Studentship Scheme (SSS) which offer means-tested awards to students studying at postgraduate and advanced postgraduate levels respectively. 75 new awards are offered each year under the SSS for study in the field of Arts and Humanities.

Awards known as state studentships are offered on a competitive basis by the British Academy and the Students Awards Agency for Scotland to candidates considered by the universities and other higher education institutions to be qualified for postgraduate studies in the humanities; similar awards, tenable at universities or other higher education institutions are offered by the Research Councils to students studying topics within the broad spectrum of agriculture and food; the biological sciences; man's natural environment; science and engineering and the social sciences at postgraduate level.

The 5 Research Councils made over 7,300 new awards in 1990–91 and there were more than 15,000 current awards in that academic year. In 1992–93 the British Academy gave 924 new awards and the Department 437 state bursaries, 204 library bursaries and 25 state studentships.

Career Development Loans (CDLs) were introduced by the Government in 1988 to provide wider opportunities for adults to acquire and improve vocational skills. The loans are aimed at those who would otherwise not have reasonable or adequate access to the funds required to train. Loans of between £300 and £8,000 can support up to 2 years of education or training, plus up to 1 year's practical work experience where it forms part of the course. Loans to pay for training are available through 4 high street banks. The Department of Education and Employment pays the interest on the loan for the period of the training and for 1 month afterwards. Borrowers registered unemployed and claiming benefit, i.e. Jobseekers' Allowance or National Insurance credits, may apply to the bank to defer repayments for up to a further 5 months. CDL Plus, launched in Sept. 1995, is piloting arrangements which allow the borrower to defer repayment of their loan for up to 18 months after completing their course if they are registered unemployed, employed and receiving certain benefits or need to extend their training. CDL Plus is available to residents of Somerset, Gwent, South Glamorgan, Mid Glamorgan and the former county of Avon.

By Oct. 1997 nearly £298m. had been advanced to over 95,000 applicants since the programme began.

Teachers. In order to teach in a maintained school or a non maintained special school in England or Wales, it is first necessary to achieve qualified teacher status. This is generally achieved by successfully completing an undergraduate or postgraduate course of initial teacher training.

Those who are recognized as qualified teachers in Scotland or Northern Ireland are also entitled to qualified teacher status. Teachers who are nationals of participating member states of the European Economic Area who are recognized as qualified in their own countries may also be entitled to qualified teacher status if they meet the requirements on the mutual recognition of qualifications.

Those who have trained overseas in a country outside of the European Economic Area or candidates over 24 who have successfully completed two or more years of higher education may be eligible to train on the job through what are known as 'employment-based' routes. These are the Graduate Teacher Programme (for graduates) and the Registered Teacher Programme (for those with two years of higher education).

In 1997–98 there were about 53,700 students on initial teacher training courses; this figure includes students on the Open University and school-centred courses.

On 1 Jan. 1997, 420,908 full-time equivalent teachers were employed by Local Education Authorities in maintained (including Grant-Maintained) nursery, primary and secondary schools in England and Wales.

Finance. Total current and capital expenditure on education in England from public funds is estimated at £28,111m. for 1994–95.

Education (Scotland). In Sept. 1997 there were 3,847 publicly funded (education authority, grant-aided and self-governing) schools in Scotland. All teachers employed in these schools require to be qualified; all figures on teaching relate to September 1996 and are full-time equivalents.

Nursery Education. There were 990 publicly funded nursery schools and classes in Scotland, with a total enrolment of 52,714 pupils in Sept. 1997.

Primary Education. In Sept. 1997 there were 2,298 publicly funded primary schools with 440,008 pupils. In Sept. 1996 there were 22,481 teachers.

Secondary Education. In Sept. 1997 there were 401 publicly funded secondary schools in Scotland with 314,076 pupils and 2,089 adults. All but 26 schools provided a full range of Scottish Certificate of Education courses and non-certificate courses. Pupils who start their secondary education in schools which do not cater for a full range of courses may be transferred at the end of their second or fourth year to

schools where a full range of courses is provided. There were 24,265 full-time equivalent teachers in secondary schools in Sept. 1996.

Special Education. In Sept. 1997 there were 158 publicly funded special schools with 7,650 pupils.

Further Education. Under the Further and Higher Education (Scotland) Act 1992 funding of further education colleges was transferred to central government on 1 April 1993.

There are 43 incorporated colleges in Scotland as well as the education centres in Orkney and Shetland which are run by the education authorities but funded by direct payments from the Scottish Office Education and Industry Department. The colleges offer training in a wide range of vocational areas and co-operate with the Scottish Qualifications Authority and the Scottish Office Education and Industry Department in the development of new courses. Scottish Vocational Qualifications (SVQs) were introduced in 1989 and General SVQs were piloted in 1993. Both qualifications aim to improve the skills of the nation's workforce and increase the country's competitiveness. The colleges benefit from co-operation with industry, both by the involvement of Industry Lead Bodies and National Training Organizations in developing SVQs and by membership of the college boards of management.

In 1995-96 there were 285,557 students enrolled at the colleges (56,037 full-time and sandwich). The full-time equivalent staff number in the colleges was 6,799.

Independent Schools. Outside the state system of education there were in England 2,269 independent schools in Jan. 1997, ranging from large 'public' schools to small local ones. There were 550,000 pupils in these schools. In Wales (1994) 10,672 full-time pupils attended 64 independent schools. Independent schools are self-financing and self-resourcing, and receive no grant from central government. All independent schools in England (and Wales) are required to be registered by the Department for Education and Employment (and the Welsh Office) and are liable to the inspection by HM Inspectors from OFSTED. The term 'public schools' refers to independent schools in membership of the Headmasters' and Headmistresses' Conference, Governing Bodies Association or the Governing Bodies of Girls' Schools Association. Qualifications under which a school may be represented at the Headmasters' and Headmistresses' Conference include the measure of independence enjoyed by the governing body and the amount of advanced courses undertaken. Some of these schools are for boarders only, but the majority include non-resident 'day-pupils'. In Scotland there were 114 independent schools, with a total of 30,958 pupils in Sept. 1996. A small number of the Scottish independent schools are of the 'public school' type but they are not known as 'public schools' since in Scotland this term is used to denote education authority (*i.e.*, state) schools.

The earliest of the schools were founded by, and attached to, medieval churches. Many were founded as 'grammar' (classical) schools in the 16th century, receiving charters from the reigning sovereign. Reformed mainly in the middle of the 19th century, among the best-known are Eton College, founded in 1440 by Henry VI; Winchester College (1394) founded by William of Wykeham, Bishop of Winchester; Harrow School, founded in 1560 as a grammar school by John Lyon, a yeoman; and Charterhouse (1611). Among the earliest foundations are King's School, Canterbury, founded 600; King's School, Rochester (604) and St Peter's, York, (627).

Higher Education. The Further and Higher Education Act 1992 removed the polytechnics from local authority funding and gave them university title. The Act created the Higher Education Funding Council for England (HEFCE) and the Higher Education Funding Council for Wales (HEFCW). The Further and Higher Education (Scotland) Act 1992 established the Scottish Higher Education Funding Council (SHEFC). These are responsible for the funding of universities and other higher education institutions and prescribed courses of higher education in further education colleges. The higher education funding councils are non-departmental public bodies operating within a policy and funding context set by the government. Their task is to advise the Secretaries of State with responsibility for education on the funding needs of institutions and to distribute the funds that they make available for the provision of education and the undertaking of research.

Powers to award degrees and authority to adopt a university title are granted by the Privy Council.

Polytechnics created universities by the 1992 Act (P = Polytechnic): Anglia P became Anglia P Univ.; Birmingham P, Univ. of Central England in Birmingham; Bournemouth P, Bournemouth Univ.; Brighton P, Univ. of Brighton; Bristol P, Univ. of the West of England, Bristol; City of London P, London Guildhall Univ.; Coventry P, Coventry Univ.; Derby P, Univ. of Derby; Hatfield P, Univ. of Hertfordshire; Huddersfield P, Univ. of Huddersfield; Humberside P, Univ. of Humberside; Kingston P, Kingston Univ.; Leeds P, Leeds Metropolitan Univ.; Lancashire P, Univ. of Central Lancashire; Leicester P, De Montfort Univ.; Liverpool P, Liverpool John Moores Univ.; Manchester P, Manchester Metropolitan Univ.; Middlesex P, Middlesex Univ.; Newcastle P, Univ. of Northumbria at Newcastle; Nottingham P, Nottingham Trent Univ.; Oxford P, Oxford Brookes Univ.; P of Central London, Univ. of Westminster; P of East London, Univ. of East London; P of North London, Univ. of North London; P South West, Univ. of Plymouth; P of West London, Thames Valley Univ.; Portsmouth P, Univ. of Portsmouth; Sheffield City P, Sheffield Hallam Univ.; South Bank P, South Bank Univ.; Staffordshire P, Staffordshire Univ.; Sunderland P, Univ. of Sunderland; Teesside P, Univ. of Teesside; Thames P, Univ. of Greenwich; Wolverhampton P, Univ. of Wolverhampton.

In *England* in 1995–96 there were 137 institutions of higher education directly funded by the HEFCE, of which 70 were universities. The HEFCE allocates public funds for teaching and research to universities and colleges. It works in partnership with the higher education sector and advises the Government on higher education policy. In 1995–96 the HEFCE distributed £3,207m. in funding: £2,270m. for teaching, £636m. for research, £287m. of non-formula money and £14m. transitional funding. There were 1,137,000 students in funded institutions, including 727,000 full-time.

In 1996–97 the Council allocated £230m. for teaching and research activities. There were 81,267 students in the higher education sector in Wales in 1996–97, excluding those registered with the Open University, including 60,397 full-time, 1,113 students on their year out and 20,097 part-time students, including those enrolled on higher education provision at further education colleges.

Edinburgh College of Art, Glasgow School of Art, Moray House Institute of Education (Edinburgh), Northern College of Education (Aberdeen and Dundee), Queen Margaret College (Edinburgh), Royal Scottish Academy of Music and Drama (Glasgow), Scottish College of Textiles (Glasgow), St. Andrew's College of Education (Glasgow).

The Scottish Agricultural College (Perth) is funded by the Scottish Office Agriculture and Fisheries Department.

In 1996–97 there were 127,934 full-time and sandwich students at the institutions funded by SHEFC (67,095 female).

All the higher education institutions are independent and self-governing. In addition to funding through the higher education funding councils they receive tuition fees through local education authorities for students domiciled in England and Wales, and from the Students Awards Agency for Scotland for students domiciled in Scotland. Institutions which carry out research may also receive funding through the 5 Research Councils administered by the Office of Science and Technology.

The *Open University* received its Royal Charter on 1 June 1969 and is an independent, self-governing institution, awarding its own degrees at undergraduate and postgraduate level. It is financed by the Government through the HEFCE and by the receipt of students' fees. Tuition is by means of correspondence textbooks, audio and video cassettes, radio and television broadcasts and, for some courses, residential schools and access to a personal computer. There are also 311 local study centres where face-to-face tutorials may be offered. No formal qualifications are required for entry to undergraduate courses. Residents from most countries of Western Europe aged 18 or over may apply, though some courses are not available outside the UK. There are over 130 undergraduate courses; many are available on a one-off basis. In 1997 there were over 124,000 undergraduates, and over 27,000 postgraduate level students. The university has some 3,000 full-time staff working at its Milton Keynes headquarters and in 13 regional centres throughout the country. There are over 6,000 part-time associate lecturers.

One university is independent of the state system, the *University of Buckingham*, which opened in 1976 and received a Royal charter in 1983. It offers 2-year courses towards its own honours degrees, the academic year commencing in Jan. and consisting of four 10-week terms. There are 4 areas of study: Business; Humanities; Law; and Sciences. In 1997 there were 568 full-time and 39 part-time undergraduate students and 71 full-time and 11 part-time postgraduate students. There were 70 teachers (3 part-time).

All universities charge fees, but financial help is available to students from several sources (*see Awards to Students* above), and the majority of students receive some form of financial assistance.

The British Council. The British Council promotes cultural, educational and technical co-operation between Britain and other countries. Established in 1934 and incorporated by Royal Charter in 1940, it is Britain's principal agency for cultural relations overseas. An independent, non-political organization, it is represented in 109 countries, running a mix of offices, libraries, resource centres and English-teaching operations. Its headquarters are in London and Manchester with regional centres in Belfast, Cardiff and Edinburgh.

The British Council's total expenditure in 1996–97 was £433.9m. This was made up of government grants (£144.8m.), revenues from English language teaching and client-funded education services (£157m.) and development programmes, principally in education and training, which are managed on behalf of the British Government and other clients (£129m.).

The British Council seeks to maximize Britain's role in the world. It does this by extending the use and improving the teaching of English; promoting international partnerships in cultural, educational and scientific fields; demonstrating the achievements of British arts; extending Britain's contribution to overseas development; and promoting, in response to overseas demand, the use of British goods and services in education and training.

Chairman: Sir Martin Jacomb.

Director-General: Dr David Drewry.

Welfare. The National Insurance Act 1946 came into operation on 5 July 1948, repealing the existing schemes of health, pensions and unemployment insurance. This Act, along with later legislation, was consolidated as the National Insurance Act

1965. The scheme now operates under the Social Security Contributions and Benefits Act 1992 and the Social Security Administration Act 1992.

Since 1975, Class 1 contributions have been related to the employee's earnings and are collected with PAYE income tax, instead of by affixing stamps to a card. Class 2 and Class 3 contributions remain flat-rate, but, in addition to Class 2 contributions, those who are self-employed may be liable to pay Class 4 contributions, which for the year 1997-98 are at the rate of 6% on profits or gains between £7,010 and £24,180, which are assessable for income tax under Schedule D. The non-employed and others whose contribution record is not sufficient to give entitlement to benefits are able to pay a Class 3 contribution of £6.05 per week in 1997-98 voluntarily to qualify for a limited range of benefits. Class 2 weekly contributions for 1997-98 for men and women are £6.15. Class 1A contributions are paid by employers who provide employees with a car and fuel for their private use.

From 6 April 1978 the Social Security Pensions Act 1975 introduced earnings-related retirement, invalidity and widows' pensions. Members of occupational pension schemes may be contracted out of the earnings-related part of the state scheme relating to retirement and widows' benefits. Employee's national insurance contribution liability depends on whether he/she is in contracted-out or not contracted-out employment.

Full rate contributions for non-contracted-out employment in 1997-98:

<i>Weekly Earnings (in £1)</i>	<i>Yearly earnings (in £1)</i>	<i>Employee pays</i>	<i>Employer pays</i>
Nil-62	Nil-3,223	Nil	Nil
62-109	3,223-5,719	10% ¹	3%
110-154	5,720-8,059	10% ¹	5%
155-209	8,060-10,919	10% ¹	7%
210-464	10,920-24,180	10% ¹	10%
Over 465	Over 24,180	£41.54	10%

¹ Plus 2% of £62.

Where earnings exceed £62 per week the employee contributes 2% of earnings up to £62 and 10% thereafter.

For contracted-out employment the employees' contributions are as above but 8.2% on weekly earnings of £62-£465. The employer's rates are reduced by 3%.

From April 1996 employers who engage a trainee, or a person who has been unemployed for at least 2 years are eligible for a year's rebate of contributions.

Contributions together with interest on investments form the income of the *National Insurance Fund* from which benefits are paid. A Treasury grant was instituted in 1993. 23,749,000 persons (10,243,000 women) paid contributions in 1993-94, including 20,797,000 employees at standard rate.

Receipts, 1994-95 (in £1m.), 49,679.08, including: Contributions, 37,863.48; compensation from Consolidated Fund for recoveries, 541; investment income, 363.95. Disbursements, 49,679.084, including: Unemployment Benefit, 1,299.48; Sickness Benefit, 381.84; Invalidity Benefit, 7,705.134; Maternity Allowances, 27; Widow's Benefit, 1,022; Guardian's Allowances, 1; Retirement Pensions, 28,744.81; Pensioners' Lump Sums, 123.31; Personal Pensions, 1,956.62; transfers to Northern Ireland, 145; administration, 1,279.89; redundancy payments, 196.52. Total benefit expenditure, 1995-96, £88,787m.

Statutory Sick Pay (SSP). Employers are responsible for paying statutory sick pay (SSP) to their employees who are absent from work through illness or injury for up to 28 weeks in any 3-year period. Basically, all employees aged between 16 and 65 (60 for women) with earnings above the Lower Earnings Limit are covered by the scheme whenever they are sick for 4 or more days consecutively. The weekly rate is £54.55. For most employees SSP completely replaces their entitlement to state incapacity benefit which is not payable as long as any employer's responsibility for SSP remains.

Pregnant working women may be eligible to receive statutory maternity pay directly from their employer for a maximum of 18 weeks. There are 2 rates: Where a woman has been working for the same employer for at least 26 weeks, she is

entitled to 90% of her average weekly earnings for the first 6 weeks and to the lower rate of £54.55 a week for the remaining 12 weeks. Employers are reimbursed by the state for 92% of the amount they pay.

Women who are not eligible for statutory maternity pay, those who are self-employed, have recently changed jobs or given up their job, may qualify for a weekly maternity allowance of £54.55 for employees and £47.35 for the self- or non-employed, which is payable for up to 18 weeks.

All pregnant employees have the right to take 14 weeks' maternity leave.

A payment of £100 from the Social Fund may be available if the mother or her partner are receiving income support, family credit or disability working allowance. It is also available if a woman adopts a baby.

Contributory benefits. Qualification for these depends upon fulfilment of the appropriate contribution conditions, except that persons who are incapable of work as the result of an industrial accident may receive incapacity benefit followed by invalidity benefit without having to satisfy the contributions conditions.

Jobseekers' Allowance. This replaced unemployment benefit on 7 Oct. 1996. Unemployed persons claiming the allowance must sign a 'Jobseekers' Agreement' setting out a plan of action to find work. The allowance is not payable to persons who left their job voluntarily or through misconduct. Claimants with sufficient National Insurance contributions are entitled to the allowance for 6 months regardless of their means; otherwise, recipients qualify through a means test and the allowance is fixed according to family circumstances at a rate corresponding to Income Support for an indefinite period. In 1995-96, there were some 30,000 recipients of Unemployment Benefit.

Incapacity benefit. This replaced the former sickness benefit and invalidity benefit on 13 April 1995. Entitlement begins when entitlement to SSP (if any) ends. There are 3 rates: A lower rate for the first 28 weeks; a higher rate between the 29th and 52nd week; and a long-term rate from the 53rd week of incapacity. It also comprises certain age additions and increases for adult and child dependants. A more objective medical test of incapacity for work was introduced for incapacity benefit as well as for other social security benefits paid on the basis of incapacity for work. This test applies after 28 weeks' incapacity for work and assesses ability to perform a range of work-related activities rather than the ability to perform a specific job. Benefit is taxable after 28 weeks. Some 1,881,000 claims were met in 1995-96.

Maternity Benefit. Women who do not qualify for statutory maternity pay may be entitled to maternity allowance if they satisfy a test of recent work and contributions paid. Maternity allowance can be paid for up to 18 weeks. Payment can start at the earliest 11 weeks before the expected week of confinement but the woman has some choice in deciding when to give up work and still retain title to the full 18 weeks. There were some 12,000 beneficiaries in 1995-96.

Widow's Benefits. From 11 April 1988 the three main widow's benefits are: Widow's payment, widowed mother's allowance, widow's pension.

A widow cannot get any widow's benefits based on her husband's National Insurance contributions (NIC) if: She had been divorced from the man who has died; or she was living with the man as if she were married to him, but without being legally married to him; or she is living with another man as if she is married to him; or she was in prison or held in legal custody. A widow can only get widow's benefits if her husband has paid enough NIC. *Widow's Payment* is a single tax-free payment of £1,000. A widow may be able to get this benefit if her husband has paid enough NIC and she was under 60 when her husband died; or her husband was not getting a State Retirement Pension when he died. *Widowed Mother's Allowance:* A widow may be able to get a widowed mother's allowance if her husband has paid enough NIC and she is receiving child benefit for one of her children, or her husband was receiving child benefit, or she is expecting her husband's baby, or if she was widowed before 11 April 1988 and has a young person under 19 living with her for whom she was receiving Child Benefit. A widow entitled to a widowed mother's allowance will get an amount based on her husband's NIC. She will also get benefit for her eldest

dependent child and further higher benefit for each subsequent child and she may also get an additional pension based on her husband's earnings since 1978. Widowed mother's allowance is usually paid as long as the widow is getting child benefit. It is taxable. *Widow's Pension:* A widow may be able to get a widow's pension if her husband has paid enough NIC. She must be 45 or over (40 or over if widowed before 11 April 1988) when her husband died or when her widowed mother's allowance ends. A widow cannot get a widow's pension at the same time as a widowed mother's allowance. A widow who is entitled to a widow's pension will get an amount that depends on her age when her husband died or when her widowed mother's allowance ends. If she was 55 or over (50 or over if widowed before 11 April 1988) she will get the full rate of widow's pension. She may also get an additional pension based on her husband's earnings since 1978. If her late husband was a member of a contracted-out occupational scheme or a personal pension scheme that scheme is responsible for paying the whole or part of the additional pensions. Widow's pension is usually paid until the widow is entitled to state retirement pension, when she is 60 or older. Widow's pension is taxable. There were some 291,000 pensioners in 1995–96.

Retirement Pension. The state retirement ('old age') pension scheme has 2 components: A basic pension and an earnings-related pension (State Earnings Related Pension—SERPS). The amount of the first is subject to National Insurance contributions made; SERPS is 1.25% of average earnings between the lower weekly earnings limit for Class 1 contribution liability and the upper earnings limit for each year of such earnings, building up to 25% in 20 years. For individuals reaching pensionable age after 6 April 1999 changes in the way pensions are calculated will be phased in over 10 years to include a lifetime's earnings with an accrual rate of 20%. Pensions are payable to women at 60 years of age and men at 65, but the age differential will be progressively phased out starting in April 2010. Women born before 6 April 1950 will be unaffected; women born after 5 March 1955 will receive their pension at 65; pension age for women between these dates will move up gradually from 60 to 65. There are standard rates for single persons and for married couples, the latter being 159% of 2 single-person rates. Proportionately reduced pensions are payable where contribution records are deficient.

Employees in an occupational scheme may be contracted out of SERPS provided that the occupational scheme provides a pension not less than the 'guaranteed minimum pension'. Self-employed persons, and also employees, may substitute personal pension schemes for SERPS. An independent statutory body, the Occupational Pension Board, is responsible for supervising contracted-out schemes.

Self- and non-employed persons may contribute voluntarily for retirement pension.

Persons who defer claiming their pension during the 5 years following retirement age are paid an increased amount, as do men and women who had paid graduated contributions. Although no further graduated contributions have been paid after April 1975, pension already earned will be paid along with the basic pension in the normal way. In 1995–96 some 10,322,000 persons were receiving pensions. Since 1 Oct. 1989 the pension for which a person has qualified may be paid in full whether a person continues in work or not irrespective of the amount of earnings.

At the age of 80 a small age addition is payable. In addition non-contributory pensions are now payable, subject to residence conditions, to persons aged 80 and over who do not qualify for a retirement pension or qualify for one at a low rate. These pensions are financed by Exchequer funds.

Pensioners whose pension is insufficient to live on may qualify for Income Support.

Non-Contributory Benefits.

Child Benefit. Child benefit is a tax-free cash allowance for children normally paid to the mother. The weekly rates are highest for the eldest qualifying child and less for each other child. Child benefit is payable for children under 16, for 16 and 17 year olds registered for work or training and for those under 19 receiving full-time non-advanced education. Some 12,993,000 children in 7,125,000 families received benefit in 1995–96.

One Parent Benefit is a tax-free cash allowance for certain people bringing up children alone. It is payable for the first or only child in the family in addition to child benefit. There were some 1,067,000 beneficiaries in 1995–96.

Child Support Agency. The Agency, which started work in April 1993, is gradually replacing the court system for obtaining maintenance for children being brought up by single parents. The Agency is responsible for assessing, collecting and enforcing child maintenance payments and for tracing absent parents. Assessments are made using a formula which takes into account each parent's income and essential outgoings. Changes to the child support arrangements were introduced in Feb. 1994 to take account of concerns raised by members of the public and MPs. These are designed to reduce the amount of child maintenance that many absent parents are required to pay and to give some families more time to adjust to increased bills. Legislation of 1995 introduced the possibility of fixing maintenance alongside the formula-assessment method. Appeals on points of law may be made to the Child Support Commissioners. In 1994–95 the Agency took on 398,584 new cases and completed 568,149 assessments.

Family Credit. Family Credit is a tax-free benefit for working families with children. To be able to get Family Credit there must be at least one child under 16 in the family (or under 19 if in full-time education up to, and including, A level or equivalent standard). The claimant or partner (if there is one) must be working at least 16 hours a week to qualify. They may be employed or self-employed, a lone parent or a couple. The claim should be made by the woman in two-parent families. The amount of Family Credit payable depends on the income of the claimant and partner, how many children there are in the family and their ages. The same rates of benefit are paid for one-parent families as for two-parent families. There are adult rates as well as a rate for each child varying with age, payable if the family's income does not exceed a certain limit. The award is reduced by £0.70 for each extra £1 earned. Family Credit is not payable if the claimant (or claimant and partner together) have savings or capital of over £8,000. Benefit is reduced if savings or capital of more than £3,000 is held. Family Credit is paid at the same rate for 26 weeks. The amount of the award will usually stay the same even if earnings, or other circumstances, change during that period. There were some 658,000 recipients in 1995–96.

Earnings Top-up. This was introduced in Oct. 1996 on a pilot basis in 8 areas. Wages for workers with dependent children are topped up. There are different rates for couples and single persons.

Guardian's Allowance. A person responsible for an orphan child may be entitled to a guardian's allowance in addition to child benefit. Normally both the child's parents must be dead but when they never married or were divorced, or one is missing, or serving a long sentence of imprisonment, the allowance may be paid on the death of one parent only.

Attendance Allowance. This is a tax-free Social Security benefit for disabled people over 65 who need help with personal care. The rates are increased for the terminally ill. There were some 1,162,000 recipients in 1995–96.

Invalid Care Allowance. This is a taxable benefit which may be paid to those who forgo the opportunity of full-time work to care for a person who is receiving attendance allowance, constant attendance allowance or the highest or middle-core component of Disability Living Allowance. There is a weekly rate, with increases for dependants. There were some 339,000 recipients in 1995–96.

Disability Living Allowance. This is a non-taxable benefit available to people disabled before the age of 65 who need help with getting around or with personal care for at least 3 months. The mobility component has 2 weekly rates, the care component has 3. There were some 1,771,000 recipients in 1995–96.

Disability Working Allowance. This is a tax-free benefit for people with an illness or disability which puts them at a disadvantage in getting a job. It is income-related and is intended for people who are starting work or already working at least 16 hours a

week. The allowance is not payable if assets exceed £16,000. About 8,000 people received the allowance in 1995–96.

Industrial Injuries Disablement and Death Benefits. The Industrial Injuries Act, which also came into operation on 5 July 1948, with its later amending Acts, was consolidated as the National Insurance (Industrial Injuries) Act, 1965. This legislation was incorporated in the Social Security Act, 1975. The scheme provides a system of insurance against 'personal injury by accident arising out of and in the course of employment' and against certain prescribed diseases and injuries due to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers persons who are employed earners under the Social Security Act. There are no contribution conditions for the payment of benefit. Three types of benefit are provided:

Disablement benefit. This is payable where, as the result of an industrial accident or prescribed disease, there is a loss of physical or mental faculty. The loss of faculty will be assessed as a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is between 14–100% benefit will be paid as weekly pension; 14–19% are payable at the 20% rate. The rates vary from 20% disabled to 100% disablement. Assessments of less than 14% do not normally attract basic benefit except for certain progressive chest diseases. Pensions for persons under 18 are at a reduced rate. When injury benefit was abolished for industrial accidents occurring and prescribed diseases commencing on or after 6 April 1983, a common start date was introduced for the payment of disablement benefit 90 days (excluding Sundays) after the date of the relevant accident or onset of the disease. The following increases can be paid with disablement benefit: Constant attendance allowance – where the disability for which the claimant is receiving disablement benefit is assessed at 100% and is so severe that they need constant care and attention. There are 4 rates depending on the amount of attendance needed. Exceptionally severe disablement allowance – where the claimant is in receipt of constant attendance allowance at one of the two higher rates and the need for attendance is likely to be permanent.

Reduced earnings allowance (REA) is a separate benefit. Entitlement exists if the claimant has not retired and cannot go back to their normal job or do another job for the same pay because of the effects of the disability caused by an accident or disease which occurred on or before 30 Sept. 1990. It can be paid whether or not disablement benefit is paid, providing the disablement benefit assessment is 1% or more (e.g. where disablement is assessed at less than 14%) and on top of 100% disablement benefit. From 1 Oct. 1989, if a claimant is of pensionable age (60 for a woman, 65 for a man) they can continue to receive REA if they are in regular employment, or in some cases if they are receiving Sickness Benefit, Invalidity Benefit or Unemployment Benefit. It will not matter whether or not they receive State Retirement Pension. If they are not in regular employment then entitlement to REA will cease. In most cases it will be replaced by Retirement Allowance.

Death Benefit. This is payable to the widow of a person who died before 11 April 1988 as the result of an industrial accident or a prescribed disease. Deaths which occurred on or after 11 April 1988 – a widow is entitled to full widow's benefits even if her late husband did not satisfy the contribution condition, if he died as a result of an industrial accident or prescribed disease.

Allowances may be paid to people who are suffering from pneumoconiosis or byssinosis or certain other slowly developing diseases due to employment before 5 July 1948. They must not at any time have been entitled to benefit for the disabled under the Industrial Injuries provision of the Social Security Act or compensation under Workmen's Compensation Acts or received damages through the courts.

In certain cases supplementation allowances are payable to people who are getting or are entitled to compensation under the Workmen's Compensation Acts.

War Pensions. Pensions are payable for disablement or death as a result of service in the armed forces, Merchant Navy or Civil Defence during war, or to civilians injured by enemy action. The amount depends on the degree of disablement. Various supplements may apply. There were some 331,000 recipients in 1995–96.

Severe Disablement Allowance. A severe disablement allowance as well as an age-related addition may be payable to people under pensionable age who have been continuously incapable of work for at least 28 weeks but who do not qualify for incapacity benefit. Those over 20 who are unable to work and are 80% disabled but do not qualify for the National Insurance invalidity pension because they have not paid sufficient contributions may be entitled to severe disablement allowance. Additions for adult dependants and for children may also be paid. There were some 368,000 beneficiaries in 1995–96.

Housing Benefit. The housing benefit scheme assists persons who need help to pay their rent, using general assessment rules and benefit levels similar to those for the income support scheme. People whose net income is below certain specified levels qualify for housing benefit of up to 100% of their rent. The scheme sets a limit of £16,000 on the amount of capital a person may have and still remain entitled. Restrictions on the granting of benefit to persons under 25 were introduced in 1995. In 1995–96 some 2,918,000 claims for rent rebate and 1,870,000 for rent allowance were made.

Council Tax Benefit. The scheme offers help to those claiming income support and others with low incomes. Subject to rules broadly similar to those governing the provision of income support and housing benefit, people may receive rebates of up to 100% of their council tax. In 1995–96 some 5,735,000 households received such help. A person who is liable for the council tax may also claim benefit (called 'second adult rebate') for a second adult who is not liable to pay the council tax and who is living in the home on a non-commercial basis.

Income Support. Under the Social Security Act, 1986, benefit was payable to any persons aged 18 years or over not in full-time work who were without adequate resources. Since 7 Oct. 1996, Income Support has been payable only to persons not required to be available for work whose resources are below a certain level. These include single parents, pensioners, long-term sick or disabled persons and those caring for them who qualify for the invalid care allowance. Income Support is not payable if the claimant (or claimant and partner together) have savings or capital over £8,000. Benefit is reduced if savings or capital of more than £3,000 is held. A person who is excluded from benefit under the normal rules may receive payments to meet urgent need. Additional sums, known as premiums, are available. There were some 5,601,000 recipients in 1995–96 (under the 1986 Act).

The Social Fund. The Fund makes payments and loans to help recipients meet intermittent expenses. 'Regulated payments' comprise *Maternity Payments* (a payment of up to £100 for each baby expected, born or adopted, payable to persons receiving income support, income-based jobseekers' allowance, disability working allowance or family credit); *Funeral Payments* (a payment of reasonable funeral expenses up to £500 incurred by persons receiving income support, income-based jobseekers' allowance, housing benefit, Council Tax benefit, disability working allowance or family credit; recoverable from the estate of the deceased); *Cold Weather Payments* (a payment of £8.50 for any consecutive 7 days when the temperature is below freezing to persons receiving income support who are pensioners, disabled or have a child under 5). 'Discretionary Payments' comprise: *Community Care Grants* (payments to help persons receiving income support to move into the community or avoid institutional care); *Budgeting Loans* (interest-free loans to persons receiving income support for expenses difficult to budget for); *Crisis Loans* (interest-free loans to anyone without resources in an emergency where there is no other means of preventing serious risk to health or safety). Savings over £500 (£1,000 for persons aged 60 or over) are taken into account before payments are made.

Health. The National Health Service (NHS) in England and Wales started on 5 July 1948 under the National Health Service Act, 1946. There is a separate Act for Scotland.

The NHS is a charge on the national income in the same way e.g. as the armed forces. Every person normally resident in the UK is entitled to use any complete part of the services, and no insurance qualification is necessary.

Since 1948 a weekly NHS contribution has been payable by employees and the self-employed. In 1957 this contribution was extended to employers. For convenience this contribution is collected with the National Insurance contribution and amounts to 1.05% of the latter for employees and 0.9% for employers. The NHS is funded 12.1% by these contributions, 82% by general taxation and 2.3% by charges for drugs and dental treatment and the rest from other receipts. Health authorities may raise funds from voluntary sources; hospitals may take private paying patients.

Organization. The National Health Service and Community Care Act, 1990, provided for a major restructuring of the NHS. From 1 April 1991, health authorities became the purchasers of health care, concentrating on their responsibilities to plan and obtain services for their local residents by the placement of health service contracts with the appropriate units. Day-to-day management tasks became the responsibility of hospitals and other units, with whom the contracts are placed, in their capacity as providers of care.

In April 1996 the Regional Health Authorities were replaced by 8 regional offices of the NHS Executive. The District Health Authorities and Family Health Service Authorities were replaced by comprehensive Health Authorities directly financed by central governments Hospital and Community Health Services funds. The budget for 1996-97 was £2,260m.

The key responsibility of Health Authorities is to ensure that the health needs of their local communities are met. They have the purchasing power to commission hospital and community health services for their residents. In doing so they have a duty to ensure that high standards are maintained and that they are securing the best possible value for money.

The Health Authorities manage the Family Doctor (or General Medical) Service and also organize the general dental, pharmaceutical and ophthalmic services for their areas. Any doctor may take part in the Family Doctor Service, and are paid for their NHS work; they may also take private fee-paying patients.

NHS Trusts are established as self-governing units within the NHS. Trusts are responsible for the ownership and management of the hospitals or other establishments or facilities vested in them, and for carrying out the individual functions set out in their establishment orders. In April 1996 there were 520 Trusts, representing most hospitals.

General practitioners (GPs) may apply for fundholding status, responsible for their own NHS budget for a specified range of goods and services. There are 2 types of fundholder: Standard fundholders for practices with at least 5,000 patients in England and 4,000 in Wales and Scotland, who purchase the full range of in- and out-patient services; and Community fundholders, for smaller practices of at least 3,000 patients, who purchase only community nursing services and diagnostic tests. In 1996 there were some 14,000 fundholding GPs in 3,300 practices, covering 47% of the population.

Services. The NHS broadly consists of hospital and specialist services, general medical, dental and ophthalmic services, pharmaceutical services, community health services and school health services. All these services are free of charge except for such things as prescriptions, spectacles, dental and optical examination, dentures and dental treatment, amenity beds in hospitals and for some of the community services, for which charges are made with certain exemptions.

The total cost of the NHS was estimated at £42,600m. for 1996-97.

In 1995 there were 26,702 GPs in England with an average of 1,887 patients each, 1,719 in Wales with 1,730 patients and 3,524 in Scotland with 1,506. There were 15,064 general dental practitioners in England, 817 in Wales and 1,764 in Scotland. In hospitals in Great Britain in 1995 there were 57,299 medical staff and 421,648 nurses and midwives (excluding agency staff). There were (1990) 338,630 average daily available hospital beds in the UK.

In the UK in 1995 there were 193 public and private hospices for the terminally ill with 2,982 beds.

Personal Social Services. Under the Local Authority Social Services Act, 1970, and in Scotland the Social Work (Scotland) Act, 1968, the welfare and social work services provided by local authorities were made the responsibility of a new local authority department—the Social Services Department in England and Wales, and Social Work Departments in Scotland headed by a Director of Social Work, responsibility in Scotland passing in 1975 to the local authorities. The social services thus administered include: the fostering, care and adoption of children, welfare services and social workers for people with learning difficulties and the mentally ill, the disabled and the aged, and accommodation for those needing residential care services. Legislation of 1996 permits local authorities to make cash payments as an alternative to community care. In Scotland the Social Work Departments' functions also include the supervision of persons on probation, of adult offenders and of persons released from penal institutions or subject to fine supervision orders.

Personal Social Services staff numbered 233,861 in 1995. The total cost of these services was estimated at £8,849m. for 1995–96. Expenditure is reviewed by the Social Services Inspectorate and the Audit Commission (in Scotland by the Social Work Services Inspectorate and the Accounts Commission).

NORTHERN IRELAND

KEY HISTORICAL EVENTS. Northern Ireland is part of the United Kingdom. The Government of Ireland Act 1920 granted Northern Ireland its own bicameral parliament (Stormont), and between 1921 and 1972 it had full responsibility for local affairs except for such matters as defence and the armed forces, foreign and trade policies, and taxation and customs. However, in the late 1960s a Civil Rights campaign and reactions to it escalated into serious rioting and sectarian violence involving the Irish Republican Army (IRA, an illegal organization aiming to unify Northern Ireland with the Republic of Ireland) and loyalist paramilitary organizations. The Northern Ireland government resigned and direct rule by the UK government began in 1972. The Northern Ireland parliament was abolished in 1973. The Northern Ireland Constitution Act 1973 provided for devolved government on a power-sharing basis, but this collapsed in May 1974.

Under the Northern Ireland Act 1974 the UK parliament approves all laws for Northern Ireland and the Northern Ireland departments are under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

Attempts have been made by successive governments to find a means of restoring greater power to Northern Ireland's political representatives on a widely acceptable basis, including through a Constitutional Convention (1975–76), a Constitutional Conference (1979–80) and 78-member Northern Ireland Assembly elected by proportional representation in 1982. This was dissolved in 1986, partly in response to Unionist reaction to the Anglo-Irish Agreement signed by the governments of the UK and the Republic of Ireland on 15 Nov. 1985. The Agreement committed both the UK and the Irish governments to the principle that Northern Ireland should remain part of the UK for as long as that were the wish of the majority of population in Northern Ireland, that there was at present no wish for change, but if there were such a desire

in the future, legislation would be introduced to give it effect. The Agreement established an Intergovernmental Conference of British and Irish ministers to monitor political, security, legal and other issues of concern to the nationalist community, and through which the Irish government could put forward views and proposals on specific matters affecting Northern Ireland affairs. There was to be no derogation from the sovereignty of the UK or Irish governments as a result of the Agreement.

Since 1990 the UK government has sought, through dialogue, to secure a political settlement encompassing all the relevant relationships—those within Northern Ireland, those within the island of Ireland and those between the UK and Irish governments. In 1991 and 1992 round table talks were held between the two governments and the Northern Ireland parties. Since then the search for a settlement has continued through bilateral discussions.

On 15 Dec. 1993 the Prime Ministers of the UK and the Republic of Ireland (John Major and Albert Reynolds) issued a joint declaration as a basis for all-party talks to achieve a political settlement, inviting Sinn Féin ('Ourselves Alone', pro-Republican nationalist party and the political wing of the IRA) to join the talks in an All-Ireland Forum 3 months after the cessation of terrorist violence. The declaration stated that both the UK and Irish governments affirmed that the status of Northern Ireland could only be changed with the consent of a greater number of its people; that the future of Ireland was to be decided by the people of the North and South alone; that the UK would give legislative effect to a united Ireland if a majority in the North so decided; and that the Irish government would abandon its constitutional claim to all the island of Ireland if there were a political settlement.

The IRA announced 'a complete cessation of military operations' on 31 Aug. 1994. On 13 Oct. 1994 the anti-IRA Combined Loyalist Military Command also announced a ceasefire 'dependent upon the continued cessation of all nationalist republican violence'.

Talks between UK government officials and Sinn Féin, and also with the political representatives of the loyalists, i.e. the Ulster Democratic Party and the Progressive Unionist Party, began in Dec. 1994 and continued at ministerial level in March and May 1995.

On 22 Feb. 1995 the British and Irish Prime Ministers (John Major and John Bruton) announced new joint UK-Irish proposals for a settlement in Northern Ireland contained in 2 documents: *A Framework for Accountable Government in Northern Ireland*, drawn up by the UK government, and *A New Framework for Agreement*, agreed by the UK and Irish governments.

The proposals envisaged: An elected single-chamber 90-member Northern Ireland assembly; a north-south body comprising members of this assembly and representatives of the Irish government and accountable to both. This body would have executive, harmonizing or consultative functions in matters designated by the UK and Irish parliaments, its decisions being reached by consensus; a standing inter-governmental conference to consider matters not transferred to the above proposed bodies; changes to the Irish constitution to withdraw the Republic's territorial claim to Northern Ireland if it were contrary to the will of a majority of its people; amendments to UK legislation to enable Northern Ireland's future status to be determined by a majority decision of its people; an undertaking by both governments to ensure the 'systematic and effective protection of common specified civil, political, social and cultural rights'.

On 28 Nov. 1995 the British and Irish Prime Ministers (John Major and John Bruton) agreed on a formula which would allow preliminary talks involving Northern Ireland's main political parties to start while a 3-member international body headed by former US Senator George Mitchell prepared a report on 'the arrangements necessary for the removal from the political equation' of paramilitary arms. The Mitchell commission report, published on 24 Jan. 1996, set out 6 principles to which all parties should adhere, including a commitment to renounce violence, verifiable disarmament of all paramilitaries and a pledge to adhere to any agreement reached through all-party negotiations. Concluding that the paramilitaries 'will not decommission any arms prior to all-party negotiations', the commission recommended that negotiations and decommissioning of weapons should proceed at the

same time, and proposed a number of measures including an elective process. However, the British Prime Minister stated that, 'In the absence of prior decommissioning, there may well be another way forward', proposing elections to a temporary body which could be used as a forum for negotiations.

On 9 Feb. 1996 the IRA exploded a bomb in the Docklands area of London (the first of several incidents) and announced the end of their ceasefire.

Elections were held on 30 May to select delegates from among whom participants in negotiations may be drawn, constituting a 110-member forum to take part in talks with the British and Irish governments. Each of the 18 Northern Ireland constituencies returned 5 delegates. The 10 parties receiving the most votes received 2 extra delegates. Sinn Féin may participate in the forum, but not in the negotiations until the IRA restores its ceasefire. The Ulster Unionist Party won 30 seats with 24.2% of votes cast; the Social Democratic and Labour Party, 21 with 21.4%; the Democratic Unionist Party, 24 with 18.8%; Sinn Féin, 17 with 15.5%; the Alliance Party, 7 with 6.5%; the United Kingdom Unionist Party, 3 with 3.7%; the Progressive Unionist Party, 2 with 3.5%; the Ulster Democratic Party, 2 with 2.2%; the Northern Ireland Women's Coalition, 2 with 1%; Labour, 2 with 0.8%. The electorate was 1.1m.

Opening Plenary talks began under the chairmanship of Senator Mitchell on 12 June 1996, with Gen. John de Chastelain (Canada) and Harri Holkeri (Finland) as deputies. In the course of 1996 a Business Committee was set up and an agenda for the remainder of the Opening Plenary agreed by sufficient consensus.

A retaliatory bomb attack on a republican sympathizer on 22 Dec. 1996 marked the end of the observance of the ceasefire by paramilitary loyalist terrorists. However, the UK Secretary of State for Northern Ireland declared that the loyalist ceasefire remained intact, so when the Mitchell talks reconvened on 13 Jan. 1997 it was with the continued participation of the loyalist parties. At the beginning of 1997 discussion was focused on the decommissioning of arms, following which the talks were scheduled to divide into 3 sub-sections ('strands'): 1) New internal arrangements for Northern Ireland including some form of assembly; 2) Cross-border co-operation; 3) Relations between the UK and Irish governments.

The talks resumed again on 3 June 1997 under the newly-elected Labour Government in which Dr Marjorie ('Mo') Mowlam was appointed as Secretary of State for Northern Ireland. The Government stated its firm intention that substantive negotiations should begin in September 1997, with a view to reaching a conclusion by May 1998, when the final outcome would be put to the people of Ireland, North and South, for approval in concurrent referendums.

The new Government also announced that it was willing to organize meetings between its officials and Sinn Féin, to clarify Government policy. A restoration of the IRA ceasefire was declared from 20 July 1997; the Government indicated it would assess whether it was genuine over a period of some six weeks, and if satisfied it was so, would then invite Sinn Féin to the talks. The Secretary of State for Northern Ireland, Dr Marjorie Mowlam, MP, announced on 29 Aug. that she had decided to invite Sinn Féin to enter the talks. This decision was reached after careful consideration of all the circumstances following the IRA announcement.

The talks resumed on 9 Sept. when Sinn Féin affirmed their commitment to the six Mitchell principles of democracy and non violence.

On 24 Sept. there was a major breakthrough when the participants in the multi-party negotiations, meeting in plenary session, approved a procedural motion which concluded the business of the opening plenary session and launched the three strands of substantive political negotiations.

Under the chairmanship of George Mitchell, a marathon negotiating struggle on 9-10 April 1998 led to an agreement, albeit nearly 17 hours after the deadline.

What the negotiators from the 21 months of talks produced was a framework for sharing power designed to satisfy Protestant demands for a reaffirmation of their national identity as British, Catholic desires for a closer relationship with the predominantly Catholic Republic of Ireland and Britain's wish to return to Northern Ireland the powers London assumed in 1972 when the local Stormont legislature was disbanded.

Under the agreement, there would be a new democratically elected legislature in

Belfast, a new ministerial council giving the governments of Northern Ireland and Ireland joint responsibilities in areas like tourism, transportation and the environment, and a new consultative council that twice a year would bring together minister from the British and Irish parliaments and the three assemblies being created in Northern Ireland and in Scotland and Wales.

The Irish government would move to eliminate its territorial claim on Northern Ireland from its constitution.

The critical issues of police and judicial-system reform, the release of parliamentary prisoners, and the dismantling of the vast underground arsenals of weaponry in the province would be submitted to new commissions for study and recommendations.

The settlement was to be put to referendums in both Northern Ireland and the Republic of Ireland on 22 May.

CONSTITUTION AND GOVERNMENT. Northern Ireland is part of the United Kingdom. The Government of Ireland Act 1920 granted Northern Ireland its own bicameral parliament (*Stormont*), and between 1921 and 1972 it had responsibility for internal affairs. Following rioting and sectarian violence involving the IRA and loyalist paramilitary organizations, the Northern Ireland government resigned and direct rule by the UK government began in 1972. The Northern Ireland parliament was abolished in 1973.

Under the Northern Ireland Act 1974 the UK parliament approves all laws for Northern Ireland and the Northern Ireland departments are under the direction and control of a UK Cabinet Minister, the Secretary of State for Northern Ireland.

Secretary of State for Northern Ireland: Rt Hon. Marjorie ('Mo') Mowlam, MP.

Local Government. Northern Ireland has a single-tier system of 26 district councils based on main centres of population. Elections were held on 19 May 1993 for the 582 council seats. The Ulster Unionist Party gained 201 seats with 34.5% of votes cast, the Social Democratic and Labour Party 127 with 21.8%, the Democratic Unionist Party 102 with 17.5%, Sinn Féin 51 with 8.8%, the Alliance 44 with 7.6%, the Conservative Party 6 with 1.8%, others 22. Independents gained 29 seats with 5%.

ECONOMY

Policy. The main Northern Ireland government department concerned with economic development is the Department of Economic Development (DED). The department and its agencies have responsibility for the promotion of inward investment and the development of larger home industry (Industrial Development Board, IDB); promotion of enterprise and small business (Local Enterprise Development Unit, LEDU); training and employment matters (Training and Employment Agency, T&EA); promotion of industrially-relevant research and development and technology transfer (Industrial Research and Technology Unit, IRTU); promotion and development of tourism (Northern Ireland Tourist Board, NITB); energy matters; mineral development; company regulation; consumer protection; health and safety at work; industrial relations; equality of opportunity in employment; and better regulation.

IDB's overall objective is to encourage the development of internationally competitive companies in the manufacturing and tradeable service sectors in Northern Ireland and to attract new inward investment, contributing to growth in durable employment. During 1996-97, IDB secured 35 investment projects by externally owned companies, promoting 4,641 new jobs and safeguarding a further 3,345 jobs. In addition, IDB assisted 56 projects by locally owned companies, promoting 1,364 new jobs and safeguarding a further 2,232 jobs.

The LEDU is the small business agency (for companies employing fewer than 50 people). It aims to strengthen the economy by encouraging enterprise and new business start-ups and by helping established small businesses achieve export-orientated, profitable growth. In 1996-97 LEDU assisted 1,545 new business start-ups. As a result, LEDU achieved 3,425 new jobs and a further 755 among existing businesses.

The T&EA is an Executive Agency within DED. It assists economic development and helps people find work through training and employment services delivered on the basis of equality of opportunity. It works closely with employers and business interests, and with the other economic development agencies in making training relevant to local needs. In 1996-97 T&EA placed 46,018 people into employment. At the end of 1996-97, 290 companies were receiving assistance to train and develop their management and workforce through the Company Development Programme. Jobskills, which commenced across Northern Ireland in April 1995, achieved its interim target for 1996-97 of 35% attainment of National Vocational Qualification (NVQ) at Level 2 or above and the Agency is confident that the 1997-98 target of 45% will be achieved.

The IRTU, an Executive Agency within DED, provides the focus for all aspects of industry-related technology and innovation policy, including grants for industrial research and development, information, advice, scientific testing and analysis services. In 1996-97, IRTU disbursed £13.1m. of Government funding to Research and Development projects; in addition, IRTU enabled companies to obtain support under EU programmes.

Currency. Banknotes are issued by Allied Irish Banks, Bank of Ireland, First Trust Bank, Northern Bank and Ulster Bank.

Public Finance. The Finance Department is responsible for control of the expenditure of Northern Ireland departments, liaison with HM Treasury and the Northern Ireland Office on financial matters, economic and social research and analysis, Citizens Charter Unit, the Valuation and Lands Agency, the Government Purchasing Service (Northern Ireland) and the Legal Services.

The public debt at 31 March 1996 was as follows: Ulster Savings Certificates, £109,552,818; Ulster Development Bonds, £13,845; borrowing from UK Government, £1,627,376,855; borrowing from Northern Ireland Government Funds, £73,507,225; European Investment Bank Loan, £4,527,579.

The above amount of public debt is offset by equal assets in the form of loans from Government to public and local bodies and of cash balances.

ENERGY AND NATURAL RESOURCES

Electricity. There are 4 power stations with an installed capacity of some 2,200 MW.

Gas. An undersea pipeline from Scotland was completed in 1996 to bring natural gas to Northern Ireland for the first time. Ballylumford Power Station is now operating on natural gas and gas is currently being systematically made available to industrial, commercial and domestic consumers in the Greater Belfast and Larne areas.

Minerals. Output of minerals (in 1,000 tonnes), 1996: Basalt and igneous rock (other than granite), 6,974; sandstone, 4,941; limestone, 4,122; sand and gravel, 7,684; other minerals (rocksalt, fireclay, diatomite, granite, chalk, clay and shale), 1,392. There are lignite deposits of 1,000m. tonnes which have not yet been developed.

Civil Aviation. There are scheduled air services to 3 airports in Northern Ireland. Belfast International Airport is the main one of these. Scheduled services are provided by British Airways and its franchise partners British Regional Airlines & Maersk, British Midland, Jersey European Airways, Aer Lingus and Air UK. Belfast International is also Northern Ireland's holiday airport with holiday flights operated direct to European and transatlantic destinations by a wide range of local and UK tour operators. In the year to 31 March 1997, the airport handled 2.4m. passengers and 38,000 tonnes of freight and mail.

Belfast City Airport offers commuter services to 14 regional airports in Great Britain as well as services to London Gatwick and Luton, the Isle of Man, Channel Islands and Cork. A 'feeder' service operates between Belfast City and City of Derry Airports. In 1994 Belfast City Airport handled 1.35m. passengers. The City of Derry Airport is situated 14 km from Londonderry and provides services from the north-west of Ireland to 14 United Kingdom destinations (Aberdeen, Belfast, Birmingham, Blackpool, Bristol, Glasgow, Guernsey, Isle of Man, Jersey, Leeds/Bradford, Liverpool, London Gatwick, Manchester, Newcastle) and 4 European destinations (Amsterdam, Brussels, Frankfurt and Paris). In 1996 the City of Derry Airport handled 68,000 passengers. There are two other licensed airfields at St Angelo and Newtownards, the latter of which is used principally by flying clubs, private owners and air taxi businesses. St Angelo has commercial flights operated by Brymon Airways to Jersey and by Crossair to Zurich. It handled 3,500 passengers in 1996.

Belfast, Londonderry and Warrenpoint offer conventional cargo services. A new port at Londonderry opened in 1993. A new car ferry service

between Ballycastle and Campbeltown, in Scotland, commenced operations on 1 July 1997. It is hoped the season will be extended in future years.

SOCIAL INSTITUTIONS

Justice. The Lord Chancellor has responsibility for the administration of all courts through the Northern Ireland Court Service and for the appointment of judges and magistrates. The court structure has 3 tiers: The Supreme Court of Judicature of Northern Ireland (comprising the Court of Appeal, the High Court and the Crown Court), the County Courts and the Magistrates' Courts. There are 21 Petty Sessions districts which when grouped together for administration purposes form 7 County Court Divisions and 4 Crown Court Circuits.

The County Court has general civil jurisdiction subject to an upper monetary limit. Appeals from the Magistrates' Courts lie to the County Court, or to the Court of Appeal on a point of law, while appeals from the County Court lie to the High Court or, on a point of law, to the Court of Appeal.

Police. The police force consists of the Royal Ulster Constabulary, supported by the Royal Ulster Constabulary Reserve, a mainly part-time force.

Religion. According to the census of 1991 there were: Roman Catholics, 605,639; Presbyterians, 336,891; Church of Ireland, 279,280; Methodists, 59,517. Those belonging to other denominations numbered 122,448; to none, 59,234. 114,827 persons did not answer the voluntary question on religion.

Education. Public education, other than university education, is presently administered centrally by the *Department of Education for Northern Ireland* and locally by 5 Education and Library Boards. The Department is concerned with the whole range of education from nursery education through to higher education and continuing education; for sport and recreation; for youth services; for the arts and culture (including libraries) and for the development of community relations within and between schools.

Each *Education and Library Board* is the local education authority for its area. Boards were first appointed in 1973, the year of local government reorganization, and are normally reappointed every 4 years following the District Council elections. The membership of each Board consists of District councillors, representatives of transferors of schools, representatives of trustees of maintained schools and other persons who are interested in the service for which the Board is responsible. Boards have a duty, amongst other things, to ensure that there are sufficient schools of all kinds to meet the needs of their areas. The Boards are responsible for costs associated with capital works at controlled schools. Voluntary schools, including maintained and voluntary grammar schools, can receive grant-aid from the Department of Education toward capital works of up to 85%, or 100% if they have opted to change their management structures so that no single interest group has a majority of nominees. Most voluntary grammar schools can receive the same rate of grant on the purchase of equipment. The Boards award university and other scholarships; they provide school milk and meals; free books and transport for pupils; they enforce school attendance; provide a curriculum advisory and support service to all schools in their area; regulate the employment of children and young people; and secure the provision of youth and recreational facilities. They are also required to develop a comprehensive and efficient library service for their area. Board expenditure is funded at 100% by the Department of Education. Integrated schools receive 100% funding for recurrent costs from the Department of Education, and, where long-term viability has been established, for capital works.

The Education Reform (NI) Order 1989 made provision for the setting up of a *Council for Catholic Maintained Schools* with effect from April 1990. The Council has responsibility for all maintained schools under Roman Catholic Management which are under the auspices of the diocesan authorities and of religious orders. The main objective of the Council is to promote high standards of education in the schools for which it is responsible. Its functions include providing advice on matters relating to its schools, the employment of teaching staff and administration of

appointment procedures, the promotion of effective management and the promotion and co-ordination of effective planning and rationalization of school provision in the Catholic Maintained sector. The membership of the Council consists of trustee representatives appointed by the Northern Roman Catholic Bishops, parents, teachers, and persons appointed by the Head of the Department of Education in consultation with the Bishops.

Integrated Schools. In recent years a small number of integrated schools have been established at primary and post-primary levels with the aim of providing education for Roman Catholic and Protestant children together. These schools began as independent schools and qualified for public funding (on the same basis as other non-state schools) when their longer-term viability had been adequately demonstrated. The Education Reform (NI) Order 1989 introduced new measures whereby new integrated schools may receive public funding right from the start. Grant Maintained Integrated schools are eligible for grants on capital works, including purchase of sites and buildings and equipment, at the rate of 100%. At Oct. 1997 there were 33 integrated schools with total enrolments of some 7,000 pupils, about 2% of all pupils.

Pre-school Education is provided in nursery schools and nursery or reception classes in primary schools. There were 91 nursery schools in 1996-97, with 5,496 pupils and 181 teachers. A further 3,026 nursery pupils and 2,544 reception pupils were situated in primary schools.

Primary Education is from 4 to 11 years. In 1996-97 there were 920 primary schools with 181,284 pupils and 9,383 teachers. There were also 25 preparatory departments of grammar schools with 3,354 pupils and 189 teachers.

Secondary Education is from 11 to 18 years. In 1996-97 there were 71 grammar schools with 61,997 pupils and 3,904 teachers and 167 secondary schools with 90,746 pupils and 6,631 teachers.

Further Education. There were 17 institutions of further education in 1996-97 with 2,144 full-time and 2,780 part-time teachers and an enrolment of 25,033 full-time, 28,519 part-time day and 31,550 evening students on vocational courses; and about 55,000 students on non-vocational (mostly evening) courses.

Special Education. The Education and Library Boards provide for children with special educational needs up to the age of 19. This provision may be made in ordinary classes in primary or secondary schools or in special units attached to those schools or in special schools. In 1996-97 there were 50 special schools with 4,858 pupils. This includes 3 hospital schools.

Universities. There are 2 universities: The Queen's University of Belfast (founded in 1849 as a college of the Queen's University of Ireland and reconstituted as a separate university in 1908) had 136 professors, 274 readers and senior lecturers, 341 lecturers, 16 other grades of academic staff and 13,228 full-time students in 1994-95 academic year. The University of Ulster, formed on 1 Oct. 1984, has campuses in Belfast, Coleraine, Jordanstown and Londonderry. In 1994-95 academic year the University had 107 professors, 245 readers and senior lecturers, 494 lecturers, 20 other grades of academic staff and 12,573 full-time students.

Teacher training takes place at both universities and at 2 colleges of education: Stranmillis, and St. Mary's, the latter mainly for the primary school sector, in respect of which 4-year (Hons) BEd courses and one-year Postgraduate Certificate in Education (PGCE) courses are available. The training of teachers for secondary schools is provided, in the main, in the education departments of the 2 universities, but 4-year (Hons) BEd courses are also available in the colleges for intending secondary teachers of religious education, business studies and craft, design and technology. Part-time PGCE courses (primary and secondary) are available through the Open University. There were a total of 1,988 students (1,530 women) in training at the 2 colleges and the 2 universities during 1996-97. The principal initial teacher-training courses are the Bachelor of Education (4-year honours), BA (Hons) with education (4-year) and the one year Certificate of Education for graduates.

Total expenditure by the Department of Education (1996-97) was £1,404m.

Health and Personal Social Services. The Department of Health and Social Services is responsible for the provision of integrated health and personal social services. 4 Health and Social Services Boards are responsible for assessing the requirements of their resident populations and for purchasing appropriate services. Since 1 April 1996 services have been delivered exclusively by HSS Trusts (similar to NHS Trusts in the rest of the UK) established under the Health and Personal Social Services (NI) Order 1991. A total of 20 HSS Trusts are fully operational. 8 HSS Trusts based on acute hospitals and the regional Northern Ireland Ambulance Service are identical in structure and management to NHS Trusts in Great Britain. Of the remaining 11, 6 provide community based health and personal social services and the other 5 provide both hospital and community based health and personal social services, reflecting the integrated nature of these services in Northern Ireland.

Social Security. Social security schemes are similar to those in Great Britain.

National Insurance. During the year ended 31 March 1997 the expenditure of the National Insurance Fund at £1,170m. exceeded contributions by £229.7m. The short-fall in income was made up by a Treasury Grant, investment income and a transfer from the Great Britain Fund.

Total benefit expenditure was £1,105.8m., excluding £2.9m. which was subsequently recovered from damages paid to recipients of National Insurance Fund Benefits.

Employers received £1.1m. reimbursement in respect of Statutory Sick Pay paid to their employees. £17.8m. was paid in Unemployment Benefit. Widows Benefit amounted to £35.6m. and Retirement Pensions to £708m. Incapacity Benefits totalled £331m. Maternity Allowance of £1.5m. was paid and employers were reimbursed £16.7m. in respect of Statutory Maternity Pay. £35.6m. was given to personal pension plan providers.

Child Benefit. During the year ended 31 March 1997, £238.4m. was paid.

Income Support. In 1996–97, £603.5m. was paid.

Family Credit. In 1996–97, £82.9m. was paid.

BRITISH DEPENDENT TERRITORIES

After the retrocession of Hong Kong to China on 1 July 1997, 13 territories remained under British sovereignty as a legacy of the former Empire. 3 of these (British Antarctic Territory, British Indian Ocean Territory and South Georgia and the South Sandwich Islands) have no resident populations and are administered by a commissioner instead of a governor.

Gibraltar is an enclave in Spain; the remainder are islands in the Caribbean and South Atlantic. Gibraltar and the Falkland Islands are the subjects of territorial claims by Spain and Argentina respectively.

Governors of Dependent Territories are appointed by the Queen, and are responsible for external affairs, internal security and the public service. Territories have their own elected legislatures and ministers, but final responsibility for government belongs to the Foreign and Commonwealth Office in London. For the Caribbean Territories some aspects of administration are carried out by the Dependent Territories Regional Secretariat in Barbados. The citizenship status of residents is defined in the British Nationality Act 1981.

ANGUILLA

KEY HISTORICAL EVENTS. Anguilla was probably given its name by the Spaniards or the French because of its eel-like shape. It was inhabited by Arawaks for several centuries before the arrival of Europeans. Anguilla was colonized in 1650 by English settlers from neighbouring St Kitts. In 1688 the island was attacked by a party of Irishmen who then settled. Anguilla was subsequently administered as part of the Leeward Islands, and from 1825 became even more closely associated with St Kitts. In 1875 a petition sent to London requesting separate status and direct rule from Britain met with a negative response. Again in 1958 the islanders formally petitioned the Governor requesting a dissolution of the political and administrative association with St Kitts, but this too failed. From 1958 to 1962 Anguilla was part of the Federation of the West Indies.

Opposition to rule from St Kitts erupted on 30 May 1967 when St Kitts policemen

were evicted from the island and Anguilla refused to recognize the authority of the State Government any longer. During 1968–69 the British Government maintained a ‘Senior British Official’ to advise the local Anguilla Council and devise some solution to the problem. In March 1969, following the ejection from the island of a high-ranking British civil servant, British security forces occupied Anguilla. A Commissioner was installed, and in 1969 Anguilla became *de facto* a separate dependency of Britain; a situation rendered *de jure* on 19 Dec. 1980 under the Anguilla Act 1980 when Anguilla formally separated from the state of St Kitts, Anguilla-Nevis. A new constitution came into effect in 1982 providing for a large measure of internal autonomy under the Crown.

TERRITORY AND POPULATION. Anguilla is the most northerly of the Leeward Islands, some 70 miles (112 km) to the north-west of St Kitts and 5 miles (8 km) to the north of St Martin/Sint Maarten. The territory also comprises the island of Sombbrero and several other off-shore islets or cays. The total area of the territory is about 60 sq. miles (155 sq. km). Census population (1984) was 6,897. Population estimate, 1997, 10,663. The capital is The Valley.

CONSTITUTION AND GOVERNMENT. A set of amendments to the constitution came into effect in 1990, providing for a Deputy Governor, a Parliamentary Secretary and an Opposition Leader. The *House of Assembly* consists of a Speaker, Deputy Speaker, 7 directly elected members for 5-year terms, 2 nominated members and 2 *ex-officio* members: the Deputy Governor and the Attorney-General.

The Governor discharges his executive powers on the advice of an Executive Council comprising a Chief Minister, 3 Ministers and 2 *ex-officio* members: the Deputy Governor, Attorney-General and the Secretary to the Executive Council.

Elections were held in March 1994 for the House of Assembly. The Anguilla National Alliance gained 2 seats, the Anguilla National Party (ANP), 2, the Anguillan Democratic Party, 2 and ind, 1.

FALKLAND ISLANDS

KEY HISTORICAL EVENTS. France established a settlement in 1764 and Britain a second settlement in 1765. In 1770 Spain bought out the French and drove off the British. This action on the part of Spain brought that country and Britain to the verge of war. The Spanish restored the settlement to the British in 1771, but the settlement was withdrawn on economic grounds in 1774. In 1806 Spanish rule was overthrown in Argentina, and the Argentine claimed to succeed Spain in the French and British settlements in 1820. The British objected and reclaimed their settlement in 1832 as a Crown Colony.

On 2 April 1982 Argentine forces occupied the Falkland Islands. On 3 April the UN Security Council called, by 10 votes to 1, for Argentina's withdrawal. After a military campaign, but without a formal declaration of war, the UK regained possession on 14–15 June after Argentina surrendered.

In April 1990 Argentina's Congress declared the Falkland and other British-held South Atlantic islands part of the new Argentine province of Tierra del Fuego.

TERRITORY AND POPULATION. The Territory comprises numerous islands situated in the South Atlantic Ocean about 480 miles north-east of Cape Horn covering 4,700 sq. miles. The main East Falkland Island, 2,610 sq. miles; the West Falkland, 2,090 sq. miles, including the adjacent small islands. The population at the census of 1996 was 2,607. The only town is Stanley, in East Falkland, with a population of 1,636. The population is nearly all of British descent, with 1,267 born in the Islands (1996 census figures) and 885 in the UK. A British garrison of about 2,000 servicemen, stationed in East Falkland in 1991, is not included in the 1996 census figures, but the 483 civilians employed there are.

CLIMATE. A cool temperate climate, much affected by strong winds, particularly in spring. Stanley. Jan. 49°F (9.4°C), July 35°F (1.7°C). Annual rainfall 27" (681 mm).

CONSTITUTION AND GOVERNMENT. A new Constitution came into force on 3 Oct. 1985. This incorporated a chapter protecting fundamental human rights and in the preamble recalled the provisions on the right of self-determination contained in international covenants.

Executive power is vested in the Governor who must consult the Executive Council except on urgent or trivial matters. He must consult the Commander British Forces on matters relating to defence and internal security (except police).

There is a *Legislative Council* consisting of 8 elected members and 2 *ex officio* members, the Chief Executive and Financial Secretary. Only elected members have a vote. The Commander British Forces has a right to attend and take part in its proceedings but has no vote. The Attorney General also has a similar right to take part

in proceedings with the consent of the person presiding. The Governor presides over sittings. He also presides over sittings of the Executive Council which consists of 3 elected members (elected by and from the elected members of Legislative Council) and the Chief Executive and Financial Secretary (*ex officio*). The Commander British Forces and Attorney General have a right to attend but may not vote.

British citizenship was withdrawn by the British Nationality Act 1981, but restored after the Argentine invasion of 1982.

Governor: Richard Ralph, CVO.

Chief Executive: Andrew Gurr.

DEFENCE. Since 1982 the Islands have been defended by a 2,000-strong garrison of British servicemen. In addition there is a local volunteer defence force.

Revenue	41,940,000	40,270,000	40,452,000	32,690,000	33,812,000	42,351,679
Expenditure	45,967,000	39,145,000	30,452,000	24,535,000	33,614,000	42,351,953

ENERGY AND NATURAL RESOURCES

Oil. The UK government authorized exploration for oil in Nov. 1991 in the 200-mile economic exclusion zone except where it overlapped Argentina's zone in the west. An Anglo-Argentine agreement of 27 Sept. 1995 establishes 2 legal frameworks for marine oil exploration areas without prejudice to either country's claim to sovereignty over the Falkland Islands. The first, close to the Islands, is to have licensing terms which give companies 22 years to explore and complete drilling. The second extends between the Islands and Argentina wherein licensing will be overseen by a joint Anglo-Argentine commission. Argentina may bid for licences in the first area, and draws revenue directly from the second.

Agriculture. The economy was formerly based solely on agriculture, principally sheep farming. Following a programme of sub-division, much of the land is divided into family size units. There were 100 farms in 1997, averaging 33,600 acres and 8,200 sheep. During 1991 the Falklands Islands Co. sold its agricultural holdings to the Falkland Island government. Less than 5% of the total land area is owned outside the islands. Wool is the principal product; output was 2,521 tonnes in 1991. In 1997 there were over 700,000 sheep.

Fisheries. Since the establishment of a 150-mile interim conservation and management zone around the Islands in 1986 and the consequent introduction, on 1 Feb. 1987, of a licensing regime for vessels fishing within the zone, income from the associated fishing activities is now the largest source of revenue. Licences raised £25m. in 1992. Some 0.2m. tonnes of illex squid are caught annually. In 1994 Argentina's quota was raised to 0.22m. tonnes; that of the Falkland Islands remained at 0.15m. tonnes. 79,803 tonnes were caught in the Falklands zone in 1996. 61,360 tonnes of Patagonian squid and 23,515 tonnes of blue whiting were also caught.

On 26 Dec. 1990 the Falklands outer conservation zone was introduced which extends beyond the 150 mile zone out to 200 miles from baselines. In Nov. 1992 commercial fishing in the outer zone was banned, the zone was reopened to fishing

in 1994. A UK-Argentine South Atlantic Fisheries Commission was set up in 1990; it meets at least twice a year.

EXTERNAL ECONOMIC RELATIONS. 90% of trade is with the UK, the rest with Latin America, mainly Chile. In 1995 imports totalled £17m.; exports (mainly wool), £3.5m.

Tourism. There are about 200 tourists and 5,000 cruise ship visitors a year.

COMMUNICATIONS

Roads. There are 27 km of made-up roads in and around Stanley and another 54 km of all-weather road between Stanley and Mount Pleasant Airport. Other settlements outside Stanley are linked by tracks. There were about 1,100 private cars in 1996.

Civil Aviation. Air communication is currently via Ascension Island. An airport, completed in 1986, is sited at Mount Pleasant on East Falkland. RAF Tristar aircraft operate a twice-weekly service between the Falklands and the UK. Internal air links are provided by the government-operated air service, which carries passengers, mail, freight and medical patients between the settlements and Stanley on non-scheduled flights in Islander aircraft. A Chilean airline runs a weekly service to Punta Arenas.

Shipping. A charter vessel calls 4 or 5 times a year to/from the UK. Vessels of the Royal Fleet Auxiliary run regularly to South Georgia. Sea links with Chile and Uruguay began in 1989.

Telecommunications. Number of telephones (Sept. 1991) 1,180. International direct dialling is available, as are international telex and facsimile links. There is a government-operated radio and TV station at Stanley.

SOCIAL INSTITUTIONS

Justice. There is a Supreme Court, and a Court of Appeal sits in the UK; appeals may go from that court to the judicial committee of the Privy Council. Judges may only be removed for inability or misbehaviour on the advice of the judicial committee of the Privy Council. The senior resident judicial officer is the Senior Magistrate. There is an Attorney General and a Senior Crown Counsel.

Education. Education is compulsory between the ages of 5 and 15 years. In 1992 there were 350 children receiving education in the Islands, 60 of these were of primary school age living on isolated farms and receiving teacher visits and radio lessons. There is a primary school in Stanley, and a community school opened in 1992 with secondary study and sport facilities. Matters of primarily domestic concern are devolved to elected Ministers, with Britain responsible for other matters, including external affairs, defence and internal security. There is a Council of Ministers presided over by the Chief Minister.

The House of Assembly consists of a Speaker appointed by the Governor, 15 elected and 2 *ex-officio* members (the Attorney-General and the Financial and Development Secretary). No more than 8 of the elected seats may go to the winning party at elections.

Gibraltarians have full UK citizenship.

A Mayor of Gibraltar is elected by the elected members of the Assembly.

MONTSERRAT

KEY HISTORICAL EVENTS. Montserrat was discovered by Columbus in 1493 and colonized by Britain in 1632 who brought Irish settlers to the island. Montserrat formed part of the federal colony of the Leeward Islands from 1871 until 1958, when it became a separate colony following the dissolution of the Federation.

On 18 July 1995 the Soufriere Hills volcano erupted for the first time in recorded history, which led to over half the inhabitants being evacuated to the north of the island and the relocation of the chief town, Plymouth. Another major eruption on 25 June 1997 caused a number of deaths and led to further evacuation. Many of the 4,000 or so residents who decided to stay are living in crowded emergency housing in the one area still considered to be safe.

The whole population was evacuated without loss and settled temporarily in the UK; in 1963 they returned to Tristan. Potatoes remain the chief crop, cattle, sheep and pigs are now reared, and fish are plentiful.

Population in 1996, 292. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St Helena was withdrawn in 1817.

At the end of April 1942 Tristan da Cunha was commissioned as HMS *Atlantic Isle*, and became an important meteorological and radio station. In Jan. 1949 a South African company commenced crawfishing operations. An Administrator was appointed at the end of 1948 and a body of basic law brought into operation. The Island Council, which was set up in 1932, consists of a Chief Islander, 3 nominated and 8 elected members (including 1 woman) under the chairmanship of the Administrator.

THE FUTURE AS PAST? AMERICAN INTERESTS AND WORLD ORDER

Professor Michael Cox

The lessons of history

Any evaluation of America's future role in world affairs has to begin with a brief examination of where the US has come from. Certainly, if we treat the present as history—and the future as the present projected forward in time—then understanding the past is not only useful, but actually critical in helping us explain the part the US is likely to play in the twenty-first century.

The first point to make is that those whose task it is to guide the last remaining superpower through the turbulent waters of world politics, do so in the sure knowledge that as an international player the US has performed extraordinarily well over the past fifty years. It defeated Japan, helped defeat Germany, went on to successfully contain the Soviet Union, and in the process helped construct a relatively stable world system. Critically, however, it managed to do all these things not because of its diplomatic skills or cultural superiority, but because of what one writer has termed its 'preponderance of power'. Not surprisingly, this has led modern American leaders to the not illogical conclusion that there is, in the end, no substitute for power and the US possessing as much of this essential commodity as possible. It was this, they reason, that helped it win the Cold War. And it will be this, they believe, that will help America maintain the peace in the future.

If the realist practice of power politics is likely to continue to shape the way in which the United States defines its role in the world, so too will a strong desire by US leaders to remain engaged in international affairs. Here again 'history' continues to cast its long shadow over contemporary discussions; and the lesson which decision-makers draw from their reading of the past is that when the US retreated into isolationism in the inter-war period there was chaos and instability, but when it became fully involved in world affairs—as it was finally impelled to in 1941 and again after 1947—the world could at least look forward to a better future. Moreover, in their view, there is no reason (even in the absence of a clear and present threat) for the US to turn its back on the world in the post-Cold War era. Indeed, according to Washington, it would be disastrous if it were to do so. America might be more selective in what it tries to do in the future. Disengagement however is not envisaged. It is simply not an option.

This brings us to the issue of American leadership. Much has been made about American indecision on key international issues such as Bosnia or Rwanda. Yet this should not blind us to the pivotal role the US has played over the past few years. It was, we should recall, the United States (and not her other European allies) that managed the problematic transition from German division to unification after 1989. It was America again that created, and then led, the coalition against Iraq between 1990 and 1991. And it was the US—and the US alone—that had the military capability, the diplomatic clout and the sense of political purpose to impose some sort of solution in ex-Yugoslavia. Thus whether it wants to or not, or others like it or not, America is 'bound to lead'. In effect, there is no substitute for the United States.

Finally, any understanding of America's future role must take account of what one writer has termed its 'mission' to promote democracy. Dismissed by some as mere rhetoric, it would nonetheless be foolish to underestimate the American desire to recast the international system in its own image: and to do this for more than just moral reasons. First, according to the new wisdom in Washington, democracies are preferable to any other form of government because they do not go to war with one another. Second, they tend to play by the rules of the international game. Finally, they have a vested interest in participating in those various multilateral bodies—such as the IMF and the European Union—upon which the US expects to build the stable world economic order of the future. Promoting democracy therefore is not merely an idealistic add-on, but an essential component of any programme aimed at advancing the American national interest in the twenty-first century.

But what is the American 'national interest', and how should it be defined? Remarkably, there has been very little discussion of this critical problem since the collapse of the communist alternative in the late 1980s. The reason for this however is not because American policy-makers cannot agree on the answer, but rather because the answer seems all too obvious. The end of the Cold War might have made American foreign policy less coherent. Americans as a people may no longer be prepared to pay any price or go anywhere to defend the cause for freedom. Yet in spite of this, there is still a good degree of consensus at the highest levels about the policies the US must pursue in order to advance its goals.

The US and the world economy

America's future role in the world begins with the death of two twentieth century myths: the myth of a separate 'Third World' functioning outside of the world economy and the myth of the communist economic alternative. The demise of the first, and the collapse of the second, have opened up the world in ways that would have once been thought inconceivable. This has created major opportunities for the United States. Some of these it has already realized. Some, it will no doubt seek to exploit in the years ahead; indeed, it is vital that it does so given its already huge stake in the international economy. With well over \$700bn. invested abroad, and close to a trillion dollars of US goods and services being imported and exported around the world per annum, America has more than just an passing interest in maintaining a dynamic international economy. Indeed, through the 1990s, it has expended a good deal of energy in ensuring that the world economy remains buoyant. It has, for example, encouraged the creation of an economic zone bringing the United States, Canada and Mexico more closely together in the institutional shape of NAFTA. It has breathed new life into APEC (Asia Pacific Economic Cooperation). And it has strengthened the world trading system more generally by successfully negotiating the conclusion of the General Agreement and Tariffs and Trade (GATT)—a deal that promised to lead both to a vast expansion in international trade and the creation of thousands of new jobs in the United States.

In the end, of course, US policy-makers and politicians will not be rewarded for their prudent and careful management of the world economy, but rather for their success in advancing America's economic interests. In this respect, the much-criticized President Clinton has perhaps showed us the shape of things to come by recognizing that foreign policy is not to be judged by wars won abroad but prosperity sustained at home; and this will only be sustained over the longer term by competing successfully against one's rivals. Prediction may be a dangerous venture, but one can predict with some degree of certainty that all administrations will be assessed by their success in helping America compete with other nations. Moreover, if the record of the Clinton administration is anything to go by, it is not a competition the US intends to come second in. As a former US trade official put it, 'if you don't win, you lose'.

The US and military power

Though economics will dominate America's future international agenda, it would be wrong to ignore the centrality of military power in US calculations. Certainly, US military strategists do not do so. By the year 2000 they are planning to be spending well over \$250bn. a year on security to ensure America's position of strength in the international system. Policy-makers are convinced that the US has to remain the number one power, with a capacity to deploy what a 1996 defence review called 'robust and flexible military forces'. These, it is felt, are vital if the United States is to deter potential enemies, provide the nation with a credible overseas presence, and make good on American promises to contribute to multilateral peace operations. However, military power is not just necessary for its own symbolic sake. It will also help ensure that the United States retains what one analyst has nicely characterized as the loudest 'voice in international affairs'. In the new world order, political influence will continue to grow out of the barrel of the gun.

But where precisely will new wars be fought? US policy-makers may disagree about specifics; nevertheless most are clear in their own minds that the threats of the future will not come in Europe nor, interestingly, from any upwardly mobile great power attempting to challenge US dominance, but rather from what they describe as

'backlash' or 'rogue' states like Iraq, Iran and North Korea. Whether or not the United States will be able to fight and win two wars simultaneously against such states (a scenario outlined in various defence plans) remains open to question. What is not open to doubt is the impressive array of weaponry at America's disposal. To all intents and purposes, the US is now the only serious military actor in the world with a capacity to intervene globally. For this reason, if no other, the twenty-first century might easily turn out to be more 'American' than the twentieth.

The US and nuclear proliferation

If the US is determined to remain the militarily hegemon of the future, it is equally keen to reduce the threat of nuclear war by preventing the proliferation of weapons of mass destruction. Some would even argue that this has become America's number one security problem, and is bound to remain so. It has undoubtedly played an important part in American foreign policy in the 1990s. It was, after all, fear of proliferation (amongst other things) which caused the US to go to war against Iraq. It was then worries about North Korea's nuclear potential that led the US to negotiate a much-criticized deal with Pyongyang three years later. And it has been concern about the spread of nuclear weapons which has impelled the US to engage so vigorously with the states of the former Soviet Union.

The question remains though, will the US be able to limit the spread of weapons of mass destruction over the longer term? There is neither an easy, nor even an optimistic answer to this. The desire by many less powerful countries to develop weapons denied to them by states like the US which already possess them, certainly points to further proliferation. In a world of increasingly porous borders, one must also doubt the ability of intelligence agencies to monitor the movement of dangerous fissile material. Indeed, such is the pessimism in certain American circles, that there are those who now feel that until the United States and the nuclear-have powers decide to abandon their own nuclear arsenals, then proliferation is virtually inevitable. Possibly so. Yet in the real world where great powers—or those who pretend to be great powers—still define their status in terms of being members of the nuclear club, there is little or no chance of this happening. Though persuaded of the virtues of non-proliferation for others, it is unlikely that countries like the US (or for that matter the UK, France or China) will ever be persuaded to denuclearize themselves. The future remains uncertain.

The US and NATO

A fourth issue that is bound to preoccupy US foreign policy-makers is how to manage, and sustain domestic support for, the eastward expansion of NATO. The American debate surrounding this particular proposal has thus far been noisy and acrimonious and shows no sign of abating. Opponents insist that expansion is not only unnecessary but more likely to provoke democratic Russia than reassure it. Supporters, on the other hand, argue that over time expansion will not only bring stability to the continent as a whole, but also accelerate the pace of European unification. Moreover, unless NATO does expand, then, according to Washington, the organization will become irrelevant, and in the end simply wither away. This, it is asserted, would be bad for the emerging states of Central Europe, bad for Europe as a whole, and bad for the United States which continues to regard NATO as the main source of its influence in European affairs.

Yet in spite of this plethora of apparently sound arguments in favour of NATO expansion, many in the United States remain highly sceptical. The costs involved and the impact of expansion upon the integrity of NATO have persuaded many ordinary Americans—and some rather extraordinary ones like the indefatigable George F. Kennan—that enlargement is simply not a very good idea. Policy-makers in the future therefore will face a most difficult task in selling what is now a policy *fait accompli* to an American public which sees no reason, and feels no strong desire to extend US guarantees to parts of Europe where the US seems to have few interests.

The US and China

Following US recognition in 1978, Washington warmly embraced the People's republic as a bulwark against Soviet power and the first communist state to experi-

ment seriously with capitalism. The end of the Cold War, however, and the emergence of China as a more serious actor on the international stage, has soured what had been one of the more convenient alliances of modern times. The process began in 1989 with the repression at Tiananmen Square and has continued ever since with concerns about Chinese military power, China's various attempts to intimidate Taiwan and its appalling record on human rights. In effect, having encouraged the growth of China, the United States now finds itself in the situation of dealing with a nation that is becoming increasingly assertive. And there are some Americans who believe that sooner, rather than later, the US will have to confront Beijing.

The case for containment is a powerful one. Nonetheless, the official US position is, and will almost certainly remain, one of 'constructive engagement'. This it has been argued *ad nauseum* is the only way of managing China as it moves from isolation to closer association with the world. Moreover, according to Washington, it would be madness to leave China out in the cold. It possesses nuclear weapons. It is a central actor in the struggle against the weapons proliferation. Its economy is one of the most dynamic in the world. And in a potentially highly volatile region, it is a source of stability and order.

The US thus has a relatively clear perspective on China, and assumes (or at least hopes) that over time 'normal' rather than hostile relations between the two powers will gradually transform and tame China. Yet there is no doubting the problems which lay ahead, nor the extent of the challenge posed by modern China to US diplomacy. One might even argue that the greatest global test confronting US policy-makers in the twenty-first century will be its successful management of a China that will not always say 'yes'—and might frequently say 'no'—to American demands.

The US and Russia

Finally, any assessment of the US role in world affairs has to speculate to some degree about its future relationship with post-communist Russia. Russia's large nuclear arsenal, its geographical position at the heart of Eurasia, and its still considerable international assets continue to make it an important power in its own right—one which America can hardly ignore. Many critics believe that America has probably devoted too much time to Russian affairs; and that in its rush to build what President Clinton hoped would one day become a 'strategic alliance with Russian reform', has tended to overlook the downside of Russia's triple transition from imperial power to normal nation, planning to market and totalitarianism to democracy. There is some truth to this. But critics of America's Russia policy (like those who would attack its stance on China) seem unable to propose any serious alternative. Furthermore, the alternatives they do propose only lead the US back to a state of conflict it is desperately trying to avoid. Certainly, having fought a long and costly Cold War against the old Soviet Union, America has no real desire to engage in another prolonged conflict with the new Russia.

The future

The transition in Russia raises a much larger question about the American role, and in particular about its 'grand strategy' towards those countries which have either made the leap into the brave new world of market economics, or are in the process of doing so. So far the movement from a world of hostile ideological camps to a more integrated world order has occurred relatively painlessly. Communism in Eastern Europe fell with little accompanying bloodshed. The USSR collapsed with remarkable ease. And the transition in China has been accomplished so far with minimal instability. There are several reasons for this quite smooth metamorphosis. One factor has been the US and its real, if at times, wavering commitment to building what President Bush in 1990 called a 'new world order'. Admittedly, the early and rather naïve expectation that the collapse of communism would usher in an age of perpetual peace has not been realized. Nor has history shown much sign of coming to an end. Yet the world is a much safer place today than it was during the Cold War. Europe has not become more unstable as some predicted it would. And relations between most states around the world are now in much better shape than they have been for decades. The United States cannot claim all the credit for this. Nonetheless, it is impossible to imagine our current state of affairs without the US.

There are those of course who claim to detect a fundamental shift in US resolve and anticipate (and fear) a less active American role in world affairs in the future. But this is a false reading of the situation. The end of the Cold War may have erased all 'strategic roadmaps' to use Charles Krauthammer's splendid phrase. But what it could not erase is the past and the lessons which policy-makers continue to derive from their reading of the past—one of which is that America cannot retreat into splendid isolation. Not because it seeks to dominate the world in any crude way, or because it has a higher moral duty to make the world a better place, but rather because it is not in its interest to do so. Talk of a homeward bound America is premature.

KEY HISTORICAL EVENTS. In 1775 white settlement in America was located in 13 British colonies on the east coast and in Spanish colonial territory in the south and south-west. The rest was Indian land, where former French claims to control had been given up in 1763. Spain succeeded to those claims in land west of the Mississippi and Britain in land east of it. Britain designated such land as Indian territory and forbade colonial expansion west of the Appalachians.

Britain's colonial subjects rebelled against her taxation and trading exploitation. The colonies declared their independence on 4 July 1776, provoking war with Britain which lasted until 1783 when Britain acknowledged the independent United States of America.

The Union extended south to the border of Florida (Spanish) and west to the Mississippi. A permanent constitution came into force in 1789, providing for a federal government. The rights of states to nullify federal laws if they contradicted state policies became a source of dispute, especially in relation to the slave-owning southern states which feared the Union preference for abolition.

In 1800 France bought back from Spain her title to 'Louisiana', the territory west of the Mississippi. In 1803 the USA bought it from France.

In 1812–14 the USA fought an inconclusive war with Britain on the grounds that Britain, operating from Canada, was encouraging Indian resistance; at sea, Britain was using her conduct of the Napoleonic War to harass American shipping.

Westward movement began almost with independence, increasing after the Homestead Act of 1832 and the removal of Indians to reservations during the 1830s.

The Spanish empire in the Americas had ended in 1821, and the north American territories had passed to Mexico, except for Florida which the USA acquired. In 1836 Texas broke away from Mexico, surviving as an independent republic until 1845 when the US, seeing strategic danger in its vulnerability, annexed it. This provoked war with Mexico which the US won in 1848, receiving the Mexican territories in the south-west including the present states of California, Arizona, Colorado, Utah, Nevada and New Mexico.

In the north-west, the Oregon Trail attracted thousands of migrants in the 1840s. In 1846 a long dispute with Britain was resolved, confirming the US title to the Oregon Territory. Westward migration was further stimulated by the California gold rush of 1848.

In the east and mid-west, tension over the question of slavery led to the secession of the southern states in 1860–61, and their formation as the Confederacy. Civil war broke out, ending in northern victory in 1865. Slavery was abolished and a period of radical reconstruction began for the South. Many reforms then implemented were cancelled after 1877, when the northern military presence was withdrawn and southern whites regained their political power, enforcing segregation and curtailing black civil and political rights.

During the late 19th century eastern and mid-western industrialization expanded rapidly. Growing cities attracted thousands of poor European immigrants, many of whom were escaping religious or political persecution as well as looking for work. This inward flow of labour continued into the 1930s and was matched by a flow of Asians to the west coast. A similar northward movement of Spanish-speakers from the Caribbean and Mexico, and of black workers from southern states, continues.

In the west there were Indian wars. The Apache and Navajo wars of the south-west lasted intermittently from 1861 until 1886. The Comanche fought for decades to protect their plains hunting grounds from settlement, as did the Cheyenne and Sioux. The latter's victory under Sitting Bull in 1876 only produced an increase in military action against them. Indian resistance ended after some 200 Sioux were shot at Wounded Knee in 1890.

In the Spanish-American war of 1898 the USA succeeded in replacing Spanish influence in the Caribbean with her own. She also replaced it in the Philippines, and acquired Guam in the western Pacific as a strategic base.

The USA entered the First World War in 1917, and afterwards reacted with an isolationist policy. In 1929 the stock market collapsed and serious economic depression lasted through the 1930s. The country turned to policies of government intervention in the economy; recovery began, but only became rapid when the Second World War necessitated a huge increase in production.

The war and subsequent victory led to active participation in the affairs of Europe and to a state of 'cold war' mistrust between the USA and the USSR. The US Marshall Plan financed the recovery of much of European industry. At the same time it appeared prudent to aid other nations where instability might admit Communist influence; this policy governed relations with Caribbean and Central American countries, and involved the USA in war against Communist forces in Korea (1950–53) and Vietnam (1961–73).

Following President Kennedy's assassination in 1963, US military involvement in Vietnam was intensified, but opposition at home led to withdrawal of forces in 1973.

In 1974 President Nixon was forced to resign amidst charges of corruption known collectively as Watergate. A revival of Republican fortunes came with the election of Ronald Reagan in the 1980 presidential race. In international affairs, Reagan was resolutely anti-Communist, raising fears of confrontation with the Soviet Union over his Strategic Defense Initiative, otherwise known as his 'Star Wars' system of defence. However, relations between the two super powers improved in the mid-eighties with successful negotiations on nuclear arms limitations. The collapse of the Soviet empire in 1990 extended US economic aid to Eastern Europe.

At home, the big social debate centred on civil rights—a movement that started in the 1960s with the campaign to end segregation in the southern states—feminism, environmental issues, urban crime and efforts to combat drug abuse.

In 1990 the invasion of Kuwait by Iraqi forces led to the Gulf War, 'Operation Desert Storm', the defeat of Iraq and renewed attempts to secure a Middle East peace settlement.

The Democrats regained control of the White House with the election of Bill Clinton, who mounted an economic recovery plan with a mix of reduced government spending and higher taxes.

In 1993 the US was involved in peacekeeping operations in the former Yugoslavia, and although there was reluctance to commit American troops, a US-brokered peace agreement led to American participation in a multinational supervisory force.

The 30-34 age group contained most people according to the 1990 census, with a total of 21,862,887 (10,985,954 females and 10,876,933 males), followed by 25-29, with 21,313,045 (10,617,109 females and 10,695,936 males).

The US population abroad at the time of the 1990 census was 925,845.

At the 1990 census there were 91,947,410 households. By 1996 this figure is estimated to have risen to 98,751,000.

Population (in 1,000) in July 1997 as estimated by the US Bureau of the Census (females in parentheses):

Total, 267,575 (136,570); White, 221,242 (112,374); Black, 33,924 (17,816); American Indian, Eskimo, Aleut, 2,322 (1,170); Asian and Pacific Islander, 10,086 (5,210); Hispanic origin, 29,240 (14,209). The following table includes population statistics, the year in which each of the original 13 states (Connecticut, Delaware, Georgia, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Virginia) ratified the constitution, and the year when each of the other states was admitted into the Union. Traditional abbreviations for the names of the states are shown in brackets with postal codes for use in addresses. The area of the USA is 3,717,796 sq. miles (9,629,091 sq. km), of which 3,536,278 sq. miles (9,158,960 sq. km) are land.

The infant mortality rates, per 1,000 live births: 29.2 in 1950; 12.9 in 1980; 7.4 in 1996.

Expectation of life, 1970: Males, 67.1 years; females, 74.7 years; 1995: Males, 72.8 years; females, 79.7 years.

Numbers of deaths by principal causes, 1995 (and as a percentage of all deaths): Heart disease, 738,781 (32.0%); cancer, 537,969 (23.3%); stroke, 158,061 (6.8%); obstructive lung disease, 104,756 (4.5%); accidents, 89,703 (3.9%); pneumonia and influenza, 83,528 (3.6%); diabetes mellitus, 59,085 (2.6%); AIDS, 42,506 (1.8%); suicide, 30,893 (1.3%); liver disease, 24,848 (1.1%). Immigration: The Immigration and Nationality Act, as amended, provides for the numerical limitation of most immigration. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not admissions. The maximum number of visas allowed to be issued under the preference categories in 1996 was 451,819: 311,819 for family-sponsored immigrants and 140,000 for employment-based immigrants. Within the overall limitations the per-country limit for independent countries is set to 7% of the total family and employment limits, while dependent areas are limited to 2% of the total. The 1996 limit allowed no more than 31,627 preference visas for any independent country and 9,036 for any dependency. Immigrants not subject to any numerical limitation are spouses, children, and parents of US citizens who are 21 years of age or older; certain former US citizens; ministers of religion; certain long-term US government employees; refugees and asylum-seekers adjusting to immigrant status; and certain other groups of immigrants.

Immigration data for 1996 include 4,635 aliens who were admitted as permanent residents under the legalization programme created by the Immigrant Reform and Control Act of 1986. These aliens have resided in the USA since before 1982 or were agricultural workers on perishable crops and have qualified as temporary residents under the first phase of the legalization programme; in the fiscal year 1989, they began qualifying for permanent status.

Immigrant aliens admitted to the USA for permanent residence, by country or region of birth, for fiscal years:

The total number of immigrants admitted from 1820 up to 30 Sept. 1996 was 63,140,227; this included 7,142,593 from Germany, and 5,427,298 from Italy.

Aliens coming to the USA for temporary periods of time are classified as non-immigrants. During fiscal year 1996, a total of 24,842,503 non-immigrants were admitted. This total includes multiple entries but excludes border crossers, crewmen and insular travellers. Tourists numbered 19,110,004, with 10,172,487 coming from the Caribbean, Germany, Japan, Mexico and the UK. There were 1,641,455 aliens expelled during fiscal year 1996. Of this number, 68,657 were removed with a formal order from an immigration judge and 1,572,798 were required to depart without orders of deportation.

During fiscal year 1996, 1,044,689 persons became US citizens through naturalization, including 890,949 naturalized under the general provisions of 5-year residence in the USA, 35,449 spouses and children of US citizens and 6,948 members of the US Armed Forces. The new citizens included 43,087 from China and Taiwan, 62,168 from Cuba, 4,617 from Italy, 24,270 from Jamaica, 24,693 from Korea, 217,418 from Mexico, 45,210 from the Philippines and 47,625 from Vietnam.

The refugee admissions ceiling for the fiscal year 1996 was fixed at 90,000, including 45,000 from Eastern Europe and the former Soviet Union and 29,000 from south-east Asia.

CLIMATE. For temperature and rainfall figures, *see* entries on individual states as indicated by regions, below, of mainland USA.

Pacific Coast. The climate varies with latitude, distance from the sea and the effect of relief, ranging from polar conditions in North Alaska through cool to warm temperate climates further south. The extreme south is temperate desert. Rainfall everywhere is moderate. *See* Alaska, California, Oregon, Washington.

Mountain States. Very varied, with relief exerting the main control; very cold in the north in winter, with considerable snowfall. In the south, much higher temperatures and aridity produce desert conditions. Rainfall everywhere is very variable as a result of rain-shadow influences. *See* Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

High Plains. A continental climate with a large annual range of temperature and moderate rainfall, mainly in summer, although unreliable. Dust storms are common in summer and blizzards in winter. *See* Nebraska, North Dakota, South Dakota.

Central Plains. A temperate continental climate, with hot summers and cold winters, except in the extreme south. Rainfall is plentiful and comes at all seasons, but there is a summer maximum in western parts. *See* Mississippi, Missouri, Oklahoma, Texas.

Mid-West. Continental, with hot summers and cold winters. Rainfall is moderate, with a summer maximum in most parts. *See* Indiana, Iowa, Kansas.

Great Lakes. Continental, resembling that of the Central Plains, with hot summers but very cold winters because of the freezing of the lakes. Rainfall is moderate with a slight summer maximum. *See* Illinois, Michigan, Minnesota, Ohio, Wisconsin.

Appalachian Mountains. The north is cool temperate with cold winters, the south warm temperate with milder winters. Precipitation is heavy, increasing to the south but evenly distributed over the year. *See* Kentucky, Pennsylvania, Tennessee, West Virginia.

Gulf Coast. Conditions vary from warm temperate to sub-tropical, with plentiful rainfall, decreasing towards the west but evenly distributed over the year. *See* Alabama, Arkansas, Florida, Louisiana.

Atlantic Coast. Temperate maritime climate but with great differences in temperature according to latitude. Rainfall is ample at all seasons; snowfall in the north can be heavy. *See* Delaware, District of Columbia, Georgia, Maryland, New Jersey, New York, North Carolina, South Carolina, Virginia.

New England. Cool temperate, with severe winters and warm summers. Precipitation is well distributed with a slight winter maximum. Snowfall is heavy in winter. *See* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. *See* also Hawaii and Outlying Territories.

CONSTITUTION AND GOVERNMENT. The form of government of the USA is based on the constitution of 17 Sept. 1787.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial.

The Federal Government has authority in matters of general taxation, treaties and other dealings with foreign countries, foreign and inter-state commerce, bankruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the USA.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec. 1791; two in 1795 and 1804; a 13th amendment, 6 Dec. 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb. 1870, establishing equal voting rights for white and coloured; a 16th, 3 Feb. 1913,

authorizing the income tax; a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors; a 19th, 18 Aug. 1920, establishing woman suffrage; a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lameduck' sessions of Congress; a 21st, 5 Dec. 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb. 1964, banning the use of the poll-tax in federal elections; a 25th, 10 Feb. 1967, dealing with Presidential disability and succession; a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote; a 27th, 7 May 1992, providing that no law varying the compensation of Senators or Representatives shall take effect until an election has taken place.

National anthem: The Star-spangled Banner, 'Oh say, can you see by the dawn's early light'; words by F. S. Key, 1814, tune by J. S. Smith; formally adopted by Congress 3 March 1931.

National motto: 'In God we trust'; formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for 4 years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November. Technically, this is an election of presidential electors, not of a president directly; the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electorate vote is one for each senator and representative. Electors may not be a member of Congress or hold federal office. If no candidate secures the minimum 270 college votes needed for outright victory, the 12th Amendment to the Constitution applies, and the House of Representatives chooses a president from among the first 3 finishers in the electoral college. (This last happened in 1824).

If the successful candidate for President dies before taking office the Vice-President-elect becomes President; if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted on 18 July 1947. In case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem.* of the Senate and successively upon those members of the Cabinet in order of precedence, who have the constitutional qualifications for President.

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan. of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan. instead of—as formerly—in the following December. The President's salary is \$200,000 per year (taxable), with in addition \$50,000 to assist in defraying expenses resulting from official duties. Also he may spend up to \$100,000 non-taxable for travel and \$20,000 for official entertainment. The office of Vice-President carries a salary of \$171,500 and \$10,000 allowance for expenses, all taxable. The Vice-President is *ex-officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term.

President of the United States: William (Bill) Jefferson Blythe IV Clinton, of Arkansas, b. 1946. (Governor of Arkansas, 1979–81, 1983–92).

Vice President: Albert Gore, of Tennessee, b. 1948 (House of Representatives, 1977–85; Senate, 1985–).

At the Presidential election on 5 Nov. 1996 turn-out was 49% (55.9% in 1992). Bill Clinton (D.) received 45,590,703 votes (49%), Bob Dole (R.) 37,816,307 (41%) and Ross Perot (Reform Party) 7,866,284 (8%). Electoral college votes: Clinton, 379; Dole, 159; Perot, nil.

Electorate: By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden. The electorate consists of all citizens over 18 years of age. Literacy tests have been banned since 1970. In 1972 durational residency requirements were held to violate the constitution. In 1973 US citizens abroad were enfranchised.

With limitations imposed by the constitution, it is the states which determine voter eligibility. In general states exclude from voting: Persons who have not established residency in the jurisdiction in which they wish to vote; persons who have been convicted of felonies whose civil rights have not been restored; persons declared mentally incompetent by a court.

Illiterate voters are entitled to receive assistance in marking their ballots. Minority-language voters in jurisdictions with statutorily prescribed minority concentrations are entitled to have elections conducted in the minority language as well as English. Disabled voters are entitled to accessible polling places. Voters absent on election days or unable to go to the polls are generally entitled under state law to vote by absentee ballot.

The Constitution guarantees citizens that their votes will be of equal value under the 'one person, one vote' rule.

Senate: The Senate consists of 2 members from each state, chosen by popular vote

for 6 years, approximately one-third retiring or seeking re-election every 2 years. Senators must be no less than 30 years of age; must have been citizens of the USA for 9 years, and be residents in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house. The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign Powers, a two-thirds majority of senators present being required for approval. (However, it has no control over 'international executive agreements' made by the President with foreign governments; such 'agreements' cover a wide range and are more numerous than formal treaties.) It also has the power of confirming or rejecting major appointments to office made by the President, but it has no direct control over the appointment by the President of 'personal representatives' or 'personal envoys' on missions abroad. Members of the Senate constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify any civil officer of the USA impeached by the House of Representatives, which has the sole power of impeachment.

The Senate has 17 Standing Committees to which all bills are referred for study, revision or rejection. The House of Representatives has 19 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House; each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies. Both Houses also have a few select or special Committees with limited duration.

House of Representatives: The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. In 1997 the states had the following numbers of representatives:

Alabama	7	Indiana	10	Nebraska	3	South Carolina	6
Alaska	1	Iowa	5	Nevada	2	South Dakota	1
Arizona	6	Kansas	4	New Hampshire	2	Tennessee	9
Arkansas	4	Kentucky	6	New Jersey	13	Texas	30
California	52	Louisiana	7	New Mexico	3	Utah	3
Colorado	6	Maine	2	New York	31	Vermont	1
Connecticut	6	Maryland	8	North Carolina	12	Virginia	11
Delaware	1	Massachusetts	10	North Dakota	1	Washington	9
Florida	23	Michigan	16	Ohio	19	West Virginia	3
Georgia	11	Minnesota	8	Oklahoma	6	Wisconsin	9
Hawaii	2	Mississippi	5	Oregon	5	Wyoming	1
Idaho	2	Missouri	9	Pennsylvania	21		
Illinois	20	Montana	1	Rhode Island	2		

The constitution requires congressional districts within each state to be substantially equal in population. Final decisions on congressional district boundaries are taken by the state legislatures and governors. By custom the representative lives in the district from which he is elected. Representatives must be not less than 25 years of age, citizens of the USA for 7 years and residents in the state from which they are chosen.

In addition, 5 delegates (1 each from the District of Columbia, American Samoa, Guam, the US Virgin Islands and Puerto Rico) are also members of Congress. They have a voice but no vote, except in committees. The delegate from Puerto Rico is the resident commissioner. Puerto Ricans vote at primaries, but not at national elections. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for 2 years, terminating at noon on 3 Jan.

The salary of a senator is \$133,600 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is \$171,500 per annum, with a taxable allowance. The salary of a Member of the House is \$133,600 (\$148,400 for the Majority Leader and Minority Leader).

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious test may be required as a qualification to any office or public trust under the USA or in any state.

Following the elections of 5 Nov. 1996, the 105th Congress (1997–99) was constituted as follows: Senate, 55 Republicans, 45 Democrats; House of Representatives, 227 Republicans, 207 Democrats, 1 independent.

The *Speaker* of the House of Representatives is Newt Gingrich (R). The *Majority Leader* of the Senate is Trent Lott (R).

Indians: By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special federal jurisdiction. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities of self-government and the establishment of self-controlled corporate enterprises empowered to borrow money and buy land, machinery and equipment; these corporations are controlled by democratically elected tribal councils. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. In 1988 the federal government recognized that it had a special relationship with, and a trust responsibility for, federally-recognized Indian entities in continental USA and tribal entities in Alaska. In 1993 the Bureau of Indian Affairs listed 552 'Indian Entities Recognized and Eligible to Receive Services'. Indian lands (1991) amounted to 52,092,247 acres, of which 41,868,582 was tribally owned and 10,233,665 in trust allotments. Indian lands are held free of taxes. Total Indian population at the 1990 census was 1,959,000, of which Oklahoma, Arizona, California and New Mexico accounted for 832,466.

State and Local Government: The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and 30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering 2 or 3 counties compared with the single county or, in some states, the town, which sends 1 representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are 4 years; in 12 states the term is 2 years. Of the 4-year senates, Illinois, Montana and New Jersey provide for two 4-year terms and one 2-year term in each decade. Terms of the lower houses are usually shorter; in 45 states, 2 years.

Members of both Houses are paid at the same rate, which varies from \$200 a year in New Hampshire to \$57,500 a year in New York. The trend is towards annual sessions of state legislatures; most meet annually now whereas in 1939 only 4 did.

The Governor has power to summon an extraordinary session, but not to dissolve or adjourn. The duties of the two Houses are similar, but in many states money bills must be introduced first in the Lower House. The Senate sits as a court for the trial of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor.

State legislatures are competent to deal with all matters not reserved for the federal government by the federal constitution nor specifically prohibited by the federal or state constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-

President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation and other corporations, subject only to the right of Congress to regulate commerce passing from one state to another; labour; education; charities; licensing; fisheries within state waters, and game laws (apart from the hunting of migratory birds, which is a federal concern under treaties with Canada and Mexico). Taxes on income were left to the states until 1913, when the 16th amendment authorized the imposition of federal taxes on income without regard to apportionment.

The Governor is elected by direct vote of the people over the whole state for a term of office ranging in the various states from 2 to 4 years, and with a salary ranging from \$60,000 (Arkansas) to \$130,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

The chief officials by whom the administration of state affairs is carried on (secretaries, treasurers, members of boards of commissioners, etc.) are usually chosen by the people at the general state elections for terms similar to those for which governors hold office.

At the 11 state gubernatorial elections on 5 Nov. 1996 (Delaware, Indiana, Missouri, Montana, New Hampshire, North Carolina, North Dakota, Utah, Vermont, Washington, West Virginia) the Republicans won 4 governorships and the Democrats 7, making a nationwide tally of 30 Republicans, 19 Democrats and 1 independent.

Local Government. The chief unit of local government is the county, of which there were (1997) 2,994 with definite functions; in addition, Rhode Island has 5 'counties' which have no functions; Alaska does not have counties but 25 divisions and, since Oct. 1960, there has been no active county government in Connecticut. Louisiana has 64 'parishes'. The counties maintain public order through the sheriff and his deputies, who may, in a crisis, be drawn temporarily from willing citizens; in many states the counties maintain the smaller local highways; other functions are the granting of licences and the apportionment and collection of taxes. In a few states they also manage the schools.

The unit of local government in New England is the rural township, governed directly by the voters, who assemble annually or more often if necessary, and legislate in local affairs, levy taxes, make appropriations and appoint and instruct the local officials. Townships are grouped to form counties. Where cities exist, the township government is superseded by the city government.

Local elections and 94 referendums were held on 5 Nov. 1996.

The **District of Columbia**, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US Government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No. 3 of 1967 instituted a Mayor Council form of government with appointed officers. In 1973 an elected Mayor and elected councillors were introduced; in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. This has still to be ratified.

The **Commonwealth of Puerto Rico, American Samoa, Guam and the Virgin Islands** each have a local legislature, whose acts may be modified or annulled by

Congress, though in practice this has seldom been done. Puerto Rico, since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island.

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior.

DEFENCE. The President is C.-in-C. of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization.

The major components of the Department of Defense are the Office of the Secretary of Defense and the Joint Chiefs of Staff, who provide immediate staff assistance and advice to the Secretary; the departments of the Army, Navy and Air Force, each separately organized under a civilian head (not of cabinet rank); and the unified and specified commands.

Army. *Secretary of the Army:* Togo D. West, Jr.

Central Administration. The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C.-in-C. and of the Secretary of Defense, he is responsible for all affairs of the Department.

The Secretary of the Army is assisted by the Under Secretary of the Army, 5 Assistant Secretaries of the Army (Civil Works, Financial Management, Installations, Logistics and Environment, Manpower and Reserve Affairs, Research, Development and Acquisition), General Counsel, Administrative Assistant, Director for Information Systems for Command, Control, Communications and Computers, Inspector General, Auditor General, Chief of Legislative Liaison, Chief of Public Affairs, Director for Small and Disadvantaged Business Utilization, Chairman of the Army Reserve Forces Policy Committee and the Army Staff headed by the Chief of Staff, US Army. The Office of the Under Secretary of the Army includes a Deputy Under Secretary (Operations Research).

The Chief of Staff, Army, in his role as a member of the Joint Chiefs of Staff, takes part in the planning and supervision of the operational forces under the command of the Commanders-in-Chief. The Vice Chief of Staff assists and advises the Chief of Staff.

The Army General Staff is the principal element of the Army Staff and includes the Offices of the Chief of Staff, Deputy Chief of Staff for Operations and Plans, Deputy Chief of Staff for Personnel, Deputy Chief of Staff for Logistics, and Deputy Chief of Staff for Intelligence. Other elements of the Army Staff are the offices of the Judge Advocate General, Surgeon General, Chief of Chaplains, Chief, Army Reserve, Chief, National Guard Bureau, and Chief of Engineers.

The Army consists of the Active Army, the Army National Guard of the US, the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the service of the US. The strength of the Active Army was (1 Aug. 1996) 495,000 (including 67,100 women).

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the Third US Army; 4 continental US Armies, and all assigned Active Army and US Army Reserve troop units in the continental US, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G. Meade, Maryland; Second US Army, Fort Gillem, Georgia; Fifth US Army, Fort Sam Houston, Texas; Sixth US Army, Presidio of San Francisco, California. The US Army Training and Doctrine Command, with headquarters at Fort Monroe, Virginia, co-ordinates and integrates the total combat development effort of the Army as well as developing, managing, establishing and verifying the training of individuals of the US Army and authorized

foreign nationals. The US Army Health Services Command, with headquarters at Fort Sam Houston, Texas, provides health services in the continental US for the US Army and provides professional education and training for medical personnel of the US Army and authorized foreign national personnel. The US Army Materiel Command, with headquarters in Alexandria, Virginia, is responsible for US Army activities dealing with equipment development, procurement, delivery, supply and maintenance. The US Army Information Systems Communications Command, with headquarters at Fort Huachuca, Arizona, provides worldwide communication automation support to the Department of the Army and supports the Defense Communications Systems. The US Army Military District of Washington, with headquarters at Fort McNair, Washington, DC, provides support to the Department of the Army and the Department of Defense at the seat of Government. The US Army Space Command, with headquarters in Colorado Springs (CO), is the Army component to the US Space Command.

Approximately 32% of the Active Army is deployed outside the continental USA. Several divisions, which are located in the USA, keep equipment in Germany and can be flown there in 48–72 hours. Headquarters of US Seventh and Eighth Armies are in Europe and Korea respectively.

Operational Commands and Weapons. The larger commands are the theater army and corps. The typical theater army may consist of a variable number of corps composed of combat forces of armour, infantry, air defense artillery, aviation and field artillery units; combat support forces of aviation, engineer, intelligence and signal elements; and combat service support forces. A typical corps consists of a variable number and mixture of infantry, mechanized infantry, armoured, air assault, or airborne divisions; one or more separate infantry, mechanized infantry or armoured brigades; one or more armoured cavalry regiments; corps artillery (155-mm howitzer, 203-mm howitzer, multiple launch rocket system (MLRS); corps air defense brigade (*Hawk*, *Chaparral*, *Patriot* and *Avenger* battalions), corps aviation brigade and combat support and combat service support forces.

US Army Divisions have a common base (containing command, divisional artillery, air defense artillery, combat support and combat service support units) aviation brigade, and a varying mixture of combat manoeuvre battalions (usually 9 or 10 in number in 3 brigades) to make up airborne, infantry, armoured, mechanized infantry and air assault divisions. Divisions can in this way be 'tailored' to fit a variety of strategic or tactical situations. A mechanized infantry division, with about 17,300 soldiers, may have 5 mechanized infantry battalions and 4 armoured battalions; an armoured division, with about 17,300 soldiers, may have 4 mechanized infantry battalions and 5 armoured battalions; an airborne division, with 13,100 soldiers, may have 9 infantry (airborne) battalions. The air assault division is a highly specialized force capable of battlefield helicopter operations for infantry, field artillery, air defense artillery and necessary support forces.

The 10,800-man light infantry divisions consist of 9 infantry battalions and offer rapid strategic force projection. Light divisions can operate in all environments and are general purpose forces. Special operations forces consist of special forces, rangers, special operations aviation psychological operations, and civil affairs units. The units are designed, equipped, and trained for special missions.

Small arms include the M-9 (9mm pistol), the M-16 series rifle and the M-249 Squad Automatic Weapon both of which fire a 5.56-mm cartridge. The standard generalpurpose machine-gun is the M-60 (23 lb; 550 rounds of 7.62-mm per minute). Infantry weapons also include M-203 grenade launcher attachment for the M-16A1 rifle, which fire a 40-mm grenade up to 400 metres, the *TOW* and *Dragon* anti-tank missile systems, and the M-72 rocket, a light anti-tank weapon.

Combat vehicles of the US Army are the tank, armoured personnel carrier, infantry fighting vehicle, and the armoured command vehicle. The first-line tanks are the M1A1 Abrams tank with a 120mm main gun, and the M1 Abrams. The standard armoured infantry personnel carrier is the M2 Bradley Fighting Vehicle (BFV), which is replacing the older M113. Both carry a mechanized infantry squad, but the BFV mounts a 25-mm Bushmaster gun and *TOW* missile launchers. The M3 version of the BFV is being used as the ground scout vehicle in armoured cavalry regiments,

armoured and mechanized infantry divisional cavalry squadrons and in scout platoons of armoured and mechanized infantry battalions.

The approved calibres of artillery are: Light, 105-mm howitzer; medium, 155-mm howitzer; heavy, 203-mm howitzer. The Multiple Launch Rocket System (MLRS) is a 227-mm rapid firerocket system used in a non-nuclear counterfire, reinforcing and deep fires roles. The 107-mm mortar, the 81-mm mortar and the 60-mm mortar are used by the combat manoeuvre elements. The 120-mm mortar will replace the 107-mm mortar. The *TOW* is the primary anti-tank weapon. Forward-area air-defence weapons, including the *Chaparral*, *Stinger* and *Avenger* 20-mm gun, provide the capability of low-altitude defence against high-performance aircraft.

The Army has three categories of missiles—surface-to-surface (field artillery) and surface-to-air (air defence artillery) and anti-tank. Surface-to-surface missiles are now limited to the Army Tactical Missile System (ATACMS; fielded) and the Tri-Service Stand-Off Attack Missile (TSSAM; EMD). ATACMS is a semi-ballistic missile capable of carrying a variety of warheads to ranges in excess of 150 km. Planned improvements include an extended range variant with a range of 300+ km. TSSAM is a joint Army, Air Force, Navy cruise missile program. TSSAM carries the Bat submunition (anti-tank) to distances in excess of 200 km. Planned improvements modify Bat submunition for targets other than armour. Surface-to-air missiles, for air defence, are: *Patriot*, guided, conventional warhead, operational; *Hawk*, homing type, low-to-mid-altitude, field operational (product improvements continue to improve the effectiveness of the system); *Chaparral*, infra-red homing, low-altitude, forward area, operational (improvements to the basic system are under development); *Stinger*, hand-held or mobile-launched, infra-red homing, low-altitude, forward area, operational. Anti-tank missiles are: *TOW*, tube launched, optically tracked, wire guided, anti-armour, forward area, operational; *Hellfire*, laser-guided, anti-armour, operational and *Dragon*, wire-guided, medium anti-armour, forward area, operational.

The Army employs rotary- and fixed-wing aircraft as organic elements of its ground formations where their use is required on a full-time basis and their immediate and constant availability is essential. The front line commander exploits the benefits of aviation technology to perform traditional land battle tasks in the third dimension. This concept of airmobility for ground formation utilizes aerial vehicles as a highly integrated team to perform all five functions of land combat: reconnaissance, command and control, logistics and that inseparable combination, firepower and manoeuvre.

The Army has some 7,000 aircraft, all but about 400 of them helicopters. The principal types are 1,000 UH-1 Iroquois Huey and 1,600 UH-60 Black Hawk utility helicopters, 1,000 OH-58 Kiowa observation helicopters, 600 AH-1 Cobra and 700 AH-64 Apache attack helicopters, and 450 CH-47 Chinook cargo helicopters.

Enlistment, Terms of Service. Since 1974 the Army has operated an 'all volunteer' system making it, in effect, an all-regular force both regular and reserve components. Terms of service may be 2, 3, 4, 5 or 6 years. Men and women who enlist incur an 8-year obligation and must serve in the reserve components any part of the period not served on active duty. Over 95% of recruits enlisting in the Army have a high school education and over 50% of the Army is married. Women serve in both combat support and combat service support units.

The National Guard is a reserve military component with both a state and a federal role. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government (except when performing state missions). Training is supervised by the active Army (FORSCOM), and unit organization parallels that for the active army; training facilities are made available by the USA and each state. As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territories of the Virgin Islands and Guam, the Guard may be called into service for local emergencies by the chief executives in those jurisdictions; and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency. In 1996 it numbered 499,800 (Army, 387,100; Air Force, 112,700).

The Army Reserve is designed to supply qualified and experienced units and

individuals in an emergency. US Army Forces Command is charged with the command, support and training supervision of US Army Reserve units. Members of units are assigned to the Ready Reserve, which is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress. In 1996 the Army Reserve numbered 596,700 (114,000 women).

Navy. *Secretary of the Navy:* John Dalton.

The Department of the Navy is administered under the Defense Secretary by the Secretary of the Navy, assisted by the Under Secretary and 4 Assistant Secretaries (for Financial Management; Installation and Environment; Manpower and Reserve Affairs; and Research, Development and Acquisition). Other divisions of the Department of the Navy are those of: Legislative Affairs, Information and the Judge Advocate General of the Navy.

The professional head of the Navy is the Chief of Naval Operations, whose staff includes the Vice Chief, 4 Deputy Chiefs responsible for Manpower and Personnel; Plans, Policy and Operations; Logistics; and Resources, Warfare Requirements and Assessments. There are 3 major staff directorates for Intelligence; Training; and Space and electronic warfare and 5 specialist divisions.

The Operating Forces include the Atlantic Fleet, divided between the 2nd fleet (home waters) and 6th fleet (Mediterranean); the Pacific Fleet, similarly divided between the 3rd fleet (home waters) and the 7th fleet (West Pacific); and the 5th fleet (Indian Ocean), formally activated in 1995 and maintained by units from both Pacific and Atlantic. All fleets include associated Fleet Marine Forces. Other operational commands include the Military Sealift Command, U.S. Naval Forces Europe, the Mine Warfare Command and the Operational Test and Evaluation Force.

The authorized budget for the Department of the Navy (which includes funding both for the Navy and Marine Corps) for current and recent fiscal years: 1995, \$78,200m.; 1996, \$76,400m.; 1997, \$79,370m.; 1998, \$79,340m.

Personnel and fleet strength declined during the mid-1990s but are now stabilizing. The '600-ship battle force' planned in the late 1980s has reduced to such an extent that the eventual figure is likely to be about 335. In late 1997 it was 347. The Navy personnel total in 1997 was 388,760, including 52,178 women who are eligible to serve at sea in support ships.

The operational strength of the Navy at the end of the year indicated:

Category	1992	1993	1994	1995	1996	1997
Strategic Submarines	23	22	16	17	17	18
Nuclear Attack Submarines	87	86	85	78	76	67
Aircraft Carriers	12	13	12	13 ¹	12 ¹	11 ¹
Amphibious Carriers	13	14	13	11	11	11
Cruisers	46	49	44	31	31	30
Destroyers	51	40	39	46	52	56
Frigates	90	67	59	46	45	31

¹ Includes the USS *John F. Kennedy* as 'operational and training reserve carrier' in the Naval Reserve Force.

Ships in inactive reserve are not included in the table; but those serving as Naval Reserve Force training ships are. Amphibious Carriers are those ships of the WASP, Tarawa, and two Jima classes capable of operating AV-8 Harrier-type aircraft as well as helicopters.

Submarine Forces. A principal part of the US naval task is to deploy the seaborne strategic deterrent from nuclear-powered ballistic missile-carrying submarines (SSBN), of which there were, in 1997, 18, all of the Ohio class. The 18th and final ship of the class, USS *Louisiana*, was commissioned in August 1997. These ships, the first of which entered service in 1981, are of 19,000 tonnes submerged displacement, and capable of 25 knots. They are designed to deploy the Trident-2 D-5 missile, with a maximum range of 4,000 nautical miles, carrying about 8 warheads with substantially improved targeting accuracy over the Trident-1 C-4 missile, which is deployed in the first 8 ships of the class. The first submarine deployed the Trident-2 operationally in 1990. The first 8 ships may be retrofitted with the Trident-2 in due

course. The last of the Franklin class first generation strategic missile submarines was withdrawn in 1995.

The listed total of 67 nuclear-powered attack submarines (SSN) includes the first of 3 new Sea Wolf class 57 of the Los Angeles class (7,040 tonnes) in 3 major batches: A basic design (23 ships) completed 1976-85, a small group of 8 ships additionally equipped with vertical-launch missile tubes for Tomahawk cruise missiles completed 1985-89, and the remaining 23 ships, the building of which was completed in 1996. These latter are known as 'Improved' Los Angeles, incorporating cruise missile tubes, a new command system, and several important additional technical modifications. There are also 9 Sturgeon class (5,040 tonnes) completed 1967-75, and 3 others.

Surface Forces. The surface fleet is headed by the force of large aircraft carriers, the first class of which entered service in the late 1950s carrying nuclear bombers as the naval contribution to the strategic deterrent. When this role passed to the ballistic missile submarine force, the carrier force was gradually reoriented to its current tasks, which relate more to limited and littoral warfare. The target of '15 deployable carriers' set in 1986 was officially amended to 14 as a result of budgetary pressure in 1989, and has now fallen to 12 of which 11 are in operational service and 1 is used for training and reserve forces.

There are 7 Nimitz and improved Nimitz class ships, of about 88,000 tonnes, completed between 1975 and 1995, nuclear-powered and capable of 33 knots. The USS *Enterprise*, completed in 1961, displacing 81,000 tonnes, was the prototype nuclear-powered carrier and is also capable of 33 knots. The 3 ships of the Kitty Hawk and John F. Kennedy classes are of about 82,500 tonnes were completed between 1961 and 1968, and represent the last oil-fuelled carriers built by the US Navy. The force is completed by the remaining ship of the Forrestal class, USS *Independence*, completed in 1959, of about 82,000 tonnes full load.

All carriers deploy an air group which comprises on average 2 squadrons each of 10 F-14 Tomcat fighters and 3 squadrons each of 12 F/A-18 Hornet fighter/ground attack aircraft. They also carry a squadron of 4 E-2C Hawkeye early warning aircraft, 4 KA-6 airborne tankers, 4 EA-6B Prowler electronic combat aircraft, 6 S-3B Viking anti-submarine aircraft and 6 SH-3D Sea King, or SH-60F Oceanhawk anti-submarine helicopters. The squadron of 10 A-6E Intruder medium bombers was withdrawn from carrier air groups in 1995-96, being replaced by the third Hornet squadron.

The cruiser force has stabilized at 31 ships following the major reductions in 1994-95. The force comprises the 27 ships of the Ticonderoga class commissioned between 1983 and 1993, of 9,600 tonnes, capable of 30 knots, equipped with the highly-capable Aegis air-defence control system and armed with Standard SM-2ER surface-to-air missiles (SAM), 2 127 mm guns and 2 SH-60B Seahawk LAMPS-III helicopters. All but the first 5 ships are equipped with 2 x 61-cell vertical launch system for their missiles, which additionally allows them to launch Harpoon anti-ship missiles and Tomahawk sea-launched cruise missiles (SLCM). The 2 nuclear-powered vessels of the Virginia class and 2 similar California class, completed between 1973 and 1980, are of 11,400 tonnes and 10,700 tonnes respectively, capable of 31 knots and armed with 2 twin Standard SAM launchers, 8 Harpoon anti-surface ship missiles, ASROC anti-submarine missiles, and (Virginia class only) 8 Tomahawk SLCM. Neither class carries a helicopter.

In addition, there are 21 guided-missile destroyers including 17 of the new Arleigh Burke class currently building, and equipped with the Aegis air-defence system and 4 Kidd class, 31 anti-submarine destroyers of the Spruance class, 45 guided-missile frigates of the Oliver Hazard Perry class and 24 inshore patrol craft. Mine warfare ships include 2 former amphibious helicopter carriers of the Iwo Jima class converted as mine counter measures command and support ships, 14 new mine counter-measure vessels of the Avenger class and the first 8 of a new Osprey class coastal minchunter based on an Italian design.

Amphibious Warfare. Amphibious capability comprises 42 specialist ships. The 5 Wasp (LHD-1) class and the 5 ships of the Tarawa (LHA-1) class are in many respects similar to the vertical/short take off and landing aircraft carriers in other

principal navies and are capable of sea control tasks. The Wasp class, completed from 1989 to 1995 and still building, are of 41,200 tonnes, capable of 23 knots, equipped with an air group of some 6-8 Harrier AV-8B aircraft, and up to 42 mixed helicopters, and accommodating 1,900 troops. The 5 ships of the Tarawa class are of 40,000 tonnes, were completed between 1976 and 1981, deploy a similar air group and carry 1,700 troops. The 1 remaining ship of the Iwo Jima class is also capable of operating vertical/short take-off and landing aircraft but does not normally do so. It is of 18,800 tonnes, is capable of 21 knots and normally carries 20 mixed helicopters and accommodates 1,740 troops. Additionally there are 2 amphibious command ships, 16 dock landing ships and 2 tank landing ships. There are 129 amphibious craft including 91 air-cushion landing craft (hovercraft) and 38 others, and several hundred minor personnel and vehicle transports. The total oceanic lift capability of the amphibious forces amounts to over 50,000 personnel, 1,000 main battle tank equivalents, and operating facilities for about 180 helicopters.

Underway Support. The Navy is provided with global, long-term sustainability through a force of some 43 underway replenishment ships, including 17 tankers, 8 multi-purpose fast replenishment ships, 8 stores ships and 10 ammunition ships. Second-line support is provided by 12 depot ships, 10 support tankers, 10 tugs and 2 hospital ships. Special purpose auxiliaries include 2 command ships, 18 ocean surveillance ships, 4 missile and space support ships, and 16 survey and oceanographic vessels. Of these major auxiliaries, about half are operated by the civilian-manned Military Sealift Command. In addition there are some hundreds of minor auxiliaries, and several thousand service craft.

Shipbuilding. Major warship building yards involved in the current building programme are located at Groton, Conn. (submarines), Newport News, Va. (submarines and aircraft carriers), Pascagoula, Miss. (amphibious ships), Bath, Me. (destroyers), New Orleans, La. (amphibious and auxiliary ships) and San Diego, Ca. (auxiliary ships).

Naval Aviation. The principal function of the naval aviation organization (72,500 strong in 1997) is to provide and train the 10 Air Wings maintained for service in the Aircraft Carriers. These usually consist of 70 fixed wing and 6 rotary wing aircraft. In addition, 1 reserve carrier air wing is available. The main carrier-borne combat aircraft on inventory are 330 F-14 fighters, 780 F/A-18 Hornet dual-purpose fighter/attack aircraft and 150 S-3A Viking anti-submarine aircraft. Supporting roles are performed by 120 EA-6B electronic warfare aircraft, 90 E-2C Hawkeye airborne early warning aircraft, 50 KA-6D tankers, 30 SH-3 Sea King and 80 SH-60F Oceanhawk helicopters for inner-zone anti-submarine defence. Helicopters held for embarkation in cruisers and below are of 2 types, the older SH-2F Seasprite aircraft of which there are some 30 and the SH-60B Seahawk of which there are 165. Although the A-6E Intruder attack aircraft has been withdrawn from carrier service, some 100 are retained in reserve. The principal tasks of the shore-based elements of US naval aviation are maritime reconnaissance and anti-submarine warfare, for which there are holdings of about 240 P-3C Orion aircraft. Additional tasks include electronic warfare (12 EP-3), electronic intelligence (16 ES-3) and mine countermeasures for which 50 MH- and RH-53 helicopters are held. Finally there are some 700 training aircraft of types not previously mentioned, and other aircraft for transport and other miscellaneous duties.

The Marine Corps. While administratively part of the Department of the Navy, the Corps ranks as a separate armed service, with the Commandant serving in his own right as a member of the Joint Chiefs of Staff, and responsible directly to the Secretary of the Navy. Its strength had stabilized at 174,000 by late 1997.

The role of the Marine Corps is to provide specially trained and equipped amphibious expeditionary forces. It is organized into 3 divisions each some 48,000 strong, subdivided into Marine Expeditionary Brigades (16,000) and Marine Expeditionary Units (some 5,000 strong). In peacetime, Marine Expeditionary Units are permanently deployed afloat in the Eastern Atlantic/Mediterranean and the West Pacific/Indian Ocean. The principal equipment of the Corps consists of 400 M-1A1

Abrams tanks, 600 LAV-25 armoured infantry fighting vehicles, 1,320 armoured personnel carriers and about 800 artillery pieces of calibres between 105 mm and 155 mm. Additional heavy equipment for US-based Marine forces units, beyond that which can be embarked in the amphibious shipping, is provided in 3 squadrons each of 13 large cargo ships prepositioned at Diego Garcia (Indian Ocean), the Pacific, and in the Mediterranean. In addition the Corps includes an autonomous aviation element numbering 34,000 in 1998 and equipped with some 400 combat aircraft and 515 helicopters. There are 280 F/A 18 Hornet, 180 AV-8B Harriers, 25 EA-6B electronic warfare aircraft, 75 KC-130 tankers, and a miscellany of other support and training aircraft. Helicopters include 240 CH-46E and 175 CH-53 transport, as well as 180 AH-1 Cobra attack helicopters of various types. Harriers and helicopters are normally employed afloat in the amphibious aircraft carriers and other suitable ships. The Hornets and other fixed wing aircraft are normally based ashore, but may be embarked in other aircraft carriers, given the operational need.

The US Coast Guard operates under the Department of Transportation in time of peace and as a part of the Navy in time of war or when directed by the President. The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times'. It comprises 250 ships including cutters of destroyer, frigate, corvette and patrol vessel types, 2 large Polar class ice-breakers, and various auxiliaries and tenders, as well as over 1,400 rescue and utility craft. It also maintains 74 fixed-wing aircraft and 137 helicopters. The workforce, in 1996, was made up of over 34,000 active duty personnel augmented by 7,340 reserve and 35,638 auxiliary members.

The Coast Guard missions include maintenance of aids to navigation, boating safety, defence operations, environmental response (oil spills), ice operations, maritime law enforcement, marine inspection, marine licensing, marine science, port safety and security, search and rescue and waterways management.

On an average Coast Guard day, the service saves 12 lives, conducts 142 Search and Rescue cases and 128 maritime law enforcement boardings, responds to 34 oil or hazardous chemical spills, seizes over \$8m. in illegal contraband, interdicts 22 illegal immigrants and services 150 aids to navigation.

Air Force. *Secretary of the Air Force:* Dr Sheila E. Widnall.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947. It is administered by the Secretary of the Air Force, assisted by an Under Secretary, a Deputy for International Affairs and 4 Assistant Secretaries (Acquisition; Space; Manpower, Reserve Affairs, Installations and Environment; and Financial Management and Comptroller). The USAF, under the administration of the Department of the Air Force, is supervised by a Chief of Staff, who is a member of the Joint Chiefs of Staff. He is assisted by a Vice Chief of Staff, Assistant Vice Chief of Staff, 4 Deputy Chiefs of Staff (Personnel; Plans and Operations; Logistics; Communications and Information) and an Assistant Chief of Staff for Intelligence.

The USAF consists of active duty Air Force officers and enlisted personnel, civilian employees, the Air National Guard and the Air Force Reserve. The USAF has the mission to defend the USA through control and exploitation of air and space. For operational purposes the service is divided into 8 major commands, 37 field operating agencies and 3 direct-reporting units. Under these organizations there are 88 major and 89 minor facilities world-wide including National Guard and Reserve bases.

Major commands are organized on a functional basis in the USA and a geographic basis overseas. They accomplish designated phases of Air Force world-wide activities. They also organize, administer, equip and train their subordinate elements for the accomplishment of assigned missions. Major commands are generally assigned specific responsibilities based on functions. In descending order of command, elements of major commands include numbered air forces, wings, groups, squadrons and flights.

The bulk of the combat forces are grouped under the Air Combat Command, which controls strategic bombing, tactical strike, air defence and reconnaissance assets in

the USA. The Air Mobility Command provides air lift, air refuelling, special air mission and aeromedical evacuation for US forces. The newest major command is the Air Education and Training Command which provides a wide variety of training from initial to advanced degree-granting education.

The other major commands are the Air Force Materiel Command, Air Force Special Operations Command, Air Force Space Command, Pacific Air Forces and United States Air Forces in Europe. The Pacific (PACAF) and European (USAFE) are responsible for offensive and defensive air operations in the Pacific and Asia, and Europe and the Mediterranean, respectively.

The field operating agencies are (AF = Air Force): the AF Audit Agency, AF Base Disposal Agency, AF Center for Environmental Excellence, AF Civil Engineering Support Agency, AF Civilian Personnel Management Center, AF Combat Operations Staff, AF Command, Control, Communications and Computer Agency, AF Cost Analysis Agency, AF Flight Standards Agency, AF Frequency Management Agency, AF Historical Research Agency, AF Inspection Agency, AF Intelligence Command, AF Intelligence Support Agency, AF Legal Services Agency, AF Logistics Management Agency, AF Management Engineering Agency, AF Medical Operations Agency, AF Medical Support Agency, AF Military Personnel Center, AF Morale, Welfare, Recreation and Services Agency, AF News Agency, AF Office of Special Investigations, AF Program Executive Office, AF Real Estate Agency, AF Review Boards Agency, AF Safety Agency, AF Security Police Agency, AF Studies and Analyses Agency, AF Technical Applications Center, Air Reserve Personnel Center, Air Weather Service, Center for Air Force History, Joint Services Survival, Evasion, Resistance and Escape Agency, and 7th Communications Group.

The direct-reporting units are: AF Academy, AF District of Washington and AF Operational Test and Evaluation Center.

Air Force aircraft are categorized as bombers, fighters, attack and observation aircraft, reconnaissance and special duty aircraft, transports and tankers, trainers and helicopters. The bombers are the B-1B Lancer, a supersonic inter-continental, nuclear and conventional aircraft; the B-2A, a subsonic, multi-role strategic bomber; and the B-52G/H Stratofortress, which has been the primary manned strategic bomber for over 35 years.

In the fighter category are the F-15 Eagle for air superiority tactical missions; the F-16 Fighting Falcon, a compact, multi-role fighter and attack aircraft; the F-117A, the world's first operational aircraft to exploit low-observable stealth technology; the A-10/OA-10 Thunderbolt II attack aircraft; and the AC-130H/U for counter-insurgency.

Under the reconnaissance and special duty heading are the U-2R/S for reconnaissance; the EC-130E/H Commando/Compass Call and the EF-111A Raven for electronic countermeasures; the E-3B/C Sentry, the E-4B and E-8 Joint Surveillance and Target Attack Radar System for command and control functions; the E-9A for telemetry relay; and the WC-130E/H for weather reconnaissance.

The primary transporters are the C-5A/B Galaxy for long-range heavy loads; the C-9A/C Nightingale for aeromedical evacuation; the C-17A Globemaster III for cargo and tactical air lift, the C-141B Starlifter for long-range troop and cargo; and the C-130 Hercules for theatre tactical air lift. The 2 refuelling aircraft types are the KC-135 Stratotanker and the KC-10A Extender.

Strategic missiles in the Air Force's inventory include the LGM-30G Minuteman, the LGM-118A Peacekeeper, the AGM-69A Short-Range Attack Missile and the AGM-86B/C Air-Launched Cruise Missile.

In 1996 the Air Force had approximately 390,000 military personnel. Approximately 60,000 Air Force members are women. Since 1991 women have been authorized to fly combat aircraft, but not until 1993 were they allowed to fly fighters.

Membership. The USA is a member of the UN, OAS, NATO, OECD, the Pacific Community and the Colombo Plan.

ECONOMY

Budget. The budget covers virtually all the programmes of federal government, including those financed through trust funds, such as for social security, Medicare and highway construction. Receipts of the Government include all income from its sovereign or compulsory powers; income from business-type or market-orientated activities of the Government is offset against outlays. The fiscal year ends on 30 Sept. (before 1977 on 30 June). Budget receipts and outlays (in \$1m.):

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product. In Jan. 1996, the Bureau revised these accounts back to 1959 (eventually 1929), notably by introducing a new featured measure of real output and prices. The principal tables are published monthly in *Survey of Current Business*; the complete set of national income and product tables are published in the *Survey* normally each July, showing data for recent years. *The National Income and Product Accounts of the United States* (vol. 1, 1929–58; vol. 2, 1959–92) were published in 1997. The conceptual framework and statistical methods underlying the accounts are described in National Income and Product Account (NIPA) Methodology Papers 1–6. Subsequent limited changes are described in the July 1995, Sept. 1995, Oct. 1995, Aug. 1996 and Aug. 1997 *Surveys*.

¹ In 1996 the chain-weighted method of estimating GDP replaced that of constant base-year prices. In chain-weighting the weights used to value different sectors of the economy are continually updated to reflect changes in relative prices.

Currency. The unit of currency is the *dollar* (USD) of 100 *cents*. Notes are issued by the 12 Federal Reserve Banks, which are denoted by a branch letter (A = Boston, MA; B = New York, NY; C = Philadelphia, PA; D = Cleveland, OH; E = Richmond, VA; F = Atlanta, GA; G = Chicago, IL; H = St Louis, MO; I = Minneapolis, MN; J = Kansas City, MO; K = Dallas, TX; L = San Francisco, CA). There are coins of 1, 5 ('nickels'), 10 ('dimes'), 25 ('quarters') and 50 ('halves') cents, and notes of \$1, 2, 5, 10, 20, 50 and 100.

Banking and Finance. The Federal Reserve System, established under The Federal Reserve Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 25 branches, and the Federal Open Market Committee. The 7 members of the Board of Governors are appointed by the President with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every 2 years. The Board exercises broad supervisory authority over the operations of the 12 Federal Reserve Banks, including approval of their budgets and of the appointments of their presidents and first vice presidents; it designates 3 of the 9 directors of each Reserve Bank including the Chairman and Deputy Chairman. The *Chairman* of the Federal Reserve Board is appointed by the President for 4-year terms. The Chairman for 1996–2000 is Alan Greenspan. The Board has supervisory and regulatory responsibilities over banks that are members of the Federal Reserve System, bank holding companies, bank mergers, Edge Act and agreement corporations, foreign activities of member banks, international banking facilities in the USA, and activities of the US branches and agencies of foreign banks. Legislation of 1991 requires foreign banks to prove that they are subject to comprehensive consolidated supervision by a regulator at home, and have the Board's approval to establish branches, agencies and representative offices. The Board also assures the smooth functioning and continued development of the nation's vast payments system. Another area of the Board's responsibilities involves the implementation by regulation of major federal laws governing consumer credit.

The 12 members of the Federal Open Market Committee (FOMC) include the 7 members of the Board of Governors and 5 of the 12 Federal Reserve Bank presidents. The latter serve 1-year terms on the FOMC in rotation except for the President of the Federal Reserve Bank of New York, who is a permanent member. The FOMC has an essential role in the formulation of monetary policy. It influences credit market conditions, money and bank credit, by buying or selling US Government securities; and it also oversees System operations in foreign currencies for the purpose of helping to safeguard the value of the dollar in international exchange markets and facilitating co-operation and efficiency in the international monetary system. The Board of Governors also influences credit conditions through powers to set reserve requirements, to approve discount rates at Federal Reserve Banks, and to fix margin requirements on stock-market credit.

The Reserve Banks advance funds to depository institutions, issue Federal Reserve notes, the only form of currency apart from coins, act as fiscal agent for the Government, and afford nationwide cheque-clearing and fund transfer arrangements.

They may increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the FOMC. The purchase and sale of securities in the open market is conducted by the Federal Reserve Bank of New York. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

From 1968, the Congress passed a number of consumer financial protection acts, the first of which was the Truth in Lending Act, for which it has directed the Board to write implementing regulations and assume partial enforcement responsibility. Others include the Equal Credit Opportunity Act, Home Mortgage Disclosure Act, Consumer Leasing Act, Fair Credit Billing Act, Truth in Savings Act and Electronic Fund Transfer Act. To manage these responsibilities the Board has established a Division of Consumer and Community Affairs. To assist it, the Board consults with a Consumer Advisory Council, established by the Congress in 1976 as a statutory part of the Federal Reserve System.

Another statutory body, the Federal Advisory Council, consists of 12 members (one from each district); it meets in Washington four times a year to advise the Board of Governors on economic and banking developments. Following the passage of the Monetary Control Act of 1980, the Board of Governors established the Thrift Institutions Advisory Council to provide information and views on the special needs and problems of thrift institutions. The group is comprised of representatives of mutual savings banks, savings and loan associations, and credit unions.

All depository institutions (commercial and savings banks, savings and loan associations, credit unions, US agencies and branches of foreign banks, and Edge Act and agreement corporations) must meet reserve requirements set by the Federal Reserve and hold the reserves in the form of vault cash or deposits at Federal Reserve Banks.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to \$100,000 for each account. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks. All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance.

The Federal Deposit Insurance Corporation Improvement Act of 1992 originated with bank reform initiatives. It imposed new capital rules on banks, new reporting requirements and a code of 'safety and soundness' standards. The main aim of the Act is to reduce risk through rigorous enforcement of capital requirements. Regulators are required to take action where banks fail to observe these standards.

In June 1997 the 10 major banks in terms of assets (\$1,000m.) were: Chase Manhattan, 281; Citibank, 254; Bank of America, 224; Morgan Guaranty, 189; NationsBank, 159; Bankers Trust, 99; Wells Fargo, 92; First Union, 84; Keybank, 66; BankBoston; 57.

The key stock exchanges are the New York Stock Exchange (NYSE), the Nasdaq Stock Exchange (NASDAQ) and the American Stock Exchange (ASE). There are several other stock exchanges, in Philadelphia, Boston, San Francisco (Pacific Stock Exchange) and Chicago, although trading is very limited in them.

Weights and Measures. The US Customary System derives from the British Imperial System. It differs in respect of the *gallon* (= 0.83268 Imperial gallon); *bushel* (= 0.969 Imperial bushel); *hundredweight* (= 100 lbs); and the *short* or *net ton* (= 2,000 lbs).

ENERGY AND NATURAL RESOURCES

Electricity. In 1996, 21.9% of electricity was produced by 110 nuclear reactors. (The last one was built in 1989.) Utility net generation (1996) 3,077,442m. kWh.

Oil and Gas. Crude oil production (includes natural gas plant liquids and other liquids), 1994, 8,645,000 bbls. a day; 1995, 8,626,000 bbls. a day; 1996, 8,607,000 bbls. a day. Proven reserves were 22,017m. bbls. at 31 Dec. 1996. 1996 output was valued at \$43,680m. Dry natural gas production, 1996, was 18,793,000m. cu. ft. with marketed production 19,750,793m. cu. ft., valued at \$42,859m.

Coal. Demonstrated coal reserves were 496,000m. short tons at 1 Jan. 1995. 1996 output (in 1m. short tons): 1,063·9 including bituminous coal, 630·7; sub-bituminous coal, 340·3; lignite, 88·1; anthracite, 4·8. Output from opencast workings, 654·0; underground mines, 409·8. Value of total output, 1996, \$19,480m.

Non-Fuel Minerals. The USA is wholly dependent upon imports for columbium, bauxite, mica sheet, manganese, strontium and graphite, and imports over 80% of its requirements of industrial diamonds, fluor spar, platinum, tantalum, tungsten, chromium and tin.

Total value of non-fuel minerals produced in 1995 was \$38,500m. (\$33,464m. in 1990). Details of some of the main minerals produced are given in the following tables.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to crop land or pasture, and extensive areas of grass lands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6·5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized. A successful conservation programme, highly co-ordinated and on a national scale—to prevent further erosion, to restore the native fertility of damaged land and to adjust land uses to production capabilities and needs—has been in operation since early in the 1930s.

Following the Second World War the uptrend in farm output has been greatly

accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing. During this period land included in farms decreased slowly, crop land harvested declined somewhat more rapidly, but the number of farms declined sharply.

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 968m. acres in 1996, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6.35m. in 1940 to 2.06m. in 1996, as the average size of farms doubled. The average size of farms in 1996 was 469 acres, but ranged from a few acres to many thousand acres. In 1992, 554,000 farms (595,000 in 1987) were less than 50 acres; 584,000 (645,000), 50-179 acres; 614,000 (678,000), 180-999 acres; and 173,000 (169,000) 1,000 acres or more.

Farms operated by owners in 1992 were 1,112,000; by part-owners, 597,000; by tenants, 217,000.

Value of land and buildings in 1996 was \$859,711m.

At the 1990 census 66,964,000 persons (22.5% of the population) were rural, of whom 4,591,000 (under 2%) lived on farms. In 1994 there were 1,453,000 farm operators and managers and 1,992,000 persons in other agricultural and related occupations, of which 748,000 were farm workers.

Cash receipts from farm marketings and government payments (in \$1,000m.):

Gross farm income (including government payments), in \$1,000m., was 210.4 in 1995 compared to 198.2 in 1990, although net farm income was greater in 1990 (44.8 compared to 34.8 for 1995). Total area of farm land under irrigation in 1992 was 49,404,000 acres. Water consumption was 137,000m. gallons a day in 1990.

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76 counties outside the Valley are served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville (TN). Under a policy announced in Dec. 1994 the TVA is subject to a debt ceiling of \$30,000m. Total debt in 1994 was \$26,000m.

The primary task of the TVA was the multipurpose development of the Tennessee River for flood control, navigation, and electric power production. In 1994 3 nuclear reactors were in operation.

The TVA has also contributed to controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and the creation of potential job-producing enterprises.

INDUSTRY. The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1987 and from the Annual Survey of Manufactures for years in which no census was taken.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the USA.

The iron and steel industry in 1994 employed 92,587 wage-earners who worked an average of 42 hours per week and earned an average of \$21.96 per hour: total employment costs were \$6,744m. and total employment costs for 33,031 salaried employees were \$2,466m.

Labour. The Bureau of Labor Statistics estimated that in 1997 the civilian labour force was 136,297,000 (67.1% of those 16 years and over), of whom 129,558,000 were employed and 6,739,000 (4.9%) were unemployed. Employment by industry in 1997:

A total of 37 strikes and lockouts of 1,000 workers or more occurred in 1996, involving 273,000 workers and 4.9m. idle days; the number of idle days was 0.02% of the year's total working time of all workers.

The Federal Mediation and Conciliation Service, the National Labor Relations Board, the National Mediation Board and the National Railroad Adjustment Board provide formal machinery for the settlement of labour disputes.

On 1 Sept. 1997 the federal hourly minimum wage was raised from \$4.75 to \$5.15 an hour, the first time it had been raised since 1991.

Labour relations are legally regulated by the National Labor Relations Act, amended by the Labor-Management Relations (Taft-Hartley) Act, 1947 as amended by the Labor-Management Reporting and Disclosure Act, 1959, again amended in 1974, and the Railway Labor Act of 1926, as amended in 1934 and 1936.

Trade Unions. The labour movement comprises 78 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. The American Federation of Labor and the Congress of Industrial Organizations merged into one organization, the AFL-CIO, in 1955, with 13m. members in 1995. Its *President* is John Sweeney, elected 1995.

Unaffiliated or independent labour organizations, inter-state in scope, had an estimated total membership excluding all foreign members (1993) of about 3m.

Labour organizations represented 16.2% (18.2m.) of wage and salary workers in 1996; a newly-developing 'associative unionism' is not based on the workplace, but provides representation for employees which is portable throughout their work history; 14.5% (16.3m.) were actual members of unions. In 1996 38% of employees in the public sector, and 10% in the private sector, were members of unions. Strongholds of organized labour are, industry-wise, iron and steel, railways, coal mining and car building; region-wise, East coast cities and the mid-West industrial belt.

FOREIGN ECONOMIC RELATIONS. The North American Free Trade Agreement (NAFTA) between the USA, Canada and Mexico was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. The UK has had 'most-favoured-nation' status since 1815. In 1994, foreign investment totalled \$47,200m., the leading investor still being the United Kingdom.

Tourism. In 1995 the USA received 43,318,000 visitors, of whom 17,612,000 were classified as tourists. Visitors spent US\$61,137m. (excluding transportation paid to US international carriers). Of the 43,318,000 visitors, 14,663,000 were from Canada and 8,083,000 from Mexico. Tourists came mainly from Europe (7.01m., of which UK 2.34m. and Germany 1.55m.), Japan (3.99m.), Mexico (0.89m.) and the Caribbean (0.83m.). Expenditure by US travellers in foreign countries for 1995 was US\$45,855m. (excluding transportation paid to foreign flag international carriers).

COMMUNICATIONS

Roads. On 31 Dec. 1994 the total public road mileage (rural and urban), amounted to 3,906,000 miles, of which 3,566,000 miles were surfaced roads. The total mileage cited includes about 690,000 miles of rural roads under control of the states, about 2,229,000 miles of local rural roads, about 174,000 miles of federal park and forest roads, and 814,000 miles of urban roads. Expenditure on highway administration and maintenance amounted to \$89,258m. in 1994.

Motor vehicles registered in 1994: 198,045,000, including 133,930,000 automobiles, 670,000 buses, 56,718,000 trucks and 3,718,000 motorcycles. There were

177.43m. licensed drivers in 1995 (87.2m. females). There were 41,800 deaths in road accidents in 1995.

Railways. Freight service is provided by 12 major independent railroad companies and several hundred smaller operators. Long-distance passenger trains are run by the National Railroad Passenger Corporation (Amtrak), which is federally-assisted. Amtrak was set up in 1971 to maintain a basic network of long-distance passenger trains, and is responsible for almost all non-commuter services over some 38,000 route-km, of which it owns only 1,256 km (555 km electrified). Outside the major conurbations, there are almost no regular passenger services other than those of Amtrak, which carried 20.3m. passengers in 1995.

Civil Aviation. There are international airports at Anchorage, Atlanta (Hartsfield), Baltimore (Baltimore/Washington), Boston (Logan), Chicago (O'Hare), Cincinnati (Northern Kentucky), Cleveland (Hopkins), Dallas/Fort Worth, Denver (Stapleton), Detroit Metropolitan, Honolulu, Houston Intercontinental, Kansas City, MO, Las Vegas (McCarran), Los Angeles, Miami, Minneapolis/St Paul, New Orleans, New York (John F. Kennedy), New York (La Guardia), New York (Newark), Orlando, Philadelphia, Phoenix (Sky Harbor), Pittsburgh, Portland, St Louis (Lambert), Salt Lake City, San Diego (Lindbergh Field), San Francisco, Seattle-Tacoma, Tampa, Washington DC (Dulles) and Washington DC (National).

The leading airports in 1995 on the basis of aircraft departures completed were Dallas/Fort Worth International (382,000); Chicago, O'Hare (381,000); Atlanta, Hartsfield International (346,000). The leading domestic routes for 1995 were New York to/from Los Angeles (2,991,060 passengers), New York to/from Chicago (2,981,610) and Honolulu to/from Kahului, Maui (2,761,470).

US flag carriers in scheduled service had 547.4m. revenue passengers enplaned in 1995, with 540,400m. revenue passenger miles.

Shipping. On 1 Oct. 1997 the US merchant marine included 478 sea-going vessels of 1,000 gross tons or over, with an aggregate 16.8m. DWT. This includes 162 tankers of 9.7m. DWT.

On 1 Oct. 1994, US merchant ocean-going vessels were employed as follows: Active, 345 of 15.2m. DWT, of which 132 of 4.7m. DWT were foreign trade, 129 of 7.3m. DWT in domestic trade and 24 of 1.8m. DWT in foreign to foreign operations. Inactive vessels totalled 4.7m. DWT; 26 of 1.4m. DWT privately owned were laid up and 136 of 2.7m. DWT were Government-owned National Defense reserve fleet. Of the total vessels in the US fleet, 333 of 15.1m. DWT were privately owned.

US exports and imports carried on dry cargo and tanker vessels in 1994 totalled 899.1m. long tons, of which 35m. long tons were carried in US flag vessels. In 1993, 54,838 vessels entered, and 53,637 cleared, all US ports.

Telecommunications. The US Postal Service superseded the Post Office Department on 1 July 1971.

Postal business for the years ended 30 Sept. included the following items:

	1993	1994	1995	1996

Regional private companies formed from the American Telephone and Telegraph Co. after its dissolution in 1995 ('Baby Bells') operate the telephone, telegraph, telex and electronic transmission services system at the national and local levels. Total domestic access lines in 1994, 157m. In 1996 there were 32.5m. mobile telephone users.

Legislation on the media and telecommunications of 1996 coming into force on 31 March 1999 deregulates the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

The licensing agency for broadcasting stations is the Federal Communications

Commission, an independent federal body composed of 5 Commissioners appointed by the President. Its regulatory activities comprise: Allocation of spectrum space; consideration of applications to operate individual stations; and regulation of their operations. In 1994 there were 10,022 commercial radio stations, 1,145 commercial TV stations, 367 non-commercial TV stations and 11,230 cable TV systems. Programming is targeted to appeal to a given segment of the population or audience taste. There are 5 national TV networks (3 commercial; colour by NTSC) with 46 national cable networks. All major cities have network affiliates and additional commercial stations.

Broadcasting to countries abroad is conducted by The Voice of America, which functions under a 7-member council nominated by the President and reviewed by Congress. In 1996 Voice of America had 126m. listeners.

In 1993 there were 520m. radio and 215m. TV receivers in use.

Cinemas. In Jan. 1994 there were 25,737 screens (25,105 in 1993), including 850 drive-ins. Attendance in 1993 was 1,244m. (1,173m. in 1992). 431 full-length films were made in 1993.

Press. In 1995 there were 1,533 daily papers with an average circulation of 58,200,000. These included 656 morning papers, 891 evening papers and 888 Sunday papers (circulation, 61,200,000). In 1996, 58.2m. newspapers were sold on average every day. 40,584 book titles were published in 1994.

SOCIAL INSTITUTIONS

Justice. Legal controversies may be decided in two systems of courts: The federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of 9 justices appointed by the President who receive salaries of \$164,100 a year (the Chief Justice, \$171,500), meets from Oct. until June every year. For the term ended June 1996 it disposed of 6,692 cases, deciding 129 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 13 (in 11 circuits composed of 3 or more states and 1 circuit for the District of Columbia and 1 Court of Appeals for the Federal Circuit); the 179 circuit judges receive salaries of \$141,700 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1997, 53,742 appeals were filed in the courts of appeals, including 1,417 in the Federal Circuit.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, 1 in the District of Columbia and 1 each in the Commonwealth of Puerto Rico and the Territories of the Virgin Islands, Guam and the Northern Marianas. Each state has at least 1 US district court, and 3 states have 4 apiece. Each district court has from 1 to 28 judgeships. There are 649 US district judges (\$133,600 a year), who received 265,151 civil cases and 68,307 criminal defendants from 1 July 1996 to 30 June 1997.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The US Court of Federal Claims (16 judges at \$133,600 a year) decides claims for money damages against the federal government in a wide

variety of matters; the Court of International Trade (9 judges at \$133,600) determines controversies concerning the classification and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to judges in the Territories, who hold their offices for a term of 10 years or to judges of the US Court of Federal Claims. The judges may retire with full pay at the age of 70 years if they have served a period of 10 years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake. 11 US judges up to 1997 have been involved in impeachment proceedings, of whom 7 were convicted and removed from office.

In 1997, of the 265,151 civil cases filed in the district courts, 167,807 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 52,710 involved personal injury or property damage claims; 38,858 dealt with contracts; and 5,761 were actions concerning real property.

Among the 69,052 criminal defendants (48,682 criminal cases) filed in 1997 in the district courts, 25,090 persons were charged with alleged infractions of drug laws; 11,832 persons were charged with miscellaneous general offences; 11,664 with embezzlement and fraud; 4,089 for larceny and theft; 7,016 were charged with immigration violations; 1,763 with robbery; and 1,663 with forgery and counterfeiting and fraud.

Persons convicted of federal crimes may be fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison, or confined in prison with a period of supervised release to follow, also under the supervision of probation officers of the federal courts. Federal prisoners are confined in 87 institutions incorporating various security levels that are operated by the Bureau of Prisons. Prisoners confined in Federal and State Prisons at June 1995, numbered 1,104,074 (6.1% women).

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the USA, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. The lowest tribunals are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving limited amounts of damages.

There were no executions from 1968 to 1976. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value. The death penalty was reinstated by the Supreme Court in 1976, but has not been authorized in Alaska, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, North Dakota, Rhode Island, Vermont, West Virginia and Wisconsin.

Education. Elementary and secondary education is mainly a state responsibility. Each state and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are 3 structural patterns in common use; the K8-4 plan, meaning kindergarten plus 8 elementary grades followed by 4 high school grades; the K6-3-3 plan, or kindergarten plus 6 elementary grades followed by a 3-year junior high school and a 3-year senior high school; and the K5-3-4 plan, kindergarten plus 5 elementary grades

followed by a 3-year middle school and a 4-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. Some states also have 2-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 14,883 in school year 1995-96), each with a board of education (usually 3 to 9 members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory from age 7 to 16.

'Charter schools' are legal entities outside the school boards administration. They retain the basics of public school education, but may offer unconventional curricula and hours of attendance. Founders may be parents, teachers, public bodies or commercial firms. Organization and conditions depend upon individual states' legislation. The first charter schools were set up in Minnesota in 1991.

The Census Bureau estimates that in Nov. 1979 only 1m. or 0.6% of the 170m. persons who were 14 years of age or older were unable to read and write; in 1930 the percentage was 4.8. In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than 5 years of elementary schooling; for persons 25 years of age or over this percentage was 1.8 in March 1996 (for the Black population it was 2.3%); it was 0.9% for white and 0.4% for Blacks in the 25-29-year-old group. The Bureau reported that in March 1996 81.7% of all persons 25 years old and over had completed 4 years of high school or more, and that 23.6% had completed 4 or more years of college. In the age group 25 to 29, 87.3% had completed 4 years of high school or more, and 27.1% had completed 4 or more years of college.

In the autumn of 1995, 14,262,000 students (7,919,000 women) were enrolled in 3,706 colleges and universities; 2,169,000 were first-time students. About 34.3% of the population between the ages of 18 and 24 were enrolled in colleges and universities.

Public elementary and secondary school revenue is supplied from the county and other local sources (46.4% in 1994-95), state sources (46.8%) and federal sources (6.8%). In 1996-76 expenditure for public elementary and secondary education totalled about \$313,500m., including \$281000m. for current operating expenses, \$25,500m. for capital outlay and \$7,000m. for interest on school debt. The current expenditure per pupil in average daily attendance was about \$6,560. The total cost per pupil, also including capital outlay and interest, amounted to about \$7,370. Estimated total expenditures, for private elementary and secondary schools in 1996-97 were about \$26,200m. In 1996-97 college and university spending totalled about \$224,500m., of which about \$142,600m. was spent by institutions under public control. The federal government contributed about 12% of total current-fund revenue; state governments, 23%; student tuition and fees, 28%; and all other sources, 37%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. Federal support for vocational education in 1995-96 amounted to about \$1,087m. Many public high schools offer vocational courses in addition to their usual academic programmes.

¹ Schools with both elementary and secondary grades are counted twice, once with the elementary and once with the secondary schools. ² Data for 1993-94.

Most of the private elementary and secondary schools are affiliated with religious denominations. In 1995–96 there were 7,022 Roman Catholic elementary schools with 1·88m. pupils and 118,800 teachers, and 1,228 secondary schools with 607,000 pupils and 48,000 teachers.

During the school year 1996–97 high-school graduates numbered about 2,564,000 (of whom about 2,298,000 were from public schools). Institutions of higher education conferred about 1,183,000 bachelor's degrees during the year 1996–97, 529,000 associate's degrees; 410,000 master's degrees; 44,000 doctorates; and 77,000 first professional degrees. In 1995–96 the federal government provided \$6,164m. in grants and work-study programmes and \$21,541m. in loans and other financial assistance to students.

During the academic year 1995–96, 458,000 foreign students were enrolled in American colleges and universities. The countries with the largest numbers of students in American colleges were: Japan, 46,300; China, 42,500; South Korea, 37,100; India, 30,600; Taiwan, 30,500; Canada, 23,000.

In 1995–96, 89,200 US students were enrolled at colleges and universities abroad. The country attracting the most students from the USA was the United Kingdom, with 20,100.

School enrolment, Oct. 1995, embraced 96·0% of the children who were 5 and 6 years old; 98·9% of the children aged 7–13 years; 98·9% of those aged 14–15, 93·6% of those aged 16–17 and 59·4% of those aged 18–19.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 1997 at all of the country's elementary, secondary and higher educational institutions (public and private) at 66·3m. (65·4m. in the autumn of 1996).

The number of teachers in regular public and private elementary and secondary schools in the autumn of 1997 was expected to increase slightly to 3,071,000. The average annual salary of the public school teachers was \$38,550 in 1996–97.

Health. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete training is 8 years beyond the secondary school with up to 3 or more years of additional graduate training. Certification as a specialist may require between 3 and 5 more years of graduate training plus experience in practice. In Jan. 1994 the estimated number of active physicians (MD and DO—in all forms of practice) in the USA, Puerto Rico and outlying US areas was 684,400.

Active dentists in Dec. 1994 numbered 190,000.

Number of hospitals listed by the American Hospital Association in 1995 was 6,291, with 1,080,601 beds and 33,282,124 admissions during the year; average daily census was 709,746. Of the total, 299 hospitals with 77,079 beds were operated by the federal government; 1,370 with 157,270 beds by state and local government; 3,029 with 609,729 beds by non-profit organizations (including church groups); 752 with 105,737 beds are investor-owned. The categories of non-federal hospitals are 5,220 short-term general and special hospitals with 874,286 beds; 112 non-federal long-term general and special hospitals with 18,765 beds; 657 psychiatric hospitals with 110,257 beds; 3 tuberculosis hospitals with 214 beds.

Personal health-care costs in 1994 totalled \$832,500m., distributed as follows: Hospital care, \$341,700m.; doctors, \$182,700m.; nursing-home care, \$74,200m.; drugs, \$79,000m.; dentists, \$40,000m.; medical durables, \$13,200m.; home health care, \$24,200m.; other personal health care, \$20,900m.

Welfare. Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally and for maternal and child-health and child-welfare services). Legislation of Aug. 1996 began the transfer of aid administration back to the states.

and also restricts the provision of aid to a maximum period of 5 years, and abolishes benefits to immigrants (both legal and illegal) for the first 5 years of their residence in the USA. The Social Security Administration (formerly part of the Department of Health and Human Services but an independent agency since March 1995) has responsibility for the programmes—old-age, survivors and disability insurance and supplemental security income. The Administration for Children and Families (ACF), an agency of the Department of Health and Human Services, is responsible for federal programmes which promote the economic and social well-being of families, children, individuals and communities. ACF has federal responsibility for the following programmes: The Aid to Families with Dependent Children Program (providing cash assistance to family and children in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands); low income energy assistance; Head Start; child care; child protective services; and a community services block grant. The ACF also has federal responsibility for social service programmes for children, youth, native Americans and persons with developmental disabilities.

The Administration of Aging (AOA), an agency of the Department of Health and Human Services, serves older persons and their families with social, nutritional, education, and aging-related research and demonstration projects through the administration of the Older Americans Act. In addition, AOA is the focal point for aging policy within the Federal government. The Assistant Secretary for Aging is the primary advocate for the elderly in the USA. In 1995–96, \$830m. was expended through a network of 57 State Units on Aging, 661 Area Agencies on Aging, 228 tribal organizations, 6,000 senior centres, and more than 27,000 service providers. More than 250m. meals were also provided through this programme.

The Health Care Financing Administration, an agency of the Health and Human Services Department, has federal responsibility for health insurance for the aged and disabled. Unemployment insurance is the responsibility of the Department of Labor.

In 1994 an average of 14.2m. persons (adults and children) were receiving payments under Aid to Families with Dependent Children (average monthly payment, \$376 per family). Total payments under Aid to Families with Dependent Children were \$22,800m. in 1994. The role of Child Support Enforcement is to ensure that children are supported by their parents. Money collected is for children who live with only one parent because of divorce, separation or out-of-wedlock birth. In 1993, nearly \$9,000m. was collected on behalf of these children.

In 1994, federal appropriations for the social services block grant amounted to \$2,800m. In addition, 1994 federal appropriations for child care totalled \$893m. Included in this amount were \$109m. for persons with developmental disabilities and \$38.6m. for native Americans.

The Social Security Act provides for protection against the cost of medical care through Medicare, a two-part programme of health insurance for people age 65 and over, people of any age with permanent kidney failure, and for certain disabled people under age 65 who receive Social Security disability benefits. In 1995, payments totalling \$116,400m. were made under the hospital portion of Medicare on behalf of 37m. people. During the same period, \$65,000m. was paid under the voluntary medical insurance portion of Medicare on behalf of 36m. people.

In 1995, 141m. persons worked in employment covered by old-age, survivors and disability insurance.

In 1996 about 43.3m. beneficiaries were on the rolls, and the average benefit paid to a retired worker (not counting any benefits paid to his/her dependants) was about \$724 per month. Full retirement benefits are now payable at age 65, with reduced benefits available as early as age 62. Beginning in 2000, the age for full retirement benefits will gradually increase until it reaches 67 in 2027.

In Dec. 1995, 6.5m. persons were receiving Supplementary Security Income payments, including 1.4m. persons aged 65 or over and over 5.1m. disabled or blind persons, including nearly 1m. children. Payments, including supplemental amounts from various states, totalled \$27,600m. in 1995.

Other block grants awarded by the Administration for Children and Families included \$385.5m. for community services block grant programmes for 1993–94, and \$1,300m. for the low income home energy assistance programme (LIHEAP).

During 1989, the Public Health Services awarded a total of \$554.3m. for maternal and child health services, \$465.3m. as block grants to the States, \$82.1m. for special projects of regional and national significance, and \$6.9m. for genetic screening. Other block grants awarded by the Public Health Service in 1988 included \$88m. for preventive health; \$487m. for alcohol, drug abuse and mental health; \$155m. for alcohol and drug abuse treatment and rehabilitation. In 1989, \$414.8m. was awarded for community health centres; \$45.6m. for migrant health centres; \$20.6m. for efforts to reduce infant mortality; \$3.2m. for black lung clinics; and \$135.1m. for family planning.

See also the section 'State and Local Government' under UNITED STATES. Constitution and Government.

Against the names of the Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican.

ALABAMA

KEY HISTORICAL EVENTS. The first European explorers were Spanish, including Hernando de Soto in 1540, but the first permanent European settlement was French, as part of French Louisiana after 1699. During the 17th and 18th centuries the British, Spanish and French all fought for control of the territory; it passed to Britain in 1763 and thence to the US in 1783, except for a Spanish enclave on Mobile Bay, which lasted until 1813. Alabama was organized as a Territory in 1817 and was admitted to the Union as a state on 14 Dec. 1819.

The economy was then based on cotton, grown in white-owned plantations by black slave labour imported since 1719. Alabama seceded from the Union at the beginning of the Civil War (1861) and joined the Confederate States of America; its capital Montgomery became the Confederate capital. After the defeat of the Confederacy the state was readmitted to the Union in 1878. Attempts made during the reconstruction period to find a role for the newly-freed black slaves—who made up about 50% of the population—largely failed, and when whites regained political control in the 1870s a strict policy of segregation came into force.

At the same time Birmingham began to develop as an important centre of iron- and steel-making. Most of the state was still rural. In 1915 a boll-weevil epidemic attacked the cotton and forced diversification into other farm produce. More industries developed from the power schemes of the Tennessee Valley Authority in the 1930s.

The black population remained mainly rural, poor and without political power, until the 1960s when confrontations on the issue of civil rights produced reforms.

TERRITORY AND POPULATION. Alabama is bounded in the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico and west by Mississippi. Land area, 50,750 sq. miles (131,443 sq. km). Census population, 1 April 1990, 4,040,587 (60.4% urban), an increase of 3.87% since 1980. Population estimate (1995), 4,252,982 (48.0% male). Births, 1995, 60,264 (14.7 per 1,000 population); deaths, 42,321 (10.3); infant deaths (under 1 year), 592 (9.8 per 1,000 live births); marriages, 42,234 (10.3); divorces, 25,813 (6.3).

Population in 5 census years was:

	White	Black	Indian	Asiatic	Total	Per sq. mile
1930	1,700,844	944,834	465	105	2,646,248	51.3
1960	2,283,609	980,271	1,726	915	3,266,521	64.0
			<i>All others</i>			
1970	2,533,831	903,467		6,867	3,444,165	66.7

ALASKA

KEY HISTORICAL EVENTS. Discovered in 1741 by Vitus Bering, its first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitk was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for \$7.2m. Settlement was boosted by gold workers in the 1880s. In 1884 Alaska became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment.

During the Second World War the Federal Government acquired large areas for defence purposes and for the construction of the strategic Alaska Highway. In the 1950s oil was found. Alaska became the 49th state of the Union on 3 Jan. 1959.

In the 1970s new oilfields were discovered and the Trans-Alaska pipeline was opened in 1977. The state obtained most of its income from petroleum by 1985.

Questions of land-use predominate; there are large areas with valuable mineral resources, other large areas held for the native peoples and some still held by the Federal Government. The population increased by over 400% between 1940 and 1980.

TERRITORY AND POPULATION. Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. The land area is 570,374 sq. miles (1,477,268 sq. km). Census population, 1 April 1990, was 550,043 (67.5% urban), including military personnel, an increase of 37.4% over 1980. Population estimate (1995), 603,617. Births, 1992, 11,714 (20 per 1,000 population); deaths, 2,317 (3.9); infant deaths, 99 (9.8 per 1,000 live births); marriages, 5,771 (9.8); divorces, 3,639 (6.2).

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>All Others</i>	<i>Total</i>	<i>Per sq. mile</i>
1950	92,808	. . .	35,835	128,643	0.23
1960	174,649	. . .	51,518	226,167	0.40
1970	236,767	8,911	54,704	300,382	0.53
1980	309,728	13,643	78,480	401,851	1.00
1990	415,492	22,451	112,100	550,043	1.00

Of the total population in 1990, 52.7% were male, 67.5% were urban and 68.7% were aged 18 years or over.

The largest city is in the borough of Anchorage, which had a 1990 census population of 226,338 and an estimated 1994 population of 254,000. Census populations of the other 13 boroughs, 1990: Aleutians East, 2,464; Bristol Bay, 1,410; Fairbanks North Star, 77,720; Haines, 2,117; Juneau, 26,751; Kenai Peninsula, 40,802; Ketchikan Gateway, 13,828; Kodiak Island, 13,309; Lake and Peninsula, 1,668; Matanuska-Susitna 39,683; North Slope, 5,979; Northwest Arctic, 6,113; Sitka, 8,588. In 1995 there were 16 boroughs and 145 incorporated cities.

CLIMATE. Anchorage. Jan. 12°F (-11.1°C), July 57°F (13.9°C). Annual rainfall 15" (371 mm). Fairbanks. Jan. -11°F (-23.9°C), July 60°F (15.6°C). Annual rainfall 12" (300 mm). Sitka. Jan. 33°F (0.6°C), July 55°F (12.8°C). Annual rainfall 87" (2,175 mm). Alaska belongs to the Pacific Coast climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT. The state has the right to select 103.55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and

wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for 4 years) and a House of Representatives of 40 members (elected for 2 years). The state sends 1 representative to Congress. The franchise may be exercised by all citizens over 18.

The capital is Juneau.

In the 1996 presidential election Dole polled 101,234 votes; Clinton, 66,508; Perot, 21,536.

Governor: Tony Knowles (D.), 1995–98 (\$81,648).

Lieut.-Governor: Fran Ulmer (D.) (\$76,188).

ECONOMY

Budget. Total state government revenue for the year ended Dec. 1994 (Annual Financial Report figures) was \$6,203m. Total expenditure was \$5,752m.

In 1976 a Permanent Fund was set up for the deposit of at least 25% of all mineral-related revenue; total assets at 30 June 1994, \$14,977m.

General obligation bonds, 30 June 1994, \$178m.

Per capita income (1995) was \$24,182.

NATURAL RESOURCES

Oil and Gas. Commercial production of crude petroleum began in 1959 and by 1961 had become the most important mineral by value. Production: 1991, 672m. bbls, value \$2,572m.; 1992, 627m. bbls, value \$2,624m.; 1994, 569m. bbls. Oil comes mainly from Prudhoe Bay, the Kuparuk River field and several Cook Inlet fields. Natural gas (liquid) production, 1991, 20.4m. bbls; 1992 production, 26.91m. bbls; 1994 production, 19.3m. bbls. Revenue to the state from petroleum in 1993 was \$2,684.8m. (87% of general fund revenues). General fund unrestricted revenues, 1993: Severance taxes, 33%; oil and gas royalties, 25%; investment earnings, 2%; other oil and gas, 27%; non-petroleum, 13%.

Oil from the Prudhoe Bay Arctic field is now carried by the Trans-Alaska pipeline to Prince William Sound on the south coast, where a tanker terminal has been built at Valdez.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the south-eastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 1994 about 0.93m. acres was farmland and there were 520 farms and ranches with annual sales of \$1,000 or more; crops covered 28,940 acres. In 1991 the average farm had 1,768 acres. At 1 Jan. 1995 there were 9,900 cattle and calves and 1,700 sheep and lambs; at 1 Dec. 1994, 2,000 hogs and pigs and 2,000 poultry.

The interior forest covers 115m. acres; more than 13m. acres are considered commercial forest, of which 3.4m. acres are in designated parks or wilderness and unavailable for harvest. The coastal rain forests provide the bulk of commercial timber volume; of their 13.6m. acres, 7.6m. acres support commercial

stands, of which 1.9m. acres are in parks or wilderness and unavailable for harvest. In 1992, 590m. bd ft of timber were harvested from private land for a total value of \$548.9m., and in 1993 9.38m. bd ft from state land for \$342.6m.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of \$138m. The greater portion of it, because it lies in Canada, is maintained by Canada.

Railways. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service operates seasonally). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use. A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Civil Aviation. Commercial passengers by air from Alaska's largest international airports Anchorage and Fairbanks in fiscal year 1994 numbered 4,358,437 at Anchorage and 721,496 at Fairbanks. General aviation aircraft in the state per 1,000 population is about 10 times the US average.

Shipping. Regular shipping services to and from the US are furnished by 2 steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC Anchorage is the main port.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Bellingham, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

ARIZONA

KEY HISTORICAL EVENTS. Spaniards looking for sources of gold or silver entered Arizona in the 16th century, finding there nomadic tribes of Navajo and Apache. The first Spanish Catholic mission was founded in 1692 by Father Eusebio Kino, settlements were made in 1752 and a Spanish army headquarters was set up at Tucson in 1776. The area was governed by Mexico after the collapse of Spanish colonial power. Mexico ceded it to the USA after the Mexican-American war (1848). Arizona was then part of New Mexico; the Gadsen Purchase (of land south of the Gila River) was added to it in 1853. The whole was organized as the Arizona Territory on 24 Feb. 1863.

Years of war between Indian and immigrant populations began when troops were withdrawn to serve in the Civil War. The Navajo surrendered in 1865, but the Apache continued to fight a series of wars, under Geronimo and other leaders, until 1886. After the wars the area settled to Mexican-style ranching. Arizona was admitted to the Union as the 48th state in 1912.

In the 20th century, and especially after 1920, irrigated farming began to replace ranching as the main activity. Large areas, however, were retained as Indian reservations and other large areas by the Federal Government to protect the exceptional desert and mountain landscape. In recent years this landscape and the Indian traditions have been used to attract tourist income.

TERRITORY AND POPULATION. Arizona is bounded north by Utah, east by New Mexico, south by Mexico, west by California and Nevada. Area, 114,006 sq. miles (295,276 sq. km), including 364 sq. miles (943 sq. km) of inland water. Of the total area in 1992, 28% was Indian Reservation, 17% was in individual or corporate ownership, 19% was held by the US Bureau of Land Management, 15% by the US Forest Service, 13% by the State and 8% by others. Census population on 1 April 1990 was 3,665,228 (87.5% urban), an increase of 34.92% over 1980. Population estimate (1996), 4,462,300. ARKANSAS

KEY HISTORICAL EVENTS. In the 16th and 17th centuries, French and Spanish explorers entered Arkansas, finding there tribes of Chaddo, Osage and Quapaw. The first European settlement was French, at Arkansas Post in 1686, and the area became part of French Louisiana. The US bought Arkansas from France as part of the Louisiana Purchase in 1803, it was organized as a Territory in 1819 and entered the Union on 15 June 1836 as the 25th state.

The eastern plains by the Mississippi were settled by white plantation-owners who grew cotton with black slave labour. The rest of the state attracted a scattered population of small farmers. The plantations were the centre of political power. Arkansas seceded from the Union in 1861 and joined the Confederate States of America. At that time the slave population was about 25% of the total.

In 1868 the state was readmitted to the Union. Attempts to integrate the black population into state life achieved little, and a policy of segregation was rigidly adhered to until the 1950s.

In 1957 federal law ordered that segregation in a public high school must end. The state governor ordered the state militia to prevent desegregation; there was rioting, and federal troops were called to Little Rock, the capital, to restore order. School segregation ended within the following 10 years.

The main industrial development followed the discovery of large reserves of bauxite.

CALIFORNIA

KEY HISTORICAL EVENTS. There were many small Indian tribes, but no central power, when the area was discovered in 1542 by the Spanish navigator Juan Cabrillo. The Spaniards did not begin to establish missions until the 18th century, when the Franciscan friar Junipero Serra settled at San Diego in 1769. The missions became farming and ranching villages with large Indian populations. When the Spanish empire collapsed in 1821, the area was governed from newly-independent Mexico.

The first wagon-train of American settlers arrived from Missouri in 1841. In 1846, during the war between Mexico and the USA, Americans in California proclaimed it to be part of the USA. The territory was ceded by Mexico on 2 Feb. 1848 and became the 31st state of the Union on 9 Sept. 1850.

Gold was discovered in 1848–49 and there was an immediate influx of population. The state remained isolated, however, until the development of railways in the 1860s. From then on the population doubled on average every 20 years. The sunny climate attracted fruit-growers, market-gardeners and wine producers. In the early 20th century the bright light and cheap labour attracted film-makers to Hollywood, Los Angeles.

Southern California remained mainly agricultural with an Indian or Spanish-speaking labour force until after the Second World War. Now more than 90% of the

population is urban, with the main manufacture being electronic equipment, much of it for the defence and aerospace industries.

TERRITORY AND POPULATION. Land area, 155,973 sq. miles (403,971 sq. km). Census population, 1 April 1990, 29,760,021 (92.6% urban), an increase of 25.7% over 1980. Population estimate (1996), 31,878,000. Births in 1995 569,000 (17.7 per 1,000 population); deaths, 224,000 (7 per 1,000 population); infant deaths (1990), 4,622 (7.5 per 1,000 live births); marriages (1990), 236,693; divorces (1990), 127,967.

COLORADO

KEY HISTORICAL EVENTS. Spanish explorers claimed the area for Spain in 1706; it was then the territory of the Arapaho, Cheyenne, Ute and other Plains and Great Basin Indians. Eastern Colorado, the hot, dry plains, passed to France in 1802 and then to the USA as part of the Louisiana Purchase in 1803. The rest remained Spanish, becoming Mexican when Spanish power in the Americas ended. In 1848, after war between Mexico and the USA, Mexican Colorado was ceded to the US. A gold rush in 1859 brought a great influx of population, and in 1861 Colorado was organized as a Territory. The Territory officially supported the Union in the Civil War of 1861–65, but its settlers were divided and served on both sides.

Colorado became a state in 1876. Mining and ranching were the mainstays of the economy. In the 1920s the first large projects were undertaken to exploit the Colorado River. The Colorado River Compact was agreed in 1922, and the Boulder Dam (now Hoover Dam) was authorized in 1928. Since then irrigated agriculture has overtaken mining as an industry and is as important as ranching. In 1945 the Colorado-Big Thompson project diverted water by tunnel beneath the Rocky Mountains to irrigate 700,000 acres (284,000 ha) of northern Colorado. Now more than 80% of the population is urban, and most engaged in trade and service industries, especially tourism.

TERRITORY AND POPULATION. Colorado is bounded north by Wyoming, north-east by Nebraska, east by Kansas, south-east by Oklahoma, south by New Mexico and west by Utah. Land area, 103,729 sq. miles (268,658 sq. km).

Census population, 1 July 1995, was 3,746,607 (83·1% urban). Population estimate (1996), 3,821,500. Births, 1995, were 53,748 (14·5 per 1,000 population); deaths, 24,898 (6·6); infant deaths, 352 (6·5 per 1,000 live births); marriages, 34,296 (9·2); divorces, 18,844.

CONNECTICUT

KEY HISTORICAL EVENTS. Formerly territory of Algonquian-speaking Indians, Connecticut was first colonized by Europeans during the 1630s, when English Puritans moved there from Massachusetts Bay. Settlements were founded in the Connecticut River Valley at Hartford, Saybrook, Wethersfield and Windsor in 1635. They formed an organized commonwealth in 1637. A further settlement was made at New Haven in 1638 and was united to the commonwealth under a royal charter in 1662. The charter confirmed the commonwealth constitution, drawn up by mutual agreement in 1639 and called the Fundamental Orders of Connecticut.

The area was agricultural and its population of largely English descent until the early 19th century. After the War of Independence Connecticut was one of the original 13 states of the Union. Its state constitution came into force in 1818 and survived with amendment until 1965 when a new one was adopted.

In the early 1800s a textile industry was established using local water power. By 1850 the state had more employment in industry than in agriculture, and immigration from the continent of Europe (and especially from southern and eastern Europe) grew rapidly throughout the 19th century. Some immigrants worked in whaling and iron-mining, both now extinct, but most sought industrial employment. Settlement was spread over a large number of relatively small cities, with no single dominant culture.

Yale University was founded at New Haven in 1701. The US Coastguard Academy was founded in 1876 at New London, a former whaling port.

TERRITORY AND POPULATION. Connecticut is bounded in the north by Massachusetts, east by Rhode Island, south by the Atlantic and west by New York. Land area, 4,844 sq. miles (12,547 sq. km).

Births (1993) were 46,658 (14.1 per 1,000 population); deaths, 28,905 (8.9); infant deaths (1990), 398 (7.9 per 1,000 live births); marriages, 26,046 (15.8); divorces, 11,617 (7.1).

DELAWARE

KEY HISTORICAL EVENTS. Delaware was the territory of Algonquian-speaking Indians who were displaced by European settlement in the 17th century. The first settlers were Swedes who came in 1638 to build Fort Christina (now Wilmington), and colonize what they called New Sweden. Their colony was taken by the Dutch from New Amsterdam in 1655. In 1664 the British took the whole New Amsterdam colony, including Delaware, and called it New York.

In 1682 Delaware was granted to William Penn, who wanted access to the coast for his Pennsylvania colony. Union of the two colonies was unpopular, and Delaware gained its own government in 1704, although it continued to share a royal governor with Pennsylvania until the War of Independence. Delaware then became one of the 13 original states of the Union and the first to ratify the federal constitution (on 7 Dec. 1787).

The population was of Swedish, Finnish, British and Irish extraction. The land was low-lying and fertile, and the use of slave labour was legal. There was a significant number of black slaves, but Delaware was a border state during the Civil War (1861–65) and did not leave the Union.

The main 19th century immigrants were European Jews, Poles, Germans and Italians. The north became industrial and densely populated, becoming more so after the Second World War with the rise of the petrochemical industry. Industry in general profited from the opening of the Chesapeake and Delaware Canal in 1829; it was converted to a toll-free deep channel for ocean-going ships in 1919.

TERRITORY AND POPULATION. Delaware is bounded north by Pennsylvania, north-east by New Jersey, east by Delaware Bay, south and west by Maryland. Land area 1,982 sq. miles (5,133 sq. km). Births in 1995, 10,260 (14.3 per 1,000 population); deaths, 6,281 (8.6); infant deaths, 79 (8.9 per 1,000 live births); marriages, 5,378 (7.4); divorces, 3,175 (4.8).

Population in 5 census years was:

DISTRICT OF COLUMBIA

KEY HISTORICAL EVENTS. The District of Columbia, organized in 1790, is the seat of the Government of the USA, for which the land was ceded by the states of Maryland and Virginia to the USA as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801. In 1846 the land ceded by Virginia (about 33 sq. miles) was given back.

TERRITORY AND POPULATION. The District forms an enclave on the Potomac River, where the river forms the south-west boundary of Maryland. The land area of the District of Columbia is 61 sq. miles (159 sq. km).

Census population, 1 April 1990, was 606,900 (100% urban), a decrease of 4.82% from that of 1980. Metropolitan statistical area of Washington, DC-Md-Va. (1980), 3m. Density of population in the District, 1990, 9,884 per sq. mile. Population estimate (1995), 554,000. Births, 1993, in the District were 10,629 (18.4 per 1,000 population); deaths, 7,000 (11.6); infant deaths (1991), 183 (18.7 per 1,000 live births); marriages, 5,031 (8.6); divorces, 2,290 (3.9).

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Chinese and Japanese</i>	<i>Total</i>	<i>Per sq. mile</i>

CLIMATE. Washington. Jan. 34°F (1.1°C), July 77°F (25°C). Annual rainfall 43" (1,064 mm). The District of Columbia belongs to the Atlantic Coast climate zone (see UNITED STATES: Climate).

GOVERNMENT. Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of 3 commissioners, of whom 2 were appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. The Commission form of government was abolished in 1967 and a new Mayor Council instituted with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or

supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections. The District has 2 delegates in Congress who may vote in committees but not on the House floor. In the 1996 presidential election Clinton polled 152,031 votes; Dole, 16,637; Perot, 3,479.

BUDGET. The District's revenues are derived from a tax on real and personal property, sales taxes, taxes on corporations and companies, licences for conducting various businesses and from federal payments.

The District of Columbia has no bonded debt not covered by its accumulated sinking fund.

INDUSTRY. The District's main industries are government service; services; wholesale and retail trade; finance, real estate, insurance, communications, transport and utilities.

TOURISM. About 17m. visitors stay in the District every year and spend about \$1,000m.

COMMUNICATIONS

Roads. Within the District are 340 miles of bus routes. There are 1,102 miles of streets maintained by the District; of these, 673 miles are local streets, 262 miles are major arterial roads. In 1991, 246,390 motor vehicles were registered.

Railways. There is a metro in Washington extending to 130 km, and 2 commuter rail networks.

Civil Aviation. The District is served by 3 general airports; across the Potomac River in Arlington, Va., is National Airport, in Chantilly, Va., is Dulles International Airport and in Maryland is Baltimore–Washington International Airport.

SOCIAL INSTITUTIONS

Justice. The death penalty was declared unconstitutional in the District of Columbia on 14 Nov. 1973. In 1994 there were 10,943 prisoners in state correctional institutions.

The District's Court system is the Judicial Branch of the District of Columbia. It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal Government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Religion. The largest churches are the Protestant and Roman Catholic Christian churches; there are also Jewish, Eastern Orthodox and Islamic congregations.

Education. In 1992 there were 80,092 pupils and 6,014 teachers in public secondary and elementary schools. State and local government expenditure on public schools, 1991, \$721,495,000. Higher education is given through the Consortium of Universities of the Metropolitan Washington Area, which consists of six universities and three colleges: Georgetown University, founded in 1795 by the Jesuit Order; George Washington University, non-sectarian founded in 1821; Howard University, founded in 1867; Catholic University of America, founded in 1887; American University (Methodist) founded in 1893; University of DC, founded 1976; Gallaudet College, founded 1864; Trinity College, founded 1897. There are altogether 18 institutes of higher education.

Social Security. The District government provides primary health care for residents, mainly through its Department of Human Services. In 1994 there were 12 community hospitals with 4,000 beds. There were 78,000 beneficiaries of social security in 1994 including 54,000 retired workers and dependants, 16,000 survivors of deceased workers and 9,000 disabled workers and dependants. FLORIDA

KEY HISTORICAL EVENTS. There were French and Spanish settlements in Florida in the 16th century, of which the Spanish, at St Augustine in 1565, proved permanent. Florida was claimed by Spain until 1763 when it passed to Britain. Although regained by Spain in 1783, the British used it as a base for attacks on American forces during the war of 1812. Gen. Andrew Jackson in 1818 captured Pensacola for the USA. In 1819 a treaty was signed which ceded Florida to the USA with effect from 1821 and it became a Territory of the USA in 1822.

Florida had been the home of the Apalachee and Timucua Indians. After 1770 groups of Creek Indians began to arrive as refugees from the European-Indian wars. These 'Seminoles' or runaways attracted other refugees including slaves, the recapture of whom was the motive for the first Seminole War of 1817-18. A second war followed in 1835-42, when the Seminoles retreated to the Everglades swamps. After a third war in 1855-58 most Seminoles were forced or persuaded to move to reserves in Oklahoma.

Florida became a state in 1845. About half of the population were black slaves. At the outbreak of Civil War in 1861 the state seceded from the Union.

During the 20th century Florida continued to grow fruit and vegetables, but real-estate development (often for retirement) and the growth of tourism and the aerospace industry set it apart from other ex-plantation states.

GEORGIA

KEY HISTORICAL EVENTS. Originally the territory of Creek and Cherokee tribes, Georgia was first settled by Europeans in the 18th century. James Oglethorpe founded Savannah in 1733, intending it as a colony which offered a new start to debtors, convicts and the poor. Settlement was slow until 1783, when growth began in the cotton-growing areas west of Augusta. The Indian population was cleared off the rich cotton land and moved beyond the Mississippi. Georgia became one of the original 13 states of the Union.

A plantation economy developed rapidly, using slave labour. In 1861 Georgia seceded from the Union and became an important source of supplies for the

Confederate cause, although some northern areas never accepted secession and continued in sympathy with the Union during the Civil War. At the beginning of the war 56% of the population were white, descendants of British, Austrian and New England immigrants; the remaining 44% were black slaves.

The city of Atlanta, which grew as a railway junction, was destroyed during the war but revived to become the centre of southern states during the reconstruction period. Atlanta was confirmed as state capital in 1877. Also in Atlanta were developed successive movements for black freedom in social, economic and political life. The Southern Christian Leadership Conference, led by Martin Luther King (assassinated in 1968), was based in King's native city of Atlanta.

TERRITORY AND POPULATION. Georgia is bounded north by Tennessee and North Carolina, north-east by South Carolina, east by the Atlantic, south by Florida and west by Alabama. Births, 1995, were 112,246 (15.8 per 1,000 population); deaths, 58,433 (8.2); infant deaths, 1,058 (9.4 per 1,000 live births); marriages, 61,908 (8.7); divorces and annulments, 37,070 (5.2).

HAWAII

KEY HISTORICAL EVENTS. The islands of Hawaii were settled by Polynesian immigrants, probably from the Marquesas Islands, about AD 400. A second major immigration, from Tahiti, occurred around 800–900. In the late 18th century all the islands of the group were united into one kingdom by Kamehameha I. Western exploration began in 1778, and Christian missions were established after 1820. Europeans called Hawaii the Sandwich Islands. The main foreign states interested were the USA, Britain and France. Because of the threat imposed by their rivalry, Kamehameha III placed Hawaii under US protection in 1851. US sugar-growing companies became dominant in the economy and in 1887 the USA obtained a naval base at Pearl Harbour. A struggle developed between forces for and against annexation by the USA. In 1893 the monarchy was overthrown. The republican government agreed to be annexed to the USA in 1898, and Hawaii became a US Territory in 1900.

The islands and the naval base were of great strategic importance during the Second World War, when the Japanese attack on Pearl Harbour brought the USA into the war.

Hawaii became the 50th state of the Union in 1959. The 19th century plantation economy led to much immigration of workers, especially from China and Japan. At the same time the Hawaiians fell victim to foreign diseases, and their laws, religions and culture were gradually adapted to foreign models.

TERRITORY AND POPULATION. The Hawaiian Islands lie in the North Pacific Ocean, between 18° 56' and 28° 25' N. lat. and 154° 49' and 178° 22' W. long., about 2,090 nautical miles south-west of San Francisco. There are 136 named islands and islets in the group, of which 7 major and 8 minor islands are inhabited. Land area, 6,423 sq. miles (16,636 sq. km). Census population, 1 April 1990, 1,108,229 (51% male, 89% urban), an increase of 14.84% since 1980; density was 172.5 per sq. mile. Estimated population (1996), 1,183,723.

The principal islands are Hawaii, 4,028 sq. miles and population, 1990, 120,317; Maui, 727 and 91,361; Oahu, 600 and 836,231; Kauai, 552 and 50,947; Molokai, 260 and 6,717; Lanai, 141 and 2,426; Niihau, 70 and 230; Kahoolawe, 45 (uninhabited). The capital Honolulu, on the island of Oahu, had a population in 1980 of 365,048 and Hilo on the island of Hawaii, 37,808 in 1990.

Figures for racial groups, 1980, were: 331,925 White, 239,734 Japanese, 132,075 Filipinos, 118,251 Hawaiian, 55,916 Chinese, 17,453 Korean, 17,687 Black, 51,650 all others. In 1989, 35% of the population (outside barracks and other institutions) was of mixed race. Of the total, 92.3% were citizens of the USA.

Inter-marriage between the races is common. Of the 9,709 resident marriages in 1988, 42.9% were between partners of different race. Births, 1991, were 20,014 (17.5 per 1,000 population); deaths, 6,715 (5.9); infant deaths in 1992, 131 (6.5 per 1,000 live births); marriages, 17,669 (15.4); divorces and annulments, 5,134 (4.5).

CLIMATE. All the islands have a tropical climate, with an abrupt change in conditions between windward and leeward sides, most marked in rainfall. Temperatures vary little. Honolulu. Jan. 71°F (21.7°C), July 78°F (25.6°C). Annual rainfall 31" (775 mm).

IDAHO

KEY HISTORICAL EVENTS. The original people of Idaho were Kutenai, Kalispel, Nez Percé and other tribes, living on the Pacific watershed of the northern Rocky Mountains. European exploration began in 1805, and after 1809 there were trading posts and small settlements. The area was disputed between Britain and the USA until 1846 when British claims were dropped. In 1860 gold and silver were found, and there was a rush of immigrant prospectors. The newly enlarged population needed organized government. An area including that which is now Montana was created a Territory in March 1863. Montana was separated from it in 1864. Population growth continued, stimulated by refugees from the Confederate states after the Civil War and by settlements of Mormons from Utah.

Fur-trapping and mining gave way to farming, especially of potatoes, wheat and sugar-beet, as the main economic activity. Idaho became a state in 1890, with its capital at Boise. The Territory capital, Idaho City, had been a gold-mining boom town whose population (about 40,000 at its height) declined to 1,000 by 1869.

During the 20th century the Indian population shrunk to nearly 1%. The Mormon community has grown to include much of south-eastern Idaho and more than half the church-going population of the state.

Industrial history has been influenced by the development of the Snake River of southern Idaho for hydro-electricity and irrigation, especially at the American Falls and reservoir. Processing food, minerals and timber have become important to the economy. The population, however, remains mainly sparse and rural.

TERRITORY AND POPULATION. Idaho is bounded north by Canada, east by the Rocky Mountains of Montana and Wyoming, south by Nevada and Utah, west by Oregon and Washington. Land area, 82,751 sq. miles (214,325 sq. km). Census population, 1 April 1990, 1,006,749 (57.4% urban), an increase of 6.65% since 1980. Population estimate (1995), 1,163,000. Births (1993), 17,440 (15.8 per 1,000 population); deaths, 7,000 (7.6). Marriages (1991), 14,352 (13.8); divorces, 6,619 (6.4); infant deaths (1992), 122 (7.0 per 1,000 live births).

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Asiatic</i>	<i>Total</i>	<i>Per sq. mile</i>

1930	438,840	668	3,638	1,886	445,032	5.4
1960	657,383	1,502	5,231	2,958	667,191	8.1
1980	901,641	2,716	10,521	5,948	943,935	11.3

ILLINOIS

KEY HISTORICAL EVENTS. Territory of a group of Algonquian-speaking tribes, Illinois was explored first by the French in 1673. France claimed the area until 1763 when, after the French and Indian War, it was ceded to Britain along with all the French land east of the Mississippi. In 1783 Britain recognized the US' title to Illinois, which became part of the North West Territory of the USA in 1787, and of Indiana Territory in 1800. Illinois became a Territory in its own right in 1809, and a state in 1818.

Settlers from the eastern states moved on to the fertile farmland, immigration increasing greatly with the opening in 1825 of the Erie Canal from New York along which settlers could move west and their produce back east for sale. Chicago was incorporated as a city in 1837 and quickly became the transport, trading and distribution centre of the middle west. Once industrial growth had begun there, a further wave of immigration took place in the 1840s, mainly of European refugees looking for work. This movement continued with varying force until the 1920s, when it was largely replaced by immigration of black work-seekers from the southern states.

During the 20th century the population became largely urban and heavy industry was established along an intensive network of rail and waterway routes. Chicago recovered from a destructive fire in 1871 to become the hub of this network and at one time the second largest American city.

TERRITORY AND POPULATION. Illinois is bounded north by Wisconsin, north-east by Lake Michigan, east by Indiana, south-east by the Ohio River (forming the boundary with Kentucky), west by the Mississippi River (forming the boundary with Missouri and Iowa). INDIANA

KEY HISTORICAL EVENTS. The area was inhabited by Algonquian-speaking tribes when the first European explorers (French) laid claim to it in the 17th century. They established some fortified trading posts but there was little settlement.

In 1763 the area passed to Britain, with other French-claimed territory east of the Mississippi. In 1783 Indiana became part of the North West Territory of the USA; it became a separate territory in 1800 and a state in 1816. Until 1811 there had been continuing conflict with the Indian inhabitants, who were then defeated at Tippecanoe.

Early farming settlement was by families of British and German descent, including Amish and Mennonite communities. Later industrial development offered an incentive for more immigration from Europe, and, later, from the southern states. In 1906 the town of Gary was laid out by the United States Steel Corporation and named after its chairman, Elbert H. Gary. The industry flourished on navigable water midway between supplies of iron ore and of coal. Trade and distribution in general benefited from Indiana Port on Lake Michigan, especially after the opening of the St Lawrence Seaway in 1959. The Ohio River was also exploited for carrying freight.

Indianapolis was laid out after 1821 and became the state capital in 1825. Natural gas was discovered in the neighbourhood in the late 19th century, and this stimulated the growth of a motor industry, celebrated with the Indianapolis 500 race, held annually since 1911.

TERRITORY AND POPULATION. Indiana is bounded west by Illinois, north by Michigan and Lake Michigan, east by Ohio and south by Kentucky across the Ohio River. Land area, 35,870 sq. miles (92,903 sq. km). Census population, 1 April 1990, was 5,544,159 (64.9% urban), an increase of 0.98% since 1980. Population estimate (1995), 5,803,471. In 1994 live births were 83,381 (14.5 per 1,000 population); deaths, 53,290 (9.3); infant deaths (under 1 year) in 1992, 795 (9.4 per 1,000 live births); marriages (1994), 50,282 (8.7).

IOWA

KEY HISTORICAL EVENTS. Originally the territory of the Iowa Indians, the area was explored by the Frenchmen Marquette and Joliet in 1673. French trading posts were set up, but there was little other settlement. In 1803 the French sold their claim to Iowa to the USA as part of the Louisiana Purchase. The land was still occupied by Indians but, in the 1830s, the tribes sold their land to the US government and migrated to reservations. Iowa became a US Territory in 1838 and a state in 1846.

The state was settled by immigrants drawn mainly from neighbouring states to the east. Later there was more immigration from Protestant states of northern Europe. The land was extremely fertile and most immigrants came to farm. Not all the Indian population had accepted the cession and there were some violent confrontations, notably the murder of settlers at Spirit Lake in 1857.

The population is still mainly rural and farming predominates, especially livestock farming with its associated stockfeed crops. Most industry is based on agriculture, either as food-processing or agricultural engineering.

The capital, Des Moines, was founded in 1843 as a fort to protect Indian rights. It expanded rapidly with the growth of a local coal field after 1910.

TERRITORY AND POPULATION. Iowa is bounded east by the Mississippi River (forming the boundary with Wisconsin and Illinois), south by Missouri, west by the Missouri River (forming the boundary with Nebraska), north-west by the Big Sioux River (forming the boundary with South Dakota) and north by Minnesota. Land area, 55,875 sq. miles (144,716 sq. km). Census population, 1 April 1990, 2,776,755 (60.6% urban), a decrease of 4.7% since 1980. Population estimate (1996), 2,852,000. Births, 1996, 37,130; deaths, 28,800; infant deaths, 259; marriages, 22,711; dissolutions of marriages, 10,347.

Population in 6 census years was:

KANSAS

KEY HISTORICAL EVENTS. The area was explored from Mexico in the 16th century, when Spanish travellers found groups of Kansa, Wichita, Osage and Pawnee tribes. The French claimed Kansas in 1682 and they established a valuable fur trade with local tribes in the 18th century. In 1803 the area passed to the USA as part of the Louisiana Purchase and became a base for pioneering trails further west. After 1830 it was 'Indian Territory' and a number of tribes displaced from eastern states were settled there. In 1854 the Kansas Territory was created and opened for white settlement. The early settlers were farmers from Europe or New England, but the Territory's position brought it into contact with southern ideas also. Until 1861 there were frequent outbursts of violence over the issue of slavery. Slavery had been excluded from the future Territory by the Missouri Compromise of 1820, but the 1854 Kansas-Nebraska Act had affirmed the principle of 'popular sovereignty' to settle the issue, which was then fought out by opposing factions throughout 'Bleeding Kansas'.

Kansas finally entered the Union (as a non-slavery state) in 1861; the part of Colorado which had formed part of the Kansas Territory was then separated from it.

The economy developed through a combination of cattle-ranching and railways. Herds were driven to the railheads and shipped from vast stockyards, or slaughtered and processed in railhead meat-packing plants. Wheat and sorghum also became important once the plains could be ploughed on a large scale.

TERRITORY AND POPULATION. Kansas is bounded north by Nebraska, east by Missouri, with the Missouri River as boundary in the north-east, south by Oklahoma and west by Colorado. Land area, 81,823 (211,922 sq. km). Census population, 1 April 1990, 2,477,574 (69.1% urban), an increase of 4.84% since 1980. Population estimate (1996), 2,572,000. Vital statistics: 1994, births, 37,379 (14.6 per 1,000 population); deaths, 23,000 (9.1); 1992, infant deaths, 316 (8.6 per 1,000 live births); 1991, marriages, 22,074 (8.7); divorces 13,897 (5.5).

KENTUCKY

KEY HISTORICAL EVENTS. Lying west of the Appalachians and south of the Ohio River, the area was the meeting place and battle-ground for the eastern Iroquois and the southern Cherokees. Northern Shawnees also penetrated. The first successful white settlement took place in 1769 when Daniel Boone reached the Bluegrass plains from the eastern, trans-Appalachian, colonies. After 1783 immigration from the east was rapid, settlers travelling by river or crossing the mountains by the Cumberland Gap. The area was originally attached to Virginia but became a separate state in 1792.

Large plantations dependant on slave labour were established, as were small farms worked by white owners. The state became divided on the issue of slavery, although plantation interests (mainly producing tobacco) dominated state government. In the event the state did not secede in 1861, and the majority of citizens supported the Union. Public opinion swung round in support of the south during the difficulties of the reconstruction period.

The eastern mountains became an important coal-mining area, tobacco-growing continued and the Bluegrass plains produced livestock, including especially fine thoroughbred horses.

TERRITORY AND POPULATION. LOUISIANA

KEY HISTORICAL EVENTS. Originally the Territory of Choctaw and Caddo tribes, the whole area was claimed for France in 1682. The French founded New Orleans in 1718 and it became the centre of a crown colony in 1731. During the wars

which the European powers fought over their American interests, the French ceded the area west of the Mississippi (most of the present state) to Spain in 1762 and the eastern area, north of New Orleans, to Britain in 1763. The British section passed to the USA in 1783, but France bought back the rest from Spain in 1800, including New Orleans and the mouth of the Mississippi. The USA, fearing to be excluded from a strategically important and commercially promising shipping area, persuaded France to sell Louisiana again in 1803. The present states of Missouri, Arkansas, Iowa, North Dakota, South Dakota, Nebraska and Oklahoma were included in the purchase.

The area became the Territory of New Orleans in 1804 and was admitted to the Union as a state in 1812. The economy at first depended on cotton and sugar-cane plantations. The population was of French, Spanish and black descent, with a growing number of American settlers. Plantation interests succeeded in achieving secession in 1861, but New Orleans was occupied by the Union in 1862. Planters re-emerged in the late 19th century and imposed rigid segregation of the black population, denying them their new rights.

The state has become mainly urban industrial, with the Mississippi ports growing rapidly. There is petroleum and natural gas, and a strong tourist industry based on the French culture and Caribbean atmosphere of New Orleans.

MAINE

KEY HISTORICAL EVENTS. Originally occupied by Algonquian-speaking tribes, the Territory was disputed between different groups of British settlers, and between the British and French, throughout the 17th and most of the 18th centuries. After 1652 it was governed as part of Massachusetts, and French claims finally failed in 1763. Most of the early settlers were English and Protestant Irish, with many Quebec French.

The Massachusetts settlers had gained control when the original colonist, Sir Ferdinando Gorges, supported the losing royalist side in the English civil war. Their control was questioned during the English-American war of 1812, when Maine residents claimed that the Massachusetts government did not protect them against British raids. Maine was separated from Massachusetts and entered the Union as a state in 1820.

Maine is a mountainous state and even the coastline is rugged, but the coastal belt is where most settlement has developed. In the 19th century there were manufacturing towns making use of cheap water-power, and the rocky shore supported a shell-fish industry. The latter still flourishes, together with intensive horticulture, producing potatoes and fruit. The other main economic development has been in exploiting the forests for timber, pulp and paper.

The capital is Augusta, a river trading post which was fortified against Indian attacks in 1754, incorporated as a town in 1797 and chosen as capital in 1832.

TERRITORY AND POPULATION. Maine is bounded west, north and east by Canada, south-east by the Atlantic, south and south-west by New Hampshire. Land area, 30,865 sq. miles (79,931 sq. km). Births, 1994, 14,441 (11·6 per 1,000 population); deaths, 12,000 (9·4); infant deaths, 1992, 109 (6·8 per 1,000 live births); marriages, 11,077 (8·8); divorces 5,816 (4·6).

MARYLAND

KEY HISTORICAL EVENTS. The first European visitors found groups of Algonquian-speaking tribes, often under attack by Iroquois from further north. The first white settlement was made by the Calvert family, British Roman Catholics, in 1634. The settlers received some legislative rights in 1638. In 1649 their assembly passed the Act of Toleration, granting freedom of worship to all Christians. A peace treaty was signed with the Iroquois in 1652, after which it was possible for farming settlements to expand north and west. The capital (formerly at St Mary's City) was moved to Annapolis in 1694. Baltimore, which became the state's main city, was founded in 1729.

The first industry was tobacco-growing, which was based on slave-worked plantations. There were also many immigrant British small farmers, tradesmen and indentured servants.

At the close of the War of independence the treaty of Paris was ratified in Annapolis. Maryland became a state of the Union in 1788. In 1791 the state ceded land for the new federal capital, Washington, and its economy has depended on the capital's proximity ever since. Baltimore also grew as a port and industrial city,

attracting much European immigration in the 19th century. Although strong sympathy for the south was expressed, Maryland remained within the Union in the Civil War albeit under the imposition of martial law.

TERRITORY AND POPULATION. Maryland is bounded north by Pennsylvania, east by Delaware and the Atlantic, south by Virginia and West Virginia, with the Potomac River forming most of the boundary, and west by West Virginia. Chesapeake Bay almost cuts off the eastern end of the state from the rest. Land area, 9,775 sq. miles (25,316 sq. km). Census population, 1 April 1990, 4,781,468 (81.3% urban), an increase since 1980 of 564,535 or 13.4%. Population estimate (1996), 5,072,000. In 1994 births were 73,971 (14.8 per 1,000 population); deaths, 41,000 (8.2); infant deaths, 1988, 856 (11.2 per 1,000 live births); 1994 rate, 9.0 per 1,000 live births; marriages, 1991, 44,399 (9.2); divorcees, also 1991, 16,576 (3.4).

(11·2m. metric tons) and stone (42·4m. metric tons) account for 75% of the total value. Coal is probably still the leading mineral commodity by value followed by, stone, sand and gravel and Portland cement. Output of coal was 3·26m. short tons, valued at about \$84m. Natural gas is produced from 1 field in Garrett County; 27·7m. cu. ft in 1993. A second gas field in the same county is used for natural gas storage.

SOCIAL INSTITUTIONS

Justice. Prisons had about 21,000 inmates in 1994; the total in 1992 equalled 401 per 100,000 population, a high rate, which may be explained by the fact that Maryland incarcerates domestic relations law violators in state prisons; state prisons also receive a considerable number of persons committed for misdemeanours by magistrates' courts of the counties as well as from Baltimore's court system.

The death penalty is authorized.

Maryland's prison system has conducted a work-release programme for selected prisoners since 1963. All institutions have academic and vocational training programmes.

The Maryland State Department of Health, organized in 1874, was in 1969 made part of the Department of Health and Mental Hygiene which performs its functions through its central office, 23 county health departments and the Baltimore City Health Department. For the financial year 1990 the department's budget was \$1,985.8m., of which \$1,327.5m. were general funds and \$46.4m. special funds appropriated by the General Assembly. The balance of the budget, \$611.9m., derives from federal funds.

During financial year 1991 Maryland's programme of medical care for indigent and medically indigent patients covered about 442,100 persons. The programme, which covers in-patient and out-patient hospital services, laboratory services, skilled nursing home care, physician services, pharmacy services, dental services and home health services, cost approximately \$1,357m.

Social Security. Under the supervision of the Department of Human Resources, local social service departments administer public assistance for needy persons. In March 1990 families with dependent children received \$29,217,254 (218,342 recipients, average actual monthly payment \$133.81); general public assistance payments were \$5,394,836 (25,443 recipients, average actual monthly payments \$212.04).

KEY HISTORICAL EVENTS. The first European settlement was at Plymouth, when the *Mayflower* landed its company of English religious separatists in 1620. In 1626–30 more colonists arrived, the main body being a large company of English Puritans who founded a Puritan commonwealth. This commonwealth, of about 1,000 colonists led by John Winthrop, became the Massachusetts Bay Colony and was founded under a company charter. Following disagreement between the English government and the colony the charter was withdrawn in 1684, but in 1691 a new charter united a number of settlements under the name of Massachusetts Bay. The colony's government was rigidly theocratic.

Shipbuilding, iron-working and manufacturing were more important than farming from the beginning, the land being poor. The colony was Protestant and of English descent until the War of Independence. The former colony adopted its present constitution in 1780. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and on 6 Feb. 1788 became the 6th state to ratify the US constitution. The state acquired its present boundaries (having previously included Maine) in 1820.

During the 19th century industrialization and immigration from Europe both increased while Catholic Irish and Italian immigrants began to change the population's character. The main inland industry was textile manufacture, the main coastal occupation was whaling; both have now gone. Boston has remained the most important city of New England, attracting a large black population since 1950.

TERRITORY AND POPULATION. Massachusetts is bounded north by Vermont and New Hampshire, east by the Atlantic, south by Connecticut and Rhode

MICHIGAN

KEY HISTORICAL EVENTS. The French were the first European settlers, establishing a fur trade with the local Algonquian Indians in the late 17th century. They founded Sault Ste Marie in 1668 and Detroit in 1701. In 1763 Michigan passed to Britain, along with other French territory east of the Mississippi, and from Britain it passed to the USA in 1783. Britain, however, kept a force at Detroit until 1796, and recaptured Detroit in 1812. Regular American settlement did not begin until later. The Territory of Michigan (1805) had its boundaries extended after 1818 and was admitted to the Union as a state (with its present boundaries) in 1837.

During the 19th century there was rapid industrial growth, especially in mining and metalworking. Many groups of immigrants from Poland, Italy, the Netherlands and Scandinavia came to settle as miners, farmers and industrial workers. The motor industry became dominant, especially in Detroit. Lake Michigan ports shipped bulk cargo, especially iron-ore and grain.

Detroit was the capital until 1847, when that function passed to Lansing. Detroit remained, however, an important centre of flour-milling and shipping and, after the First World War, of the motor industry.

TERRITORY AND POPULATION. Michigan is divided into two by Lake Michigan. The northern part is bounded south by the lake and by Wisconsin, west and north by Lake Superior, east by the North Channel of Lake Huron; between the two latter lakes the Canadian border runs through straits at Sault Ste Marie. The southern part is bounded in the west and north by Lake Michigan, east by Lake Huron, Ontario and Lake Erie, south by Ohio and Indiana. Area, 58,110 sq. miles (150,544 sq. km). Census population, 1 April 1990, 9,295,297 (70.5% urban), an increase of 0.4% since 1980. Population estimate (1996), 9,594,350. In 1995 births were 134,169; deaths, 83,405; infant deaths, 1,110 (8.3 per 1,000 live births); marriages, 71,042; divorces, 39,449.

MINNESOTA

KEY HISTORICAL EVENTS. Minnesota remained an Indian territory until the middle of the 19th century, the main groups being Chippewa and Sioux, many of whom are still there. In the 17th century there had been some French exploration, but no permanent settlement. After passing under the nominal control of France, Britain and Spain, the area became part of the Louisiana Purchase and so was sold to the USA in 1803.

Fort Snelling was founded in 1819. Early settlers came from other states, especially New England, to exploit the great forests. Lumbering gave way to home-steading, and the American settlers were joined by Germans, Scandinavians and Poles. Agriculture, mining and forest industries became the mainstays of the economy. Minneapolis, founded as a village in 1856, grew first as a lumber centre, processing the logs floated down the Minnesota River, and then as a centre of flour-milling and grain marketing. St Paul, its twin city across the river, became Territorial capital in 1849 and state capital in 1858. St Paul also stands at the head of navigation on the Mississippi, which rises in Minnesota.

The Territory (1849) included parts of North and South Dakota, but at its admission to the Union in 1858, the state of Minnesota had its present boundaries.

TERRITORY AND POPULATION. Minnesota is bounded north by Canada, east by Lake Superior and Wisconsin, with the Mississippi River forming the

boundary in the south-east, south by Iowa, west by South and North Dakota, with the Red River forming the boundary in the north-west. Land area, 79,617 sq. miles (206,207 sq. km). Census population, 1 April 1990, 4,375,099 (69.9% urban), an increase of 7.31% since 1980. Population estimate (1996), 4,658,484. Births in 1995, 63,258 (13.7 per 1,000 population); deaths, 37,429 (8.1); infant deaths, 494 (7.4 per 1,000 live births); marriages, 32,878 (7.1); divorces, 15,486 (3.3).

Population in 5 census years was:

MISSISSIPPI

KEY HISTORICAL EVENTS. Mississippi was one of the territories claimed by France since the 17th century and ceded to Britain in 1763. The indigenous people were Choctaw and Natchez. French settlers at first traded amicably with them, but in the course of three wars (1716, 1723 and 1729) the French allied with the Choctaw to drive the Natchez out. During hostilities the Natchez massacred the settlers of Fort Rosalie, which the French had founded in 1716 and which was later renamed Natchez.

In 1783 the area passed to the USA except for Natchez which was under Spanish control until 1798. The USA then made it the capital of the Territory of Mississippi. The boundaries of the Territory were extended in 1804 and 1812. In 1817 it was separated in two, the western part becoming the state of Mississippi. (The eastern part became the state of Alabama in 1819.) The city of Jackson was laid out in 1822 as the new state capital.

A cotton plantation economy developed, based on black slave labour, and by 1860 the majority of the population was black. Mississippi joined the Confederacy during the Civil War. After defeat and reconstruction there was a return to rigid segregation and denial of black rights. This situation lasted until the 1960s. There was a black majority until the Second World war, when out-migration began to change the pattern. By 1990 about 35% of the population was black, and manufacture (especially clothing and textiles) had become the largest single employer of labour.

TERRITORY AND POPULATION. Mississippi is bounded north by Tennessee, east by Alabama, south by the Gulf of Mexico and Louisiana, west by the Mississippi River forming the boundary with Louisiana and Arkansas. MISSOURI

KEY HISTORICAL EVENTS. Territory of several Indian groups, including the Missouri, the area was not settled by European immigrants until the 18th century. The French founded Ste Genevieve in 1735, partly as a lead-mining community. St Louis was founded as a fur-trading base in 1764. The area was nominally under Spanish rule from 1770 until 1800 when it passed back to France. In 1803 the USA bought it as part of the Louisiana Purchase.

St Louis was made the capital of the whole Louisiana Territory in 1805, and of a new Missouri Territory in 1812. In that year American immigration increased markedly. The Territory became a state in 1821, but there had been bitter disputes between slave-owning and anti-slavery factions, with the former succeeding in obtaining statehood without the prohibition of slavery required of all other new states north of latitude 36°30'; this was achieved by the Missouri Compromise of 1820. The Compromise was repealed in 1854 and declared unconstitutional in 1857. During the Civil War the state held to the Union side, although St Louis was placed under martial law.

With the development of steamboat traffic on the Missouri and Mississippi rivers, and the expansion of railways, the state became the transport hub of all western movement. Lead and other mining remained important, as did livestock farming. European settlers came from Germany, Britain and Ireland.

MONTANA

KEY HISTORICAL EVENTS. Originally the territory of many groups of Indian hunters including the Sioux, Cheyenne and Chippewa, Montana was not settled by American colonists until the 19th century. The area passed to the USA with the Louisiana Purchase of 1803, but the area west of the Rockies was disputed with Britain until 1846. Trappers and fur-traders were the first immigrants, and the fortified trading post at Fort Benton (1846) became the first permanent settlement. Colonization increased when gold was found in 1862. Montana was created a separate Territory (out of Idaho and Dakota Territories) in 1864. In 1866 large-scale grazing of sheep and cattle was allowed, and this provoked violent confrontation with the indigenous people whose hunting lands were invaded. Indian wars led to the defeat of federal forces at Little Bighorn in 1876 and at Big Hole Basin in 1877, but the Indians could not continue the fight and they had been moved to reservations by 1880. Montana became a state in 1889.

Helena, the capital, was founded as a mining town in the 1860s. In the early 20th century there were many European immigrants who settled as farmers or in the mines, especially in copper-mining at Butte.

TERRITORY AND POPULATION. Montana is bounded north by Canada, east by North and South Dakota, south by Wyoming and west by Idaho and the Bitterroot Range of the Rocky Mountains. Land area, 145,556 sq. miles (336,991 sq. km). US Bureau of Indian Affairs (1990) administered 5,574,835 acres, of which 2,663,385 were allotted to tribes. Census population, 1 April 1990, 799,065 (52.5% urban), an increase of 2% since 1980. Population estimate (1996), 879,000. NEBRASKA

KEY HISTORICAL EVENTS. The Nebraska region was first reached by Europeans from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the USA as part of the Louisiana Purchase in 1803. During the 1840s the Platte River valley became an established trail for thousands of pioneers' wagons heading for Oregon and California. The need to serve and protect the trail led to the creation of

Nebraska as a Territory in 1854. In 1862 the Homestead Act opened the area for settlement, but colonization was not very rapid until the Union Pacific Railroad was completed in 1869. The largest city, Omaha, developed as the starting point of the Union Pacific and became one of the largest railway towns in the country.

Nebraska became a state in 1867, with approximately its present boundaries except that it later received small areas from the Dakotas. Many early settlers were from Europe, brought in by railway-company schemes, but from the late 1880s eastern Nebraska suffered catastrophic drought. Crop and stock farming recovered, but crop growing was only established in the west by means of irrigation.

TERRITORY AND POPULATION. Nebraska is bounded in the north by South Dakota, with the Missouri River forming the boundary in the north-east and the boundary with Iowa and Missouri to the east; south by Kansas, south-west by Colorado and west by Wyoming. Births, 1995, were 23,221 (14.4 per 1,000 population); deaths, 15,216 (9.5); marriages, 12,351 (7.7); divorces, 6,262 (3.9); infant deaths in 1992, 186 (7.9 per 1,000 live births).

NEVADA

KEY HISTORICAL EVENTS. The area was part of Spanish America until 1821, when it became part of the newly-independent state of Mexico. Following a war between Mexico and the USA, Nevada was ceded to the USA as part of California in 1848. Settlement began in 1849, and the area was separated from California and joined with Utah Territory in 1850. In 1859 a rich deposit of silver was found in the Comstock Lode. Virginia City was founded as a mining town and immigration increased rapidly. Nevada Territory was formed in 1861. During the Civil War the Federal Government, allegedly in order to obtain the wealth of silver for the Union cause, agreed to admit Nevada to the Union as the 36th state. Areas of Arizona and Utah Territories were added to it in 1866–67.

The silver boom lasted until 1882, by which time cattle ranching had become equally important in the valleys where the climate is less arid. Carson City, the capital, developed in association with the nearby silver-mining industry. The largest cities, Las Vegas and Reno, grew most in the 20th century with the building of the Hoover dam, the introduction of legal gambling and of easily obtained divorce.

After 1950 much of the desert area was adopted by the Federal Government for weapons testing and other military purposes.

TERRITORY AND POPULATION. Nevada is bounded north by Oregon and Idaho, east by Utah, south-east by Arizona, with the Colorado River forming most of the boundary, south and west by California. Land area, 105,540 sq. miles (273,349 sq. km). The federal government in 1995 owned 56,854,307 acres, or 80.4% of the land area.

Census population on 1 April 1990, 1,201,833 (88.3% urban), an increase of 401,325 since 1980. Population estimate (1996), 1,638,015. Births, 1995, were 25,175; deaths, 1995, 11,680; marriages, 129,034; divorces, 12,553; infant deaths, 143; abortions, 6,942.

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>All others</i>	<i>Total</i>	<i>Per sq. mile</i>
1910	74,276	513	5,240	1,846	81,875	0.7
1930	84,515	516	4,871	1,156	91,058	0.8
1970	449,850	27,579	7,329	3,980	488,738	4.4

1990	1,012,695	78,771	19,637	90,730	1,201,833	10.9

Of the total population in 1990, 611,880 were male, 1,061,312 were urban and 364,109 were under 21 years of age. Nevada's population rise has made it the fastest-growing state in the USA every year since 1986.

The largest cities (with 1995 estimated population) are: Las Vegas, 368,360; Reno, 150,620; Henderson, 115,380; North Las Vegas, 77,820; Sparks, 59,880; Carson City (the capital), 46,770.

CONSTITUTION AND GOVERNMENT. The constitution adopted in 1864 is still in force, with 119 amendments by 1994. The Legislature meets biennially (and in special sessions) and consists of a Senate of 21 members elected for 2 years, half their number retiring every 2 years, and an Assembly of 42 members elected for 4 years. The Governor may be elected for 2 consecutive 4-year terms.

NEW HAMPSHIRE

KEY HISTORICAL EVENTS. The area was part of a grant by the English crown made to John Mason and fellow-colonists, and was first settled in 1623. In 1629 an area between the Merrimack and Piscatagua rivers was called New Hampshire. More settlements followed, and in 1641 they were taken under the jurisdiction of the governor of Massachusetts. New Hampshire became a separate colony in 1679.

After the War of Independence New Hampshire became one of the 13 original states of the Union, drawing up its constitution in 1784 and revising it on accession to the Union in 1792.

The settlers were Protestants from Britain and Northern Ireland. They developed manufacturing industries, especially shoe-making, textiles and clothing, to which large numbers of French Canadians were attracted after the Civil War.

Portsmouth, originally a fishing settlement, was the colonial capital and is the only seaport. In 1808 the state capital was moved to Concord (having had no permanent home since 1775); Concord produced the Concord Coach which was widely used on the stagecoach routes of the West until at least 1900.

NEW JERSEY

KEY HISTORICAL EVENTS. Originally the territory of Delaware Indians, the area was first settled by immigrant colonists in the early 17th century, when Dutch and Swedish traders established fortified posts on the Hudson and Delaware Rivers. The Dutch took control but lost it to the English in 1664. In 1676 the English divided the area in two; the eastern portion was assigned to Sir George Carteret and the western granted to Quaker settlers. This division lasted until 1702 when New Jersey was united as a colony of the Crown and placed under the jurisdiction of the governor of New York. It became a separate colony in 1738.

During the War of Independence crucial battles were fought at Trenton, Princeton and Monmouth. New Jersey became the 3rd state of the Union in 1787. Trenton, the state capital since 1790, began as a Quaker settlement and became an iron-working town. Industrial development grew rapidly, there and elsewhere in the state, after the opening of canals and railways in the 1830s. Princeton, also a Quaker settlement,

became an important post on the New York road; the college of New Jersey (Princeton University) was transferred there from Newark in 1756.

The need for supplies in the Civil War stimulated industry and New Jersey became a manufacturing state. The growth beyond its borders of New York and Philadelphia, however, produced a pattern of commuting to employment in both centres. By 1980 about 60% of the state's population lived within 30 miles of New York.

TERRITORY AND POPULATION. New Jersey is bounded north by New York, east by the Atlantic with Long Island and New York City to the north-east, south by Delaware Bay and west by Pennsylvania. Population estimate (1996), 7,988,000. NEW MEXICO

KEY HISTORICAL EVENTS. The first European settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern province of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. Ceded to the USA in 1848 after war between the USA and Mexico, the area was organized as a Territory in 1850, by which time its population was Spanish and Indian. There was frequent conflict, especially between new settlers and raiding parties of Navajo and Apaches. The Indian war lasted from 1861 until 1866, and from 1864–68 about 8,000 Navajo were imprisoned at Bosque Redondo.

The boundaries were altered several times when land was taken into Texas, Utah, Colorado and lastly (1863) Arizona. New Mexico became a state in 1912.

Settlement proceeded by means of irrigated crop-growing and Mexican-style ranching. During the Second World War the desert areas were brought into use as testing zones for atomic weapons. Mineral extraction also developed, especially after the discovery of uranium and petroleum.

TERRITORY AND POPULATION. New Mexico is bounded north by Colorado, north-east by Oklahoma, east by Texas, south by Texas and Mexico and west by Arizona. Land area, 121,365 sq. miles (314,334 sq. km). Public lands, administered by federal agencies (1975) amounted to 26.7m. acres or 34% of the total area. The Bureau of Indian Affairs held 7.3m. acres; the State of New Mexico held 9.4m. acres; 34.4m. acres were privately owned.

Census population, 1 April 1990, 1,515,069 (73% urban), an increase of 211,767 or 16.2% since 1980. Population estimate (1996), 1,713,407. Vital statistics, 1996 (provisional): Births, 27,173 (15.9 per 1,000 population); marriages, 16,026 (9.4); divorces, 10,945 (6.4); deaths, 12,325 (7.2); infant deaths, 160 (5.9 per 1,000 live births).

The population in 5 census years was:

	White	Black	Indian	Asian and Pacific Island	Other	Total	Per sq. mile
1910	304,594	1,628	20,573	506		327,301	2.7

1990	1,146,028	30,210	134,355	14,124	190,352	1,515,069	12.5

Of the 1990 total, 745,253 were male, 1,068,328 were 18 years of age or older, 163,062 were 65 years of age or older.

Before 1930 New Mexico was largely a Spanish-speaking state, but since 1945 an

influx of population from other states has reduced the percentage of persons of Spanish origin or descent to 38.2% (1990).

The largest cities are Albuquerque, with estimated population, 1996, 419,681; Las Cruces, 74,779; Santa Fé, 66,522; Roswell, 47,559; Rio Rancho, 46,565.

NEW YORK STATE

KEY HISTORICAL EVENTS. The first European immigrants came in the 17th century, when there were two powerful Indian groups in rivalry: the Iroquois confederacy (Mohawk, Oneida, Onondaga, Cayuga and Seneca) and the Algonquian-speaking Mohegan and Munsee. The Dutch made settlements at Fort Orange (now Albany) in 1624 and at New Amsterdam in 1625, trading with the Indians for furs. In the 1660s there was conflict between the Dutch and the British in the Caribbean; as part of the concluding treaty the British in 1664 received Dutch possessions in the Americas, including New Amsterdam, which they renamed New York.

In 1763 the Treaty of Paris ended war between the British and the French in North

America (in which the Iroquois had allied themselves with the British). Settlers of British descent in New England then felt confident enough to expand westward into the area. The climate of northern New York being severe, most settled in the Hudson river valley. After the War of Independence New York became the 11th state of the Union (1778), having first declared itself independent of Britain in 1777.

The economy depended on manufacturing, shipping and other means of distributing goods, and trade. During the 19th century New York became the most important city in the USA. Its manufacturing industries, especially clothing, attracted thousands of European immigrants. Industrial development spread along the Hudson-Mohawk valley, which was made the route of the Erie Canal (1825) linking New York with Buffalo on Lake Erie and thus with the developing farmlands of the middle west.

TERRITORY AND POPULATION. New York is bounded west and north by Canada with Lake Erie, Lake Ontario and the St Lawrence River forming the boundary; east by Vermont, Massachusetts and Connecticut, south-east by the Atlantic, south by New Jersey and Pennsylvania. Births in 1994 were 278,392 (15.3 per 1,000 population); deaths, 169,000 (9.3); infant deaths in 1989, 3,076 (10.6 per 1,000 live births); marriages in 1989, 162,782 (9.1); divorces, also 1989, 55,610 (3.1).

NORTH CAROLINA

KEY HISTORICAL EVENTS. The early inhabitants were Cherokees. European settlement was attempted in 1585–87, following an exploratory visit by Sir Walter Raleigh, but this failed. Settlers from Virginia came to the shores of Albemarle Sound after 1650, and in 1633 Charles II chartered a private colony of Carolina. In 1691 the north was put under a deputy governor who ruled from Charleston in the south. The colony was formally separated into North and South Carolina in 1712. In 1729 control was taken from the private proprietors and vested in the Crown, whereupon settlement grew, and the boundary between north and south was finally fixed (1735).

After the War of Independence North Carolina became one of the original 13 states of the Union. The city of Raleigh was laid out as the new capital. Having been a plantation colony North Carolina continued to develop as a plantation state, growing tobacco with black slave labour. It was also an important source of gold before the western gold-rushes of 1848.

In 1861 at the outset of the Civil War North Carolina seceded from the Union, but General Sherman occupied the capital unopposed. A military governor was admitted in 1862, and civilian government restored with readmission to the Union in 1868.

NORTH DAKOTA

KEY HISTORICAL EVENTS. The original inhabitants were various groups of Plains Indians. French explorers and traders were active among them in the 18th century, often operating from French possessions in Canada. France claimed the area until 1803, when it passed to the USA as part of the Louisiana Purchase, except for the north-eastern part which was held by the British until 1818.

Trading with the Indians, mainly for furs, continued until the 1860s, with American traders succeeding the French. In 1861 the Dakota Territory (North and South) was established. In 1862 the Homestead Act was passed (allowing 160 acres of public land free to any family who had worked and lived on it for 5 years) and this greatly stimulated settlement. Farming settlers came on to the wheat lands in great numbers, many of them from Canada, Norway and Germany.

Bismarck, the capital, began as a crossing-point on the Missouri and was fortified in 1872 to protect workers building the Northern Pacific Railway. There followed a gold-rush nearby, and the town became a service centre for prospectors. In 1899 North and South Dakota were admitted to the Union as separate states, and Bismarck became the Northern capital. The largest city is Fargo which was also a railway town, named after William George Fargo the express-company founder.

The population grew rapidly until 1890 and steadily until 1930 by which time it was about one-third European in parentage. Between 1930 and 1970 there was a steady population drain, increasing whenever farming was affected by the extremes of the continental climate. The state is still mainly agricultural although oil was discovered in 1951.

TERRITORY AND POPULATION. North Dakota is bounded north by Canada, east by the Red River (forming a boundary with Minnesota), south by South Dakota and west by Montana. Land area, 68,994 sq. miles (178,695 sq. km). The Federal Bureau of Indian Affairs administered (1992) 841,295 acres, of which 214,006 acres were assigned to tribes. Census population, 1 April 1990, 638,800 (53.3% urban), a decrease of 2.13% since 1980. Population estimate (1996), 644,000. Births in 1994 were 8,585 (13.44 per 1,000 population); deaths, 5,887 (9.2); infant deaths, 62 (7.2 per 1,000 live births); marriages, 4,813 (7.5); divorces, 2,197 (3.4).

OHIO

KEY HISTORICAL EVENTS. The land was inhabited by Delaware, Miami, Shawnee and Wyandot Indians. It was explored by French and British traders in the 18th century and confirmed as part of British North America in 1763. After the War of Independence it became part of the Northwest Territory of the new United States. Former American soldiers of the war came in from New England in 1788 and made the first permanent white settlement at Marietta, at the confluence of the Ohio and Muskingum rivers. In 1803 Ohio was separated from the rest of the Territory and admitted to the Union as the 17th state.

During the early 19th century there was steady immigration from Europe, mainly of Germans, Swiss, Irish and Welsh. Industrial growth began from the processing of local farm, forest and mining products; it increased rapidly with the need to supply the Union armies in the Civil War of 1861–65.

As the industrial cities grew, so immigration began again, with many whites from eastern Europe and the Balkans and blacks from the southern states looking for work in Ohio.

Cleveland, which developed rapidly as a Lake Erie port after the opening of commercial waterways to the interior and the Atlantic coast (1825, 1830 and 1855), became an iron-and-steel town during the Civil War.

TERRITORY AND POPULATION. Ohio is bounded north by Michigan and Lake Erie, east by Pennsylvania, south-east and south by the Ohio River (forming a boundary with West Virginia and Kentucky) and west by Indiana. OKLAHOMA

KEY HISTORICAL EVENTS. Francisco Coronado led a Spanish expedition in 1541, claiming the land for Spain. There were several Indian groups, but no strong political unit. In 1714 Juchereau de Saint Denis made the first French contact. During the 18th century French fur-traders were active, and France and Spain struggled for control, a struggle which was resolved by the French withdrawal in 1763. France returned briefly in 1800–03, and the territory then passed to the USA as part of the Louisiana Purchase.

In 1828 the Federal Government set aside the area of the present state as Indian Territory, that is, a reservation and sanctuary for Indian tribes who had been driven off their lands elsewhere by white settlement. About 70 tribes came, among whom were Creeks, Choctaws and Cherokees from the south-eastern states, and Plains Indians.

In 1889 the government took back about 2.5m. acres of the Territory and opened it to white settlement. About 10,000 homesteaders gathered at the site of Oklahoma City on the Santa Fe Railway in the rush to stake their land claims. The settlers' area, and others subsequently opened to settlement, were organized as the Oklahoma Territory in 1890. In 1907 the Oklahoma and Indian Territories were combined and admitted to the Union as a state. Indian reservations were established within the state.

The economy first depended on ranching and farming, with packing stations on the railways. A mining industry grew in the 1870s attracting foreign immigration, mainly from Europe. In 1901 oil was found near Tulsa, and the industry grew rapidly.

TERRITORY AND POPULATION. Oklahoma is bounded north by Kansas, north-east by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. Land area, 68,679 sq. miles (177,877 sq. km). Census population, 1 April 1990, 3,189,456 (67.7% urban), an increase of 5.42% since 1980. Population estimate (1996), 3,301,000. Births, 1994, 46,711 (14.8 per 1,000 population); deaths, 32,574 (10.3); marriages, 30,495 (9.7); divorces, 22,784 (7.2). Infant deaths, 1992, 450 (9.6 per 1,000 live births).

The population at 5 federal censuses was:

The Legislature consists of a Senate of 48 members, who are elected for 4 years, and a House of Representatives elected for 2 years and consisting of 101 members. Irrigated production has increased in the Oklahoma 'panhandle'. The Ogallala aquifer is the primary source of irrigation water there and in western Oklahoma, a finite source because of its isolation from major sources of recharge. Declining groundwater levels necessitate the most effective irrigation practices.

OREGON

KEY HISTORICAL EVENTS. The area was divided between many Indian groups including the Chinook, Tillamook, Cayuse and Modoc. In the 18th century English and Spanish visitors tried to establish national claims, based on explorations of the 16th century. The USA also laid claim by right of discovery when an expedition entered the mouth of the Columbia River in 1792.

Oregon was disputed between Britain and the USA. An American fur company established a trading settlement at Astoria in 1811, which the British took in 1812. The Hudson Bay Company were the most active force in Oregon until the 1830s when American pioneers began to migrate westwards along the Oregon Trail. The dispute between Britain and the USA was resolved in 1846 with the boundary fixed at 49°N. lat. Oregon was organized as a Territory in 1848 but with wider boundaries; it became a state with its present boundaries in 1859.

Early settlers were mainly American. They came to farm in the Willamette Valley and to exploit the western forests. Portland developed as a port for ocean-going traffic, although it was 100 miles inland at the confluence of the Willamette and Columbia rivers. Industries followed when the railways came and the rivers were exploited for hydro-electricity. The capital of the Territory from 1851 was Salem, a mission for Indians on the Willamette river; it was confirmed as state capital in 1864. Salem became the processing centre for the farming and market-gardening Willamette Valley.

TERRITORY AND POPULATION. Oregon is bounded in the north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Land area, 97,060 sq. miles (251,385 sq. km). The federal government owned (1994) 32,132,581 acres (51.73% of the state area). Census population, 1 April 1990, 2,842,321 (70.5% urban), an increase of 8% since 1980. Population estimate (1996), 3,204,000. In 1994 births numbered 41,837 (13.6 per 1,000 population); deaths, 27,000 (8.9); in 1992 infant deaths numbered 297 (7 per 1,000 live births); marriages, 24,866 (8.3), and divorces, 16,067 (5.4).

West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown; east of the Range stock-raising and wheat-growing are the principal industries and irrigation is needed for row crops and fruits. In 1993 the monthly average employed in agriculture was 22,500.

Trees vary from the coastal forest of hemlock and spruce to the state's primary species, Douglas-fir, throughout much of western Oregon. In eastern Oregon, ponderosa pine, lodgepole pine and true firs are found. Here, forestry is often combined with livestock grazing to provide an economic operation. PENNSYLVANIA

KEY HISTORICAL EVENTS. Pennsylvania was occupied by 4 powerful tribes in the 17th century: Delaware, Susquehanna, Shawnee and Iroquois. The first white settlers were Swedish, arriving in 1643. The British became dominant in 1664, and in 1681 William Penn, an English Quaker, was given a charter to colonize the area as a sanctuary for his fellow Quakers. Penn's ideal was peaceful co-operation with the Indians and religious toleration within the colony. Several religious groups were attracted to Pennsylvania because of this policy, including Protestant sects from Germany and France. During the 18th century, co-operation with the Indians failed as the settlers pushed into more territory and the Indians resisted.

During the War of Independence the Declaration of Independence was signed in

Philadelphia, the main city. Pennsylvania became one of the original 13 states of the Union. In 1812 Harrisburg, which began as a trading post and ferry point on the Susquehanna river, was chosen as the state capital. The new state's southern boundary was the Mason and Dixon Line, which became the dividing line between free and slave states during the conflict leading to the Civil War. During the war crucial battles were fought in the state, including Gettysburg. Industrial growth was rapid after the war. Pittsburgh, founded as a British fort in 1761 during war with the French, had become an iron-making town by 1800 and grew rapidly when canal and railway links opened in the 1830s. The American Federation of Labor was founded in Pittsburgh in 1881, by which time the city was of national importance in producing coal, iron, steel and glass.

In the 20th century, industry attracted immigration from Italy and eastern Europe. In farming areas the early sect communities survive, notably Amish and Mennonites. (The Pennsylvania 'Dutch' are of German extraction.)

TERRITORY AND POPULATION. Pennsylvania is bounded north by New York, east by New Jersey, south by Delaware and Maryland, south-west by West Virginia, west by Ohio and north-west by Lake Erie. Land area, 44,820 sq. miles (116,083 sq. km). Census population, 1 April 1990 (68.9% urban), 11,881,643, an increase of 0.13% since 1980. Population estimate (1996), 12,056,000. RHODE ISLAND

KEY HISTORICAL EVENTS. The earliest white settlement was founded by Roger Williams, an English Puritan who was expelled from Massachusetts because of his dissident religious views and his insistence on the land-rights of the Indians. At Providence he bought land from the Narragansetts and founded a colony there in 1636. A charter was granted in 1663. The colony was governed according to policies of toleration, which attracted Jewish and nonconformist settlers; later there was French Canadian settlement also.

Shipping and fishing developed strongly, especially at Newport and Providence;

these two cities were twin capitals until 1900, when the capital was fixed at Providence.

Significant actions took place in Rhode Island during the War of Independence. In 1790 the state accepted the federal constitution and was admitted to the Union.

Early farming development was most successful in dairying and poultry. Early industrialization was mainly in textiles, beginning in the 1790s, and flourishing on abundant water power. Textiles dominated until the industry began to decline after the First World War. British, Irish, Polish, Italian and Portuguese workers settled in the state, working in the mills or in the shipbuilding, shipping, fishing and naval ports. The crowding of a new population into cities led to the abolition of the property qualification for the franchise in 1888.

TERRITORY AND POPULATION. Rhode Island is bounded north and east by Massachusetts, south by the Atlantic and west by Connecticut. Land area, 1,045 sq. miles (2,707 sq. km). Census population, 1 April 1990, 1,003,464 (86% urban) a decrease of 5.95% since 1980. Population estimate (1996), 990,000.

Births, 1994, were 13,466 (13.5 per 1,000 population); deaths, 9,000 (9.4); infant deaths, 1992, were 110 (7.5 per 1,000 live births); marriages, 1991, were 7,496 (7.4); divorces, also 1991, were 3,314 (3.3).

Population of 5 census years was:

SOUTH CAROLINA

KEY HISTORICAL EVENTS. Originally the territory of Yamasee Indians, the area attracted French and Spanish explorers in the 16th century. There were attempts at settlement on the coast, none of which lasted. Charles I of England made a land grant in 1629, but the first permanent white settlement began at Charles Town in 1670, moving to Charleston in 1680. This was a proprietorial colony including North Carolina until 1712; both passed to the Crown in 1729.

The coastlands developed as plantations worked by slave labour. In the hills there were small farming settlements and many trading posts, dealing with Indian suppliers.

After active campaigns during the War of Independence, South Carolina became one of the original states of the Union in 1778.

In 1793 the cotton gin was invented, enabling the speedy mechanical separation of seed and fibre. This made it possible to grow huge areas of cotton and meet the rapidly growing needs of new textile industries. Plantation farming spread widely, and South Carolina became hostile to the anti-slavery campaign which was strong in northern states. The state first attempted to secede from the Union in 1847, but was not supported by other southern states until 1860, when secession led to civil war.

At that time the population was about 730,000, of whom 413,000 were black. During the reconstruction periods there was some political power for black citizens, but control was back in white hands by 1876. The constitution was amended in 1895 to disenfranchise most black voters, and they remained with hardly any voice in government until the Civil Rights movement of the 1960s. Columbia became the capital in 1786.

TERRITORY AND POPULATION. South Carolina is bounded in the north by North Carolina, east and south-east by the Atlantic, south-west and west by Georgia. Land area, 30,111 sq. miles (77,988 sq. km). SOUTH DAKOTA

KEY HISTORICAL EVENTS. The area was part of the hunting grounds of nomadic Dakota (Sioux) Indians. French explorers visited the site of Fort Pierre in 1742–43, and claimed the area for France. In 1763 the claim fell and, together with French claims to all land west of the Mississippi, passed to Spain. Spain held the Dakotas until defeated by France in the Napoleonic Wars, when France regained the area and sold it to the US as part of the Louisiana Purchase in 1803.

Fur-traders were active, but there was no settlement until Fort Randall was founded on the Missouri river in 1856. In 1861 North and South Dakota were organized as the Dakota Territory, and the Homestead Act of 1862 stimulated settlement, mainly in the south-east until there was a gold-rush in the Black Hills of the west in 1875–76. Colonization developed as farming communities in the east, miners and ranchers in the west. Livestock farming predominated, attracting European settlers from Scandinavia, Germany and Russia.

In 1899 the North and South were separated and admitted to the Union as states. The capital of South Dakota is Pierre, founded as a railhead in 1880, chosen as a temporary capital and confirmed as permanent capital in 1904. It faces Fort Pierre,

the former centre of the fur trade, across the Missouri river. During the 20th century there have been important schemes to exploit the Missouri for power and irrigation.

The federal government, 1994, owned 2,698,000 acres.

TENNESSEE

KEY HISTORICAL EVENTS. Bordered on the west by the Mississippi, Tennessee was part of an area inhabited by Cherokee. French, Spanish and British explorers penetrated the area up the Mississippi and traded with the Cherokee in the late 16th and 17th centuries. French claims were abandoned in 1763, colonists from the British colonies of Virginia and Carolina then began to cross the Appalachians westwards, but there was no organized Territory until after the War of Independence. In 1784 there was a short-lived, independent state called Franklin. In 1790 the South West Territory (including Tennessee) was formed, and Tennessee entered the Union as a state in 1796.

The state was active in the war against Britain in 1812. After the American victory, colonization increased and pressure for land mounted. The Cherokee were forcibly removed during the 1830s and taken to Oklahoma, a journey on which many died.

Tennessee was a slave state and seceded from the Union in 1861, although eastern Tennessee was against secession. There were important battles at Shiloh, Chattanooga, Stone River and Nashville. In 1866 Tennessee was readmitted to the Union.

Nashville, the capital since 1843, Memphis, Knoxville, and Chattanooga all developed as river towns, Memphis becoming an important cotton and timber port. Growth was greatly accelerated by the creation of the Tennessee Valley Authority in the 1930s, producing power for a manufacturing economy. Industry increased to the extent that, by 1970, the normal southern pattern of emigration and population loss had been reversed.

TERRITORY AND POPULATION. Tennessee is bounded north by Kentucky and Virginia, east by North Carolina, south by Georgia, Alabama and Mississippi and west by the Mississippi River (forming the boundary with Arkansas and Missouri). Land area, 41,220 sq. miles (106,759 sq. km). Census population, 1 April 1990, 4,877,185 (60.9% urban), an increase of 6.2% since 1980. Population estimate (1993), 5,098,798. TEXAS

KEY HISTORICAL EVENTS. A number of Indian tribes occupied the area before French and Spanish explorers arrived in the 16th century. In 1685 La Salle established a colony at Fort St Louis, but Texas was confirmed as Spanish in 1713. Spanish missions increased during the 18th century with San Antonio (1718) as their headquarters.

In 1820 a Virginian colonist, Moses Austin, obtained permission to begin a settlement in Texas. In 1821 the Spanish empire in the Americas came to an end, and Texas, together with Coahuila, formed a state of the newly independent Mexico. The Mexicans agreed to the Austin venture, and settlers of British and American descent came in.

The settlers became discontented with Mexican government and declared their independence in 1836. Warfare, including the siege of the Alamo fort, ended with the foundation of the independent Republic of Texas, which lasted until 1845. During this period the Texas Rangers were organized as a policing force and border patrol. Texas was annexed to the Union in Dec. 1845, as the Federal Government feared its vulnerability to Mexican occupation. This led to war between Mexico and the USA from 1845 to 1848. In 1861 Texas left the Union and joined the southern states in the Civil War, being readmitted in 1869. Ranching and cotton-growing were the main activities before the discovery of oil in 1901.

TERRITORY AND POPULATION. Texas is bounded north by Oklahoma, north-east by Arkansas, east by Louisiana, south-east by the Gulf of Mexico, south by Mexico and west by New Mexico. UTAH

KEY HISTORICAL EVENTS. Spanish Franciscan missionaries explored the area in 1776, finding Shoshoni Indians. Spain laid claim to Utah and designated it part of Spanish Mexico. As such it passed into the hands of the Mexican Republic when Mexico rebelled against Spain and gained independence in 1821.

In 1848, at the conclusion of war between the USA and Mexico, the USA received Utah along with other south-western territory. Settlers had already arrived in 1847 when the Mormons (the Church of Jesus Christ of Latter-day Saints) arrived, having been driven on by local hostility in Ohio, Missouri and Illinois. Led by Brigham Young, they entered the Great Salt Valley and colonized it. In 1849 they applied for statehood but were refused. In 1850 Utah and Nevada were joined as one Territory. The Mormon community continued to ask for statehood but this was only granted in 1896, after they had renounced polygamy and disbanded their People's Party.

Mining, especially of copper, and livestock farming were the base of the economy. Settlement had to adapt to desert conditions, and the main centres of population were in the narrow belt between the Wasatch Mountains and the Great Salt Lake. Salt Lake City, the capital, was founded in 1847 and laid out according to Joseph Smith's plan for the city of Zion. It was the centre of the Mormons' provisional 'State of Desert' and Territorial capital from 1856 until 1896, except briefly in 1858 when federal forces occupied it during conflict between territorial and Union governments.

TERRITORY AND POPULATION. Utah is bounded north by Idaho and Wyoming, east by Colorado, south by Arizona and west by Nevada. Land area, 82,168 sq. miles (212,816 sq. km). The Bureau of Indian Affairs in 1990 administered 2,317,604 acres, 2,284,766 acres of which were allotted to Indian tribes.

Census population, 1 April 1990, 1,722,850 (87% urban), an increase of 17.92% since 1980. Population estimate (1996), 2,000,000. Births in 1994 were 38,279 (20.1 per 1,000 population); deaths, 10,000 (5.5); infant deaths in 1992, 226 (6.1 per 1,000 live births); marriages, 18,788 (10.8); divorces, 8,407 (4.8).

Population at 5 federal censuses was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Asiatic</i>	<i>Total</i>	<i>Per sq. mile</i>
1910	366,583	1,144	3,123	2,501	373,851	4.5

1960	873,828	4,148	6,961	5,207	890,627	10.8
1970	1,031,926	6,617	11,273	6,230	1,059,273	12.9

VERMONT

KEY HISTORICAL EVENTS. The original Indian hunting grounds of the Green Mountains and lakes was explored by the Frenchman Samuel de Champlain in 1609 who reached Lake Champlain on the north-west border. The first attempt at permanent settlement was also French, on Isle la Motte in 1666. In 1763 the British gained the area from the French by the Treaty of Paris. The Treaty, which also brought peace with the Indian allies of the French, opened the way for settlement, but in a mountain state transport was slow and difficult. Montpelier, the state capital from 1805, was chartered as a township site in 1781 to command the main pass through the Green Mountains.

During the War of Independence Vermont declared itself an independent state, to avoid being taken over by New Hampshire and New York. In 1791 it became the 14th state of the Union.

Most early settlers were New Englanders of British and Protestant descent. After 1812 a granite-quarrying industry grew around the town of Barre, attracting immigrant workers from Italy and Scandinavia. French Canadians also settled in Winooski. When textile and engineering industries developed in the 19th century these brought more European workers.

Vermont saw the only Civil War action north of Pennsylvania, when a Confederate raiding party attacked from Canada in 1864.

During the 20th century the textile and engineering industries have declined but paper and lumber industries flourish. Settlement is still mainly rural or in small towns, and farming is pastoral.

TERRITORY AND POPULATION. Vermont is bounded in the north by Canada, east by New Hampshire, south by Massachusetts and west by New York. Land area, 9,614 sq. miles (23,955 sq. km). Census population, 1 April 1990, 562,758 (32.2% urban), an increase of 10% since 1980. Population estimate (1996), 589,000. Births, 1995, were 6,783 (11.6 per 1,000 population); deaths, 4,949 (8.5); infant deaths, 41 (6.0 per 1,000 live births); marriages, 6,000 (10.3); divorces, 2,520 (436).

Population at 5 census years was:

Of the population in 1990, 275,494 were male; 180,904 were urban; those 20 years of age or older numbered 400,019. The largest cities are Burlington, with a population (1996 estimate) of 39,004; Rutland, 17,605; Essex, 16,498 (1994 estimate); Colchester, 16,400.

CLIMATE. Burlington. Jan. 17°F (−8.3°C), July 70°F (21.1°C). Annual rainfall 33" (820 mm). Vermont belongs to the New England climate zone (*see* UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT. The constitution was adopted in 1793 and has since been amended. Amendments are proposed by two-thirds vote of the Senate every 4 years, and must be accepted by two sessions of the legislature; they are then submitted to popular vote. The state Legislature, consisting of a Senate of 30 members and a House of Representatives of 150 members (both elected for 2 years), meets in Jan. every year. The Governor and Lieut.-Governor are elected for 2 years. Electors are all citizens who possess certain residential qualifications and have taken the freeman's oath set forth in the constitution.

The state sends 1 representative to Congress.

In the 1996 presidential election Clinton polled 137,030 votes; Dole, 79,675; Perot, 30,491.

In 1995 Vermont had 290,000 cattle and calves, 19,500 sheep and lambs, 2,800 hogs and pigs, and 134,000 chickens and turkeys.

The state is 76% forest, with 10% in public ownership. National forests area (1996), 350,000 acres. State-owned forests, parks, fish and game areas, 250,000 acres; municipally-owned, 38,500 acres.

VIRGINIA

KEY HISTORICAL EVENTS. In 1607 a British colony was founded at Jamestown, on a peninsula in the James River, to grow tobacco. The area was marshy and unhealthy but the colony survived and in 1619 introduced a form of representative government. The tobacco plantations expanded and African slaves were imported. Jamestown was later abandoned, but tobacco-growing continued and spread through the eastern part of the territory.

In 1624 control of the colony passed from the Virginia Company of London to the Crown. Growth was rapid during the 17th and 18th centuries. The movement for American independence was strong in Virginia; George Washington and Thomas Jefferson were both Virginians, and crucial battles of the War of Independence were fought there.

When the Union was formed, Virginia became one of the original states, but with reservations regarding the constitution because of its attachment to slave-owning. In 1831 there was a slave rebellion. The tobacco plantations began to decline, and plantation owners turned to the breeding of slaves. While the eastern plantation lands seceded from the Union in 1861, the small farmers and miners of the western hills refused to secede and remained in the Union as West Virginia.

Richmond, the capital, became the capital of the Confederacy. Much of the Civil War's decisive conflict took place in Virginia, with considerable damage to the economy. After the war the position of the black population was little improved. Blacks remained without political or civil rights until the 1960s.

WASHINGTON

KEY HISTORICAL EVENTS. The strongest Indian tribes in the 18th century were Chinook, Nez Percé, Salish and Yakima. The area was designated by European colonizers as part of the Oregon Country. Between 1775 and 1800 it had been claimed by explorers for Spain, Britain and the USA; the dispute between the two latter nations was not settled until 1846.

The first small white settlements were Indian missions and fur-trading posts. In the 1840s American settlers began to push westwards along the Oregon Trail, making a speedy solution of the dispute with Britain necessary. When this was achieved the whole area was organized as the Oregon Territory in 1848, and Washington was made a separate Territory in 1853.

Apart from trapping and fishing, the important industry was logging, mainly to supply building timbers to the new settlements of California. After 1870 the westward extension of railways helped to stimulate settlement. Statehood was granted in 1889. The early population was composed mainly of Americans from neighbouring states to the east, and Canadians. Scandinavian immigrants followed. Seattle, the chief city, was laid out in 1853 as a saw-milling town and named after the Indian chief who had ceded the land and befriended the settlers. It grew as a port during the Alaskan and Yukon gold-rushes of the 1890s. The economy thrived on exploiting the Columbia River for hydro-electric power.

TERRITORY AND POPULATION. Washington is bounded north by Canada, east by Idaho, south by Oregon with the Columbia River forming most of the boundary, and west by the Pacific. WEST VIRGINIA

KEY HISTORICAL EVENTS. In 1861 the state of Virginia seceded from the Union over the issue of slave-owning. The 40 western counties of the state were composed of hilly country, settled by miners and small farmers who were not slave-owners. In 1862 these counties ratified an ordinance providing for the creation of a new state. On 20 June 1863 West Virginia became the 35th state of the Union.

The capital, Charleston, was an 18th-century fortified post on the early westward migration routes across the Appalachians. In 1795 local brine wells were tapped and the city grew as a salt town. Coal, oil, natural gas and a variety of salt brines were all found in due course. Huntington, the next largest town, developed as a railway terminus serving the same industrial area, and also providing transport on the Ohio river.

Three-quarters of the state is forest and settlement has been concentrated in the mineral-bearing Kanawha valley, along the Ohio river and in the industrial Monongahela valley of the north. More than half of the population is still classified as rural. The traditional small firms and small hill-mines, however, support few, and the majority of rural dwellers commute to industrial employment.

TERRITORY AND POPULATION. West Virginia is bounded north by Pennsylvania and Maryland, east and south by Virginia, south-west by the Big Sandy River (forming the boundary with Kentucky) and west by the Ohio River (forming the boundary with Ohio). Total area, 24,232 sq. miles (62,761 sq. km). Census population, 1 April 1990, 1,793,477 (36.1% urban), a decrease of 8.01% since 1980. Population estimate (1996), 1,826,000. WISCONSIN

KEY HISTORICAL EVENTS. The French were the first European explorers of the territory; Jean Nicolet landed at Green Bay in 1634, a mission was founded in 1671 and a permanent settlement at Green Bay followed. In 1763 French claims were surrendered to Britain. In 1783 Britain ceded them to the USA, which designated the Northwest Territory, of which Wisconsin was part. In 1836 a separate Territory of Wisconsin was organized, including the present Iowa, Minnesota and parts of the Dakotas.

Territorial organization was a great stimulus to settlement. In 1836 James Duane Doty founded the town site of Madison and successfully pressed its claim to be the capital of the Territory even before it was inhabited. In 1848 Wisconsin became a state, with its present boundaries.

The city of Milwaukee was founded, on Lake Michigan, when Indian tribes gave up their claims to the land in 1831–33. It grew rapidly as a port and industrial town, attracting Germans in the 1840s, Poles and Italians 50 years later. The Lake Michigan shore was developed as an industrial area; the rest of the south proved suitable for dairy farming; the north, mainly forests and lakes, has remained sparsely settled except for tourist bases.

There is a Menominee Indian reservation in the north-east, where many of the 29,000 remaining Indians live. Since the Second World War there has been black immigration from the southern states to the industrial lake-shore cities.

TERRITORY AND POPULATION. Wisconsin is bounded north by Lake Superior and the Upper Peninsula of Michigan, east by Lake Michigan, south by Illinois, west by Iowa and Minnesota, with the Mississippi River forming most of the boundary. Area, 56,154 sq. miles (145,439 sq. km), including 1,439 sq. miles of inland water, but excluding any part of the Great Lakes. Census population, 1 April 1990, 4,891,769 (65·7% urban), an increase of 4% since 1980. Estimated population (1996), 5,142,999. Births in 1995 were 67,493 (13·2 per 1,000 population); deaths in 1996 were 45,107 (8·7); infant deaths, 492 (7·3 per 1,000 live births); marriages, 36,186 (7·0); divorces and annulments, 17,218 (3·3).

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>All others</i>	<i>Total</i>	<i>Per sq. mile</i>
1910	2,320,555	2,900	10,405	2,333,860	42·2
1930	2,916,255	10,739	12,012	2,939,006	53·7
1960	3,858,903	74,546	18,328	3,951,777	72·2

WYOMING

KEY HISTORICAL EVENTS. The territory was inhabited by Plains Indians (Arapahoes, Sioux and Cheyenne) in the early 19th century. There was some trading between them and white Americans, but very little white settlement. In the 1840s the great western migration routes, the Oregon and the Overland Trails, ran through the territory, Wyoming offering mountain passes accessible to wagons. Once migration became a steady flow it was necessary to protect the route from Indian attack, and forts were built.

In 1867 coal was discovered. In 1868 Wyoming was organized as a separate Territory, and in 1869 the Sioux and Arapaho were confined to reservations. At the same time the route of the Union Pacific Railway was laid out, and working settlements and railway towns grew up in southern Wyoming. Settlement of the north was delayed until after the final defeat of hostile Indians in 1876.

The economy of the settlements at first depended on ranching. Cheyenne had been made Territorial capital in 1869, and also functioned as a railway town moving cattle. Casper, on the site of a fort on the Pony Express route, was also a railway town on the Chicago and North Western. Laramie started as a Union Pacific construction workers' shanty town in 1868. In 1890 oil was discovered at Casper, and Wyoming became a state in the same year.

During the 20th century mineral extraction became the leading industry, as natural gas, uranium, bentonite and trona were exploited as well as oil and coal.

TERRITORY AND POPULATION. Wyoming is bounded north by Montana, east by South Dakota and Nebraska, south by Colorado, south-west by Utah and west by Idaho. Land area, 97,105 sq. miles (251,501 sq. km). The Yellowstone National Park occupies about 2.22m. acres; the Grand Teton National Park has 307,000 acres. The federal government in 1986 owned 49,838 sq. miles (50.9% of the total area of the state). The Federal Bureau of Land Management administers 17,546,188 acres.

Census population, 1 April 1990, 453,588 (65% urban), a decrease of 3.66% since 1980. Population estimate (1996), 481,400. Births in 1995 were 6,261; deaths, 3,720; marriages, 5,037; divorces, 3,149; infant deaths, 48 (7.7 per 1,000 live births).

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>American Indian</i>	<i>Asiatic</i>	<i>Total</i>	<i>Per sq. mile</i>	
1910	140,318	2,235	1,486	1,926	145,965	1.5

Of the total population in 1990, 227,007 were male and those over 18 years of age numbered 318,063.

The largest towns (with 1990 census population) are Cheyenne, 50,008; Casper, 46,742; Laramie, 26,687; Rock Springs, 19,050; Gillette, 17,635; Sheridan, 13,900; Green River, 12,711.

OUTLYING TERRITORIES

GUAM

KEY HISTORICAL EVENTS. Magellan is said to have discovered the island in 1521; it was ceded by Spain to the USA by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

TERRITORY AND POPULATION. Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. Total area, 209 sq. miles (541 sq. km). Agaña, the seat of government is about 8 miles from the anchorage in Apra Harbour. The census on 1 April 1990 showed a population of 133,152, an increase of 27,173 since 1980 (50,801 urban; 62,207 female); density, 637.1 per sq. mile; estimate, 1996, 156,974. In 1990 those of Guamanian ancestry numbered 63,504; density was 637 per sq. mile. Vital statistics, 1996: Birth rate, 24.2 per 1,000 population; death rate, 3.9 per 1,000 population; infant mortality rate, 15.7 per 1,000 live births. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

CONSTITUTION AND GOVERNMENT. Guam's constitutional status is that of an 'unincorporated territory' of the USA. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949-50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the USA. There was a referendum on status, 30 Jan. 1982. 38% of eligible voters voted; 48.5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The legislature is a 21-member *Senate*; its powers are similar to those of an American state legislature. At the general election of Nov. 1991, the Democratic Party won 14 seats and the Republicans 7. Guam returns 1 non-voting delegate to the House of Representatives.

COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

KEY HISTORICAL EVENTS. In 1889 Spain ceded Guam (largest and southernmost of the Marianas Islands) to the USA and sold the rest to Germany. Occupied by Japan in 1914, the islands were administered by Japan under a League of Nations mandate until occupied by US forces in August 1944. In 1947 they became part of the US-administered Trust Territory of the Pacific Islands. On 17 June 1975 the electorate adopted a covenant to establish a Commonwealth in association with the USA; this was approved by the US government in April 1976 and came into force on 1 Jan. 1978. In Nov. 1986 the islanders were granted US citizenship. The UN terminated the Trusteeship status on 22 Dec. 1990.

TERRITORY AND POPULATION. The Northern Marianas form a single chain of 16 mountainous islands extending north of Guam for about 560 km, with a total area of 5,050 sq. km (1,950 sq. miles) of which 464 sq. km are dry land and a population (1990 Census) of 43,345 (urban, 12,151; female, 20,543); density, 235.6 per sq. mile. 16,752 persons were born in the Islands. AMERICAN SAMOA

KEY HISTORICAL EVENTS. The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the USA all

rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the independent state of Samoa). The islands of Tutuila and Aunu'u were ceded to the USA by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

TERRITORY AND POPULATION. The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-north-east of Fiji. The total area is 1,511 sq. km (583 sq. miles), of which 200 sq. km are dry land; population (1990 Census), 46,773, nearly all Polynesians or part-Polynesians, of whom 25,573 were born in American Samoa (urban, 15,599; female, 22,750); density, 607.4 per sq. mile; estimate (July 1996), 59,566. In 1996 the birth rate was 35.6 per 1,000 population and the death rate 4.0 per 1,000 population. Infant mortality was 18.8 per 1,000 live births. The island's 3 Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1.9 sq. miles and 100 inhabitants (1994), which lies 210 miles to the north west. Rose Island (uninhabited) is 0.4 sq. mile in area. In 1990 some 85,000 American Samoans lived in the USA.

CLIMATE. A tropical maritime climate with a small annual range of temperature and plentiful rainfall. Pago Pago, Jan. 83°F (28.3°C), July 80°F (26.7°C). Annual rainfall 194" (4,850 mm).

CONSTITUTION AND GOVERNMENT. American Samoa is constitutionally an unorganized unincorporated territory of the US administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the Government.

The islands are organized in 15 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs. The Governor and Lieut.-Governor have been popularly elected since 1978.

Governor: A. P. Lutati (D.).

Lieut.-Governor: Tauese P. Sunia.

ECONOMY

Policy. The first formal Economic Development and Planning Office completed its first year in 1971. Much has been done to promote economic expansion within the Territory and a large amount of outside investment interest has been stimulated.

The Office initiated the first Territorial Comprehensive Plan. This plan when completed will, with periodic updating, provide a guideline to territorial development for 20 years. The planning programme was made possible under a Housing and Urban Development '701' grant programme, and Economic Development Administration '302' planning programmes.

The focus will be on physical development and the problems of a rapidly increasing population with severely limited labour resources.

Budget. The chief sources of revenue are annual federal grants from the USA, and local revenues from taxes, and duties, and receipts from commercial operations

(enterprise and special revenue funds), utilities, rents and leases and liquor sales. In 1990–91 revenues were \$97m. (\$43m. in local revenue and \$54m. in grant revenue).

South Pacific Island Airways also operates between Pago Pago and Honolulu, and between Pago Pago and Tonga. The islands are also served by Air Nauru which operates between Pago Pago, Tahiti and Auckland, and Air Pacific (Fiji and westward). South Pacific and Manu'a Air Transport run local services. There are 3 airports.

The land and title division decides cases relating to disputes involving communal land and Matai title court rules on questions and controversy over family titles. The appellate division hears appeals from trial, land and title and probate divisions as well as having original jurisdiction in selected matters. The appellate court is the court of last resort. Two American judges sit with 5 Samoan judges permanently. In addition there are temporary judges

or assessors who sit occasionally on cases involving Samoan customs. There is also a District Court with limited jurisdiction and there are 69 village courts.

VIRGIN ISLANDS OF THE UNITED STATES

KEY HISTORICAL EVENTS. The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French c. 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

They were purchased by the United States from Denmark for \$25m. in a treaty ratified by both nations and proclaimed 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

TERRITORY AND POPULATION. The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (31 sq. miles), St Croix (83 sq. miles), St John (20 sq. miles) and 65 small islets or cays, mostly uninhabited. The total area is 1,910 sq. km (738 sq. miles), of which 346 sq. km are dry land.

The population, according to the census of 1 April 1990, was 101,809, a decrease of 8,991 since 1985 (52,599 females); density, 760.9 per sq. mile; population estimate, 1996, 97,120. Vital statistics (1996): Birth rate, 17.6 per 1,000 population; death rate, 5.2; infant mortality rate, 12.5 per 1,000 live births.

Population (1990 census) of St Croix, 50,139; St Thomas, 48,166; St John, 3,504. About 45% (1990) were native-born, 29% from other Caribbean islands, 13% from mainland USA and 5% from Puerto Rico. St Croix has over 40% of Puerto Rican origin or extraction, Spanish speaking.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (1990 census) of 12,331; there are two towns on St Croix. Christiansted (2,555) and Frederiksted (1,064).

CLIMATE. Average temperatures vary from 77°F to 82°F throughout the year; humidity is low. Average annual rainfall, about 45 inches. The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer, but hurricanes rarely.

CONSTITUTION AND GOVERNMENT. The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for 2 years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating.

For administration, there are 14 executive departments, 13 of which are under commissioners and the other, the Department of Justice, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1986 there were 34,183 voters, of whom 26,377 participated in the local elections that year.

They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

KEY HISTORICAL EVENTS. Uruguay was the last colony settled by Spain in the Americas. Part of the Spanish viceroyalty of Rio de la Plata until revolutionaries expelled the Spanish in 1811, and subsequently a province of Brazil, Uruguay declared its independence 25 Aug. 1825 which was recognized by the treaty between Argentina and Brazil signed at Rio de Janeiro on 27 Aug. 1828. The first constitution was adopted on 18 July 1830. In the 1830s two political parties, the *blancos* (conservatives) and the *colorados* (liberals), emerged and conflict between the parties in 1865-70 precipitated the War of the Triple

Alliance. In 1903, peace and prosperity were restored under President José Battle y Ordóñez. Since 1904 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the group known as the 'Batllistas' (a *colorado* faction) which, until defeated at the 1958 elections, held a parliamentary majority for over 90 years, has been the collegiate system of government, in which the two largest political parties were represented.

The early part of the 20th century saw the development of a welfare state in Uruguay which encouraged fairly extensive immigration.

In 1919 a new constitution was adopted providing for a *colegiado*—plural executive based on the Swiss pattern. However, the system was abolished in 1933 and replaced by presidential government, with quadrennial elections. From 1951 to 1966 a collective form of leadership again replaced the presidency. During the 1960s, following a series of strikes and riots, the Army became increasingly influential, repressive measures such as censorship of the press were adopted and presidential government was restored in 1967. The Tupamaro, Marxist urban guerrillas, sought violent revolution but were finally defeated by the Army in 1972. In 1984 the military permitted presidential elections, although several candidates were banned.

The return to civilian rule came on 12 Feb. 1985 when Gen. Alvarez resigned as president and was succeeded by Dr Julio Maria Sanguinetti, who established a government of National Unity and ordered the release of all political prisoners.

TERRITORY AND POPULATION. Uruguay is bounded on the north-east by Brazil, on the south-east by the Atlantic, on the south by the Río de la Plata and on the west by Argentina. CONSTITUTION AND GOVERNMENT. Congress consists of a *Senate* of 30 members and a *Chamber of Deputies* of 99 members, both elected by proportional representation for 5-year terms. The electoral system provides that the successful presidential candidate be a member of the party which gains a parliamentary majority. Electors vote for deputies on a first-past-the-post system, and simultaneously vote for a presidential candidate of the same party. The winners of the second vote are credited with the number of votes obtained by their party in the parliamentary elections. Referendums may be called at the instigation of 10,000 signatories. A referendum was held on 8 Dec. 1996 to prohibit parties from presenting more than 1 candidate in presidential elections, and to provide for 2 rounds of voting if no candidate gained an absolute majority in the first round. 50.2% of votes cast were in favour.

Presidential, parliamentary and gubernatorial elections were held on 27 Nov. 1994. The electorate was 2.4m. Julio Sanguinetti was elected President with 31.36% of votes cast against 18 opponents.

ECONOMY

Policy. Uruguay's small economy benefits from a favourable climate for agriculture and substantial hydropower potential. Economic development has been restrained in recent years by high—though declining—inflation and extensive government regulation. The Sanguinetti government's conservative monetary and fiscal policies are aimed at continuing to reduce inflation, at 24.3% at year end 1996; other priorities include extensive reform of the social security system and increased investment in education. Uruguay recovered from recession in 1996—partly due to the recovery in Argentina—and ended the year with a nearly 5% rise in GDP. Uruguayan trade continued to expand and the potential for new markets continued to open through the negotiations of Mercosur (Southern Cone Common Market) with neighbouring countries and the EU.

KEY HISTORICAL EVENTS. Descended from nomadic Mongol tribes who settled in Central Asia in the 13th century, the Uzbeks came under Russian control in the late 19th century.

In Oct. 1917 the Tashkent Soviet assumed authority, and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into People's Republics, then (1923–24) into Soviet Socialist Republics and finally merged in the Uzbek

SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 27 Oct. 1924 from lands formerly included in Turkestan. It included a large part of the Samarkand region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Karakalpak ASSR and the Uzbek regions of Khorezm. In 1963 40,000 sq. km were transferred from Kazakhstan.

On 20 June 1990 the Supreme Soviet adopted a declaration of sovereignty, and in Aug. 1991, following an unsuccessful coup, declared independence as the 'Republic of Uzbekistan'. This was confirmed by referendum in Dec. In Dec. 1991 Uzbekistan became a member of the CIS.

KEY HISTORICAL EVENTS. Vanuatu occupies the group of islands formerly known as the New Hebrides, in the south-western Pacific Ocean. Many of the northern islands have been inhabited by Melanesian peoples for at least 3,000 years. The islands which comprise the Republic of Vanuatu were first discovered in 1606 by the Portuguese. They were rediscovered by the French in 1768 and charted and named the New Hebrides by Captain Cook in 1774. Captain Bligh and his companions, east adrift by the *Bounty* mutineers,

sailed through part of the island group in 1789. Sandalwood merchants and European missionaries came to the islands in the mid 19th century and were then followed by cotton planters—mostly French and British—in 1868.

Complaints by missionaries regarding the activities of slave traders induced Britain to establish legislation to protect the islanders. Shortly thereafter British and French settlers began to arrive and French influence increased. In response to Australian calls to annexe the islands, Britain and France agreed on joint supervision, initially through an 1888 Joint Naval Commission and subsequently through a Condominium Government, established in 1906, which was superseded by an Anglo-French Protocol in 1914. Joint sovereignty was held over the indigenous Melanesia people, but each nation retained responsibility for its own nationals according to the protocol of 1914. The island group escaped Japanese invasion during the second world war and became an Allied base.

In 1972, the New Hebrides National Party, now known as the Vanuaaku Pati, was formed. The Vanuaaku Pati was instrumental in winning agreement from the condominium powers for independence and on 30 July 1980 New Hebrides became an independent nation under the name of Vanuatu, meaning 'Our Land Forever'.

VATICAN CITY STATE

Stato della Città del Vaticano

KEY HISTORICAL EVENTS. For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq. miles, with a population finally of over 3m. In 1859–60 and 1870 the Papal States were incorporated into the Italian Kingdom. The consequent dispute between Italy and successive Popes was only settled on 11 Feb. 1929 by three treaties between the Italian Government and the Vatican: a political treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; a concordat, to regulate the condition of religion and of the Church in Italy; and a financial convention, in accordance with which the Holy See received 750m. lire in cash and 1,000m. lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929 and embodied in the Constitution of the Italian Republic of 1947. A revised Concordat between the Italian Republic and the Holy See was negotiated and signed in 1984, and came into force on 3 June 1985.

TERRITORY AND POPULATION. The area of the Vatican City is 44 ha (108.7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (for freight only), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major and St Paul without the Walls, the Pope's summer villa at Castel Gandolfo and a further Vatican radio station on Italian soil. *Radio Vaticana* broadcasts an extensive service in 34 languages from the transmitters in the Vatican City and in Italy.

The Vatican City has about 1,000 inhabitants.

CONSTITUTION. The Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

Supreme Pontiff: **John Paul II** (Karol Wojtyła), born at Wadowice near Kraków, Poland, 18 May 1920. Archbishop of Kraków 1964–78, created Cardinal in 1967, elected Pope 16 Oct. 1978, inaugurated 22 Oct. 1978.

Pope John Paul II was the first non-Italian to be elected since Pope Adrian VI (a Dutchman) in 1522.

Secretary of State: Angelo Sodano.

Secretary for Relations with Other States: Jean-Louis Tauran.

ROMAN CATHOLIC CHURCH. The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting in Nov. 1996 of 167 Cardinals appointed by him from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Holy See. In addition to the College of Cardinals, the Pope has created a 'Synod of Bishops'. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals

in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets as and when decided by the Pope. The last Synod (on the formation of priests) met in Oct. 1990.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, each composed of a number of Cardinals and diocesan bishops (both appointed for 5-year periods), with Consultors and Officials. Besides the Secretariat of State and the Second Section of the Secretariat of State (Section for Relations with States) there are now 9 Sacred Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. Pontifical Councils have replaced some of the previously designated Secretariats and Prefectures and now represent the Laity, Christian Unity, the Family, Justice and Peace, Cor Unum, Migrants, Health Care Workers, Interpretation of Legislative Texts, Inter-Religious Dialogue, Culture, Preserving the Patrimony of Art and History, and a new Commission, for Latin America. There are also various Offices. The Pontifical Academy of Sciences was revived in 1936. The director of the Vatican Bank (Istituto per le Opere di Religione) is Giovanni Bodio.

KEY HISTORICAL EVENTS. Columbus sighted Venezuela in 1498 and it was visited by Alonzo de Ojeda and Amerigo Vespucci in 1499 who named it Venezuela (Little Venice). It was part of the Spanish colony of New Granada until 1821 when it became independent, at first in union with Colombia and then as a separate independent republic from 1830.

Between 1830 and 1945 the country was governed mainly by dictators. In 1945 a three-day revolt against the reactionary government of Gen. Isaias Medina led to

Romulo Betancourt assuming the presidency. Betancourt produced constitutional and economic reforms but he was replaced by Gen. Marcos Pérez Jiménez who seized power in 1952. Jiménez was himself overthrown by a military junta in a revolution in 1958, led by Adm. Wolfgang Larrazabal. Betancourt again became president.

In 1961 a new constitution was promulgated which provided for a presidential election every five years, a national congress, and state and municipal legislative assemblies.

Betancourt's progressive policies were continued by his successor, Dr Raúl Leoni. There was an abortive military uprising in 1966. In 1969 Dr Rafael Caldera Rodriguez became the first Christian Democratic president. In 1978 Dr Luis Herrera was chosen president but as his party, the *Partido Social-Christiano* (COPEI), failed to obtain an overall majority in congress he was forced to form alliances with smaller parties in order to make legislative progress.

Twenty political parties participated in the 1983 elections. Of 13 presidential candidates, Dr Jaime Lusinchi was elected with 57% of the votes. By now the economy was in crisis and social unrest was widespread. Corruption linked to drug trafficking led to further violence. In Feb. 1992 an attempt to overthrow the President by rebel troops was narrowly averted. There was another abortive coup in Nov. A state of emergency was declared. President Perez resisted demands for his resignation but he was later suspended from office. In Dec. 1993, Dr Rafael Caldera Rodriguez was returned to the presidency with 30·5% of the vote. Dr Caldera's election reflected disenchantment with the established political parties and concern over allegations of mismanagement and corruption. He took office in the early stages of a banking crisis which cost 15% of GDP to resolve. Fiscal tightening backed by the IMF brought rapid recovery.

TERRITORY AND POPULATION. Venezuela is bounded to the north by the Caribbean with a 2,813 km coastline, east by the Atlantic and Guyana, south by Brazil, south-west and west by Colombia. The ministers, who together constitute the Council of Ministers, are appointed by the President and head various executive departments. There are 17 ministries and 7 officials who also have the rank of Minister of State.

The Senate and Chamber of Deputies have similar legislative powers. For a bill to become law, it must be approved by a majority in both bodies. Differences between the 2 chambers are resolved through majority vote of the Congress, meeting in joint session. The constitution provides for procedures by which the President may reject bills passed by Congress, as well as provisions by which Congress may override such Presidential veto acts.

KEY HISTORICAL EVENTS. Vietnam was conquered by the Chinese in 111BC, and though it broke free of Chinese domination in 939AD, at many subsequent periods it was a nominal Chinese vassal.

By the end of the 15th century, the Vietnamese had conquered most of the Kingdom of Champa (now Vietnam's central area), and by the end of the 18th century had acquired Cochin-China (now its southern area). At the end of the 18th century, France helped to establish the Emperor Gia-Long (with whom Louis XVI

had signed a treaty in 1787) as ruler of a unified Vietnam, known then as the Empire of Annam. French influence increased with a series of treaties between 1874 and 1884, the establishment of French protectorates over Tonkin and Annam, and the formation of the French colony of Cochin-China. By a Sino-French treaty of 1885, the Empire of Annam ceased to be a tributary to China. Cambodia had become a French protectorate in 1863, and in 1899 after the extension of French protection to Laos in 1893, the Indo Chinese Union was proclaimed.

In 1940, Vietnam was occupied by the Japanese. In 1941, a nationalist coalition of nationalist, revolutionary and Communist organizations, known as the Vietminh League, was founded by the Communists. On 9 March 1945, the Japanese interned the French authorities and proclaimed the independence of Indo-China. In Aug. 1945, they allowed the Vietminh movement to seize power, dethrone the Emperor of Annam and establish a republic known as Vietnam. On 6 March 1946, France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. On 19 Dec. Vietminh forces made a surprise attack on Hanoi, the signal for nearly eight years of hostilities. An agreement on the cessation of hostilities in Vietnam was reached on 20 July 1954 at the Geneva Conference. The French withdrew and by the Paris Agreement of 29 Dec. 1954, completed the transfer of sovereignty to Vietnam.

The conference divided Vietnam along the 17th parallel into Communist North Vietnam and non-Communist South Vietnam. From 1959, the North promoted insurgency in the south and from 1961, the USA came to the aid of the south and a full scale guerrilla war developed.

In 1963, the South Vietnamese president, Diem, was overthrown; Nguyen Van Thieu took power as chairman of a national leadership committee in 1965, becoming president in 1967.

In Paris on 27 Jan. 1973, an agreement was signed ending the war in Vietnam. After the US withdrawal in that year, however, hostilities continued between the North and the South until the latter's defeat in 1975. Between 150,000 and 200,000 South Vietnamese fled the country, including the former President Thieu.

After the collapse of Thieu's régime the provisional revolutionary government established an administration in Saigon. A general election was held on 25 April 1976 for a national assembly representing the whole country. Voting was by universal suffrage of all citizens of 18 or over, except former functionaries of South Vietnam undergoing 're-education'. The unification of North and South Vietnam into the Socialist Republic of Vietnam finally took place on 2 July 1976. Following the signing of a treaty of friendship with the USSR in 1978, relations with China correspondingly deteriorated. Vietnam invaded Cambodia in Dec. 1978 and China attacked Vietnam in consequence. Thailand's relations with Vietnam worsened considerably in view of Vietnam attacks on guerrilla bases along the Thai border. Many refugees escaped in small boats across the South China Sea.

In 1986, Vietnam implemented economic reforms, eliminating subsidies and

gradually shifting to a multi-sectoral market economy under State regulation. On 11 July 1995, Vietnam and the USA officially normalized relations. On 28 July 1995, Vietnam became an official member of the Association of South East Asian Nations (ASEAN), and in the same month, signed a trade agreement with the European Union. At the present time, it has established diplomatic relations with more than 160 countries.

KEY HISTORICAL EVENTS. Following an agreement reached in Dec. 1989 on a constitution for a unified state, the (northern) Yemen Arab Republic and the (southern) People's Democratic Republic of Yemen were united as the Republic of Yemen on 22 May 1990.

In Aug. 1993 Vice-President Ali Salem Albaidh withdrew to Aden and demanded the implementation of a reform programme as a condition of re-joining President Saleh in Sanaia. Albaidh agreed to a modified reform programme at an agreement brokered by King Hussein of Jordan in Feb. 1994, but clashes between north and south escalated into

full civil war at the beginning of May. Southern officials announced their secession from Yemen on 21 May 1994. Aden was captured by northern forces on 7 June 1994. The former vice-president and government went into exile.

TERRITORY AND POPULATION. Yemen is bounded in the north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Red Sea. The territory includes 112 islands including Kamaran (181 sq. km) and Perim (300 sq. km) in the Red Sea and Socotra (3,500 sq. km) in the Gulf of Aden. The islands of Greater and Lesser Hanish is claimed by both Yemen and Eritrea. On 15 Dec. 1995 Eritrean troops occupied it, and Yemen retaliated with aerial bombardments. A ceasefire was agreed at presidential level on 17 Dec. On 20 Dec. the UN resolved to send a good offices mission to the area. In an agreement of 21 May 1996 brokered by France, Yemen and Eritrea renounced the use of force to settle the dispute and agreed to submit it to arbitration. The area is 555,000 sq. km excluding the desert Empty Quarter (Rub Al-Khali). A dispute with Saudi Arabia broke out in Dec. 1994 over some 1,500–2,000 km of undemarcated desert boundary. A memorandum of understanding signed on 26 Feb. 1995 reaffirmed the border agreement reached at Taif in 1934. An agreement of June 1995 completed the demarcation of the border with Oman.

The population was estimated at 15·8m. in 1995; density, 21 persons per sq. km. At the census of 1986 in the north and 1988 in the south the population was 9,664,939 (4,938,318 females; 1,793,861 urban). The birth rate in 1994 was 48·4; the death rate, 11·5. There were 1,168,199 citizens working abroad mainly in Saudi Arabia and the United Arab Emirates not included in the census total. Since 1990 Saudi Arabia has compulsorily repatriated almost all Yemeni workers. In 1988 there were 17 governorates:

	<i>1986/88 census population</i>		<i>1986/88 census population</i>
Sanaia (city)	427,502	Shabwah	192,324
Sanaia	1,237,016	Hajjah	720,000
Aden	326,919	Bayd	295,439
Taiiz	1,419,708	Hadhrama	537,095

CONSTITUTION AND GOVERNMENT. There is a 301-member *House of Representatives* which after the elections of April 1993 was composed of: General People's Congress (GPC), 123 seats; Islah, 62; Yemen Socialist Party, 56; ind, 47; others, 13.

On 28 Sept. 1994 the House of Representatives unanimously adopted a new constitution founded on Islamic law. This abolishes the former 5-member Presidential Council and installs a *President* elected by parliament for 5-year terms. Lieut.-Gen. Ali Abdullah Saleh was elected President on 1 Oct. 1994.

Parliamentary elections were held on 27 April 1997, in which the GPC gained 187 seats, the Independents 54, Islah 53, Baassists 3, and Nasserians 2. There were 21 women candidates, of whom 2 were elected.

KEY HISTORICAL EVENTS. On 28 June 1914 Archduke Franz Ferdinand of Austria was assassinated in Bosnia by a young nationalist. Though Serbia complied with most of the terms of Austria's subsequent ultimatum, Austria declared war on 28 July, thus precipitating the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government, under Prime Minister Pašić, was established. Montenegro capitulated in 1916 and its king fled. Exiles from Croatia and Slovenia had formed a Yugoslav Committee in 1914 whose aim was South Slav federation. This was not compatible

with Pašić's goal of a centralized, Serb-run state, but the Committee and the government managed to contrive a joint 'Corfu Declaration' in July 1917 demanding a 'constitutional, democratic, parliamentary monarchy headed by the Karadjordjevićs'. This was accepted by the Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918. From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes.

Boundary disputes with Italy and other neighbouring countries lasted into the 1920s. A constitution of 1921 established an assembly under King Alexander, but the trappings of parliamentarianism could not bridge the gulf between Serbs and Croats. The Croat peasant leader Radić was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. On 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the 1930s Yugoslavia had become heavily dependent on the German economy. During the regency of Prince Paul, Prime Minister Stojadinović pursued a pro-fascist line. On 25 March 1941 Paul was induced to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within 10 days Yugoslavia surrendered; king and government fled to London. Two resistance movements came into being, a royalist group, under Draža Mihailović, and the communist-dominated partisans of Josip Broz, nicknamed Tito. The latter were imbued with revolutionary as well as liberationist aims. The movements often fought each other, and Mihailović collaborated to some extent with the Germans. Allied support was switched from him to Tito in 1944.

Tito succeeded in liberating Yugoslavia largely by his own efforts. The partisan Liberation Committee formed the nucleus of the post-war provisional government. A constituent assembly was elected in Nov. 1945 from a single list of People's Front candidates. A people's republic was proclaimed with a Soviet-type constitution. Tito embarked on a programme of enthusiastic Sovietization, but was too independent for Stalin, who sought to topple him by excommunicating Yugoslavia in 1948–49. However, Tito survived by the support of his people and a *rapprochement* with the west, and it was the Soviet Union under Khrushchev which had to extend the olive branch in 1956. As a spin-off from this schism Yugoslavia evolved its 'own road to socialism'. Collectivization of agriculture was abandoned; the principles of 'industrial self-management' were developed, and extended into the whole of the representative process; and Yugoslavia became a champion of international 'non-alignment'. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia

between Serbs and Croats, brought inter-ethnic tensions into prominence after 1988. With the election of new national assemblies in all 6 republics during 1990, several of the latter came increasingly into conflict with the federal government. At the end of 1990 both Croatia and Slovenia proclaimed their right to secede from federal Yugoslavia. In May 1991, following escalating Serb-Croat violence and demands for secession from predominantly Serb-inhabited areas of Croatia, the federal army was given powers to restrict the movement of unofficial armed groups. On 12 May the Krajina area held a self-styled referendum resulting, it was claimed, in an overwhelming vote for union with Serbia. Croatia rejected the poll.

On 15 May 1991 Croatia's representative in the federal presidency, Štipe Mesić, failed to secure the 5 votes needed to become president, hitherto a mere formality. Serbia, Kosovo and Vojvodina voted against and Montenegro abstained, leaving Yugoslavia without a head of state.

On 25 June Croatia and Slovenia made declarations of independence, agreeing on 30 June to an EU proposal to suspend them for 3 months. Fighting began during the summer in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. Federal forces had left Slovenia by July 1991. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia.

The 3-month moratorium agreed at the EU peace talks on 30 June having expired, both Slovenia and Croatia declared their complete independence from the Yugoslav federation on 8 Oct.

Trade sanctions on the whole of Yugoslavia were applied from 8 Nov., but restricted to Serbia after 2 weeks.

After 13 ceasefires had failed to be observed, a fourteenth was signed on 23 Nov. by the presidents of Croatia and Serbia and the federal defence minister, for the first time under UN auspices. Following a request on 26 Nov. from the federal government, a Security Council resolution of 27 Nov. proposed the deployment of a UN peace-keeping force if the ceasefire were kept. Fighting, however, continued.

On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia-Herzegovina was recognized on 7 April 1992 and Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted unanimously to send a 14,000-strong peace-keeping force to Croatia and Yugoslavia.

On 27 April 1992 Serbia and Montenegro announced the formation of a federal republic of Yugoslavia constituted by themselves as the legal successor to the former Socialist Federal Republic of Yugoslavia (SFRY).

On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted in favour of the imposition of sanctions.

In mid-1992 NATO countries began to commit air, sea and eventually land forces to enforce sanctions and protect humanitarian relief operations in Bosnia.

At a joint UN-EC peace conference on Yugoslavia held in London on 26-27 Aug. some 30 countries and all the former republics of Yugoslavia endorsed a plan to end the fighting in Croatia and Bosnia, install UN supervision of heavy weapons, recognize the borders of Bosnia-Herzegovina and return refugees. At a further conference at Geneva on 30 Sept. the Croatian and Yugoslav presidents agreed to make efforts to bring about a peaceful solution in Bosnia, but fighting continued.

On 22 Sept. the UN resolved (by 127 votes to 6 with 26 abstentions) that the self-proclaimed Federal Republic of Yugoslavia of Serbia and Montenegro could not automatically assume the seat of the former SFRY and excluded it from the General Assembly.

On 16 Nov. the UN Security Council voted for sanctions against Yugoslavia to be made more effective, and NATO agreed to lend naval support to their enforcement.

Further peace talks were held in Geneva in Jan. 1993, and transferred to the UN in Feb. On 22 Feb. the UN Security Council resolved to set up a war crimes tribunal for alleged violations of human rights in the former SFRY. A court was inaugurated at The Hague on 17 Nov. 1993. In 1995 the tribunal was merged into the International Penal Tribunal for Yugoslavia and Rwanda sitting at The Hague. The first sentence on a Yugoslav was delivered in Nov. 1996.

Following the Serbian President Milošević's announcement that Yugoslavia would

no longer send supplies to Bosnian Serbs and would not accept international monitors on its borders, on 24 Sept. 1994 the UN Security Council lifted the non-trade sanctions against Yugoslavia affecting civil aviation, culture and sport. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all remaining UN sanctions were lifted in Nov. 1995.

Massive public anti-government demonstrations took place in Nov.-Dec. 1996 following the government's annulment of municipal election results where opposition candidates had been elected. An OSCE delegation investigated the disputed results and found that opposition candidates should have won in 22 municipalities. As demonstrations and protests from various quarters continued throughout Jan. 1997, Milošević conceded opposition victories in at first some, then finally on 7 Feb., all, the disputed municipalities.

In July 1997 Slobodan Milošević switched his power base to become president of federal Yugoslavia. Vojislav Seselj, leader of the ultra-nationalist Radical party defeated his Socialist rival in the run-off for the Serbian presidency. But since the turn-out fell short of the 50% required by the constitution there was a further election in Dec. in which the former Yugoslav foreign minister, Milan Milutinović finally succeeded Milošević. Meanwhile, in Montenegro, the pro-western Milo Djukanović succeeded a pro-Milošević president despite violent demonstrations which raised fears that Montenegro might break away from Serbia to create an independent state.

TERRITORY AND POPULATION. Yugoslavia is bounded in the north by Hungary, north-east by Romania, east by Bulgaria, south by Macedonia and Albania, and west by the Adriatic Sea, Bosnia-Herzegovina and Croatia. REPUBLICS AND PROVINCES

In Dec. 1992 the new self-styled Federal Republic of Yugoslavia comprised the 2 republics of Montenegro and Serbia, and the 2 formerly autonomous provinces of Kosovo and Metohija, and Vojvodina within Serbia.

MONTENEGRO

KEY HISTORICAL EVENTS. Montenegro emerged as a separate entity on the break-up of the Serbian Empire in 1355. Owing to its mountainous terrain, it was never effectively subdued by Turkey. It was ruled by Bishop Princes until 1851, when a royal house was founded. The Treaty of Berlin (1828) recognized the independence of Montenegro and doubled the size of the territory. The remains of King Nicholas I, who was deposed in 1918, were returned to Montenegro for reburial in Oct. 1989.

TERRITORY AND POPULATION. Montenegro is a mountainous region which opens to the Adriatic in the south-west. It is bounded in the west by Croatia, north-west by Bosnia-Herzegovina, in the north-east by Serbia and in the south-east by Albania. The capital is Podgorica (population, 1996 estimate, 159,394). Its area is 13,812, sq. km. Population at the 1991 census was 615,035, of which the predominating ethnic groups were Montenegrins (380,467), Moslems (89,614), Serbs (57,453) and Albanians (40,415). Population density per sq. km, 44.5. Estimate, 1995, 635,012; density, 46 per sq. km.

Vital statistics:

	Live births	Marriages	Deaths	Growth rate per 1,000
1993	8,922	3,873	4,471	7.1
1994	8,887	3,753	4,660	6.7
1995	9,477	3,791	4,921	7.2
1996	9,193	3,869	5,029	6.5

CONSTITUTION AND GOVERNMENT. There is an 85-member single-chamber National Assembly.

A referendum was held on 29 Feb.–1 March 1992 to determine whether Montenegro should remain within a common state, Yugoslavia, as a sovereign republic. The electorate was 412,000, of whom 66% were in favour.

President: Milo Đukanović; sworn in on 15 Jan. 1998.

Prime Minister: Filip Vujanović.

ECONOMY

Agriculture. In 1997 the cultivated area was 187,000 ha. Yields (in 1,000 tonnes): Wheat, 7; maize, 14; potatoes, 57. Livestock (1,000 head): Cattle, 180; sheep, 439; pigs, 22. Timber cut in 1997: 232,000 cu. metres.

Industry. Production (1996): Electricity, 3,102m. kWh; lignite, 1,369,664 tonnes; bauxite, 323,000 tonnes; heavy semi-manufactures, 26,000 tonnes; cotton carded yarn, 146 tonnes.

SERBIA

KEY HISTORICAL EVENTS. The Serbs received Orthodox Christianity from the Byzantines in 891, but shook off the latter's suzerainty to form a prosperous state, firmly established under Stevan Nemanja (1167–96). A Serbian Patriarchate was established at Peć during the reign of Stevan Dušan (1331–55). Dušan planned the conquest of Constantinople, but he was forestalled by incursions of Turks. After he died many Serbian nobles accepted Turkish vassalage; the reduced Serbian state under Prince Lazar received the coup de grace at Kosovo on St Vitus day, 1389. Turkish preoccupations with a Mongol invasion and wars with Hungary, however, postponed the total incorporation of Serbia into the Ottoman Empire until 1459.

The Turks permitted the Orthodox church to practice, though the Patriarchate was abolished in 1776. The native aristocracy was eliminated and replaced by a system of fiefdoms held in return for military or civil service. Local self-government based on rural extended family units (*zadruga*) continued. In its heyday the Ottoman system probably bore no harder on the peasantry than the Christian feudalism it had replaced, but with the gradual decline of Ottoman power, corruption, oppression and reprisals led to economic deterioration and social unrest.

In 1804 murders carried out by mutinous Turkish infantry provoked a Serbian rising under Djordje Karadjordje. The Sultan's army disciplined the mutineers, but was then defeated by the intransigent Serbs. By the Treaty of Bucharest (1812), however, Russia agreed that Serbia, known as Servia until 1918, should remain Turkish. The Turks reoccupied Serbia with ferocious reprisals. A new rebellion broke out in 1815 under Miloš Obrenović which, this time with Russian support, won autonomy for Serbia within the Ottoman empire. Obrenović had Karadjordje murdered in 1817. In 1838 he was forced to grant a constitution establishing an appointed state council, and abdicated in 1839. In 1842 a coup overthrew the Obrenoviés and Alexander Karadjordjević was elected as ruler. He was deposed in 1858.

During the reign of the western-educated Michael Obrenović (1860 until his assassination in 1868) the foundations of a modern centralized and militarized state were laid, and the idea of a 'Great Serbia', first enunciated in Prime Minister Garašanin's *Draft Programme* of 1844, took root. Milan Obrenović, adopting the title of king, proclaimed formal independence in 1882. He suffered defeats against Turkey (1876) and Bulgaria (1885) and abdicated in 1889. Alexander Obrenović was assassinated in 1903, and replaced by Peter Karadjordjević, who brought in a period of stable constitutional rule.

In its foreign policy, Serbia's striving for an outlet to the sea was consistently thwarted by Austria. Annexing Bosnia in 1908, Austria forced the Serbs to withdraw from the Adriatic after the first Balkan war (1912).

TERRITORY AND POPULATION. Serbia is bounded in the north-west by Croatia, in the north by Hungary, in the north-east by Romania, in the east by Bulgaria, in the south by Macedonia and in the west by Albania, Montenegro and Bosnia-Herzegovina. It includes the 2 provinces (formerly autonomous) of Kosovo and Metohija in the south and Vojvodina in the north. With these Serbia's area is 88,361 sq. km; without, 55,968 sq. km. The capital is Belgrade (population estimate, 1995, 1,601,373). Population at the 1991 census was (with Kosovo and Vojvodina) 9,778,991, of which the predominating ethnic group was Serbs (6,446,595). Population density per sq. km, 110.7; (without Kosovo and Vojvodina), population estimate 5,808,906, of which the predominating ethnic group was Serbs (5,108,682).

Population density per sq. km, 103·8. 1996 estimate (with Kosovo and Vojvodina), 9,951,707; density, 112·6 per sq. km; (without) 5,799,810; density, 103·6 per sq. km.

Vital statistics (*without Kosovo and Vojvodina*):

	<i>Live births</i>	<i>Marriages</i>	<i>Deaths</i>	<i>Growth rate per 1,000</i>
1993	65,913	33,338	67,131	-0·2
1994	63,698	33,338	65,493	-0·3
1995	63,737	32,295	66,756	-0·5

In 1996 the live birth rate was 10·64 and the death rate 11·96, giving a growth rate of -1·32.

CONSTITUTION AND GOVERNMENT. In Sept. 1990 a new constitution was adopted by the National Assembly. It defines Serbia as a 'democratic' instead of a 'socialist' republic, lays down a framework for multi-party elections, and describes Serbia as 'united and sovereign on all its territory', thus stripping Kosovo and the Vojvodina of the attributes of autonomy granted by the 1974 federal constitution.

There is a 250-member single-chamber National Assembly. The *President* is elected by universal suffrage for not more than 2·5-year terms. At the elections on 20 Dec. 1992 Slobodan Milošević was re-elected *President* of Serbia with 56·32% of the votes cast against 34·05% for Milan Panić, the then prime minister. In July 1997 Milošević became President of Yugoslavia.

President: Milan Milutinović; sworn in on 29 Dec. 1997.

Prime Minister: Mirko Marjanović.

KOSOVO AND METOHIJA

KEY HISTORICAL EVENTS. Kosovo has a large ethnic Albanian majority. Following Albanian-Serb conflicts the Kosovo and Serbian parliaments adopted constitutional amendments in March 1989 surrendering much of Kosovo's autonomy to Serbia. Renewed Albanian rioting broke out in 1990. The Prime Minister and 6 other ministers resigned in April 1990 over ethnic conflicts. In July 1990, 114 of the 130 Albanian members of the National Assembly voted for full republican status for Kosovo, but the Serbian National Assembly declared this vote invalid and unanimously voted to dissolve the Kosovo Assembly. Direct Serbian rule was imposed causing widespread violence. Western demands for negotiations in granting Kosovo some kind of special status were rejected. Ibrahim Rugova, the leader of the main Albanian party, the Democratic League of Kosovo (LDK), has declared himself 'president' but wants talks on independence. The official *President* is Hisen Kajdomci.

ZAMBIA

Republic of Zambia

Capital: Lusaka

Population: 9·35m.

GDP per head: (PPP\$) 962

GNP: US\$3·2bn.

HDI/world rank: 0·369/143

KEY HISTORICAL EVENTS. The early history of Zambia is obscure. The first expedition of real geographical value was Livingstone's missionary journey of 1851 during which he discovered the Victoria Falls.

The great majority of the present African population of the area is of Bantu origin, descended from invaders who swept over the country. There are more than 70 different tribes, the most important being the Bemba and the Bgoni in the north-east, and there are also about 30 different dialects in use. The chief invaders of the

early 19th century were the Arabs from the north, the Ngoni Zulus fleeing from Shaka, and the Kololo, who fought their way from the south across the Zambezi and founded a kingdom with a high degree of social organization. One of the more successful of the invading tribes was the Lozi under Lewanika, who asked for and obtained the protection of the British government in 1891. In 1900 the chartered company acquired certain trading and mining rights over Lewanika's territory. These 2 territories were amalgamated in 1911 under the name of Northern Rhodesia, and in 1924 the Crown took over the administration of Northern Rhodesia from the British South Africa Company.

In 1953, following a referendum in Southern Rhodesia, the Federation of Rhodesia and Nyasaland, of which Northern Rhodesia was a component part, was created. Federation brought great economic benefits to Northern Rhodesia, but it was from the outset bitterly opposed by the African leaders there. Kenneth Kaunda led a sustained campaign against Federation, and after elections held under a new constitution of 1962, his United National Independence party gained wide success. In March 1963 Britain agreed in principle to Northern Rhodesia's right to secede from the Federation, which was duly dissolved at the end of the year. In Jan. 1964 full internal self-government was attained. On 24 Oct. Northern Rhodesia became an independent republic within the Commonwealth, changing its name to Zambia. Kaunda became its first president, and led the efforts to break the foreign hold on Zambia's mineral resources. He was ousted in the country's first multi-party elections in 1991.

A highly centralized one-party state was created which suffocated the emergent economy. Living standards fell sharply and the production of copper, Zambia's biggest foreign exchange earner, almost halved. In 1991 the Movement for Multiparty Democracy (MMD) was elected on a promise to transform the economy. Markets were liberalized and the budget deficit contained. Inflation fell from 46% in 1995 to around 20% in 1997. A Privatization Act was passed in 1992.

TERRITORY AND POPULATION. Zambia is bounded by the Democratic Republic of the Congo in the north, Tanzania in the north-east, Malaŵi in the east, Mozambique in the south-east and by Zimbabwe and Namibia in the south. The area is 290,586 sq. miles (752,614 sq. km). Population estimate (1997), 9·35m.; population density, 11·7 per sq. km.

The republic is divided into 9 provinces. Area, population and chief towns:

Annual rainfall 27" (673 mm). Ndola. Jan. 70°F (21·1°C), July 59°F (15°C). Annual rainfall 52" (1,293 mm).

CONSTITUTION AND GOVERNMENT. In Aug. 1991 the National Assembly adopted a new constitution by 107 votes to 15 permitting multi-party elections for a new wholly-elected parliament of 150 members. Candidates for election as President must have both parents born in Zambia (this excludes ex-President Kaunda).

At the presidential and parliamentary elections on 18 Nov. 1996 the potential electorate was 6·4m., of whom only 60% registered. Turn-out was 40%. Frederick Chiluba was re-elected President by 70% of votes cast. The Movement for Multiparty Democracy (MMD) gained 129 seats.

A state of emergency was imposed in Oct. 1997 after a failed coup, but President Chiluba lifted the emergency in March 1998.

KEY HISTORICAL EVENTS. Shona-speaking people lived in Zimbabwe hundreds of years before the Europeans arrived. It was a major commercial centre in the 14th and 15th centuries, although the ruins of Great Zimbabwe date back to the 8th century. It became increasingly secondary of the Kingdom of Mwanamutapa which arose on the north. By backing rival kings, Portuguese traders managed to destroy Mwanamutapa by 1700. The Shona inhabitants were unable to repel the invasion of Ndebele people under

Mzilikazi in 1870; the Ndebele had a very powerful state. However, it was not strong enough to defeat European settlers who forcibly acquired Shona lands in 1890 and turned to Ndebele territory in 1893. Revolts by both peoples several years later were also defeated.

The territory which now forms Zimbabwe was administered by the British South Africa Company from the beginning of European colonization in 1890 until 1923 when it was granted the status of a self-governing colony. In 1911 it had been divided into Southern and Northern Rhodesia (*see* Zambia).

In 1953 Southern and Northern Rhodesia were again united, along with Nyasaland to form the Federation of Rhodesia and Nyasaland. When this federation was dissolved on 31 Dec. 1963 Southern Rhodesia reverted to the status of a self-governing colony within the British Commonwealth.

Ian Smith, prime minister from April 1964, had discussions about independence on three occasions with two British prime ministers during 1964 and 1965. On 11 Nov. 1965 Smith and his government issued a unilateral declaration of independence (UDI). Thereupon the Governor dismissed Smith and his cabinet, and the British government reasserted its own formal responsibility for Rhodesia; but effective internal government was carried on by the Smith cabinet.

The UN Security Council on 20 Nov. called upon all member states to break off economic relations with Rhodesia. From 1-3 Dec. Harold Wilson, the British prime minister, and others met Smith on board H.M.S. *Tiger* and drafted a 'Working Document' on the procedure for progress towards legal independence. This statement was approved by the British cabinet, but rejected by the Smith government. As a result the Security Council voted for mandatory sanctions including oil: France and the USSR abstained. On 2 March 1970 the Smith government declared Rhodesia a republic and adopted a new constitution.

On 3 March 1978 Smith signed a constitutional agreement with the internationally-based black nationalist leaders. It decreed independence, as Zimbabwe, on 31 Dec. 1978. In Nov. 1978 the government considered it was impossible to meet the independence date. A draft constitution was published in Jan. 1979 and was accepted by the white electorate in a referendum. In April 1979 general elections were held for the 72 black seats in the 100-seat parliament. The United African National Council won 51 of the 72 seats and Bishop Abel Muzorewa became prime minister of Rhodesia-Zimbabwe on 1 June 1979.

At the Commonwealth Conference held in Lusaka in Aug. 1979 agreement was reached for a new constitutional conference to be held in London; elections took place in March 1980 resulting in a victory for the Zimbabwe African National Union (ZANU). Southern Rhodesia became the Republic of Zimbabwe, with Canaan Banana as president, and Robert Mugabe as prime minister. On 31 Dec. 1987, Robert Mugabe became the first executive president.

The state of emergency in force since 1965 was lifted in July 1990. In June 1991 the ZANU (PF) renounced Marxism.

TERRITORY AND POPULATION. Zimbabwe is bounded in the north by Zambia, east by Mozambique, south by South Africa and west by Botswana and the Caprivi Strip of Namibia. The area is 150,872 sq. miles (390,759 sq. km). The population was (1992 census) 10,401,767 (51.2% female). Estimate, 1995, 11,536,000 (50.4% female); density, 29.5 per sq. km.

Vital statistics (1990–95): Birth rate, 40.5 per 1,000; death rate, 11 per 1,000; infant mortality, 59 per 1,000 live births; growth rate, 2.96%. Life expectancy in 1994: Males, 54.4 years; females, 57.3.

There are 8 provinces and 2 cities, Harare and Bulawayo, with provincial status. Area and population (1992 census):

	Area (sq. km)	Population		Area (sq. km)	Population
Bulawayo	479	620,936	Mashonaland West	57,441	1,116,928
Harare	872	1,478,810	Masvingo	56,566	1,221,845
Manicaland	36,459	1,537,676	Matabeleland North	75,025	640,957
Mashonaland Central	28,374	857,318	Matabeleland South	54,172	591,747
Mashonaland East	32,230	1,033,336	Midlands	49,166	1,302,212

The chief cities (with 1992 census populations) were Harare, the capital (1,184,169), Bulawayo (620,936), Chitungwiza (274,035), Mutare (131,808) and Gweru (124,735). The main ethno-linguistic groups are the Shona (71%), Ndebele (16%) and Nyanja (3%).

The official language is English.

CLIMATE. Though situated in the tropics, conditions are remarkably temperate throughout the year because of altitude, and an inland position keeps humidity low. The warmest weather occurs in the three months before the main rainy season, which starts in Nov. and lasts till March. The cool season is from mid-May to mid-Aug. and, though days are mild and sunny, nights are chilly. Harare. Jan. 69°F (20.6°C), July 57°F (13.9°C). Annual rainfall 33" (828 mm). Bulawayo. INTERNATIONAL RELATIONS

Membership. Zimbabwe is a member of UN, the Commonwealth, OAU and SADC and is an ACP state of the EU.

ECONOMY

Policy. The second phase of structural adjustment dubbed Zimbabwe Programme for Economic and Social Transformation (ZIMPREST) was to be launched in early 1998. Its goals are similar to those of the first phase (1991-95), promoting a market economy by economic stabilization, liberalization of trade, deregulation, reform of the public sector and social reform.

Performance. GDP is estimated to have grown by 5% in 1997. Agriculture contributes about 65% of GDP which was left in tatters in 1992 after a severe water shortage cut it by about 12%. In 1996, on the other hand, thanks to much more favourable weather conditions in the 1995/96 growing season, agricultural production jumped 45% and GDP rose 8.1%. Manufacturing industry is estimated to have grown by 7% in 1997, against a 2.1% rise in 1996.

Budget. Revenue and expenditure (in Z\$1,000):

	1996-97	1997-98
Revenue	27,289	52,152
Expenditure	32,366	63,857

Since April 1995 corporate tax has been 35% and effective from January 1998 the top rate of income tax was to be 55% for \$80,000.

Currency. The unit of currency is the *Zimbabwe dollar* (ZWD) divided into 100 cents. There are coins of 1, 5, 10, 20 and 50 cents and Z\$1, and notes of Z\$5, 10, 20, 50 and 100. Gold reserves were valued at US\$150m. in 1996; foreign exchange reserves were US\$800m. Z\$1,226.8m. were in circulation in 1994. The currency was devalued 17% in Jan. 1994 and made fully convertible. 1996 inflation of 21% slowed in 1997.

Banking and Finance. The Reserve Bank of Zimbabwe is the central bank (established 1965; *Governor*, Dr Leonard Tsumba). It acts as banker to the Government and to the commercial banks, is the note-issuing authority and co-ordinates the application of the Government's monetary policy. The Zimbabwe Development Bank, established in 1983 as a development finance institution, is 51% Government-owned. In 1997 there were 7 commercial and 5 merchant banks. There are 5 registered finance houses, 3 of which are subsidiaries of commercial banks.

There is a stock exchange.

Weights and Measures. The metric system is in use but the US short ton is also used.

ENERGY AND NATURAL RESOURCES

Electricity. In 1997 Zimbabwe Electricity Supply Authority's (Zesa) five power stations supplied 7,323.3 GWh, and a further 3,171.5 GWh was imported via the Southern African Power Pool (SAPP). Electricity sales during the financial year 1996/96 increased by 3.6% and revenues grew by 28% from \$2,222.7 million to \$2,852.7 million.

Minerals. The total value of all minerals produced in 1995 was Z\$5,249.3m. 1995 production: gold, 23.9 tonnes, value Z\$2,395m.; nickel, value (1993) Z\$369.1m.; asbestos, 0.70m. tonnes; coal, some 5m. tonnes.

Agriculture. Current Land distribution Pattern: i) 4,000 large scale communal farmers (mainly white) on 11.2m. hectares; ii) 1m. communal area families on 16.3m. hectares; iii) 10,000 small scale commercial farmers on 1.2m. hectares; iv) 60,000 resettlement families on 3.3m. hectares; v) state farming sector on 0.5m. hectares.

Replacing a constitutional provision that permitted the government to acquire land on a 'willing-seller willing-buyer' basis, legislation of March 1992 provides for its compulsory purchase at a fixed price for peasant resettlement. The possibility of compensation is not excluded. 60,000 peasants have been resettled on 3m. hectares of land purchased from white farmers. In 1990 some 4,000 farmers owned 12m. hectares while 0.75m. peasants occupied 15m. hectares of communal agricultural areas. In June 1996 the Supreme Court ruled that the Government's expropriation proposals were not unconstitutional. Land reform still remains a thorny political subject. In Nov. 1997 the Government designated 1,503 farms (nearly half the total area of big commercial farms) to be expropriated after the harvest of mid-1998. President Mugabe has said that he will not compensate white farmers, some of whom have been in the country for several generations, for land which is appropriated for settlement by black farmers. The British Government has told Zimbabwe that it will not assume responsibility for compensating the white farmers. In the past Britain has helped the Government to purchase farms for resettlement.

The staple food crop is maize. Tobacco is the most important cash crop. Production, 1993 in 1,000 tonnes: Maize, 2,562; tobacco, 205,000; sorghum, 90; barley, 24; millet, 95; soyabbeans, 65; groundnuts, 64; fruit, 153; vegetables and melons, 140; seed cotton, 187; wheat, 300; tea, 14; coffee, 4; sugar-cane, 700. Zimbabwe is the world's second largest exporter of flue-cured tobacco. In 1996 more than 201m. kg of tobacco were sold at nearly 3m. kg up on the previous year, fetching Z\$5.8bn. More than 150,000 people work in the tobacco industry. Tobacco is a highly commercial crop, worth nearly 60 times as much as the same acreage planted with soya or maize.

The commercially-owned beef cattle herd was 1.8m. in 1991 (3.2m. in 1975). Livestock (1993): Cattle, 4m.; pigs, 270,000; sheep, 530,000; goats, 2.5m. Milk production (1993): 400,000 tonnes.

Fisheries. Trout, prawns and bream are farmed to supplement supplies of fish caught in dams and lakes.

INDUSTRY. Metal products account for over 20% of industrial output. Important agro-industries include food processing, textiles, furniture and other wood products.

Trade Unions. There is a Zimbabwe Congress of Trade Unions.

FOREIGN ECONOMIC RELATIONS. Foreign debt was US\$4,574m. in 1996. Since 1 Jan. 1995 foreign companies have been permitted to remit 100% of after-tax profits. The Customs Agreement with South Africa was extended in 1982.

Commerce. In 1995, exports totalled US\$2,050m.; imports, US\$1,850m.

Principal exports in 1993 (in US\$1m.): Tobacco, 365; ferrochrome, 142; clothing and textiles, 122; nickel, 56; cotton lint, 26; steel, 16.

Main export markets, 1994 (% of total trade): UK, 12.9%; South Africa, 11.8%; Germany, 7.1%; USA, 6.3%; Japan, 5.7%. Main import suppliers: South Africa, 32.6%; UK, 10.3%; Germany, 5.9%; Japan, 5.7%; USA, 5.3%.

Recent estimates suggest a marked deterioration in balance of payments.

Tourism. In 1994, 1.1m. visitors visited Zimbabwe, bringing foreign exchange revenue of US\$153m.

COMMUNICATIONS

Roads. The total length of roads is almost 86,000 km including surfaced, 12,900; gravel, 47,000; earth, 25,800. Number of motor vehicles, 1992: Passenger cars, 310,400; commercial vehicles, 30,200; motor cycles, 29,100; tractors, 7,200.

Railways. In 1995 the National Railways of Zimbabwe had 2,759 km (1,067 mm gauge) of route ways (313 km electrified). In 1995 the railways carried 12.2m. tonnes of freight and 1.9m. passengers.

Civil Aviation. There are 3 international airports: Harare, Bulawayo and Victoria Falls. Air Zimbabwe, the state-owned national carrier, operated 4 B-707-320Bs, 3 B-737-200 Advs, 2 B-767-200ERs and 3 other aircraft in 1995. The country is also served by British Airways, Kenya Airways, Ethiopian Airlines, Air Tanzania, Air Malawi, Zambian Airways, Balkan Bulgarian Airlines, Mozambique Airlines, South African Airways, Air Botswana, the Royal Swazi Airlines, TAP Air Portugal, Qantas, Lesotho Airways and Air India.

There were 251,344 telephones served by 96 exchanges; 2,102 telex connections, served by 2 telex exchanges. Zimbabwe Broadcasting Corporation is an statutory body broadcasting a general service in English, Shona, Ndebele, Nyanja, Tonga and Kalanga. There are 3 national semi-commercial services, Radio 1, 2 and 3, in English, Shona and Ndebele. Radio 4 transmits formal and informal educational programmes. Zimbabwe Television broadcasts on 2 channels (colour by PAL). In 1994 there were 297,000 television and 945,000 radio sets in use.

SOCIAL INSTITUTIONS

Justice. The general common law of Zimbabwe is the Roman Dutch law as it applied in the Colony of the Cape of Good Hope on 10 June 1891, as subsequently modified by statute. Provision is made by statute for the application of African customary law by all courts in appropriate cases.

The death penalty is authorized. The last execution took place in 1997.

The Supreme Court consists of the Chief Justice and at least 2 Supreme Court judges. It is the final court of appeal. It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it sits regularly in Bulawayo also.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of

the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in 3 other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction that is intermediate between that of the High Court and the Magistrates' courts. Magistrates' courts, established in 20 centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

Primary courts consist of village courts and community courts. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences. The death penalty is authorised.

Religion. Some of the population adhere to traditional animist religion. In 1989, 5.29m. persons were Christian: Anglicans, Roman Catholics, Methodists and Presbyterians.

Education. Education is compulsory. 'Manageable' school fees were introduced in 1991; primary education had hitherto been free to all. All instruction is given in English. There are also over 3,800 private primary schools and over 950 private secondary schools, all of which must be registered by the Ministry of Education. In 1996 there were 2,499,381 pupils at primary schools and 760,572 pupils at secondary schools. In 1992 69% of the population (aged 15 years and over) was classed as literate. In 1997 the literacy rate was 80.38%.

There are 10 teachers' training colleges, 8 of which are in association with the University of Zimbabwe. In addition, there are 4 special training centres for teacher trainees in the Zimbabwe Integrated National Teacher Education Course. In 1990 there were 17,873 students enrolled at teachers' training colleges, 1,003 students at agricultural colleges and 20,943 students at technical colleges. There are 4 universities and 10 technical colleges.

Health. In 1985 there were 162 hospitals, 1,062 static rural clinics and health centres and 32 mobile rural clinics operated by the Ministry of Health. All mission health institutions get 100% government grants-in-aid for recurrent expenditure.

Social Services. It is a statutory responsibility of the government in many areas to provide: Processing and administration of war pensions and old age pensions; protection of children; administration of remand, probation and correctional institutions; registration and supervision of welfare organisations.
